Chairman & Managing Director's Review

Building a more profitable and sustainable business for shareholders.

Mr David Balkin AM,
Chairman

Mr Rowan Melrose,
CEO and Managing
Director

Twelve months ago, we laid out a blueprint for how your new Board wanted the company to be run. Specifically, a focus on our customers that is built around our local and much shorter supply chain, and the adoption of a more strategic approach to managing our business given that our major competitors are fully integrated multi-national steel producers. In addition, we flagged that there was a major leadership transition underway with the recent appointment of a new CFO and the resignation of our then CEO.

Rowan Melrose has been appointed as CEO and Managing Director and Bernie Landy has been appointed as a non-Executive Director. Their appointments bring a very impressive combination of industrial business leadership, global steel industry experience and reputation and, in particular, deep working knowledge of China's steel industry and business conditions. The Board is delighted about the management transformation that has occurred in the sales and marketing, operations, and financial functions as well as the cultural change that is underway that enables everyone to contribute and speak up.

We would like to thank Michael Gundy, one of our non-Executive Directors, for taking on the interim CEO role, prior to Rowan's appointment. Michael's leadership was critical for ensuring a smooth transition at a sensitive time for the business.

These leadership changes combined with historically high steel prices in line with international trends have delivered a substantial

increase in after tax profits. Dividends increased from 9c per share to 13.5c per share.

During the year we have strengthened our relationships and business with our distributors and many of Australia's quenched and tempered steel plate consuming OEMs and processors. Our sales teams continue to drive and improve our market share through greater customer engagement and focus, but also through strong partnerships. Partnerships where our customers have access to a unique set of benefits, support, and services, that are not readily available from our competitors.

Excellent progress is being made in our armour business as we emerge from COVID travel restrictions. We are rebuilding our relationships with several foreign governments, and we have high hopes for the company's near-term participation in a number of Australian defense programs.

There is much more to do in both our wear and armour businesses, but the change in approach that we foreshadowed a year ago is tangible and the change in attitude of our customers to Bisalloy and its products is evident.

Bisalloy has continuously developed and improved its standards and performance with respect to safety, environment, and operations.

- Safety and achieving a Zero Harm operating environment is the number one priority of the Bisalloy Group. All JV's

9.0c

Final Dividend
(FY21: 9.0c)

Each of our overseas businesses has its own unique challenges, and we will continue to invest time and effort into these businesses to ensure they realise their full potential.

The Anti-Dumping Commission (ADC) has ended its almost two-year enquiry into US produced quenched and tempered plate shipped to Australia. Unfortunately, the ADC concluded that a significant proportion of the steel that originated in the US should be excluded from the investigation because it had been further processed in another country en-route to Australia which changes the steel's country of export. We would like to thank the ADC for its work. We will continue to work with them and Government to understand how further processing worth less than ten percent of delivered value and with no change to the workability and technical aspects of the steel can enable an exporter to change the country of export from the steel's country of origin.

Our competitors are international integrated steel makers who already have an established presence in the Australia market. We welcome competition so long as the Australian playing field is level. We rely on the Federal Government to ensure that this occurs. In particular, we expect Government to ensure that our anti-dumping legislation and our future carbon emissions reduction regime enables us to compete fairly and effectively.

Bisalloy was established 43 years ago. It has built an internationally recognised brand based on the superior quality of its quenched and tempered plate. Quenched and tempered plate is of vital strategic importance to Australia in that it is a staple of truck bodies, buckets and mineral processing plant used in the mining industry, as structural steel in construction and infrastructure, and as armour in military vehicles and equipment. Bisalloy is the only Australian producer of quenched and tempered steel plate. The value of a local manufacturer and supplier has been highlighted by currently disrupted global supply chains and the war in Ukraine.

Looking ahead the headwinds that we have begun to experience in the second half of FY22 are expected to continue through FY23. Falling international steel plate prices, significantly increased shipping costs, disruptions to international and coastal shipping, and ever-increasing gas prices are reducing our profit margins and supply chain predictability.

We would like to thank our customers for their continued support. We value their business and will continue to work hard to maintain their trust and goodwill.

Finally, we would like to thank the Bisalloy family for their loyalty and support in delivering this strong financial result for shareholders.

Mr David Balkin AM
Chairman

Mr Rowan Melrose
CEO and Managing
Director

achieved Zero Harm for the financial year, with Australia recording only one LTI. Our AIFR has continued to reduce over the year, with a greater focus on leading versus lagging indicators and ensuring that not only the statistics, but our way of working, reflect the business's true safety culture.

- There were no environmental issues reported during the year and our National Pollutant Industry report for 2021-22 delivered another 5% reduction over the previous year and a 30% reduction since reporting began in 2018. Our business continues to reduce water consumption through recycling and always operates and maintains our facilities to minimize waste and reduce energy consumption which has reduced by 15% since 2019.
- Our operations and our operational efficiency have continued to improve over the past year. More opportunities have been identified for further improvement going forward.

Both our subsidiary affiliates in Thailand and Indonesia improved their performance on a year-on-year basis which was achieved during significant Covid restrictions. As these restrictions unwind and we have the ability for much greater interaction, we would expect the financial performance and contribution from these two businesses to improve.

Our Joint Venture in China has also performed admirably over the last 12 months delivering another strong financial result and strong growth in volume under difficult economic circumstances.

2022 Financial Report

For personal use only

Directors' Report

For the year ended 30 June 2022

Your Directors submit their report for the year ended 30 June 2022.

Directors

The names and details of the Company's Directors in office during the financial year and until the date of this report are as follows. Directors were in office for this entire period unless otherwise stated.

Mr David Balkin AM

BSc, Civil engineering
(WITS), MBA (Harvard)

Chairman

Skills and Experience:

Mr Balkin brings extensive knowledge and understanding of global basic materials industries through 25 years as a consultant, senior partner and leader of McKinsey & Company's global basic materials practice. He is also an experienced director and chairman of a number of private companies where he actively advises and supports management to improve shareholder returns and build more sustainable businesses.

Term of office:

Appointed as Director and Chairman on 27 November 2020. Last re-elected on November 2021 and subject to re-election by rotation in October 2022.

Board Committees:

- Audit and Risk Committee
- Nominations and Remuneration Committee

Other Directorships:

- RIS Safety Pty Ltd, Chairman
- RP Infrastructure Pty Ltd, Chairman
- Commitworks Pty Ltd, Director

Mr Rowan Melrose

B.E (Hons), M.App.Sc,
MBA

Managing Director and
Chief Executive Officer

Skills and Experience:

Mr Melrose is an experienced executive with an extensive background in mining services, mining consumables, operations and manufacturing.

Mr Melrose has successfully worked and managed businesses in Australia, SE Asia, China, India, and New Zealand, including most recently as Executive General Manager of Bradken Limited's Mineral Processing and Fixed Plant division.

Mr Melrose holds a Bachelor of Engineering and a Master of Science from the University of NSW as well as a Master of Business Administration from Wollongong University.

Term of office:

Appointed as CEO and Managing Director 01 March 2022. As the Managing Director he is not subject to re-election by rotation.

Other Directorships:

Nil

Mr Ian Greenyer**B Sc (Hons)****Non-executive Director****Skills and Experience:**

Mr Greenyer brings significant financial and business analysis and improvement skills, through 27 years as an independent consultant, actively identifying and effecting change in small and medium sized companies operating in a broad range of business sectors based in Australia. These activities flowed from a background as an actuary, investment analyst and stockbroker.

Term of office:

Appointed as Director on 27 November 2020. Last re-elected in November 2021.

Board Committees:

- Audit and Risk Committee
- Nominations and Remuneration Committee

Other Directorships:

- Nil
-

Mr Michael Gundy**MBA, B Bus, Assoc Dip****Metallurgy****Non-executive Director****Skills and Experience:**

Mr Gundy is an experienced executive with 34 years of steel industry experience spread across Australia, S.E. Asia, New Zealand, and the United States. In his career Mr Gundy has been involved in profitably growing businesses, opening new markets, developing distribution channels and business restructuring.

Term of office:

Appointed as Director on 27 November 2020. Last re-elected in November 2021 and subject to re-election by rotation in October 2022.

Board Committees:

- Audit and Risk Committee
- Nominations and Remuneration Committee

Other Directorships:

Nil

Mr Glenn Cooper**Managing Director and
Chief Executive Officer****Skills and Experience:**

Mr Cooper has an engineering background and over 25 years' experience as a senior executive in the mining, construction, transport and quarrying industries. He is an experienced senior executive across all business functions including sales, aftermarket, distribution and market development. Glenn has held previous senior executive roles at regional and global levels for major global OEM's and manufacturers. Mr Cooper was a Director of Bisalloy Steel Group's majority owned businesses – PT Bima Bisalloy and Bisalloy Thailand. Mr Cooper was also Vice-Chairman of the Group's Co-operative Joint Venture, Bisalloy Shangang (Shandong) Steel Plate Co., Limited.

Term of office:

Mr Cooper was appointed CEO Australia in November 2019 before being appointed as Managing Director and Chief Executive Officer on 6 July 2020. Mr. Cooper left the business on 16 December 2021.

Other Directorships:

Nil

Directors' Report (continued)

For the year ended 30 June 2022

Mr Bernard Landy

Non-executive Director

Skills and Experience:

Mr Landy has more than 40 years of experience working as a steel industry executive in Australia, ASEAN and China; including almost seven years based in Shanghai where he successfully led BlueScope China's steel and building products manufacturing businesses. At board level, highlights include: chair and director of the Australian Steel Institute, chair and director of the Bureau of Steel Manufacturers of Australia and director of several BHP and BlueScope international subsidiaries. He is also currently an advisory board member of Swinburne University's Centre for Smart Infrastructure and Digital Construction.

Term of office:

Appointed as Director on 01 March 2022 and subject to re-election October 2022.

Board Committees:

- Audit and Risk Committee
- Nominations and Remuneration Committee

Other Directorships:

Nil

Company Secretary

Mr Carl Bowdler

B Bus, FCPA, MAICD

Company Secretary and
Chief Financial Officer

Skills and Experience:

Appointed in November 2021. Mr Bowdler is a Fellow of CPA Australia with over 25 years' experience in senior roles with strategic, financial, and operational responsibilities. Those roles include the CFO roles at Tribe Breweries, Kollaras & Co and Hagemeyer Brands Australia. Mr Bowdler is a Director of Bisalloy Steel Groups majority owned businesses – PT Bima and Bisalloy Thailand.

Mr Luke Beale

B Comm, MBA, ACA,
GAICD

Company Secretary and
Chief Financial Officer

Skills and Experience:

Appointed in April 2018. Mr Beale is a Chartered Accountant with 21 years professional experience working in senior financial positions with listed companies in Australia, New Zealand and Asia. Mr Beale was a Director of Bisalloy Steel Group's majority owned businesses – PT Bima Bisalloy and Bisalloy Thailand. Mr Beale was also Financial Supervisor of the Group's Co-operative Joint Venture, Bisalloy Shangang (Shandong) Steel Plate Co., Limited. Mr Beale resigned on 21 July 2021 and his last day with Bisalloy was 12 October 2021.

Interests in shares of the company and related bodies corporate

As at the date of this report, the interests of the Directors in the shares of Bisalloy Steel Group Limited were:

	Number of Ordinary Shares
D Balkin	7,781,095
I Greenyer	100,000
M Gundy	64,157
B Landy	2,500
G Cooper	Nil
R Melrose	Nil

Dividends

	Cents	\$'000
Final dividend for FY22 recommended on ordinary shares (fully franked)	9.0	4,238
FY22 Interim Dividend paid in the year	4.5	2,104
FY21 Final Dividend paid in the year	9.0	4,147

Principal activities

The principal activity of the Group during the financial year was the manufacture and sale of quenched and tempered, high-tensile, and abrasion resistant steel plates ("Q&T plate").

Operating and financial Review

Operations

Group

Bisalloy Steel Group comprises Bisalloy Steels Pty Ltd in Australia, the majority owned distribution businesses in Indonesia (PT Bima Bisalloy) and Thailand (Bisalloy (Thailand) Co Limited) and the investment in the Chinese Co-operative Joint Venture (CJV) – Bisalloy Shangang (Shandong) Steel Plate Co, Ltd.

Bisalloy has delivered a strong performance in FY22, consolidating the foundations we have put in place to create a stronger and more resilient business. We've continued our reset of the business, installed new leadership including the appointment of Mr Rowan Melrose as CEO and Managing Director. We are accelerating our review of our strategy for growth to create long term value for our stakeholders over the cycle.

The Bisalloy Group experienced one Lost Time Injury for the H1 which was an upgrade of a minor injury in the previous financial year (FY21) and have recorded nil Lost Time Injuries in H2. Our All-Injury frequency is trending down. The balance of the Group in Thailand, Indonesia and China experienced no Lost Time Injuries. Bisalloy Australia performed strongly in our surveillance

audit for ISO14001 (Environment Management) and ISO45001 (Safety Management Systems), with zero non-conformances.

Bisalloy Steels is Australia's only processor of quenched and tempered high strength, abrasion resistant and armour grade alloyed steel plates. Bisalloy distributes wear and structural grade plates through both distributors and directly to select manufacturers and end users in Australia and internationally. For armour grade steels, Bisalloy exclusively deals directly with select companies.

Bisalloy's unique stand-alone heat treatment facility at Unanderra, near Wollongong, is a highly automated and efficient operation providing a relatively low-cost base, allowing it to compete with a variety of imported products. During the twelve months ended 30 June 2022 Bisalloy utilised greenfeed steel supply mainly from neighbouring BlueScope Steel in Wollongong, complimented with selected supply from international greenfeed suppliers, including the CJV.

Financial review

Operating results

The Group's net profit for the year after income tax was \$15,403,000 (2021: \$8,954,000).

The profit increase was primarily driven by an increase in domestic Australian margins along with increased margins in Indonesia and Thailand. Export sales from Australia were higher in FY22, as were domestic sales in China. Overhead savings relative to the previous year were also achieved.

Operating results are summarised as follows:

	2022	
	Revenue \$'000	Profit after tax \$'000
Operating Segments		
Australia	102,386	13,201
Overseas	19,769	3,054
	122,155	16,255
Consolidated entity adjustments	(4,328)	(852)
Consolidated entity revenue and profit after tax for the year	117,827	15,403

Shareholder returns

The Board has decided to pay a final dividend of 9.0 cents per share for the year ended 30 June 2022.

Directors' Report (continued)

For the year ended 30 June 2022

	2022	2021	2020	2019	2018	2017
Basic earnings / (loss) per share (cents)	32.2	19.3c	14.9c	8.3c	8.2c	3.4c
Net profit / (loss) attributable to members (\$'000)	14,991	8,810	6,736	3,682	3,636	1,509
Return on equity (reported PAT/equity) (%)	24.0%	18.5%	16.0%	12.6%	12.6%	6.6%
Gearing (net debt / net debt + equity) (%)	12%	13%	27%	21%	16%	15%
Dividends paid (cents)	13.5c	5.0c	4.0c	4.0c	2.5c	2.5c
Dividends proposed (cents)	9.0c	9.0c	5.0c	4.0c	4.0c	2.5c
Dividend franking	100%	100%	100%	100%	100%	100%

Liquidity and capital resources

The Group has predominately funded the cash paid in dividends from Operating Activities, whilst delivering slightly lower gearing compared to 2021.

The consolidated statement of cash flows details a decrease in cash and cash equivalents before exchange rate differences for the year ended 30 June 2022 of \$564,000 (2021: increase of \$1,845,000).

Operating activities resulted in a net cash inflow of \$4,285,000 (2021: inflow of \$10,849,000) partially offset by an increase in working capital.

Investing activities resulting in a net cash outflow of \$341,000 (2021: inflow of \$155,000). This included cash outflows of \$842,000 (2021: \$1,252,000) for investment in operating plant and equipment and dividends received of \$620,000 (2021: \$1,751,000).

Financing activities resulted in a net cash outflow of \$4,508,000 (2021: outflow of \$9,159,000), including an increase of \$727,000 in borrowings (2021: decrease in borrowings of \$6,928,000) and the dividend paid in cash to shareholders in November 2021 and April 2022 totalling \$4,630,000 (2021: \$1,703,000).

Funding

The Group's net debt increased to \$8.6m at 30 June 2022, up from \$7.4m at 30 June 2021, with a decrease in gearing to 12%, down from 13% at the end of last year.

Bisalloy Steel Group Limited and Bisalloy Steels Pty Limited have the following facilities in place with Westpac Banking Corporation: a trade finance facility of \$9 million, an invoice finance facility of \$12 million, a two-year bank bill business facility of \$6 million and a premium finance facility of \$0.49 million. The total limit of these facilities is \$27.4 million.

The Group has IDR 44.5b revolver facilities as well as a USD \$0.5m Letter of Credit facility available to its Indonesian based subsidiary.

Business strategy and outlook

Strategy

Domestic Australian Sales and Margins

The last twelve months have been characterised by global and domestic steel prices at or near record levels with continued strong Australian demand for quench and tempered steel plate. Combined with proactive pricing and procurement

decisions, this has resulted in much higher product margins for Bisalloy across FY22 relative to FY21. As expected, product margins declined in H2 relative to H1 as higher greenfeed costs flowed through.

Co-Operative Joint Venture (CJV) in China

Despite impacts from Covid-19 lock-downs and tightening market conditions, we continue to see solid performance from the CJV, in particular a 23.1% increase in Bisplate sales tonnes compared to FY2021. Unfortunately, these gains in sales have been offset by higher administration and operating costs along with lower gross margins, resulting in a relatively flat contribution to earnings.

Overseas Distribution

The Group's overseas distribution operations in Indonesia and Thailand continue to be profitable.

Armour

Our Armour business continues to be of importance both domestically and internationally. We continue to develop and support an alternate supply of specialised greenfeed from targeted partner mills overseas.

Covid-19

Our focus like many other businesses has continued to evolve with the changing impacts from the COVID-19 pandemic. We are pleased to report that our NSW based operation has maintained our ability to produce on schedule from the Unanderra plant, maintaining our superior delivery performance metrics. Our employees have been exceptionally cooperative and adaptable to the additional measures we've taken to maintain our business continuity through these community health events.

While Covid-19 has not had a material impact on demand in Australia, during H2 FY22 we have noted impacts across customers and supply chain as a result of staff absences. We expect this disruption to normalise over the coming months as Australia passes the peak of the third wave.

FY23 Outlook

Throughout the recent macroeconomic and geopolitical volatility, Bisalloy has continued to demonstrate strength and resilience in its business performance. With this volatility ongoing, we are anticipating normalisation of product margins as a result of expected reductions in international steel prices, along with the impact of higher energy and transportation

costs. We also cannot discount the impact of future disruptions caused by COVID-19 and ongoing supply chain disruptions, particularly sea freight. Therefore, Bisalloy is projecting a reduction in profits in FY23 compared to FY22.

Business risk management

The Group takes a proactive approach to risk management. The Board is responsible for ensuring that risks, and also opportunities, are identified on a timely basis and that the Group's objectives and activities are aligned with the risks and opportunities identified by the Board.

The Board has established an Audit and Risk Committee comprising non-executive Directors, whose meetings are also attended by the executive Director. In addition, sub-committees are convened as appropriate in response to issues and risks identified by the Board, and the sub-committee further examines the issue and reports back to the Board.

The Board has a number of mechanisms in place to ensure that management's objectives and activities are aligned with the risks identified by the Board. These include the following:

- Board approval of a strategic plan, which encompasses the Group's vision, mission and strategy statements, designed to meet stakeholders' needs and manage business risk.
- Implementation of Board approved operating plans and budgets and Board monitoring of progress against these budgets, including the establishment and monitoring of KPIs of both a financial and non-financial nature.
- Establishment of committees to report on specific business risks, including for example, such matters as environmental issues and concerns and occupational health and safety.
- Board review of financial risks such as the Group's liquidity, currency, interest rate and credit policies and exposures and monitors management's actions to ensure they are in line with Group policy.

The major high level business risks with the greatest potential to materially impact on the financial outlook for the Group are continued upward pressure on energy prices and ongoing disruption on the east to west coast domestic sea-freight route. Both electricity, and natural gas in particular, are integral inputs into the Group's manufacturing process, and affordable energy resources are critical if the Group is to maintain its competitive advantage. With our operations on the east coast, we are reliant on regular and affordable shipping to the West Australian market to meet demand. Alternative transportation options would have a material impact on the financial outlook in the near term. Furthermore, supply constraints, market dysfunction and higher gas prices may impact many sectors of the economy including the mining and agricultural sectors on the demand side and the Group's ability to source competitively priced raw material on the supply side. Bisalloy Australia currently has retail contracts in place for electricity supply through to the end of December 2022 and gas supply through to the end of December 2022.

Significant changes in the state of affairs

Total equity increased from \$48,414,000 to \$64,286,000 an increase of \$15,872,000 that was driven by the increase in net profit for the year offset by FY22 interim and FY21 final

dividends totalling \$6,251,000 which were paid to shareholders in November 2021 and April 2022.

Significant events after the balance date

There have been no significant events after the balance date.

Indemnification and insurance of directors and officers

The Group must, subject to certain exceptions set out in the constitution, indemnify each of its officers on a full indemnity basis and to the full extent permitted by law against all losses, liabilities, costs, charges and expenses incurred by the officer, as an officer of the Group (including all liabilities incurred where the officer acts as an officer of any other body corporate at the request of the Group) including any liability for negligence and for reasonable legal costs.

During the year or since the end of the year, the Group has paid premiums in respect of a Directors and officers liability insurance policy. Details of the nature of the liabilities covered or the amount of the premium paid in respect of the policy have not been disclosed, as such disclosure is prohibited under the terms of the contract.

Environmental regulation

The Group's activities are governed by a range of environmental legislation and regulations. The Group utilises both internal and external environmental assessments to verify its compliance with applicable environmental legislation and regulations.

The Group is registered under *National Greenhouse and Energy Reporting Act 2007* under which it is required to report energy consumption and greenhouse gas emissions for its Australian facilities. The Group has implemented systems and processes for the collection and calculation of the data to meet its reporting requirements.

The Board believes that the consolidated entity has adequate systems in place for the management of its environmental requirements and is not aware of any breach of those environmental requirements as they apply to the consolidated entity.

Rounding

The amounts contained in this report and in the financial report have been rounded to the nearest \$1,000 (where rounding is applicable) under the option available to the company under ASIC Corporations Instrument 2016/191. The company is an entity to which the Class Order applies.

Auditor independence

The Directors received the declaration on page 17 from the auditor of Bisalloy Steel Group Limited which forms part of this report.

Indemnification of auditors

To the extent permitted by law, the Company has agreed to indemnify its auditors, KPMG, as part of the terms of its audit

Directors' Report (continued)

For the year ended 30 June 2022

engagement agreement against claims by third parties arising from the audit (for an unspecified amount). No payment has been made to indemnify KPMG during or since the financial year.

Non-audit services

During the year the Company's auditor, KPMG, has performed certain other services in addition to the audit and review of the financial statements. The board has considered the non-audit services during the year by the auditor and is satisfied that the provision of those non-audit services is compatible with, and did not compromise, the auditor independence requirements of the *Corporations Act 2001*.

Details of the amounts paid to the Company's auditor for audit and non-audit services provided during the year are set out below.

In dollars	2022
Tax compliance engagement	12,000
Audit and review of financial statements	207,000
Total paid to KPMG	219,000

Likely developments and expected results

In FY23 Bisalloy is continuing with its growth strategy of focusing on the premium grades of QT steels from its Unanderra plant, including armour and defence grades while developing the volume growth of other products including those sourced from Bisalloy's CJV operation.

This strategy and focus has resulted in market share gains in the second half of FY22 with good momentum going into FY23. Despite this, Bisalloy is forecasting profitability to be down in FY23 due to increased headwinds compared to FY22 as highlighted earlier in this document.

Directors' meetings

The number of Directors meetings and number of meetings attended by each of the Directors of the Company during the financial year are:

	Committee Meetings		
	Directors' Meetings	Audit and Risk	Nominations and Remuneration
Number of Meetings Held	12	3	7
Number of Meetings Attended			
D Balkin	12	3	7
G Cooper	5	1	3
I Greenyer	12	3	7
M Gundy	12	3	7
R Melrose	5	2	3
B Landy	5	2	3

Remuneration report (audited)

This remuneration report for the year ended 30 June 2022 outlines the remuneration arrangements of the Company and the Group in accordance with the requirements of the *Corporations Act 2001* (the Act) and its regulations. This information has been audited as required by section 308(3C) of the Act

The remuneration report details the remuneration arrangements for key management personnel (KMP) who are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Company and the Group, directly or indirectly, including any Director (whether executive or otherwise) of the parent company, and includes the six executives in the Group receiving the highest remuneration.

Remuneration policy

The remuneration policy is set in recognition that the performance of the Group depends upon the quality of its Directors and executives. In order to perform, the Group must be successful in attracting, motivating and retaining Directors and executives of the highest quality.

To assist in achieving this objective, the remuneration policy embodies the following principles:

1. Provide competitive remuneration to attract high calibre Directors and executives.
2. Align executive rewards with creation of shareholder value.
3. Ensure a significant component of executive remuneration is 'at risk' dependent upon meeting pre-determined performance hurdles.
4. Establish appropriately demanding performance hurdles in relation to variable executive remuneration.
5. Provide the opportunity for non-executive Directors to sacrifice a portion of their fees to acquire shares in the Company at market price.

Nominations and remuneration committee

The Nominations and Remuneration Committee is responsible for determining and reviewing compensation arrangements for the Directors, the Managing Director and other senior executives, and the review and recommendation of general remuneration principles.

Remuneration structure

The structure of non-executive Director and executive remuneration is separate and distinct, in accordance with good corporate governance principles.

Non-executive director remuneration

Objective

The Board sets aggregate remuneration at a level which is intended to provide the Company with the ability to attract and retain non-executive Directors of the highest calibre, whilst incurring a cost which is acceptable to shareholders.

Structure

The Company's constitution and the ASX listing rules specify that the non-executive Director fee pool shall be determined from time to time by a general meeting. The non-executive Director fee pool is currently set at \$500,000¹.

The remuneration of non-executive Directors must not include a commission on, or a percentage of, profits or operating revenue but non-executive Directors are entitled to be reimbursed for travelling and other expenses incurred in attending to the Company's affairs.

Each non-executive Director receives a fee for being a non-executive Director of the Company and an additional fee for each Board Committee on which a non-executive Director sits. The payment of additional fees for serving on a committee recognises the additional time commitment required by non-executive Directors who serve on one or more sub committees.

Non-executive Directors are encouraged by the Board to hold shares in the Company and are able to participate in the Non-executive Director ("NED") Share Plan. Under the NED Share Plan a non-executive Director can choose to sacrifice up to 100% of their annual Director's fee and instead be allocated

shares up to the equivalent value. The value of the allocated shares is determined by reference to the market value on the day they are acquired on market.

The remuneration of non-executive Directors for the period ended 30 June 2022 is detailed in the table on page 12 of this report.

Executive director and executive manager remuneration

Objective

The Group aims to reward executives with a level and mix of remuneration commensurate with their duties and responsibilities within the Group and to:

- reward executives for Group, business unit and individual performance measured against targets set by reference to appropriate benchmarks;
- link reward with the achievement of the Group's strategic goals;
- align the interests of executives with those of shareholders; and
- ensure total remuneration is competitive.

Structure

Executive Director and executive manager remuneration consists of the following key components:

1. Fixed Remuneration
2. Variable Remuneration made up of:
 - Short Term Incentive (STI); and
 - Long Term Incentive (LTI)

The proportion of total remuneration that is fixed or variable (either short term or long term incentives) is determined for each individual executive by the Nominations and Remuneration Committee.

The remuneration of members of management who have the authority and responsibility for planning, directing and controlling the activities of the Group for the year ended 30 June 2022 is detailed in the table on page 12 of this report.

Fixed remuneration

Objective

The level of fixed remuneration is set so as to provide a base level of remuneration which is both commensurate with the individual's duties and responsibilities within the Group and competitive in the market.

Fixed remuneration is reviewed annually by the Nominations and Remuneration Committee utilising a process of reviewing group-wide, business unit and individual performance, relevant comparative remuneration in the market and internal and external advice on policies and practice.

Structure

Executive Directors and executive managers are provided with the opportunity to receive their fixed remuneration in a variety of forms, including cash, additional superannuation contributions

¹ The Directors fee pool was incorrectly stated as \$383,250 in the 2021 Financial Report.

Directors' Report (continued)

For the year ended 30 June 2022

and fringe benefits such as motor vehicles. The aim is to provide payments in a form that is both optimal for the recipient and cost efficient for the Group.

The fixed remuneration component of executive Directors and members of management who have the authority and responsibility for planning, directing and controlling the activities of the Group for the year ended 30 June 2022 is detailed in the table on page 12 of this report.

Variable remuneration – short term incentives (STI)

Objective

The STI program has been designed to align the remuneration received by executive Directors and executive managers with the achievement of the Group's operational and financial targets. The total potential STI available for payment is determined so as to provide sufficient incentive to executive Directors and executive managers to achieve the targets and so that the cost to the Group is reasonable in the circumstances.

Structure

The actual STI payments granted to each executive Director and executive manager depends upon the extent to which specific operational and financial targets set at the beginning of the financial year are met. The targets consist of a number of both financial and non-financial Key Performance Indicators (KPIs).

After the end of each financial year, consideration is given to performance against each of these KPIs to determine the extent of any payment to an individual executive Director or executive manager. The aggregate of STI payments and STI payments to individuals is subject to the approval of the Nominations and Remuneration Committee. The individual needs to be employed at the time of payment to be eligible for the payment.

Payments made are normally paid as cash but the recipient is also able to elect to receive payment in alternative forms.

Variable remuneration – long term incentives (LTI)

Objective

The LTI program has been designed to align the remuneration received by executive Directors and executive managers with the creation of shareholder wealth.

Consequently, LTI grants are only made to executives who are in a position to influence shareholder wealth and thus have the opportunity to influence the company's performance against the relevant long term performance hurdles.

Group performance

The Board has determined that 100% of the performance components of the 2022 share rights have vested based on an ROE achieved that was above stretch ROE.

For further detail of historical performance, refer to the following table.

	2022	2021	2020	2019	2018	2017
Return on equity (reported PAT/equity) (%)	24.0%	18.5%	16.0%	12.6%	12.6%	6.6%

Structure

At the 2019 Annual General Meeting, the LTI plan was renewed for LTI grants to executives in the form of share rights.

For grants prior to 2022, these rights are granted in two equal parts. The first part is based on retention and requires the holder remain an employee for three years from grant date. The second part is based on delivering superior long-term performance as measured by Return on Equity ("ROE"), with each grant of rights divided into three equal tranches. For each tranche, actual ROE is measured against a budget ROE and a stretch ROE as determined annually by the Board in respect of the forthcoming year. The proportion of the rights which vest depend on where within this range the Group performs, with 100% vesting on achieving the stretch ROE and no rights vesting if actual ROE is less than 90% of the budgeted ROE. For the 2022 year, the stretch ROE was set at 115% of the budget ROE. Any rights to which the employee may become entitled on achieving the performance criteria, are still subject to the three year retention criteria before they can vest.

For grants in 2022, these rights are granted based on delivering superior long-term performance as measured by Return on Invested Capital ("ROIC") over a three year performance period, determined by the Board in respect of each forthcoming three year period. The rights which vest depend on achieving this target ROIC, with 100% vesting on achieving the ROIC and no rights vesting if actual ROIC is less than the target ROIC. Any rights to which the employee may become entitled on achieving the performance criteria, are still subject to being employed by Bisalloy for the whole performance period.

Any share rights which do not vest, as a result of the relevant performance condition not being satisfied, lapse. If the holder leaves the business, the unvested rights lapse on the leaving date unless the Board determines otherwise. In the event of a change in control of the Group, the vesting date will generally be brought forward to the date of change of control and share rights will vest subject to performance over this shortened period, subject to ultimate Board discretion.

Once vested a holder may exercise their share rights and be allocated a fully paid ordinary share of Bisalloy at no cost to the employee or the equivalent in cash at the Board's discretion.

A total of 217,905 share rights (2021: 1,050,000) were granted under this scheme during the year.

Details of key management personnel of the company and group

(i) Directors

D Balkin	Non-executive Chairman (from 27 November 2020)
I Greenyer	Non-executive Director (from 27 November 2020)
M Gundy	Non-executive Director (from 27 November 2020)
R Melrose	Managing Director and Chief Executive Officer (from 1 March 2022)
B Landy	Non-executive Director (from 1 March 2022)
G Cooper	Managing Director and Chief Executive Officer (from 6 July 2020 until 16 December 2021)

(ii) Executives

M Enbom	Chief Operating Officer (from November 2019)
C Bowdler	Chief Financial Officer and Company Secretary (from 29 November 2021)
L Beale	Chief Financial Officer and Company Secretary (until 12 October 2022)
A Egan	Bisalloy Australia Sales and Marketing Manager (until 31 January 2022)

Executive contracts

Remuneration arrangements for the key management personnel are formalised in employment contracts.

Details of these contracts are provided below.

R Melrose – Managing Director and Chief Executive Officer (from 1 March 2022)

- Regular employment contract without fixed term
- Participation in STI and LTI schemes
- 6 months notice required for termination of employment

C Bowdler – Chief Financial Officer and Company Secretary (from 29 November 2021)

- Regular employment contract without fixed term
- Participation in STI and LTI schemes
- 3 months notice required for termination of employment

M Enbom – Chief Operating Officer (from November 2019)

- Regular employment contract without fixed term
- Participation in STI and LTI schemes
- 3 months notice required for termination of employment

G Cooper – Managing Director and Chief Executive Officer (from 6 July 2020 until 16 December 2021)

- Regular employment contract without fixed term
- Participation in STI and LTI schemes
- 6 months notice required for termination of employment

L Beale – Chief Financial Officer and Company Secretary (until 12 October 2022)

- Regular employment contract without fixed term
- Participation in STI and LTI schemes
- 3 months notice required for termination of employment

A Egan – Bisalloy Australia Sales and Marketing Manager (until 31 January 2022)

- Regular employment contract without fixed term
- Participation in STI and LTI schemes
- 1 month notice required for termination of employment

Notes to the Consolidated Financial Statements

For the year ended 30 June 2022

1. Corporate information

The financial report of Bisalloy Steel Group Limited and its subsidiaries ("the Group") for the year ended 30 June 2022 was authorised for issue in accordance with a resolution of the directors on 25 August 2022.

Bisalloy Steel Group Limited is a for profit company limited by shares incorporated and domiciled in Australia whose shares are publicly traded on the Australian Stock Exchange.

The nature of the operations and principal activities of the Group are described in the Directors' Report.

2. Revenue from contracts with customers

2.1 Disaggregated revenue information

Set out below is the disaggregation of the Group's revenue from contracts with customers:

In thousands of dollars	For the year ended 30 June 2022		
	Australia	Overseas	Total
Performance obligation			
Sales of steel plates	92,837	19,431	112,268
Shipping and handling	5,221	338	5,559
Total revenue from contracts with customers	98,058	19,769	117,827
Timing of revenue recognition			
Goods transferred at a point in time	92,837	19,431	112,268
Services transferred over time	5,221	338	5,559
Total revenue from contracts with customers	98,058	19,769	117,827

In thousands of dollars	For the year ended 30 June 2021		
	Australia	Overseas	Total
Performance obligation			
Sales of steel plates	82,499	17,580	100,079
Shipping and handling	4,408	340	4,748
Total revenue from contracts with customers	86,907	17,920	104,827
Timing of revenue recognition			
Goods transferred at a point in time	82,499	17,580	100,079
Services transferred over time	4,408	340	4,748
Total revenue from contracts with customers	86,907	17,920	104,827

2.2 Contract balances

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Trade receivables (refer to note 10)	25,898	22,705
Contract assets	138	135
Contract liabilities	(386)	(395)

Trade receivables are non-interest bearing and are generally on terms of 30 to 90 days end of month.

Contract assets are initially recognised for revenue earned from shipping and handling services as receipt of consideration is conditional on delivery of the steel plates. Upon delivery of the steel plates, the amounts recognised as contract assets are reclassified to trade receivables.

2. Revenue from contracts with customers (continued)

2.2 Contract balances

Contract liabilities are recognised for shipping and handling services yet to be provided with respect to the steel plates invoiced and for any settlement discounts expected to be obtained by customers.

2.3 Performance Obligations

The Group's contracts with customers are for the sale of steel plates. In completing the sale of the steel plates, there are two performance obligations identified, being the provision of steel plates and the provision of shipping and handling. The Group has concluded that revenue from the provision of steel plates is recognised at the point in time when control of the asset is transferred to the customer and revenue from the services of shipping and handling are recognised over time as the service is performed.

As at 30 June 2022, the unsatisfied performance obligations per each segment is presented below.

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Shipping and handling	386	395
Total Revenue from contracts with customers	386	395

The remaining performance obligations are expected to be recognised within the next 12 months.

3. Operating Segments

Identification of reportable segments

The Group has identified its operating segments based on the internal reports that are reviewed and used by the executive management team (the chief operating decision makers) in assessing performance and in determining the allocation of resources.

The operating segments are identified by management based on country of origin. Discrete financial information about each of these operating businesses is reported to the executive management team on at least a monthly basis.

The reportable segments are based on aggregated operating segments determined by the similarity of economic characteristics.

Geographical areas

Australian operations

The Australian operations are comprised of Bisalloy Steels Pty Limited and Bisalloy Steel Group Limited.

Bisalloy Steels Pty Limited manufactures and sells wear-grade and high tensile plate through distributors and directly to original equipment manufacturers in both Australia and Overseas.

Bisalloy Steels is located in Unanderra, near Wollongong, NSW.

Bisalloy Steel Group Limited is the corporate entity, also located in Unanderra NSW, which incurs expenses such as head office costs and interest. Corporate charges are allocated across the Australian and Overseas segments.

Overseas operations

The Overseas operations comprise of PT Bima Bisalloy and Bisalloy (Thailand) Co Limited located in Indonesia and Thailand respectively. These businesses distribute Bisalloy Q&T plate as well as other steel plate products. The Overseas operations also includes the co-operative joint venture Bisalloy Shangang (Shandong) Steel Plate Co. Limited in the People's Republic of China for the marketing, sale and distribution of quench & tempered steel plate.

Accounting policies and inter-segment transactions

The accounting policies used by the Group in reporting segments internally are the same as those contained in note 28 to the accounts and in the prior period except as detailed below:

Inter-entity sales

Inter-entity sales are recognised based on an internally set transfer price. This price is set monthly and aims to reflect what the business operation could achieve if they sold their output to external parties at arm's length.

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

3. Operating segments (continued)

Major customers

The group has a number of customers to which it provides products. There are two customers who account for 30% (2021: 32%) and 14% (2021: 12%) of total external revenue. All these customers are in the Australian operating segment.

In thousands of dollars	For the year ended 30 June 2022		
	Australia	Overseas	Total
Revenue:			
Sales to external customers	98,058	19,769	117,827
Inter-segment sales	4,328	–	4,328

3. Operating segments (continued)

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
i) Segment revenue reconciliation to the statement of comprehensive income		
Total segment revenue	122,155	110,277
Inter-segment sales elimination	(4,328)	(5,450)
Total revenue	117,827	104,827

Revenue from external customers by geographical location is detailed below. Revenue is attributed to geographic location based on the location of the customers.

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Australia	86,387	74,508
Indonesia	21,083	21,946
Thailand	3,495	2,476
Other foreign countries	6,862	5,897
Total revenue	117,827	104,827

ii) Segment net operating profit after tax reconciliation to the statement of comprehensive income

The executive management committee meets on a monthly basis to assess the performance of each segment by analysing the segment's net operating profit after tax.

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Reconciliation of segment net operating profit after tax to net profit before tax		
Segment net operating profit after tax	16,255	11,810
Intercompany eliminations (net of tax)	(852)	(2,856)
Income tax expense	5,779	3,598
Total net profit before tax per the statement of profit or loss	21,182	12,552

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

3. Operating segments (continued)

iii) Segment assets reconciliation to the statement of financial position

In assessing the segment performance on a monthly basis, the executive management committee analyses the segment result as described above and its relation to segment assets. Segment assets are those operating assets of the entity that the management committee views as directly attributing to the performance of the segment. These assets include plant and equipment, receivables, inventory and intangibles and exclude derivative assets, deferred tax assets, and pension assets.

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Reconciliation of segment operating assets to total assets		
Segment operating assets	108,989	86,514
Inter-segment eliminations	(2,629)	(2,635)
Deferred tax assets	69	51
Income tax receivable	157	375
Derivative assets	–	–
Total assets per the statement of financial position	106,586	84,305

The analysis of the location of non-current assets other than financial instruments, deferred tax assets and pension assets is as follows:

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Australia	34,029	25,742
Overseas	2,767	2,996
Total non-current assets	36,796	28,738

iv) Segment liabilities reconciliation to the statement of financial position

Segment liabilities include trade and other payables and debt. The Group has a centralised finance function that is responsible for raising debt and capital for the Group operations. The executive management committee reviews the level of debt for each segment in the monthly meetings.

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Reconciliation of segment operating liabilities to total liabilities		
Segment operating liabilities	34,594	30,112
Inter-segment eliminations	(2,158)	(1,468)
Income tax payable	2,729	1,708
Employee benefit liabilities	2,984	3,610
Derivative Liability	95	–
Deferred tax liabilities	4,056	1,929
Total liabilities per the statement of financial position	42,300	35,891

4. Other income and expenses

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
(a) Other (income) / expenses		
Foreign exchange (gain) / loss	(114)	12
Other Income	(13)	(45)
	(127)	(33)
(b) Finance (income) and costs		
Bank interest and borrowing costs	693	1,107
Total finance costs	693	1,107
Bank interest	(11)	(6)
Total finance income	(11)	(6)
(c) Depreciation and costs of inventories included in statement of comprehensive income		
Depreciation*	2,315	2,205
Cost of inventories	80,794	76,155 ¹
Provision for inventory	148	(18)
Cost of inventories recognised as an expense	80,942	76,137
(d) Employee benefits expense*		
Wages and salaries	12,991	12,677
Superannuation costs	840	1,090
Expense of share-based payments	(154)	271
	13,677	14,038

*These costs are apportioned over several functions of the Group.

1. The cost of inventories reported in the 2021 Financial Report was \$64,242k. This did not include all conversion costs. This has been updated.

5. Investment in a joint venture

Interests in the joint venture are accounted for using the equity method. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's share of the profit or loss and other comprehensive income of equity-accounted investees, until the date on which significant influence or joint control ceases.

The financial statements of the joint venture are prepared on a December balance date, however, as the Group equity accounts for this, the necessary adjustments are made to align these to the Group's reporting period. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

In July 2011, Bisalloy Steel Group Limited signed a Cooperative Joint Venture Agreement with Ji'nan Iron & Steel Co., Limited to establish Bisalloy Jigang Steel Plate (Shandong) Co., Limited ('the joint venture') for the marketing, sale and distribution of quench & tempered steel plate in the People's Republic of China and other international markets. The Group has joint control under the terms of the Joint Venture Agreement.

Under the terms of the JV, Bisalloy initially contributed US\$1 million in capital and licenced its Q&T intellectual property

and brand name to the joint venture to produce quench & tempered steel plate at Jinan's production facility in Shandong Province, PRC for an initial 33% ownership of the equity and a 50% share in the operating result of the joint venture.

In 2018 the JV changed its registered name to Bisalloy Shangang (Shandong) Steel Plate Co., Limited.

In April 2020, due to the substantial growth in the CJV, both parties in the joint venture increased their contribution to registered capital, with Bisalloy's contribution increasing from US\$1.0m to US\$2.5m, representing a 41.67% ownership of the equity and a 50% share in the operating result of the joint venture. The increase was funded through distributable profits from 2017 and 2018 calendar years that would have otherwise been fully paid to Bisalloy as a dividend in November 2018 and November 2019.

In June 2021, it was agreed that Bisalloy would increase their contribution to registered capital to ensure both parties had a 50% share in equity. Bisalloy's contribution increased from US\$2.5m to US\$3.5m, representing a 50% ownership of the equity and a continuation of the 50% share in the operating result of the joint venture. The increase was funded through distributable profits from 2021 calendar year that would have otherwise been fully paid to Bisalloy as a dividend in November 2021.

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

5. Investment in a joint venture (continued)

Dividends of \$620,090 (2021:\$1,751,417) were received from the JV during the year.

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021

Closing balance at 30 June	69	51	(4,056)	(1,929)

Of the DTA and DTL's recognised for the Group the following amounts are attributed to the Thailand and Indonesian tax jurisdiction at 30 June 2022, the balance relates to the Australian tax jurisdiction:

In thousands of dollars	Net DTA / (DTL)	
	Thailand 2022	Indonesia 2022
The balance comprises of temporary differences attributable to:		
Property, plant and equipment	–	(404)
Employee entitlement provisions	45	112
Other provisions and accruals	24	92
Deferred tax assets and liabilities reflected in the balance sheet	69	(200)

(e) Current income tax at 30 June 2022 relates to the following:

The current tax payable for the Group of \$2,730,004 (2021: \$1,707,824) represents the amount of income tax payable in respect of the current and prior periods. The current tax payable of the Group is made up of \$2,589,059 payable in the Australian jurisdiction, \$50,393 in the Indonesian tax jurisdiction and \$90,552 in the Thailand tax jurisdiction.

The current tax receivable of \$0 (2021: \$78,255) and the non-current tax receivable of \$157,488 (2021: \$296,780) for the Group represents the amount of income tax receivable in respect of the current and prior periods. The amount of tax receivable is entirely attributed to the Indonesian tax jurisdiction.

The Group liability includes both the income tax payable by all members of the tax consolidated group and those members outside the tax consolidated group and outside the Australian tax jurisdiction.

(f) Unrecognised temporary differences

At 30 June 2022, there are no unrecognised temporary differences associated with the Group's investments in subsidiaries, as the Group has no liability for additional taxation should unremitted earnings be remitted (2021: Nil).

6. Income tax (continued)

(g) Tax consolidation

(i) Members of the tax consolidation group and the tax sharing arrangement

Effective 1 July 2003, for the purposes of income taxation, the Company and its 100% owned Australian subsidiaries formed a tax consolidated group. Members of the group have entered into a tax sharing arrangement. This arrangement provides for the allocation of income tax liabilities between the entities should the head entity default on its tax payment obligations. At the balance date, the possibility of a default is remote. The head entity of the group is Bisalloy Steel Group Limited.

(ii) Tax effect accounting by members of the tax consolidated group

Members of the tax consolidated group have entered into a tax funding agreement. The allocation of taxes under the tax funding agreement is recognised under the separate tax payer within a group approach. Allocations under the tax funding agreement are made on a semi-annual basis.

The amount that is allocated under the tax funding agreement is done so in accordance with a method permitted by Urgent Issues Group Interpretation 1052 and is recognised by way of an increase or decrease in the subsidiaries intercompany accounts.

7. Earnings per share (EPS)

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
The following reflects the income and share data used in the basic and diluted earnings per share computations:		
Net profit for the period	15,403	8,954
Net profit attributable to non-controlling interest holders	(412)	(144)
Net profit attributable to equity holders of the parent (used in calculating basic and diluted EPS)	14,991	8,810
	Thousands	Thousands
Weighted average number of ordinary shares for basic earnings per share	46,546	45,720
Effects of dilution:		
Performance rights	913	1,894
Adjusted weighted average number of ordinary shares for diluted earnings per share	47,459	47,614
Weighted average number of lapsed or cancelled potential ordinary shares included in diluted earnings per share	597	838*

*This number was incorrectly presented in 30 June 2021 report.

8. Dividends paid or proposed

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
(a) Dividends paid during the year		
Interim	2,104	–
Final	4,147	2,271
	6,251	2,271
(b) Proposed dividend (not recognised as a liability as at 30 June)		
Final dividend for 2022: 9.0 cents per share (2021: 9.0 cents per share)	4,238	4,137

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

8. Dividends paid or proposed (continued)

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
(c) Franking credit balance		
The amount of franking credits available for the subsequent financial year are:		
Franking account balance as at the end of the financial year at 30%	9,199	6,971
Franking credits that will arise from the payment of tax as at the end of the financial year	2,589	1,590
Franking debits that will arise from the payment of dividends as at the end of the financial year	(1,816)	(1,773)
	9,972	6,788

9. Cash and cash equivalents

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
(a) Reconciliation of cash		
For the purpose of the cash flow statement, cash and cash equivalents comprise the following at 30 June:		
Cash at bank	1,833	2,345
Cash at hand	1	2
Total	1,834	2,347
(b) Reconciliation of net profit after income tax to net cash provided by operations		
Net profit after tax	15,403	8,954
Non-cash items		
Depreciation and amortisation	2,315	2,205
Share-based payments expense	(154)	271
Provision for stock obsolescence	148	(18)
Provision for doubtful debts	78	(41)
Share of profit of a joint venture	(2,300)	(2,355)
Net fair value change on derivatives	61	41
Decrease / (increase) in foreign currency translation	314	(904)
Change in operating assets and liabilities		
(Increase)/decrease in receivables and other assets	(3,402)	(6,392)
(Increase)/decrease in inventories	(12,059)	10,309
Increase/(decrease) in tax assets and liabilities	1,463	225
(Increase)/decrease in prepayments	(18)	(14)
Increase/(decrease) in trade creditors	2,965	(1,606)
(Decrease)/increase in employee benefit liabilities	(529)	225
Net cash from operating activities	4,285	10,900
(c) Disclosure of financing facilities		
Refer note 18.2		
(d) Reconciliation of movements of liabilities to cash flows arising from financing activities		
Changes from financing cash flows		
Proceeds from loans and borrowings	5,817	1,558
Repayment of borrowings	(5,090)	(8,486)
Net increase/(decrease) in borrowings	727	(6,928)

10. Trade and other receivables

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Current		
Trade receivables	26,210	22,939
Less: Allowance for expected credit losses	(312)	(234)
	25,898	22,705
Other	269	827
Goods and services tax	73	–
	342	827
	26,240	23,532

Trade receivables are non-interest bearing and are generally on 30-90 day terms. Refer to note 18.3 for more information of the allowance for expected credit losses.

Other balances within trade and other receivables do not contain impaired assets and are not past due. It is expected that these other balances will be received when due.

The Group has a credit insurance policy in place that covers 90% of the sales value to Australian and Indonesian eligible customers.

Fair value and credit risk

Due to the short term nature of these receivables, their carrying value is assumed to approximate their fair value. The maximum exposure to credit risk is the fair value of receivables. Collateral is not held as security, nor is it the Group's policy to transfer (on-sell) receivables to special purpose entities.

Foreign exchange and interest rate risk

Detail regarding foreign exchange and interest rate risk exposure is disclosed in note 18.3.

11. Inventories

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Current		
Raw materials	614	2,007
Finished goods	39,233	25,929
	39,847	27,936

12. Other current assets

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021* Restated
Current		
Prepayments	1,505	1,488
	1,505	1,488
Non-current		
Prepayments	125	122
	125	122

*The Group had previously recorded the net position of premium finance. The gross figures are now reported. This increases Prepayments by \$416k.

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

13. Property, plant and equipment

(a) Reconciliation of carrying amounts at the beginning and end of the period

In thousands of dollars	Freehold land and buildings	Leasehold improvements	Plant and equipment	Total
Consolidated				
Year ended 30 June 2022				
At 1 July 2021, net of accumulated depreciation and impairment	13,898	–	7,306	21,204

At 30 June 2021				
Cost or fair value	14,915	34	26,272	41,221
Accumulated depreciation and impairment	(1,017)	(34)	(18,966)	(20,017)
Net carrying value	13,898	–	7,306	21,204

13. Property, plant and equipment (continued)

(b) Revaluation of freehold land and freehold buildings

Freehold land and freehold buildings are required by the Group to be externally revalued every three years at minimum. In addition to this, Indonesian freehold land and freehold buildings are required to be externally revalued every 12 months in order to meet lending requirements stipulated by their finance provider.

Fair value is the amount for which the assets could be exchanged between a knowledgeable willing buyer and a knowledgeable willing seller in an arm's length transaction as at the valuation date. Fair value is determined by direct reference to recent market transactions on arm's length terms for land and buildings comparable in size and location to those held by the Group, and to market based yields for comparable properties.

In 2022, the Group engaged KJPP Jimmy Prasetyo & Rekan, accredited independent valuers to determine the fair value of its Indonesian land and buildings. The effective date of the valuation was 30 June 2022 and fair value was determined as \$2,347,391.

In 2022, the Group engaged Herron Todd White, accredited independent valuers to determine the fair value of its Australian land and buildings respectively. The effective date of the valuation was 30 June 2022 and fair value was determined as \$17,800,000.

There has been no change in the valuation technique in current or prior period.

(c) Carrying amounts if land and buildings were measured at cost less accumulated depreciation and impairment

If land and buildings were measured using the cost model the carrying amounts would be as follows:

In thousands of dollars	Consolidated	
	2022 Freehold land and buildings	2021 Freehold land and buildings
Cost	7,028	7,048
Accumulated depreciation and impairment	(2,524)	(2,249)
Net carrying amount	4,504	4,799

(d) Leased assets

'Property, plant and equipment' comprise of owned and leased assets that do not meet the definition of investment property.

In thousands of dollars	Note	Consolidated	
		2022	2021
Property, plant and equipment owned		26,046	20,577
Right-of-use assets		692	627
	14(a)	26,738	21,204

Right-of-use assets in each category is shown below:

In thousands of dollars	Consolidated			
	Freehold land and buildings	Leasehold improvements	Plant and equipment	Total
Balance at 1 July 2021	182	–	445	627
Additions	42	–	473	515

14. Intangible Assets

In thousands of dollars	Consolidated	
	2022	2021
Cost	634	514
Accumulated depreciation and impairment	–	–
Net carrying amount	634	514

The Group is currently investing in the further development of their existing enterprise resource planning system. These developments were completed in July 2022 and the new system is currently scheduled to go-live in October 2022.

15. Share-based payment plans

Long Term Incentives (LTI) Plan

The LTI program has been designed to align the remuneration received by executive directors and senior managers with the creation of shareholder wealth.

Consequently LTI grants are only made to executives who are in a position to influence shareholder wealth and thus have the opportunity to influence the company's performance against the relevant long term performance hurdles.

Structure

At the 2019 Annual General Meeting, an LTI plan was renewed for LTI grants to executives in the form of share rights.

For grants prior to 2022, those rights were granted in two equal parts. The first part is based on retention and requires the holder remain an employee for three years from grant date. The second part is based on delivering superior long-term performance as measured by Return on Equity ("ROE"), with each grant of rights divided into three equal tranches. For each tranche, actual ROE is measured against a budget ROE and a stretch ROE as determined annually by the Board in respect of the forthcoming year. The proportion of the rights which vest depend on where within this range the Group performs, with 100% vesting on achieving the stretch ROE and no rights

vesting if actual ROE is less than 90% of the budgeted ROE. For the 2022 year the stretch ROE was set at 115% of the budget ROE. Any rights to which the employee may become entitled on achieving the performance criteria, are still subject to the three year retention criteria before they can vest.

Any share rights which do not vest, as a result of the relevant performance condition not being satisfied, lapse. If the holder leaves the business, the unvested rights lapse on the leaving date unless the Board determines otherwise. In the event of a change in control of the Group, the vesting date will generally be brought forward to the date of change of control and share rights will vest subject to performance over this shortened period, subject to ultimate Board discretion.

For grants in 2022, these rights are granted are based on delivering superior long-term performance as measured by Return on Invested Capital ("ROIC") over a three year performance period, determined by the Board in respect of each forthcoming three year period. The rights which vest depend on achieving this target ROIC, with 100% vesting on achieving the ROIC and no rights vesting if actual ROIC is less than the target ROIC. Any rights to which the employee may become entitled on achieving the performance criteria, are still subject to being employed by Bisalloy for the whole performance period.

Once vested a holder may exercise their share rights and be allocated a fully paid ordinary share of Bisalloy at no cost to the employee or the equivalent in cash at the Board's discretion.

During the 30 June 2022 financial year, 217,905 share rights were awarded to executives under this scheme.

15. Share-based payment plans (continued)

The share rights have been valued by Mercer (Australia) Pty Ltd. A fair value expressed as a value per share right has been determined as at the grant date for each grant of rights. The rights have been valued according to a discounted cash flow (DCF) methodology. The share price at valuation date and a 3.9% dividend yield for Grant 15 and a 5.0% dividend yield for Grants 17, 18 and 19 (based on historic and future estimates at the time) formed the basis of the valuation. Refer to note 28(n) for further details on the valuation methodology.

The following table lists the valuation outputs for outstanding grants as at 30 June 2022:

	Expiry term of three years	
	Value of one right	Proportion of rights that are outstanding
Grant 15	\$0.82	94.26%
Grant 17	\$1.52	100.00%
Grant 18	\$1.43	100.00%
Grant 19	\$1.43	100.00%

The fair value of the performance rights granted is brought to account as an expense in the profit and loss over the three year vesting period. The following table shows the number of rights outstanding during the year and in the previous year. The expense recognised in the statement of comprehensive income in relation to share based payments is disclosed in note 4(d).

2. The grant date shown is the date of the initial award. However, the 52,742 balance at 30 June 2022 still remains subject to shareholder approval at the upcoming AGM and the fair value determined as at 30 June 2022 is \$1.52.

The weighted average remaining contractual life for the share rights outstanding as at 30 June 2022 is 1.53 years (2021: 1.33 years).

Share Rights Plan

The net amount entered in the Profit or Loss in relation to the above for the current year was a credit of \$153,545 (2021: debit \$271,285).

16. Pensions and other post-employment benefit plans

Superannuation commitments

The Group contributes to externally managed defined contribution superannuation plans, as well as an unfunded defined benefit plan in Indonesia and a defined benefit plan in Thailand. The contributions are defined by the terms of each individual employee's employment.

17. Trade and other payables

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
Current		
Trade payables	17,883	15,153
Other payables and accruals	3,005	2,428
Goods and services tax	–	256
	20,888	17,837

Trade payables are non-interest bearing and are normally settled on 30 day terms.

Other payables and accruals are non-interest bearing and have an average term of three months.

Fair value

Due to the short term nature of these payables, their carrying value is assumed to approximate their fair value.

Interest rate, foreign exchange and liquidity risk

Information regarding interest rate, foreign exchange and liquidity risk exposure is set out in note 18.3.

18. Financial assets and financial liabilities

*The Group had previously recorded the net position of premium finance. The gross figures are now reported. This increases Loans and borrowings by \$416k.

(i) Bisalloy Steel Group Limited's facility with Westpac Banking Corporation is secured by a fixed and floating charge over all assets of the Closed Group. The facility is subject to usual provisions such as negative covenants and various undertakings, including compliance with an equity ratio covenant, a leverage ratio covenant and an interest coverage ratio. The bank bill facility has a two-year term, whilst the other facilities are ongoing. The drawn invoice finance facility balance is limited to the value of the available collateral being eligible receivables and fluctuates daily. The facility is linked to a variable interest rate plus a fixed margin. The average variable interest rate for the year is 2.84% (2021: 3.53%).

(ii) The bank overdraft facility available to its Thailand based subsidiary is secured by a guarantee from Bisalloy Steel Group Limited.

(iii) The revolver facility and Letter of Credit facility available to its Indonesian based subsidiary are secured by a charge over the assets of the Indonesian subsidiary and mature on 30 September 2022.

Total non-current	-	-

18.3 Financial risk management

Overview

The Group has exposure to the following risks from their use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

The Board is responsible for ensuring that risks, and also opportunities, are identified on a timely basis and that the Group's objectives and activities are aligned with the risks and opportunities identified by the Board.

The Board has established an Audit and Risk Committee comprising non-executive directors, whose meetings are also attended by the executive directors. In addition sub-committees are convened as appropriate in response to issues and risks identified by the Board, and the sub-committee further examines the issue and reports back to the Board.

The Board has a number of mechanisms in place to ensure that management's objectives and activities are aligned with the risks identified by the Board. These include the following:

- Board approval of a strategic plan, which encompasses the Group's vision, mission and strategy statements, designed to meet stakeholders' needs and manage business risk.
- Implementation of Board approved operating plans and budgets and Board monitoring of progress against these budgets, including the establishment and monitoring of KPIs of both a financial and non-financial nature.
- The establishment of committees to report on specific business risks, including for example, matters such as environmental issues and concerns and occupational health and safety.
- The Board reviews financial risks such as the Group's liquidity, currency, interest rate and credit policies and exposures and monitors management's actions to ensure they are in line with Group policy.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer fails to meet its contractual obligations, and arises principally from the Group's receivables from customers.

Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Group has a narrow customer base and has the potential to be exposed to credit risk on a specific customer.

A credit policy is in place, the objective of which is:

- To ensure all credit worthiness checks are carried out prior to opening new credit accounts and appropriate authorisations obtained;
- To ensure the approved credit limit is appropriate to the inherent risk of trading with any particular customer;
- To ensure all orders are converted into cash within trading terms;
- To minimise late payments and any potential bad debts through the constant application of sound commercial debtor management on a continuing basis;

Goods are sold subject to retention of title clauses that permit the Group to reclaim stock from a customer up to the value of monies owed in the event:

- Official Manager
- Receiver and Manager
- Administrator
- Liquidator

or similar business administration is appointed to the customer's business.

The Group performs an impairment analysis at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e. geographical region and coverage by insurance). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic

Notes to the Consolidated Financial Statements (continued)

conditions. The maximum exposure to credit risk for these financial assets is limited to their carrying amounts as disclosed in note 10. The Group does not hold collateral as security.

The Group evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

The Group has for a number of years had credit insurance in place for Australian sales, and Indonesian local sales.

Set out below is the information about the credit risk exposure on the Group's trade receivables and contract assets using a provision matrix:

30 June 2022

In thousands of dollars	Current	Trade Receivables					Total
		<=30 days	30-60 days	61-90 days	>91 days	>91 days*

Expected Credit Loss	6	3	1	1	1	222	234

*Indonesian and Thai receivables with no insurance coverage.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities as and when they fall due without incurring unacceptable losses or risking damaging the Group's reputation.

On 17 December 2021 the Group entered into a new facility agreement with Westpac Banking Corporation. The facility comprises a \$6.2m bank bill facility (decreased from \$7.0m), a \$12m invoice finance facility and a \$9m trade finance facility. The drawn invoice finance facility balance is limited to the value of the available collateral being eligible receivables and fluctuates daily. Eligible trade receivables, eligible inventory, plant and equipment and real property constitute available collateral. At reporting date, the carrying amount of assets pledged as collateral was \$86.2m (2021: \$65.0m).

In addition to the eligible collateral, the Group has several general and financial undertakings which it must comply with including an Equity Ratio covenant, a Leverage Ratio covenant and an Interest Cover Ratio covenant.

Due to the nature of the facility, cashflow is managed on a daily basis, comparing actual against forecast collateral, receipts and payments. Each month a complete review is undertaken of the projected daily cashflow.

Contractual maturity of financial liabilities

The table below reflects all contractually fixed payments for settlement, repayments and interest resulting from recognised financial liabilities, including derivative financial instruments as at 30 June 2022.

For derivative financial instruments the market value is presented, whereas for the other obligations the respective undiscounted cash flows for the respective upcoming fiscal years are presented. Cash flows for financial assets and liabilities without fixed amount or timing are based on the conditions existing at 30 June 2022.

Management analysis of financial assets and liabilities

The table below is based on management expectations of the timing of cash inflows and outflows from its financial assets and liabilities which reflect a balanced view of cash inflows and outflows. Net settled derivatives comprise forward exchange contracts that are used to hedge future sales and purchase commitments.

Leasing obligations, trade payables and other financial liabilities mainly originate from the financing of assets used in our ongoing operations such as property, plant, equipment and investments in working capital (e.g., inventories and trade receivables). These assets are considered in the Group's overall liquidity risk.

To monitor existing financial assets and liabilities as well as to enable an effective controlling of future risks, the Group has established comprehensive risk reporting covering its operation that reflects expectations of management of expected settlement of financial assets and liabilities.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and commodity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising return.

Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in different currency from the Group's functional currency) and the Group's net investment in foreign subsidiaries.

The Group manages its foreign currency risk by hedging transactions that are expected to occur within a maximum twelve-month period. The Group generally adopts a policy of covering exchange exposures related to purchases and sales of product at the time they are incurred or committed.

Throughout the year the foreign exchange risk has been actively managed through periodic risk assessments. The objective of these assessments is to stratify foreign exchange exposure into risk categories and enable available hedge facilities to be applied to those assessed as higher risk.

Risk assessments take into account macroeconomic lead indicators such as interest rate differentials, inflation rate differentials and externally published market analytical data to determine the likelihood of movement in exchange rates. The likelihood is applied to the Group's foreign currency exposure to determine financial impact on a sensitivity basis.

Sensitivity analysis

The following table summarises the sensitivity of financial instruments held at balance date to possible movements in the exchange rate of the Australian dollar to foreign currencies, with all other variables held constant. The +10%/-10% sensitivity is based on reasonably possible changes, over a financial year, using the observed range of actual historical rates for the preceding 5 year period, along with consideration for current market trends.

18. Financial assets and financial liabilities (continued)

18.3 Financial risk management (continued)

	Post tax profit Higher / (Lower)		Effect on equity Higher / (Lower)	
In thousands of dollars	2022	2021	2022	2021
Sensitivity to USD				
Consolidated				
AUD/USD +10%	(77)	(144)	-	-
AUD/USD -10%	194	177	-	-

Interest rate risk

The Group's borrowing facility has a variable interest rate attached to it. The Group monitors the underlying interest rate outlook and considers the use of interest rate derivatives (principally swaps) to manage the exposure to interest rate fluctuations.

The Group's exposure to market interest rates relates primarily to the Group's interest bearing borrowings. At 30 June 2022, the Group had the following mix of financial assets and liabilities exposed to variable interest rates that are not designated in cash flow hedges.

	Consolidated	
In thousands of dollars	2022	2021
Financial Assets		
Cash and cash equivalents less cash on hand	1,833	2,345
Financial Liabilities		
Bank loans	(10,458)	(9,731)
Net exposure	(8,625)	(7,386)

Interest rate sensitivity analysis

The following table summarises the sensitivity of the fair value of financial instruments held at the balance date following a movement in interest rates, with all other variables held constant. The +100/-100 basis points sensitivity is based on reasonably possible changes over a financial year, using the observed range of actual historical rates for the preceding 5 year period.

	Post tax profit Higher / (Lower)		Other Comprehensive income Higher / (Lower)

Consolidated				
+1% (100 basis points)	(60)	(49)	-	-
- 1% (100 basis points)	60	49	-	-

Commodity risk

The Group does not hedge for movements in the underlying price of product but manages commodity risk within the parameters of the markets within which it trades.

Assets/Liabilities Measured at Fair value

The Group uses various methods in estimating the fair value of assets and liabilities. The methods comprise:

Level 1 – the fair value is calculated using quoted prices in active markets.

Level 2 – the fair value is calculated using inputs other than quoted prices included in Level 1 that are observable for the

asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3 – the fair value is estimated using inputs for the asset or liability that are not based on observable market data.

The fair value of the assets and liabilities as well as the methods used to estimate the fair value are summarised in the table below. For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Forward currency contracts – Fair value hedges	–	–
	–	–
Current Liabilities		
Forward currency contracts – Fair value hedges	95	33
	95	33

Instruments used by the Group

Derivative financial instruments are used by the Group in the normal course of business in order to hedge exposure to fluctuations in foreign exchange rates.

Forward currency contracts

Inventory purchases

During the year ended 30 June 2022, in order to protect against exchange rate movements and to manage the inventory costing process, the Group had entered into forward exchange contracts to purchase \$EUR 345k (2021: \$EUR 0k) and \$AUD 4.2m (2021: \$AUD 4.7m). These contracts hedged highly probable forecasted purchases and they were timed to mature when payments are scheduled to be made.

Fair value hedges

As at balance date, the details of outstanding contracts in respect of fair value hedges were:

In thousands of dollars	Average exchange rate			
	30 June 2022	30 June 2021	30 June 2022	30 June 2021
Buy EUR \$ Sell AUD \$	–	–	–	–
Buy AUD \$ Sell IDR \$	(6)	(35)	10,209.0000	11,297.0000
Buy AUD \$ Sell THB \$	–	2	–	24.3000

Sales invoices

During the year ended 30 June 2022, in order to protect against exchange rate movements and to manage the receivables process, the Group had entered into forward exchange contracts to sell \$USD 4.8m (2021: \$USD 1.4m). These contracts hedged highly probable forecasted receipts and they were timed to mature when payments are scheduled to be received.

Fair value hedges

As at balance date, the details of outstanding contracts in respect of fair value hedges were:

In thousands of dollars	Average exchange rate			
	30 June 2022	30 June 2021	30 June 2022	30 June 2021
Buy AUD \$ Sell USD \$	(89)	–	0.6889	–

22. Contributed equity and reserves

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021
(a) Ordinary shares, issued and fully paid	14,507	12,886

Fully paid ordinary shares carry one vote per share and carry the right to dividends. Shares have no par value.

	Number of Shares	2022 \$'000	Number of Shares	2021 \$'000
(b) Movements in shares on issue				
Balance at 1 July	45,967,851	12,886	45,418,007	12,318
New shares issued under Dividend Reinvestment Plan	932,880	1,621	449,844	568
Exercise of performance rights	187,946	–	100,000	–
Balance at 30 June	47,088,677	14,507	45,967,851	12,886

(c) Capital management

When managing capital, the Group's objective is to maintain optimal returns to shareholders and benefits for other stakeholders. The Group also aims to maintain a capital structure that delivers the lowest cost of capital available to its operations.

The Group adjusts the capital structure to take advantage of favourable costs of capital or high returns on assets. As the economic conditions change, the Group may change the amount of dividends to be paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

No changes were made in the objectives, policies or processes for managing capital during the years ended 30 June 2022 and 2021.

The Group monitors capital through the gearing ratio (net debt/ total equity plus net debt) and currently targets a gearing ratio of between 0% and 35%. The Group includes within net debt interest bearing loans and borrowings less cash and cash equivalents. The gearing ratios based on continuing operations at 30 June 2022 and 2021 were as follows:

In thousands of dollars	Consolidated	
	Year Ended 30 June 2022	Year Ended 30 June 2021* Restated
Total borrowings	10,458	9,731
Less cash and cash equivalents	(1,834)	(2,347)
Net debt	8,624	7,384
Total equity	64,286	48,414
Total capital	72,910	55,798
Gearing ratio	12%	13%

*The Group had previously recorded the net position of premium finance. The gross figures are now reported. This increases Total borrowings by \$416k.

The Group is not subject to any externally imposed capital requirements.

22. Contributed equity and reserves (continued)

Nature and purpose of reserves

Employee equity benefits reserve

This reserve is used to record the value of share-based payments provided to employees and directors as part of their remuneration. Refer to note 15 for further details of these plans.

Foreign currency translation reserve

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.

Cash flow hedge reserve

This reserve records the portion of the gain or loss on a hedging instrument in a cash flow hedge that is determined to be an effective hedge.

Asset Revaluation Reserve

The asset revaluation reserve is used to record increases and decreases in the fair value of land and buildings (net of tax) to the extent that they offset one another. The reserve can only be used to pay dividends in limited circumstances.

Equity Settlement Reserve

The equity settlement reserve records the net difference between payment for shares upon the exercise of performance rights under the LTIP and the amount expensed in the profit and loss and recorded in the employee equity benefits reserve over the three year vesting period.

Other Reserve

Relates to actuarial losses from defined benefit pensions.

23. Commitments and contingencies

In thousands of dollars	Consolidated	
	30 June 2022	30 June 2021

Entities subject to class order relief

Pursuant to Class Order 2016/785, relief has been granted to Bisalloy Steels Pty Limited from the Corporations Act 2001 requirements for preparation, audit and lodgement of their financial reports. As a condition of the Class Order, Bisalloy Steel Group Limited and Bisalloy Steels Pty Limited (the "closed" Group) entered into a Deed of Cross Guarantee on the 18th April 2002. The effect of the deed is that Bisalloy Steel Group Limited has guaranteed to pay any deficiency in the event of winding up of the controlled entity. The controlled entity has also given a similar guarantee in the event that Bisalloy Steel Group Limited is wound up.

The consolidated statement of profit or loss and statement of financial position of the entities which are members of the "Closed Group" are as follows:

a) Basis of preparation

The financial report is a general purpose financial report, which has been prepared in accordance with the Australian Accounting Standards (AASBs) adopted by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*. The financial report complies with International Financial Reporting Standards (IFRS) adopted by the International Accounting Standards Board (IASB). The financial report has also been prepared on a historical cost basis, except for land and buildings classified as property, plant and equipment and derivative financial instruments, which are measured at fair value.

The Company is of a kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 and in accordance with that Instrument, all financial information presented in Australian Dollars has been rounded to the nearest thousand unless otherwise stated.

The consolidated financial statements provide comparative information in respect of the previous period.

Comparative information

Comparative information is consistent with the current years presentation.

b) Basis of consolidation and investments in joint venture

The consolidated financial statements comprise the financial statements of the Company, being Bisalloy Steel Group Limited, and its subsidiaries ("the Group") as at the reporting date.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary.

The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. Adjustments are made to bring into line any

dissimilar accounting policies that may exist. All intercompany balances and transactions, including unrealised profits arising from intra-group transactions, have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered.

Non-controlling interests represent the portion of profit or loss and net assets in subsidiaries not held by the Group, and are presented separately in the consolidated statement of comprehensive income and within equity in the consolidated statement of financial position, separately from the equity of the owners of the parent.

The Group has an interest in a joint venture, which is a jointly controlled entity, whereby the venturers have a contractual arrangement that establishes joint control over the economic activities of the entity. The Group's investment in the joint venture is accounted for using the equity method and is not part of the consolidated Group.

Under the equity method, the investment in the joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the joint venture since the acquisition date. Goodwill relating to the joint venture is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

The statement of profit or loss and other comprehensive income reflects the Group's share of the results of operations of the joint venture. When there has been a change recognised directly in the equity of the joint venture, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the joint venture are eliminated to the extent of the interest in the joint venture.

The Group's share of profit of the joint venture is shown on the face of the statement of profit or loss and other comprehensive income.

In the application of the Group's accounting policies as described below, management is required to make judgements, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates and underlying assumptions are reviewed on an ongoing basis.

c) Significant accounting judgements, estimates and assumptions

In applying the Group's accounting policies, management have not made any significant accounting judgements which affect the amounts recognised in the financial statements.

Significant accounting estimates and assumptions

The carrying amounts of certain assets and liabilities are often determined based on estimates and assumptions of future events. The key estimates and assumptions that have a significant risk of causing material adjustment to the carrying

28. Summary of significant accounting policies (continued)

c) Significant accounting judgements, estimates and assumptions (continued)

amounts of certain assets and liabilities within the next annual reporting period are:

Property, plant and equipment

The Group measures the fair value of land buildings by reference to valuations performed at reporting date. The fair value is determined by an external valuer every three years, unless determined by Directors' valuation that the fair value has moved significantly or at the request of a finance provider. The valuation method is detailed in note 18.3.

Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees (including directors and other senior executives) by reference to the fair value at the date on which they are granted. The fair value is determined by an external valuer using discounted cash flow models using the assumptions dealt with in note 28(n).

The Group measures the cost of cash-settled transactions with employees (including directors and other senior executives) by reference to the fair value at the reporting date. The fair value is determined by reference to the price of shares of the issuer.

d) Operating segments

An operating segment is a component of an entity that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity), whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available. This includes start-up operations which are yet to earn revenues. Management will also consider other factors in determining operating segments such as the existence of a line manager and the level of segment information presented to the Board of directors.

Operating segments have been identified and based on the information provided to the chief operating decision makers – being the executive management team.

The Group aggregates two or more operating segments when they have similar economic characteristics, and the segments are similar in each of the following respects:

- nature of the products and services,
- nature of production processes,
- type or class of customer for their products and services,
- methods use to distribute their products or provide their services, and if applicable
- nature of the regulatory environment.

Operating segments that meet the quantitative criteria as prescribed by AASB 8 are reported separately. However, an operating segment that does not meet the quantitative criteria

is still reported separately where information about the segment would be useful to users of the financial statements.

e) Taxation

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences except:

- when the deferred income tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- in respect of taxable temporary differences associated with investments in subsidiaries, associates or interests in joint ventures, when the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry-forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- in respect of deductible temporary differences associated with investments in subsidiaries, associates or interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

28. Summary of significant accounting policies (continued)

e) Taxation (continued)

be available against which the temporary difference can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

Bisalloy Steel Group Limited and its wholly-owned Australian controlled entities implemented the tax consolidation legislation as of 1 July 2003.

The head entity, Bisalloy Steel Group Limited and the controlled entities in the tax consolidated group continue to account for their own current and deferred tax amounts. The Group has applied the Group allocation approach in determining the appropriate amount of current taxes and deferred taxes to allocate to members of the tax consolidated group.

In addition to its own current and deferred tax amounts, Bisalloy Steel Group Limited also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused losses.

Assets or liabilities under tax funding arrangements with the tax consolidation entities are recognised as amounts receivable from or payable to other entities in the Group. Any difference between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

f) Cash and cash equivalents

Cash and short term deposits in the statement of financial position and the cash flow statement is comprised of cash at bank and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

g) Trade and other receivables

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of

time is required before payment of the consideration is due). Refer to accounting policies of financial assets in note 28(p) Financial instruments.

h) Inventories

Raw materials, work in progress and finished goods are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Raw materials	• Purchase cost is on a weighted average cost basis.
Work in progress and finished goods	• Cost of direct materials, labour and an appropriate proportion of manufacturing overheads is based on normal operating capacity, but excluding borrowing costs.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

i) Property, plant and equipment

Plant and equipment is stated at historical cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing parts that are eligible for capitalisation when the cost of replacing the parts is incurred. Similarly, when each major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement only if the recognition criteria are satisfied. All other repairs and maintenance are recognised in the profit or loss as incurred.

Land and buildings are measured at fair value using the revaluation model, less accumulated depreciation on buildings and any impairment losses recognised after the date of the revaluation. Valuations are performed every three years, or sooner should there be a significant change in market conditions or other market requirements such as in Indonesia where land and buildings are revalued every 12 months as a result of lending requirements, to ensure that the fair value of a revalued asset does not differ materially from its carrying amount.

Depreciation is calculated on a straight-line basis over the estimated useful life of the specific assets as follows:

• Land	not depreciated
• Buildings	50 years
• Plant and equipment	1 – 20 years
• Leasehold improvements	5 – 10 years or lease life if shorter

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted prospectively if appropriate, at each financial year end.

28. Summary of significant accounting policies (continued)

i) Property, plant and equipment (continued)

Revaluations of land and buildings

Any revaluation increment is credited to the asset revaluation reserve in equity, except to the extent that it reverses a revaluation decrement for the same asset previously recognised in profit or loss, in which case the increment is recognised in profit or loss.

Any revaluation decrement is recognised in profit or loss, except to the extent that it offsets a previous revaluation increment for the same asset, in which case the decrement is debited directly to the asset revaluation reserve to the extent of the credit balance existing in the revaluation reserve for that asset.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amounts of the assets and the net amounts are restated to the revalued amounts of the assets.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the profit or loss.

Upon disposal or derecognition, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit and loss in the period the item is derecognised.

j) Intangible assets

Recognition and measurement

Expenditure on research activities is recognised in profit or loss as incurred.

Development expenditure is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Group intends to and has sufficient resources to complete development and to use or sell the asset. Otherwise, it is recognised in profit or loss as incurred. Subsequent to initial recognition, development expenditure is measured at cost less accumulated amortization and any accumulated impairment losses.

Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

Amortisation

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values using the straight-

line method over their estimated useful lives and is generally recognised in profit or loss.

The estimated useful life for current periods for development costs is 3 years.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

k) Trade and other payables

Trade and other payables are carried at amortised cost and represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services.

l) Contributed equity

Ordinary share capital is recognised at the fair value of the consideration received by the Company. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity, net of tax, as a reduction of the share proceeds received.

m) Employee benefits

Liabilities arising in respect of short-term employee benefits such as wages, salaries, annual leave and sick leave represent the amount which the entity has a present obligation to pay resulting from employees' services provided up to the balance date. Liabilities in respect of short-term employee benefits are measured at their nominal amounts.

Long-term employee benefit liabilities such as long service leave represent the present value of the estimated future cash outflows to be made by the employer resulting from employees' services provided up to the balance date. Long-term employee benefit liabilities are measured at their present values using corporate bond rates which most closely match the terms of maturity of the related liabilities.

In determining the employee benefit liabilities, consideration has been given to future increases in wage and salary rates, and the Group's experience with staff departures. Related on-costs have also been included in the liability.

The Group contributes to defined contribution superannuation plans, as well as an unfunded defined benefit plan in Indonesia and a defined benefit plan in Thailand.

n) Share-based payment transactions

Employees (including directors and other senior executives) of the Group receive remuneration in the form of a grant of Rights, whereby employees render services as consideration for equity instruments ('equity-settled transactions'). There is currently a Share Rights Plan in place to provide these benefits. If the issue of shares in the Board's opinion does not achieve the desired outcome, then the Board may determine to satisfy the entitlement to Shares under a Vested Right in the form of cash rather than Shares. In recent years, there have been a number

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

28. Summary of significant accounting policies (continued)

n) Share-based payment transactions (continued)

of instances in which settlement has taken the form of 50% equity and 50% cash ('cash-settled transactions').

Equity-settled transactions

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date on which they are granted. The fair value is determined by an external valuer using a discounted cash flow methodology. In valuing equity-settled transactions, no account is taken of any performance conditions, other than conditions linked to the price of the shares of the issuer ('market conditions'), if applicable.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ('vesting date').

Cash-settled transactions

The cost of cash-settled transactions with employees is measured by reference to the fair value at the reporting date and ultimately at settlement. The fair value is determined by reference to the price of the shares of the issuer ('market conditions').

The cost of cash-settled transactions is recognised, together with a corresponding increase in liability, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ('vesting date').

The cumulative expense recognised for both equity-settled and cash-settled transactions at each reporting date until vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. This estimate is formed based on the best available information at balance date. The statement of profit or loss and other comprehensive income charge or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period.

No expense is recognised for Rights that do not ultimately vest. Any Rights that do not become vested Rights, lapse.

The dilutive effect, if any, of outstanding Rights is reflected as additional share dilution in the computation of diluted earnings per share.

o) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense related to

any provision is presented in the statement of comprehensive income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a borrowing cost.

p) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15. Refer to the accounting policies in note 28(r) Revenue from contracts with customers.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)

28. Summary of significant accounting policies (continued)

p) Financial instruments (continued)

- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

Financial assets at amortised cost (debt instruments)

This category is the most relevant to the Group. The Group measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest rate (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost include trade receivables.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include derivative assets which are mandatorily required to be measured at fair value. Derivatives are classified as held for trading unless they are designated as effective hedging instruments.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when the rights to receive cash flows from the asset have expired.

Impairment

Further disclosures relating to impairment of financial assets are also provided in the following notes:

- Significant accounting judgements, estimates and assumptions Note 28(c)
- Trade and other receivables Note 28(g)

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of

collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Group considers a financial asset in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

28. Summary of significant accounting policies (continued)

p) Financial instruments (continued)

Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Group has not designated any financial liability as at fair value through profit or loss.

Financial liabilities at amortised cost

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

All loans and borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

This category generally applies to interest-bearing loans and borrowings. For more information, refer to Note 18.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

q) Goods and services tax

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), or GST equivalents, such as Value Added Tax, except:

- where the amount of GST incurred is not recoverable from the Australian Tax Office (ATO), or equivalent foreign organisations. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expenses;

- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the ATO is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis. The GST components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the ATO are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

r) Revenue from contracts with customers

The Group is in the business of manufacturing and selling quench and tempered steel plates. Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has concluded that it is the principal in its revenue arrangements, as it controls the goods or services before transferring them to the customer.

Sale of goods

Revenue from the sale of steel plates is recognised at the point in time when control of the asset is transferred to the customer, which is on delivery of the goods for domestic sales, on invoice for Bill and Hold sales and on bill of lading for export sales. Revenue from the services of shipping and handling is recognised over time as the service is performed. The normal credit terms are 30 to 90 days upon end of month invoiced.

The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g., shipping). In determining the transaction price for the sale of goods, the Group considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer (if any).

(i) Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved. Some contracts for the sale of steel plates provide customers with a right of return and early settlement discounts. The rights of return and early settlement discounts give rise to variable consideration.

28. Summary of significant accounting policies (continued)

r) Revenue from contracts with customers (continued)

Early Settlement Discounts

The Group provides early settlement discounts to certain customers if the payment for the sale of goods is made within a specified period of time. The discounts are offset against amounts payable by the customer. To estimate the variable consideration to which it will be entitled, the Group applies the 'expected value method' to estimate the settlement discounts that will be issued. This method best predicts the amount of variable consideration to which the Group will be entitled. The Group then applies the requirements on constraining estimates of variable consideration that can be included in the transaction price.

(ii) Significant financing component

Generally, the Group receives payment for the sale of goods between 30 to 90 days after the goods have been delivered. Should a significant financing component exist, the Group will apply the practical expedient in AASB 15. Using this, the Group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less.

(iii) Non-cash consideration

The Group does not receive non-cash consideration for the sale of goods.

Contract balances

Contract Assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Trade Receivables

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section p) Financial instruments – initial recognition and subsequent measurement.

Contract Liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

s) Other Income

Interest income

Interest income is recognised as it accrues using the effective interest rate (EIR) method. The EIR is the rate that exactly discounts estimated future cash receipts over the expected life of the financial asset to the net carrying amount of the financial asset. Interest income is included in finance income in the statement of profit or loss and other comprehensive income.

Dividend income

Dividend income is recognised when the Group's right to receive the payment is established.

t) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of that asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Bisalloy Steel Group Limited does not currently hold qualifying assets but, if it did, the borrowing costs directly associated with this asset would be capitalised (including any other associated costs directly attributable to the borrowing and temporary investment income earned on the borrowing).

u) Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group uses the definition of a lease in AASB 16.

This policy is applied to contracts entered into, on or after 1 July 2020.

Group as a lessee

At inception or on reassessment of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease and non-lease component on the basis of their relative stand-alone prices. However, the Group has elected for all leases in which it is a lessee, not to separate non-lease components and will instead account for the lease and non-lease components as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

28. Summary of significant accounting policies (continued)

u) Leases (continued)

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if the that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of asset leased.

Lease payments included in the measurement of the lease liability comprise of the following:

- Fixed payments, included in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of where it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets in 'property, plant and equipment', the same line item as it presents underlying assets of the same nature that it owns and lease liabilities in 'lease liabilities' in the statement of financial position.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases, including IT equipment. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

v) Foreign currency translation

The Group's consolidated financial statements are presented in Australian dollars (A\$), which is the Company's functional and presentation currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currencies are initially recorded in the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the statement of financial position date.

All differences are taken to profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

The functional currency of the foreign operations is the currency in circulation in the country they each reside in. As at the reporting date, the assets and liabilities of these subsidiaries are translated into the Company's presentation currency (A\$) at the rate of exchange ruling at balance date, and their income statements are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation are recognised in the foreign currency translation reserve within equity. On disposal of a foreign entity, the deferred cumulative amount recognised in equity relating to that particular foreign operation is recognised in the statement of comprehensive income.

w) Earnings per share (EPS)

Basic EPS is calculated as net profit attributable to members, adjusted to exclude costs of servicing equity (other than dividends), divided by the weighted average number of ordinary shares, adjusted for any bonus element.

Diluted EPS is calculated as net profit attributable to members, adjusted for:

- costs of servicing equity (other than dividends);
- the after tax effect of dividends and interest associated with dilutive potential ordinary shares that have been recognised as expenses; and
- other non-discretionary changes in revenues or expenses during the period that would result from the dilution of potential ordinary shares divided by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element.

28. Summary of significant accounting policies (continued)

x) Derivative financial instruments and hedging

The Group uses derivative financial instruments such as forward currency contracts to hedge its risks associated with foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value on derivatives that do not qualify for hedge accounting are taken directly to net profit or loss for the year.

The fair value of forward currency contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles. The fair value of interest rate swap contracts is determined by reference to market values for similar instruments.

For the purpose of hedge accounting, hedges are classified as:

- fair value hedges: when hedging the exposure to changes in the fair value of a recognised asset or liability; or
- cash flow hedges: when hedging exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

Hedges that meet all the qualifying criteria for hedge accounting are accounted for as described below:

Cash Flow Hedges

The effective portion of the gain or loss on the hedging instrument is recognised directly in equity, while the ineffective portion is recognised in profit or loss.

Amounts taken to equity are transferred to the statement of profit or loss and other comprehensive income when the hedged transaction affects profit or loss, such as when hedged financial income or financial expense is recognised or when a forecast sale or purchase occurs. Where the hedged item is the cost of a non-financial asset or liability, the amounts taken to equity are transferred to the initial carrying amount of the non-financial asset or liability.

If the forecast transaction is no longer expected to occur, amounts previously recognised in equity are transferred to profit or loss. If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognised in equity remain in equity until the forecast transaction occurs. If the related transaction is not expected to occur, the amount is taken to profit or loss.

Fair Value Hedges

The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in the statement of profit or loss and other comprehensive income as a finance cost.

When an unrecognised firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognised as an asset or liability with a corresponding gain or loss recognised in profit or loss.

The Group discontinues fair value hedge accounting if the hedging instrument expires or is sold, terminated or exercised, the hedge no longer meets criteria for hedge accounting or the Group revokes the designation. Any adjustment to the carrying amount of a hedge financial instrument for which the effective interest method is used is amortised to the profit or loss. Amortisation may begin as soon as an adjustment exists and shall begin no later than when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged.

y) Fair Value Measurement

The Group measures financial instruments such as derivatives at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

Notes to the Consolidated Financial Statements (continued)

For the year ended 30 June 2022

28. Summary of significant accounting policies (continued)

x) Derivative financial instruments and hedging (continued)

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of the reporting period.

z) Changes in accounting standards

The accounting policies adopted in the preparation of the condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 30 June 2021, except for the adoption of new standards effective as of 1 July 2021. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

aa) Standards issued but not yet effective

A number of new standards are effective for annual periods beginning after 1 July 2021 and earlier application is permitted; however the Group has not early adopted the new or amended standards in preparing these consolidated financial statements. No new standard is considered to have a material impact on the Group.

Directors' Declaration

For the year ended 30 June 2022

In accordance with a resolution of the directors of Bisalloy Steel Group Limited, I state that:

In the opinion of the directors:

- a. the financial statements and notes of the consolidated entity are in accordance with the *Corporations Act 2001*, including:
 - (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2022 and of its performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*;
- b. the financial statements and notes also comply with International Financial Reporting Standards (AASB) as disclosed in note 28.
- c. there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.
- d. as at the date of this declaration, there are reasonable grounds to believe that the members of the Closed Group identified in Note 24 will be able to meet any obligations or liabilities to which they are or may become subject, by virtue of the Deed of Cross Guarantee.
- e. this declaration has been made after receiving the declarations required to be made to the Directors in accordance with section 295A of the *Corporations Act 2001* for the financial year ended 30 June 2022.

On behalf of the Board

Rowan Melrose

Independent Auditor's Report

For the year ended 30 June 2022

Independent Auditor's Report

To the shareholders of Bisalloy Steel Group Limited

Report on the audit of the Financial Report

Opinion

We have audited the **Financial Report** of Bisalloy Steel Group Limited (the Company).

In our opinion, the accompanying Financial Report of the Company is in accordance with the *Corporations Act 2001*, including:

- giving a true and fair view of the **Group's** financial position as at 30 June 2022 and of its financial performance for the year ended on that date; and
- complying with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The **Financial Report** comprises:

- Consolidated statement of financial position as at 30 June 2022;
- Consolidated statement of profit or loss and other comprehensive income, Consolidated statement of changes in equity, and Consolidated statement of cash flows for the year then ended;
- Notes including a summary of significant accounting policies
- Directors' Declaration.

The **Group** consists of the Company and the entities it controlled at the year-end or from time to time during the financial year.

Basis for opinion

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with these requirements.

PMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organisation. Liability limited by scheme approved under Professional Standards Legislation.

Key Audit Matters

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report of the current period.

This matter was addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Revenue from contracts with customers (\$117.8 million)

Refer to Note 2 to the Financial Report

The key audit matter	How the matter was addressed in our audit
Recognition of revenue is a key audit matter due to the: - Significance of revenue to the financial statements; and - Varying contract arrangements applicable to the Group with different points in time when control of the asset is transferred to the customer. In addition, the Group recognises revenue from the services of shipping and handling over time as the service is performed. This results in complex and judgemental revenue recognition from sale of goods and services of shipping and handling and therefore significant audit effort is required to gather sufficient audit evidence for revenue recognition. We also focused on the Group's assessment of the amount of revenue recognised from sale of goods with variable consideration which is highly probable of not reversing, as applicable. The Group's determination that variable consideration is highly probable requires a degree of estimation and judgement. This increased the audit effort we applied to gather sufficient audit evidence.	Our procedures included: - Obtaining an understanding of the Group's process for revenue recognition from sale of goods and services of shipping and handling. - Considering the appropriateness of the Group's accounting policies for the recognition and measurement of revenue, including variable consideration, against the requirements of AASB 15 <i>Revenue from Contracts with Customers</i>. - Selecting a sample of revenue transactions across varying contract arrangements applicable to the Group: - during the year, we tested the timing and amount of revenue recognised in comparison to underlying records including, the sales invoice, delivery docket and bank statement cash receipts; - we obtained direct sales confirmation from a sample of customers; - we focused on the year end cut-off. We evaluated the timing and amount of revenue recognised in comparison to underlying records including, terms and conditions in the underlying customer contract, sales invoice, delivery docket and bank statement cash receipts. - we evaluated the method applied by the Group to estimate the highly probable amount of the variable consideration against the specific contract terms. This included gathering underlying evidence in relation to the customer's early settlement discounts against the terms of the contract. We then recalculated the amount of variable consideration. We compared the recalculated amount to the amounts recorded by the Group as offsets to revenue.

Independent Auditor's Report (continued)

For the year ended 30 June 2022

	Assessing the appropriateness of disclosures in the financial statements using our understanding obtained from our testing and against the requirements of the accounting standards.
--	--

Other Information

Other Information is financial and non-financial information in Bisalloy Steel Group's annual reporting which is provided in addition to the Financial Report and the Auditor's Report. The Directors are responsible for the Other Information.

The Other Information we obtained prior to the date of this Auditor's Report was the Director's Report and Remuneration Report. The Chairman and Managing Director's Review, Review of Operations and Safety and ASX Additional Information are expected to be made available to us after the date of the Auditor's Report.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon, with the exception of the Remuneration Report and our related assurance opinion.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*;
- implementing necessary internal control to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error;
- assessing the Group's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in

accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at:

https://www.auasb.gov.au/admin/file/content102/c3/ar1_2020.pdf. This description forms part of our Auditor's Report.

Report on the Remuneration Report

Opinion

In our opinion, the Remuneration Report of Bisalloy Steel Group for the year ended 30 June 2022, complies with *Section 300A* of the *Corporations Act 2001*.

Directors' responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with *Section 300A* of the *Corporations Act 2001*.

Our responsibilities

We have audited the Remuneration Report included in pages 8 to 16 of the Directors' Report for the year ended 30 June 2022.

Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with *Australian Auditing Standards*.
