Disclaimer

This presentation has been prepared by Newfield Resources Limited (Newfield or the Company). This document contains background information about Newfield current at the date of this presentation. The presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation.

This presentation is for information purposes only. Neither this presentation nor the information in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction. This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdictions. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such a jurisdiction.

This presentation does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments.

To the fullest extent permitted by law, Newfield and its officers, employees, agents and advisers do not make any representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimates, forecasts or other representations contained in this presentation. No responsibility for any errors or omissions from this presentation arising out of negligence or otherwise is accepted.

This presentation includes forward looking statements. Newfield has concluded that it has a reasonable basis for providing the forward looking statements, including the production target and forecast financial information, included in this presentation. Forward looking statements are only predictions and are subject to risks, uncertainties and assumptions which are outside the control of Newfield. Actual values, results or events may be materially different to those expressed or implied in this presentation. Given these uncertainties, recipients are cautioned not to place reliance on forward looking statements. Any forward looking statements in this presentation speak only at the date of issue of this presentation. Subject to any continuing obligations under any applicable law and the ASX Listing Rules, Newfield does not undertake any obligation to update or revise any information or any of the forward looking statements in this presentation of any changes in events, conditions or circumstances on which any such forward looking statement is based.

Competent Persons' Statement

The information in this presentation has been reviewed and compiled by Karl Smithson, Executive Director of Newfield and Chief Executive Officer of Newfield's subsidiary company Sierra Diamonds Limited, a qualified geologist and Fellow of the Institute of Materials, Metals, Mining, with 30 years' experience in the diamond and natural resources sector. Mr Smithson has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Smithson consents to the inclusion in this presentation of this information in the form and context in which it appears.

Mineral Resource and Ore Reserve Estimates

Information included in this presentation that relates to the diamond Resource and Reserve estimate is extracted from Newfield's ASX announcement dated 26 November 2018 titled "7.4 million carats Resource for the Tongo Diamond Project", as amended by the ASX announcement dated 28 November 2018 titled "Revised Announcement and Retraction of Valuation References", ASX announcement dated 9 May 2019 titled "Tongo Ore Reserve Estimate and FEED Study Outcomes" and ASX announcement dated 27 January 2021 titled "Increase in Diamond Resource to 8.3 million carats". Newfield confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all the material assumptions and technical parameters underpinning the estimates in the original market announcements continue to apply and have not materially changed.

Information included in this presentation that relates to the Ore Reserve estimate for the Kundu and Lando dykes is based on and fairly represents information and supporting documentation prepared by Michael Lynn, who is a Fellow of the Geological Society of South Africa, and a registered scientist with the South African Council for Scientific Professions. Mr Lynn has provided his prior written consent to the form and context in which the Ore Reserve estimate for the Kundu and Lando dykes and the supporting information are presented in this presentation.

Overview

Newfield's flagship asset, the Tongo Diamond Mine, is located in the diamond rich area of eastern Sierra Leone.

Newfield Resources Limited ("Newfield" or "NWF") acquired Stellar Diamonds plc in 2018 and has since invested over US\$70m (A\$95m+) to move from exploration through development into production at the Tongo Diamond Mine The Mine is located in eastern Sierra Leone (West Africa), an area renowned for high quality diamonds The development covers two adjacent mining licenses spanning over 134km² and hosts 11 diamondiferous kimberlite dykes

Initial production is from the 1.1 million carat Ore Reserve⁽¹⁾ of the 8.3 million carat Resource⁽²⁾

Two separate mining control samples on the Kundu kimberlite indicate a 22% and 26% on original block model grades for these areas mined In May 2022 a first diamond sale from Tongo of 5,128 carats realised US\$1.34m at an average price of US\$262 per carat, which exceeds the modelled reserve diamond price of US\$222 per carat by 18%

Corporate Information

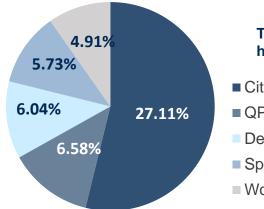

~~~

#### **Top 20 Shareholders of NWF** hold 79.23% of shares on issue.

- Citicorp Nominess
- QP & Co
- Deutsche Balaton
- Sparkle Capital
- Wonder Holdings

# Directors & Management

#### **Board and Management**

#### Mr Karl Smithson | Executive Director

- Over 30 years' experience in the resources sector in Africa
- Previously held senior management positions at De Beers, Southern Era Resources, Mano River Resources and Stellar Diamonds
- In-depth knowledge of exploration, evaluation and production of diamond and other mineral resources
- Karl holds a Bachelor of Science in Geology (Honours) from Kingston University, London, and a Masters of Business Administration from the University of Cape Town

#### Management

#### Mr Charl Barnard | General Manager, Tongo Mine

- 25 years project manager experience in Africa, Europe and Middle East
- Held senior roles in the past 15 years as part of the group executive committee for Petra Diamonds and served as in-Country and general manager on both large and open cast ad underground diamond mines in Sierra Leone, Tanzania and South Africa
- Also served roles as Group Head of Health, Safety and Environment

#### Board

#### Mr Chris Burton Non-Executive Director

- Chartered accountant with over 24 years' experience
- Former audit partner at BDO, servicing ASX-listed resources companies
- Current facilitator with the Institute of Company Directors in Australia (AICD)

#### Mr Alistair Croll Non-Executive Director

- A mining engineer with 35 years of mining / management experience in Africa and Australia
- 20 years' with De Beers and Anglo American
- Formerly CEO of Kimberley Diamond Company. Various COO positions with ASX listed companies over 17 years

#### Mr Jack Spencer-Cotton Non-Executive Director

 Over 27 years' experience with previous senior engineering roles at ERG Group Ltd, Sanmina-SCI, SRX Global and Pfizer

#### owen Com

Management

#### Rowan Carr Mineral Resource Manager

- Over 30 years' experience in diamond exploration, evaluation and mining projects in Africa
- Previously held management roles in De Beers Group and Stellar Diamonds

#### Julius Baiden Group Finance Manager

- Finance executive with over 10 years' experience in the resource sector
- Management of the Group's subsidiaries' finances in West Africa

# Project Development

Since 2019 Newfield has established a robust 8.3 million carat resource, completed engineering focused FEED studies, developed the underground mine and entered production.

#### **Progress**

#### Mining Ramp Up to Commercial Production and Mine Expansion

continue increased production ramp up from Kundu and Lando to commercial production levels. Undertake studies to bring Tongo Dyke-1 into the mine plan with commercial decision point.

#### **First Production and Sales**

first underground production achieved in Feb-22 with successful diamond sale completed in May-22

#### **Underground Development and First Diamonds**

initial surface and underground development, first diamonds yielded on track with original timeline

#### Increased Diamond Resource<sup>(2)</sup>

increased to 8.3 million carats (+84% from 4.5 million in 2016) and reserve of 1.1 million carats

#### **FEED Study Completed**

by independent consultants PPM and SRK Consulting<sup>(1)</sup> and Resource increased to 7.4 million carats<sup>(2)</sup>

# Substantial Diamond Resource

See Appendix for detailed Resource and Reserve tables

 $\Leftrightarrow$ 

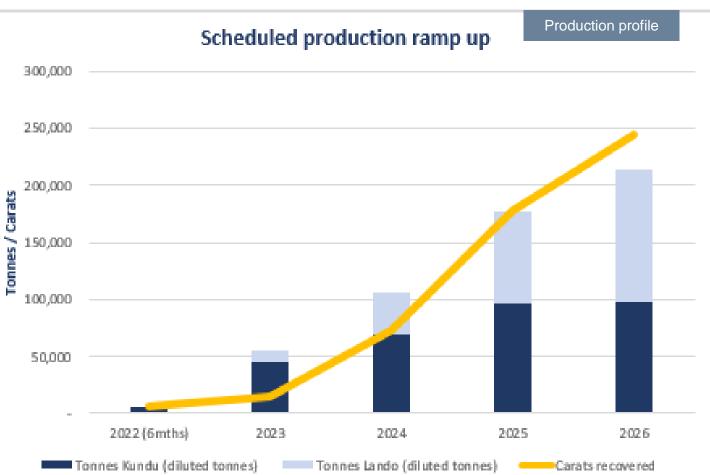

#### See Newfield ASX release dated 9 May 2019 'Tongo Ore Reserve Estimate and FEED Study Outcomes'

Panguma dyke will be then be assessed for economic viability and potential further mine expansion opportunities

#### **Production Ramp Up**

Short term production schedule involves a steady ramp up of tonnes and carats from Kundu and Lando Ore Reserves to 250,000 carats per annum

- Commercial production is triggered in H1-25
- Tongo Dyke-1 studies ongoing as part of planned mine expansion strategy
  - 150.000Tonnes 100,00050.000 2022 (6mths) 2023 20242025Tonnes Kundu (diluted tonnes) Tonnes Lando (diluted tonnes)

## Tongo's Quality Gems

#### THE 4 C's OF DIAMOND VALUE

CUT

Excellent crystal shapes with high yield

#### CLARITY

Large proportion of clear and transparent gems

#### COLOUR

Mostly white gems with a large percentage of collection goods (D to G colour for top quality jewellery) based on bulk sample diamond parcels and sales

#### CARAT

High gem quality ratio compared to other diamond mines

**50%** "Collection Goods" Run of Mine D,E,F Colours

"Tongo has 63% gem content compared to 20% for average worldwide diamond mine.

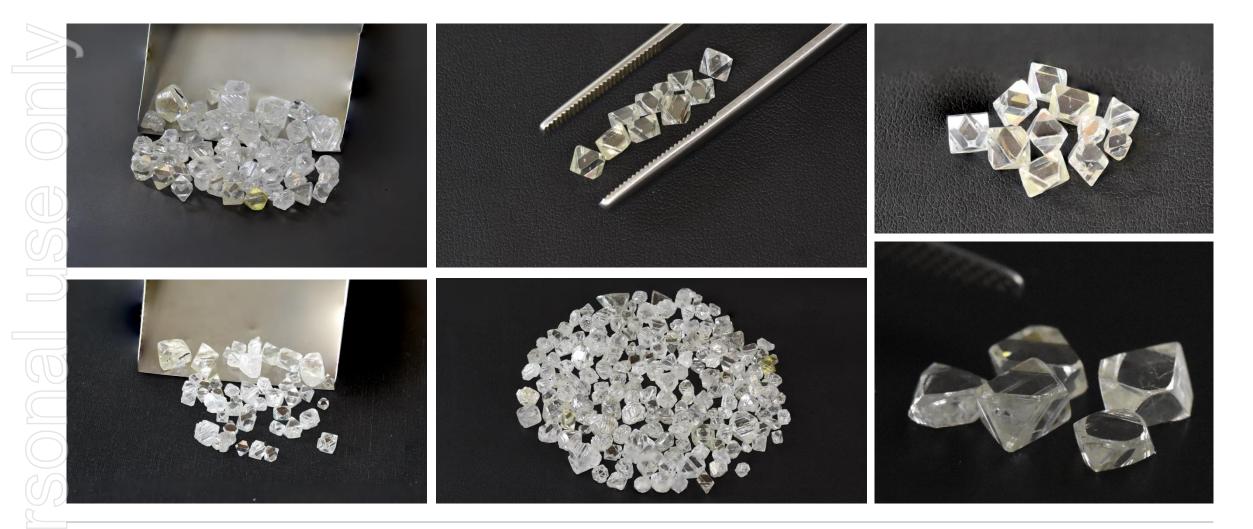

The top colour "collection goods" is 50% of run of mine production which is unusually high for any diamond mine. Fancy yellows and even a pink diamond has been observed."

> Ray Ferraris, Diamond Specialist, 'Breakage Report on Five Tongo Diamond Samples for Newfield Resources', July 2019

# High Proportion of Gem Quality Goods and 50% "Collection Goods" (D, E, F Colours)

 $\Leftrightarrow$ 

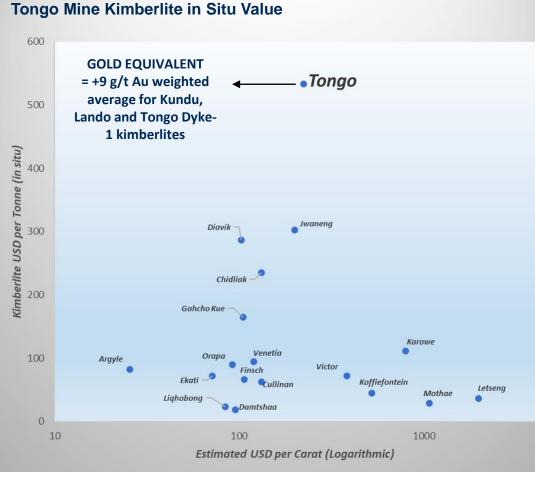

# Superior in-situ Rock Value

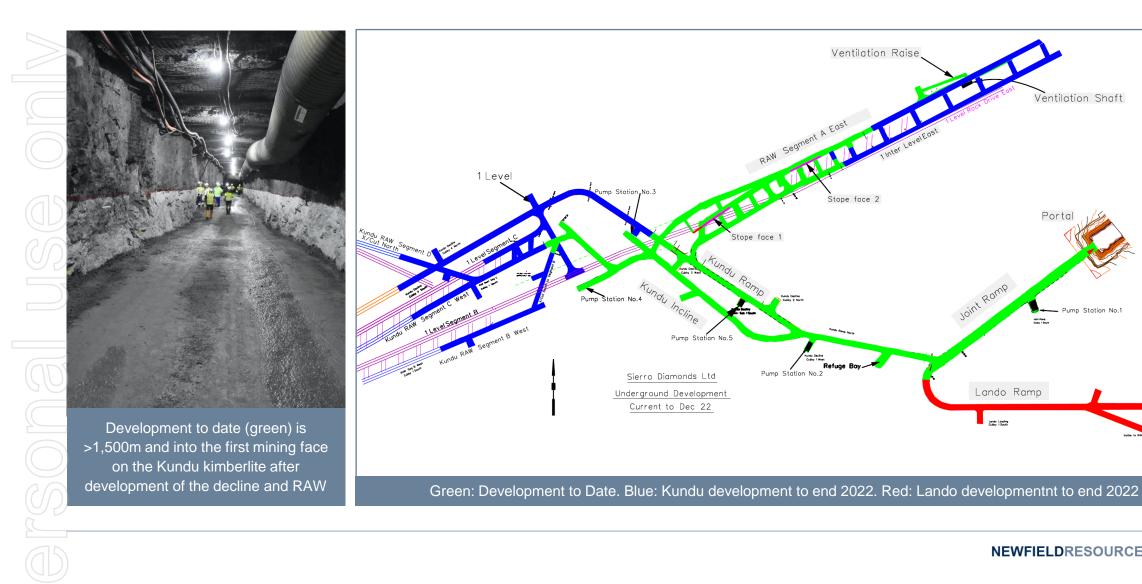

Diamonds in Kimberlite

#### Underground Development Status

holes to RAW Cubby 1 North

Ventilation Shaft

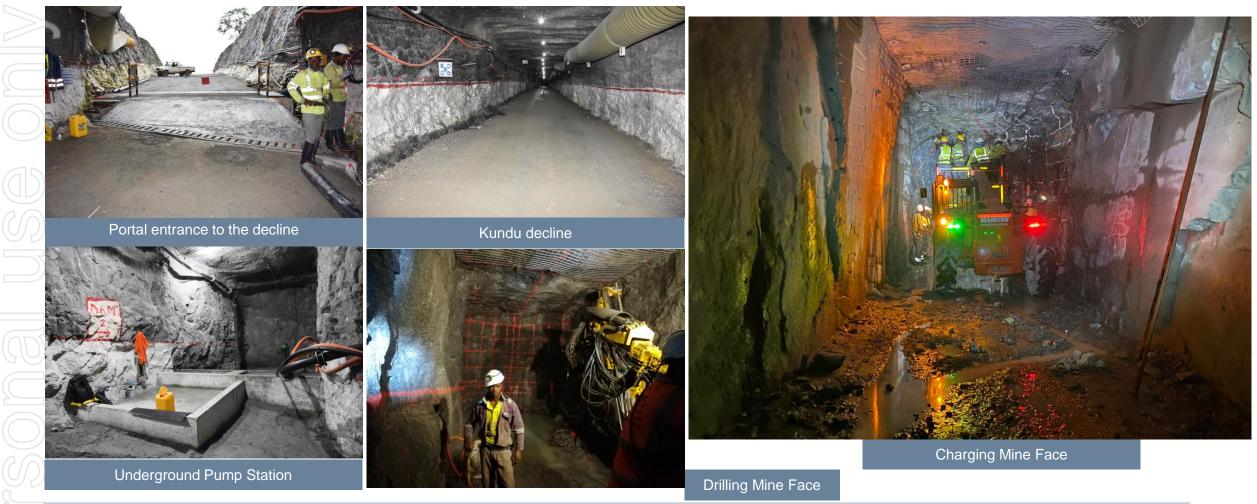

Porta

Station No.1

# Mining Activities

Mine development to date is fully supported for safety, and equipped with power, ventilation and pump stations.

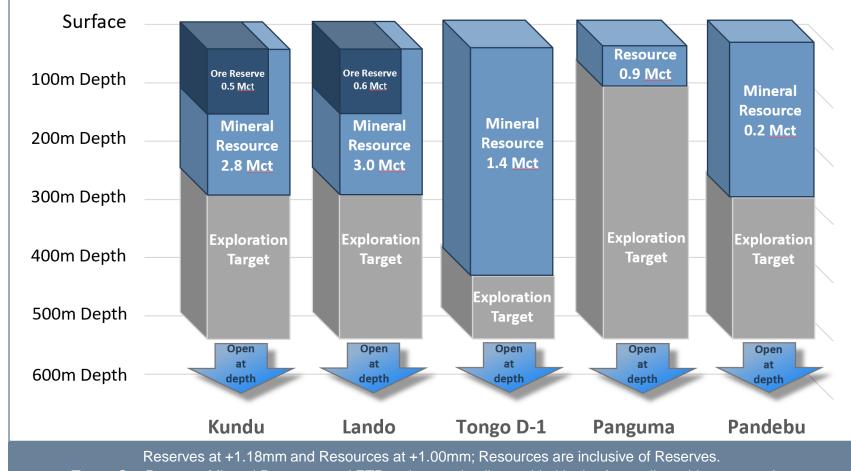

# Resource & Mining Upside

All five kimberlites in resource are open at depth.

~~~

There is opportunity through deeper drilling to significantly increase the carats in reserve and resource and as a result extend the current life of mine.

Similar mines in South Africa have achieved depths of mining in excess of 600m.

Tongo Ore Reserve, Mineral Resource and ETR estimates details provided in the Appendix to this presentation

Short Term Strategy

Production focus

Open more mine faces on Kundu to ramp up carat production and continue decline development on Kundu and Lando Plant upgrade to 50tph plant

Construct and commission the 50tph plant and final recovery to meet growing production profile

Diamond Sales

Further planned diamond sales during 2022 and into 2023

Mine Expansion Study

FEED study, drilling and technical work to bring Tongo Dyke-1 into the mine plan

Medium Term Strategy

CURRENT MINING PHASE

Achieve commercial production of Kundu and Lando by end 2024

Engineering design and mine scheduling of Tongo Dyke-1 kimberlite

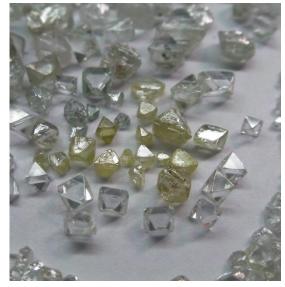

Deeper drilling to increase diamond resource and reserves Engineering design and mine scheduling of Panguma kimberlite

MINE EXPANSION PHASE

Increase production of Kundu and Lando to over 250,000 carats p.a.

Development of Tongo Dyke-1 to increase production by target 100,000 carats p.a.

Resource drilling of other six kimberlites to further increase diamond resource and reserves

Investment Proposition

A substantial diamond Resource...

- 8.3 million carats (incl. 1.1 million carats Reserve) from 5 of 11 kimberlites
- Grade weighted average of 2.4 carats per tonne (+1.18mm)
- First sales diamond value of US\$262 per carat (+1.18mm) achieved in May 2022
- In-situ value of kimberlite one of the highest world wide (equivalent to 9g/t Au weighted average)

... at the Production Stage...

- >1,500m underground decline and associated development completed
- First production commenced in February 2022
- Production ramp up in progress through developing multiple mining faces
- Commercial production targeted for Dec-24

... with an experienced Board and Operations Management team...

- Board and management with significant production experience
- Operational team bring a wealth of country, technical and financial experience
- Mining and engineering team on the mine have worked on numerous underground diamond mines
- Strong blend of Sierra Leone nationals in senior and middle management

... the future mine production is supported by a strong diamond market

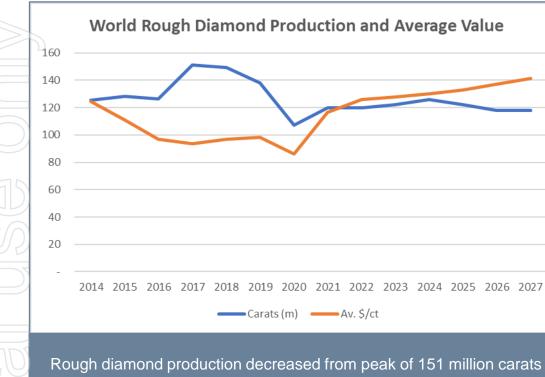

- Significant resource and reserve upside from existing and new kimberlites
- Global rough diamond supply is decreasing; rough and polished diamond demand is increasing
- This will underpin strength of rough diamond prices
- Rough diamond prices have rebounded very strongly in 2021 and 2022

SOD 2

Appendices

Robust Market Fundamentals Underpinned by Decreasing Global Diamond Production

Rough diamond production decreased from peak of 151 million carats in 2017 to 120 million carats in 2020. Rough supply to 2027 is forecast to flatline or decrease as mines age and go deeper. Only one new discovery of significance in past 20 years due to limited exploration. Average rough diamond value is US\$117 per carat vs. Tongo's recent sale of US\$262 per carat.

Rough diamond production by value has rebounded strongly from lows of US\$9.2bn in 2020 to US\$14bn in 2021. Rough value is forecast to increase to over US\$16bn as production volumes decrease and rough diamond demand increases.

	Seleima	Surface to -255masl	various	200,000	500,000	No grade	No grade
	Total Range			3,540,000	6,000,000		

The Exploration Target Ranges (ETRs) are conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource in these areas and it is uncertain if further exploration will result in the estimation of a Mineral Resource. For full Exploration Target Ranges details please see Newfield ASX release dated 26 November 2018, '7.4 million carats Resource for the Tongo Diamond Project' and ASX release dated 27 January 2021, 'Increase in Diamond Resource to 8.3 million carats'

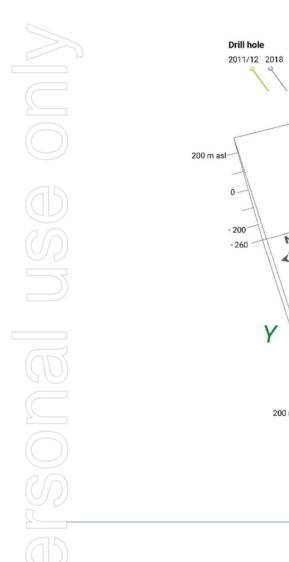

Lando & Kpandebu Resource & Drilling

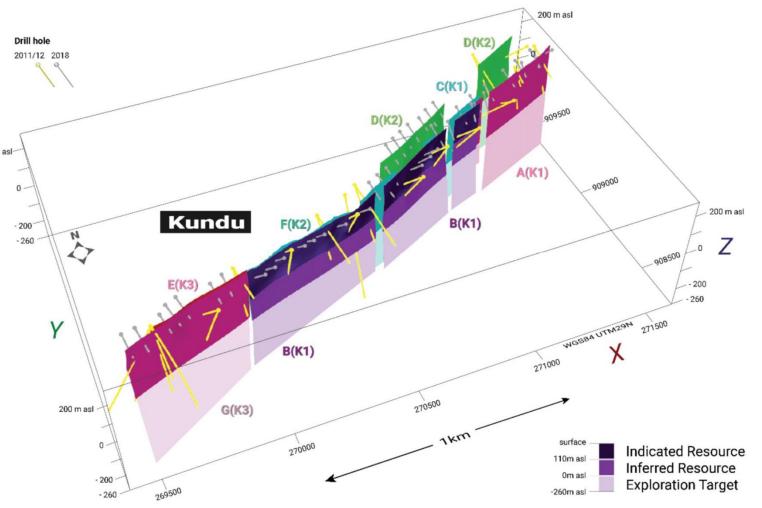

Kundu Resource & Drilling

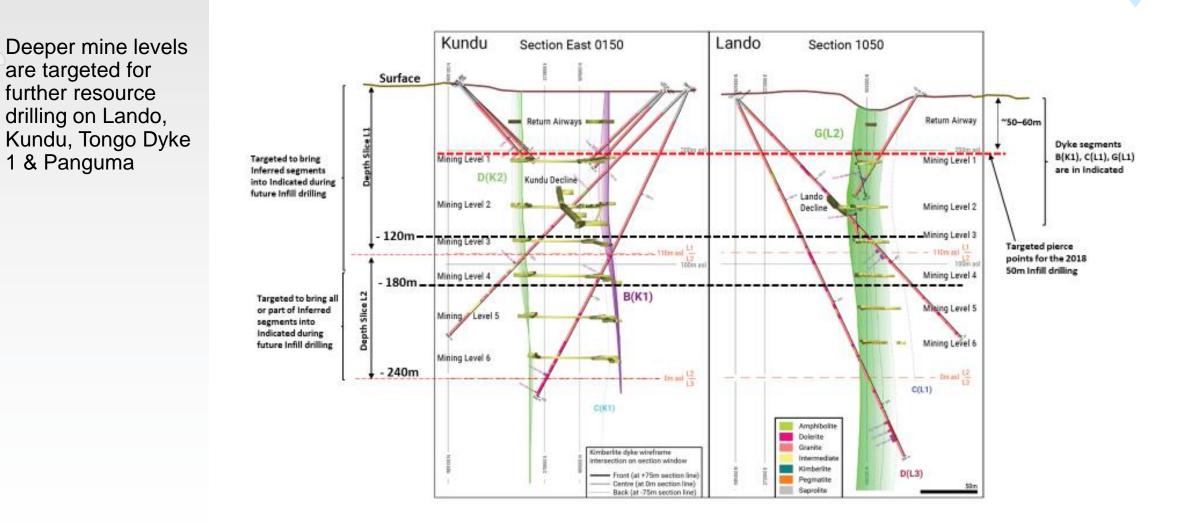

Mining Levels Targeted for Deep Drilling

1 & Panguma

Sierra Leone
