Chief Executive Officer & Managing Director's Letter

13 September 2022

Dear Shareholder,

On behalf of the Board of Wellnex Life Limited, (ASX: WNX) (**Wellnex** or **Company**), we are pleased to offer you the opportunity to purchase up to \$30,000 in additional shares in WNX under this share purchase plan (**SPP**).

The SPP is an offer to shareholders who were registered holders of fully paid ordinary shares in the Company (**Shares**) at 7.00pm (Melbourne time) on Monday, 12 September 2022 (**Record Date**) and shown on the Register to have an address in Australia or New Zealand (**Eligible Shareholders**). All Eligible Shareholders have the opportunity to participate in the SPP.

The Company is seeking to raise \$2 million under the SPP, however the Company reserves the right to raise more or less than this amount in its absolute discretion. The Board also reserves the right to close the Offer early or extend the Offer at its absolute discretion.

The SPP gives Eligible Shareholders the opportunity to purchase additional fully paid ordinary shares in Wellnex at \$0.075 per Share, which represents a discount of 21.88% to the closing price of Shares on 12 September 2022¹; and a discount of 19.70% to the VWAP of Shares calculated over the last five days on which sales in Shares were recorded, before the SPP announcement date of 13 September 2022². There are no transaction costs or brokerage costs to participating Eligible Shareholders.

The funds raised under the SPP will be used to:

- drive the progress of the JV with OneLife Botanicals Pty Ltd with the goal to become one of the first companies to offer an over-the-counter S3 medical cannabis product in the Australian market;
- finance the inventory required for the growth expected from launching several new products including Mark Wahlberg's Performance Inspired and Over the Counter (OTC) products under Pharmacy Own;
- continue to progress further growth avenues including the launch of a proprietary e-commerce platform to widen the Company's distribution footprint. and
- cover the costs of the SPP.

Enclosed with this letter is an SPP Booklet which aims to address any questions you may have about the SPP, including:

- an investment overview, which includes details on pricing, the timetable, intended use of funds and key risks of an investment in the Company;
- SPP Terms and Conditions; and

¹ The closing price of Wellnex Shares traded on ASX on 12 September 2022 was \$0.096.

² The VWAP of Wellnex Shares, calculated over the last five days on which sales in Wellnex Shares were recorded before 13 September 2022, was \$0.0934.

For personal use only

- details on how to apply, and an Application Form.

I encourage you to read the SPP Booklet carefully and in full, and to seek your own financial and taxation advice in relation to the SPP Offer, before making a decision on whether to participate. In addition, Eligible Shareholders should also carefully consider some of the key risks of an investment in Wellnex as set out in the SPP Booklet.

The SPP will close on Wednesday, 5 October 2022 at 5.00pm (Melbourne time). Acceptances and payment must be received by our Registrar, Computershare Investor Services Pty Limited, by the closing date. Wellnex reserves its right to close the SPP early.

Our journey and the opportunity ahead

This capital raise sits at a vital inflection point on our growth journey within the large and fast growing health and wellness market - a journey which started with our strategic pivot and resumption of trading of our Shares on the ASX last year.

Over the past year we have achieved some significant milestones. We finished our first full financial year FY22 with \$18.61 million in revenues³. During the period, we announced the launch of the Pharmacy Own brand, expanded listings of existing products and added vital partnerships including the JV with Chemist Warehouse on Wagner Liquigestic, the licensing agreement with Performance Inspired and an initial supply agreement with GlaxoSmithKline. We started FY23 with revenues in the first two months at 46% above the same period in FY22, putting us on track towards our FY23 goals of \$29 million revenue and positive EBITDA.

We have achieved these successes by focusing on our core competencies which lie in the identification of consumer trends, the development of products and brands capturing these trends as well as our ability to bring these products onto shelves fast and at scale by leveraging our vast manufacturing and distribution networks, as well as our process know-how for key regulators including Australia's Therapeutic Goods Administration (TGA). We are executing under an asset-light business model that allows us to be nimble and grow fast.

Notwithstanding these achievements, I believe that we are still at the start of our journey with the biggest opportunities yet to come. The most exciting opportunity at hand is to become one of the first companies bringing an over-the-counter medicinal cannabis product to market under Australia's new over the counter Schedule 3 (S3) classification. The SAS market, currently worth \$423m p.a. in Australia, has been limited by its prescription requirement which is soon to be lifted under the S3 scheme. This should lower the hurdle for people to get the product they need from their pharmacist without a prescription, thereby delivering a potential boost to this fast-growing market.

Our core competencies around required regulatory approvals and distribution networks, in combination with the production capabilities secured through our joint venture with OneLife Botanicals Pty Ltd, provide us with all the ingredients required to be one of the first few to dominate this soon-to-emerge and fast-growing market - a market which is expected to feature regulatory hurdles for any competitors and high shelving priority for Australian pharmacies. Among several other growth initiatives, this capital raise will allow us to continue working on this significant opportunity while organically growing the rest of the business.

- (c) You acknowledge the risk that the market price of Shares may change (i.e., rise or fall) between the date you submit your Application and the Issue Date, which may mean that the Issue Price you pay for the SPP Shares may exceed or be less than the market price of Shares on the Issue Date.

Appendix A – Risk Factors

1. Company and Industry risks

The risks outlined below are specific to the Company's operations.

1.1 Risk as a relatively new entrant in the health and wellness market

Wellnex is a relatively new entrant in the health and wellness industry and, as an early stage growth company, Wellnex currently faces challenges in product development, profile / brand building and market penetration for its products and services (in both local and overseas markets).

These risks will in part turn upon the Company's ability to:

- (a) continue to build on customer acceptance on current and proposed new products in the health and wellness segment;
- (b) maintain and source high quality manufacturers to produce the current and proposed products;
- (c) maintain and expand distribution channels (such as Chemist Warehouse) and continue to develop within Australian domestic and export markets; and
- (d) have the required capital to maintain and expand operations including investing in marketing.

1.2 Sufficiency of funding

Wellnex has limited financial resources and will need to raise additional funds from time to time to finance the complete development and commercialisation of new and current product lines and its other longer-term objectives. It is likely that Wellnex in the future may require additional capital (debt or equity) for working capital and, if that occurs by way of an equity issue, there is no guarantee of the issue price at which such additional equity capital is raised and there is potential dilution for existing shareholders.

The Company's ability to raise additional funds and the price at which any funds are raised, will be subject to, among other things, factors beyond the control of Wellnex and its Directors, including cyclical factors affecting the economy and share markets generally. The Directors can give no assurance that future funds can be raised by Wellnex on favourable terms, if at all.

1.3 Financial Performance

Although Wellnex is growing its presence in the market, with the result that its revenue is improving, no assurance can be given that Wellnex will achieve profitability.

1.4 Business strategy execution risk

The Company's future growth and financial performance is dependent on the Company's ability to successfully execute its business strategy. This will be impacted by a number of factors, including the Company's ability to:

- (a) continue to build on customer acceptance on current and proposed new products in the health and wellness segment.
- (b) maintain and source high quality manufacturers to produce the current and proposed products.

For personal use only

- (c) maintain and expand distribution channels (such as Chemist Warehouse) and continue to develop within Australian domestic and export markets; and
- (d) have the required capital to maintain and expand operations including investing in marketing.

There can be no assurance that Wellnex can successfully achieve any or all of the above initiatives / strategies. The failure by Wellnex to successfully execute its business strategy could have a material adverse effect on the Company's business, financial condition and results of operations.

1.5 Manufacturing/production risks

Wellnex is reliant on third parties to manufacture its current products. The Company will have various contractual rights in the event of non-compliance by contracting party.

However, no assurance can be given that all contracts will be fully performed by all contracting parties or in the case of a breach that the Company will be successful in securing compliance with the terms of each contract by the relevant counterparties to its contracts. There is also no assurance as to the financial strength of the parties to complete their obligations under the various contracts when such financial obligations fall due.

1.6 Counterparty risk

As a party to many contracts and agreements, the Company will have various contractual rights in the event of non-compliance by a contracting party. However, no assurance can be given that all contracts will be fully performed by all contracting parties or in the case of a breach that the Company will be successful in securing compliance with the terms of each contract by the relevant counterparties to its contracts. There is also no assurance as to the financial strength of the parties to complete their obligations under the various contracts when such financial obligations fall due.

1.7 Logistics risk

Wellnex is reliant on out-sourced logistics. Accordingly, if an adverse event occurs such as a strike, poor logistics technology, increases in the price of energy, changes in transport services and the physical destruction of infrastructure (e.g. roads and railways), Wellnex (or its third party providers) may not be able to efficiently supply and deliver the Company's products. This may have an adverse impact on the Company's financial performance.

1.8 Competition risk

The health and wellness business is highly competitive. Some of these competitors may be able to respond more effectively to changing business and economic conditions. Competition in nutritional health and food products is largely based on branding presence, pricing of products, quality of products, perceived value of products, in-store presence and visibility and, promotional activities (including online advertising).

1.9 Customer credit risk

A general decline in economic conditions or business downturn may negatively impact an existing purchasing customer's ability to purchase the Company's products or services. Such financial difficulties could result in Wellnex reducing or ceasing its business with that retailer customer. Alternatively, Wellnex may extend further credit to its retailer customers. The Company's inability to collect such receivables (i.e. bad debts) from one or a group of retailer customers could have a material adverse effect on the Company's financial performance. If a retailer customer were to go

into liquidation, Wellnex could incur additional costs if Wellnex decides to buy back the retailer customer's inventory of the Company's products to protect its brand.

1.10 Currency risk

Revenue and expenditures in overseas jurisdictions are subject to the risk of fluctuations in foreign exchange markets. Where a material proportion of the Company's revenue is in the future generated in foreign currencies, the Company will be exposed to the risk of changes in exchange rates of such foreign currency against the Australian dollar. Wellnex has no plans at this stage to hedge its foreign currency payments.

1.11 Business disruption risk

Wellnex is engaged in developing and distributing products. Accordingly, Wellnex is subject to the risks inherent in such activities, including environmental events, strikes and other labour disputes, industrial accidents, disruptions in supply chain, product quality control, safety and regulatory issues and other events outside of the Company's control including natural disasters.

1.12 Market and consumer trend risk

The Company's continued success depends on its ability to anticipate, react and adapt quickly to changes in industry trends as well as consumer preferences / attitudes toward its products and services. Wellnex must continually work to develop, commercialise and market new products and enhance the recognition of its branding. Failure to anticipate, react and adapt to industry trends in a timely and cost effective manner may affect the Company's financial results. Additionally, the increasing use of social media (such as Facebook, Instagram, Twitter, WeChat and Weibo) by consumers affects the speed at which information and opinions are shared, which may result in the rapid change of industry trends / consumer preferences. If Wellnex is unable to anticipate, respond and adapt to new trends in the market / changes to consumer preferences, the Company's financial performance may suffer.

1.13 Information technology risks

Wellnex relies and uses information technology in conducting its business including (but not limited to) using the internet to process, transmit and store electronic and financial information, for digital marketing purposes, to manage a variety of business processes and activities such as inventory control, financial management and reporting database management. If Wellnex is unable to protect against service interruptions, data corruption, cyber security breaches or network security breaches, the Company's business operations could be negatively affected.

The Company's information technology systems (some of which may be managed by a third party), may be vulnerable to disruptions, damage or shutdowns as a result of failures during the process of upgrading or replacing software, computer viruses, power outages, hardware failures, computer hacking, user errors or other similar events. If the Company's information technology systems suffer severe damage, disruption or shutdown and Wellnex does not efficiently resolve such issues, the sale of the Company's product may be materially and adversely affected.

2. General Risks

The future prospects of the Company's business may be affected by circumstances and external factors beyond the Company's control. Financial performance of the Company may be affected by a number of business risks that apply to companies generally and may include economic, financial, market or regulatory conditions.

2.1 Economic risks

The operating and financial performance of the Company is influenced by a variety of general economic and business conditions, including levels of consumer spending, inflation, interest rates, access to debt and capital markets, international economic conditions, significant acts of terrorism, hostilities or war or natural disasters, and government fiscal, monetary and regulatory policies. Prolonged deterioration in general economic conditions may have an adverse impact on the Company's business or financial condition. No guarantee can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

2.2 Market conditions

An investment in the Company's Shares has the general risks associated with any investment in the share market. Returns from an investment in Shares will depend on general stock market conditions as well as the performance of the Company. The market price of the Company's Shares can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. The trading price of the Company's Shares may be subject to fluctuations in response to factors such as actual or anticipated variations in the Company's operating results, announcements of new contracts by the Company or its competitors, announcements by the Company or its competitors of significant acquisitions, technological developments, capital commitments, additions or departures of key personnel and other events or factors, many of which are beyond the Company's control.

Further, general share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as: general economic outlook; interest rates and inflation rates; currency fluctuations; changes in investor sentiment; the demand for, and supply of, capital; and terrorism or other hostilities. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

2.3 COVID-19 pandemic

As a result of the COVID-19 pandemic, global credit and investment markets have experienced a high degree of uncertainty and volatility. The factors which have led to this situation have been outside the control of the Company and may continue for some time resulting in continued volatility and uncertainty in world stock markets (including ASX). This may impact the price at which the Shares trade, regardless of operating performance and affect the Company's ability to raise additional equity and/or debt to achieve its objectives, if required.

2.4 Liquidity Risk

The market for the Company's Shares may be illiquid. As a consequence, investors may be unable to readily exit or realise their investment.

2.5 Force majeure

The Company's contracts now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, pandemics, epidemics or quarantine restrictions.

2.6 Taxation and government regulations

Changes in taxation and government legislation in a range of areas (for example, the Corporations Act, accounting standards, and taxation law) can have a significant influence on the outlook for companies and the returns to investors. The recoupment of taxation losses accrued by the

Company from any future revenues is subject to the satisfaction of tests outlined in taxation legislation or regulations in the jurisdictions in which the Company operates. There is no guarantee that the Company will satisfy all of these requirements at the time it seeks to recoup its tax losses which may impact on the financial performance and cash flows of the Company.

2.7 Litigation risk

The Company is not currently engaged in any litigation. However, the Company is exposed to the risk of actual or threatened litigation or legal disputes in the form of customer claims, intellectual property claims, personal injury claims, employee claims and other litigation and disputes. If any claim was successfully pursued it may adversely impact the financial performance, financial position, cash flow and share price of the Company.

2.8 Insurance risk

The Company intends to insure its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

3. Concluding comment

The above list of risk factors ought not to be taken as an exhaustive one of the risks faced by Wellnex or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of Wellnex and the value of the SPP Shares. Therefore, the SPP Shares to be issued carry no guarantee with respect to the payment of dividends, returns of capital or the market value or price at which those SPP Shares may be traded.

Investment in Wellnex must be regarded as highly speculative and neither Wellnex nor any of its Directors or any other party associated with the preparation of this SPP Booklet guarantee that any specific objectives of Wellnex will be achieved or that any particular performance of Wellnex or of the SPP Shares, will be achieved.
