20. COMMENTARY ON RESULTS FOR THE PERIOD

HiTech's core business is the recruitment of ICT professionals and the supply of contracting services. This sector of the market has been strong in the past year.

For the financial year ended 30 June 2022, the consolidated entity's results are:

- **Operating revenue is \$63,096,126, an increase of 49.7% over the previous corresponding period (pcp) (FY21: \$42,168,504).**
- **Gross Profit is \$9,304,117, an increase of 31.8% over pcp (FY21: \$7,059,491).**
- **NPAT is \$4,403,625, an increase of 21.1% over pcp (FY21: \$3,636,602).**
- **EBITDA is \$6,757,822, an increase of 29.6% over pcp (FY21: \$5,214,886).**

HiTech remains fully prepared to take advantage of any improvement in the ICT recruitment and services sector. We are working towards winning new business, increasing profit and ensuring that operating costs are kept to a minimum.

For personal use only

We are also actively seeking EPS accretive acquisitions.

EPS

Basic and diluted earnings per share for the current financial year was 10.73 cents per share as compared with 9.32 cents per share in the previous corresponding period.

Dividends

The directors have declared a fully franked dividend of 6 cents per share to be paid on 16 September 2026 to shareholders registered on close of business on 2 September 2022.

Significant features of operating performance

HiTech currently supplies permanent and contract staff from its large, personalised database of over 391,000 specialised ICT professionals which has been developed over the years through various strategies of recruitment.

The HiTech client base is well established, with strong representation by Federal Government departments and agencies, recognised private enterprise and state government departments.

ICT contracting, comprising the provision of ICT professionals for temporary/contingent and other non-permanent staffing needs of clients for specific projects is the primary source of HiTech's recurring steady cash flow. ICT contracting is viewed as a relatively higher volume business with recurring contractual arrangement for the supply of the service. We continue to grow this part of the revenue stream alongside permanent recruitment.

Factors which are likely to affect results in the future

While there is still an increasing short supply of quality candidates and increasing demand for talent, any potential drop in ICT resources demand will result in lower margins, less contracts and downward pressure on permanent placement numbers.

We have retained our preferred supplier status with our valued clients and are working towards further developing these relationships. We are constantly evolving and improving our systems and productivity to provide a better service to our clients and candidates.

We expect to secure further contracts in the near future and develop our business in both the government and private sector.
