2.6 Brief explanation of any of the figures in 2.1 to 2.4 above necessary to enable figures to be understood

IODM has measured where the business stood at the end of the financial year versus the previous year and notes the following:

-operational revenue was down slightly, due to the continued effects of COVID 19 and the associated lockdowns on the east coast of Australia for at least the first half of the year. This coupled with the fact that the onboarded Universities in the UK went live in between billing cycles, which saw the universities focus on collection of arrears as opposed to new invoicing which will begin in September and carry through October & November depending on each University's billing timetable.

-notwithstanding the slight drop in operational revenue, the other metrics which the business uses, being invoice numbers and value of invoices both saw increases, with the value of invoices uploaded being \$1.95 billion versus \$1.7 billion from the year before resulting in an increase of 15%.

Notes to the Consolidated Financial Statements for the year ended 30 June 2022

1. Corporate Information

The preliminary report consists of the consolidated financial statements of IODM Limited and its subsidiaries for the year ended 30 June 2022. IODM Limited is a for-profit entity.

IODM Limited is a company limited by shares incorporated in Australia whose shares are publicly traded on the Australian Securities Exchange.

2. Basis of Preparation

The preliminary report is to be read in conjunction with the 2021 Annual Financial Report, the December 2021 half year report and any public announcements made by IODM Limited and its controlled entities during the year in accordance with the continuous disclosure requirements of the Corporations Act 2001 and ASX Lisitng Rules.

The preliminary report has been prepared in accordance with Australian Accounting Standards (AASBs) adopted by the Australian Accounting Standards Board and the Corporations Act 2001.

The preliminary report has been prepared on the basis of historical cost. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in Australian dollars, unless otherwise noted.

The accounting policies and methods of computation adopted in the preparation of the preliminary report are consistent with those adopted of the previous financial year.

3. Going Concern

This report has been prepared on the going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and settlement of liabilities in the normal course of business.

The Group incurred a net loss after tax for the year ended 30 June 2022 of \$2,397,880 (2021 \$2,204,414) and incurred net cash outflows from operating activities of \$1,786,233 (2021 \$1,640,819). At 30 June 2022, the Group had a net asset position of \$799,047 (2021 net asset position of \$437,891).

The ability to continue as a going concern is dependent upon a number of factors, that being achieving forecast sales or raising additional funds. The Directors believe that the Group will be able to continue as a going concern for the following reasons:

- On 31 January 2022 the Group completed a share placement for 7,091,666 shares to raise and receive \$2,127,500 at 30 cents per share to assist the Group in its capital management and fund expansion of sales and marketing globally.
- As per announcements made to ASX, the company is in the process of onboarding several UK universities, with the first revenue expected to flow from those universities via Western Union in the second half of the year.
- As is prudent for a Group of this size and in the Group's current capital position, given that the company has been transforming from a software development company to a sales and marketing business, the Directors will continue to manage capital in the best interests of shareholders.

Notes to the Consolidated Financial Statements for the year ended 30 June 2022

- In the event that the forecast growth in revenue is slower than anticipated, the Directors are confident they have the ability to raise additional funds through share issues and placements to sophisticated investors but do not believe that this will be necessary
- Based on the above the Group have prepared cash flow forecasts which demonstrate that the Group will generate sufficient cash flows to fund its activities for a period of not less than twelve months from the date of this report.

4. Critical accounting estimates and judgements

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Share-based payment transactions

The Group recognises the cost of equity-settled transactions with employees by reference to the fair value of the equity instrument at the date at which they are granted. The fair value is determined using the assumptions of an independent expert which are detailed in Note 30. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next reporting period but may impact expenses and equity.

Employee benefits provision

The liability for employee benefits expected to be settled more than 12 months from the reporting date are recognised and measured at the present value of the estimated future cash flows to be made in respect of all employees at the reporting date. In determining the present value of the liability, estimates of attrition rates and pay increases through promotion and inflation have been taken into account.

5. Segment Information

For management purposes, the Group is organised into one main operating segment, which is the operation as a cloud based software as a service provider. All of the Group's activities are interrelated, and financial information is reported to the Board (Chief Operating Decision Makers) as a single segment.

Accordingly, all significant operating decisions are based upon analysis of the Group as one segment. The financial results from this segment are equivalent to the Financial Statements of the Group as a whole. Total revenue earned by the Group is generated in Australia, New Zealand and the United Kingdom and all of the Group's non-current assets reside in Australia.
