## Group CEO of carsales, Cameron McIntyre, commented:

"Our team have worked hard to deliver an excellent operational and financial performance while continuing to deliver our strategy and invest in future growth opportunities including progressing the acquisition of the remaining $51 \%$ of Trader Interactive in the US. The acquisition is a natural evolution of our international growth strategy into large, attractive markets and brings further growth opportunities as well as increasing the diversification of our business across geography and customer segment. We have an excellent track record of delivering strong shareholder value through investment in international markets and moving to $100 \%$ ownership of Trader Interactive will enable carsales shareholders to capture the significant upside potential of that business.

We are continuing to drive more of the vehicle buying and selling process online across all our markets. We launched our end-to-end online digital buying experiences in Australia and the US, with great progress made in both markets. We have significantly increased the adoption of our online instant trade in products in Australia and Korea, which are now material contributors to our growth.

We continue to see robust levels of demand in all our key markets, reflecting the strength of our market position and the resilience of marketplace businesses through economic cycles. This gives us confidence we can continue to deliver great results for our shareholders in FY23."
