- **Camplify finishes the year with strong cash position and zero debt**

Camplify Holdings Limited ('Camplify') is pleased to announce strong marketplace performance in FY22, delivering on its strategic objectives, and continuing to scale.

During FY22 period, which was impacted by domestic and global travel restrictions, Camplify still experienced over 63.13% growth in GTV pcg (FY21). Total GTV recorded was \$53.6m. This result continues the impressive continued growth achieved by Camplify since debut on the ASX in June FY21. It represents a CAGR of 111% GTV growth since FY20.

Global net revenue figures also grew during this period. For FY22 net revenue grew by 93.36% compared with FY21. Total net revenue recorded was \$16.36m. As a business focused on growing revenue to achieve scale in the business, this provides a robust platform for continued success in FY23.

A core focus for Camplify is take rate. In the year Camplify achieved an overall take rate of 26.8% excluding van sales, and achieving 30.5% including van sales. An increase of 5% from FY21 where take rate was recorded at 25.73% inc van sales. Camplify continues to expand its product suite to customers, improving conversion rates and delivering a growing take rate.

One of the key areas that Camplify wanted to ensure improvement on for FY22 was retained hirers. In FY21 Camplify recorded 20% of customers rebooking holidays. In FY22

Camplify has grown this to 25%, while increasing their customer database by over 88,000 customers.

Business drivers for Camplify remain strong with key metrics such as global average booking values, RV daily rates, and global booking requests continuing to rise.

Growth for the period was led by the Northern Hemisphere operations (UK & Spain) with strong growth in all key metrics. Notably GTV grew in the UK by 136% and Spain saw growth of 1632% pcp (FY21). Europe and the UK show strong demand for the outdoor travel lifestyle from Camplify.

Founder and CEO Justin Hales said "Camplify is a business with significant growth potential, and substantial scalability opportunities. Camplify has delivered on its strategic outcomes in FY22 by clearly building on customer demand to record four quarters of continued growth. As growth continues in FY23 based on customer demand, Camplify will position the business to ensure scalability, and automation will deliver improved bottom line results, on our road towards profitability."

Camplify finishes FY22 with a continued strong cash position driven by customer receipts and zero debt.

The Travel Sector and Outlook

As the travel sector continues to face logistical challenges, Camplify provides simple worry free travel for those wishing to be a part of the outdoor lifestyle. Participation in the caravanning and camping sector continues in strong numbers throughout our key market of Australia, New Zealand, Spain and the UK. Camplify is confident in the overall support for the RV sharing segment, with continued demand from customers.

One of the strongest indications of demand from customers is future booking values. In FY21 Camplify closed out the year with \$6.95m in future bookings. In FY22 Camplify closed out the year with over \$14.7m in future bookings. This over doubling of future bookings clearly demonstrates from customers their intention to travel in FY23.

With still less than 1% of RVs listed on the platform that are registered in our markets, and the investment in scalable technology we have made, Camplify is very well positioned to continue our strategy of scaling and growing to deliver exceptional longer term results.

Camplify has demonstrated the ability to leverage both inorganic and organic growth opportunities to become a significant global market leader in the RV rental marketplace business

Full results can be found in the company FY22 presentation.
