Yojee Strengthens its Board with Further Global Logistics Expertise

Yojee Limited (**Yojee** or the **Company**) (ASX: **YOJ**), is a cloud-based software as a service (**SaaS**) logistics platform that facilitates the flow of freight movements into a single ecosystem, making the complex process of managing land transport simple and reducing carbon emissions for a greener planet.

The Company is pleased to announce the appointment of Ms Saskia Groen-Int-Woud to its Board. Saskia brings to Yojee a highly relevant background from senior executive roles including with world number two logistics shipping operator, Maersk. At Maersk she held various roles in the Netherlands and Asia, culminating as the global CEO of Damco, one of the world's largest freight forwarders, including its successful migration into the consolidated Maersk Integrated Logistics strategy.

Currently, she is the Managing Director of CRH Infrastructure Products Australia, part of a leading global building materials group CRH plc. Saskia has previously held numerous international roles with world leading building materials Holcim Group where she managed complex logistics operations amongst other operational and Supply Chain responsibilities. Additionally, Saskia currently holds a Directorship with one of Europe's leading private equity firm's investment in ToiToi Dixi, a German-based global company that has experienced significant growth in the past three years.

Saskia is a graduate of Central Queensland University and has completed a number of postgraduate qualifications and executive leadership certifications including at USQ, IMD, Harvard and Stanford. Saskia also won Telstra's Asia Business Woman of the Year in 2017.

Saskia has experience on the customer side of Yojee's operations and is also someone who shares the vision for transparency, innovation and using data and relationships to build powerful customer outcomes.

Ms Saskia Groen-Int-Woud said "I have always seen huge potential and value in Yojee's vision, people and purpose, from improving operations to increasing efficiency and sustainability of global supply chains. I am looking forward to working closely with the board and team to support the Company's growth objectives."

Yojee Chairman David Morton said, "Saskia brings a strong and highly qualified skillset working in senior leadership roles in shipping logistics and complex multinational businesses. We look forward to having Saskia on our Board as the Company focuses on achieving continued revenue growth."

This announcement is authorised by the Board of Yojee Limited.

About Yojee Limited (ASX: YOJ). Yojee is a cloud-based software as a service (SaaS) logistics platform that facilitates the flow of freight movements into a single ecosystem, making the complex process of managing land transport simple and accessible to all players whilst reducing carbon emissions for a greener planet. Rarely is a single carrier servicing an entire goods journey from sender to end customer, or exclusively using one type of transportation method. Yojee provides connectivity and more efficient planning along the entire journey.

Yojee's customers are predominantly third-party logistics providers (3PL) and logistics subcontractors (2PL) who benefit from:

1. **Managing, Tracking and Auditing goods movements.** All job and location data is made easily accessible and can be shared with up and down-stream providers end to end. Customers experience improved delivery windows.
2. **Route and schedule optimisation.** Tracking data allows 2PL and 3PL operators to generate cost savings through Yojee's powerful optimisation capability across vehicle selection, utilisation and routing.

Yojee's solution is flexible and integrates seamlessly through API's into existing logistics provider systems to access and share key data across part or all of the goods journey. The more segments that use Yojee, the more powerful it becomes. Yojee's business is focused on Asia and is expanding rapidly. Yojee's platform has evolved through recent technological developments in cloud-based computing and information processing capability. Future steps now under development will see Yojee further advance logistics, its connectivity and route optimisation through distributed ledger blockchain technology. This will see smart information access and activation, providing logistics companies and agencies information such as location, size and weight data, and customs requirements that are timely, contextually accessible and highly secure.

Yojee services the logistics market at both the SME and enterprise levels with a focus on APAC and to date has signed multi-year enterprise-level agreements with four global top 10 freight forwarders operating in the region. Yojee has strong corporate citizenship working with industry to reduce carbon emissions, by removing paper and logistics congestion through digitisation and vastly improving efficiency, speaking to our social license to operate.
