

Drilling Underway to Uncover a Tier-1 Nickel Sulphide Discovery in the East African Nickel Belt

**Paydirt Nickel
Conference**

5 & 6 October 2022 | ASX: ADD

Important Notice and Disclaimer

This presentation has been prepared by Adavale Resources Ltd (ASX:ADD). This presentation contains background information about ADD current at the date of this presentation. The presentation is in summary form, has not been independently verified and does not purport to be all inclusive or complete nor does it contain all the information that a prospective investor may require in evaluating a possible investment in ADD or its assets.

Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. Recipients of this presentation who decide to invest in ADD do so at their own risk.

This presentation is for information purposes only. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of securities in any jurisdiction. This presentation is not a prospectus and does not contain all of the information which would be required to be disclosed in a prospectus. This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This presentation does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek their own professional, legal, tax, business and/or financial advice when deciding if an investment is appropriate.

To the fullest extent permitted by law, ADD and its related bodies corporate, its directors, officers, employees and representatives (including its agents and advisers), disclaim all liability, take no responsibility for any part of this presentation, or for any errors in or omissions from this presentation arising out of negligence or otherwise and do not make any representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimates, forecasts, conclusions or other representations contained in this presentation.

This presentation contains forward looking statements concerning Adavale. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this presentation are based on Adavale's beliefs, opinions and estimates of Adavale as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of nickel, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws. No representation, warranty or undertaking, express or implied, is given or made by the Company that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur.

Competent Person Statement

The information in this release that relates to "exploration results" for the **Nickel** Project is based on information compiled or reviewed by **Mr David Dodd** of MSA, South Africa. Mr Dodd is a consultant for Adavale Resources Limited and is a member of the SACNASP. Mr Dodd has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration as well as to the activity that is being undertaking to qualify as a Competent Person under the ASX Listing Rules. Mr Dodd consents to this release in the form and context in which it appears.

The information in this release that relates to "exploration results" for the **Uranium** Project is based on information compiled or reviewed by **Mr Patrick Harvey** MAppSci, Australia. Mr Harvey is a consultant for Adavale Resources Limited and is a member of the AIG. Mr Harvey has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration as well as to the activity that is being undertaking to qualify as a Competent Person under the ASX Listing Rules. Mr Harvey consents to this release in the form and context in which it appears.

Why invest in Adavale?

Exposure to critical minerals - Nickel and Uranium

- Electrification and Decarbonisation

A dominant Nickel exploration portfolio in the East African Nickel Belt ("EANB")

- Poised to become an epicentre for nickel discovery and production in Tanzania

Success through dedicated methodology and a considered exploration program

- 32 new and untested large-scale Ni sulphide targets identified

Drilling program now underway

- RC/DD initially testing 7 priority Heli-EM targets areas
- Drill targets based on coincident ground-based gravity and Heli EM anomalies

A team with deep African experience and a track record of major discoveries in Nickel

Fully funded to execute imminent drill programs and ongoing exploration

- Recent placement and rights issue completed to raise ~\$3M

Board & Capital Structure

Grant Pierce

Non-Executive Chairman

Mining engineer with ED, NED, GM experience
Strong and long-standing affinity with Tanzania

David Riekie

Executive Director

Corporate experience, ASX roles (NED, MD, ED, CEO)
including Nickel, Uranium/Energy, African experience

John Hicks

Non-Executive Director

Accomplished Nickel Sulphide Geologist/Explorer, 15yrs of
GM level Geo/Explorer for ASX listed

Allan Ritchie

Chief Executive Officer

Experienced ASX/HKEx Energy and Resources CEO/ED/MD,
30+yr Investment Banking career

Leonard Math

Chief Financial Officer/ Company Secretary

Experienced Resources sector executive, ASX listed ED, CFO,
Coy Sec

Supply squeeze pushes nickel up 5% to 11-year high

Reuters

LONDON, Jan 19 (Reuters) - Nickel prices on Wednesday shot to their highest since 2011 as a supply shortage forced traders to pay huge premiums to get their hands on metal.

Wyloo to buy nickel miner Noront after BHP drops off from race

Reuters

6

Tanzania - Country Dynamics And Recent Nickel Focussed Actions

Tanzania as a destination

- Numerous projects for various minerals are progressing or in the pipeline for government consideration and approval
- Dedicated negotiation teams to progress projects
- Clear government ownership interest (16%) established

BHP has made a significant investment in Kabanga Nickel (equity/technology)

- US\$40m stage 1
- US\$10m technology
- US\$50 stage 2 milestone (scope for future commitments) to secure ~18% interest in Kabanga Nickel

Relevance and context

- BHP responsible for the original regional surveys 1990's (foundation for Kabanga discovery)
- Global relevance of Tanzanian Ni Sulphide deposits as a destination
- Signals changing sentiment - Tanzania as an investment destination
- Benefit to ADD of proximal green processing and mining operation/jurisdiction
- Significant local economic benefit current and ongoing anticipated

Kabanga Jirani and Luhuma – Dominant Position in East African Nickel Belt

Dominant nickel licence portfolio within the East African Nickel Belt of Tanzania

Dedicated methodology and considered exploration program has generated numerous priority Ni target areas

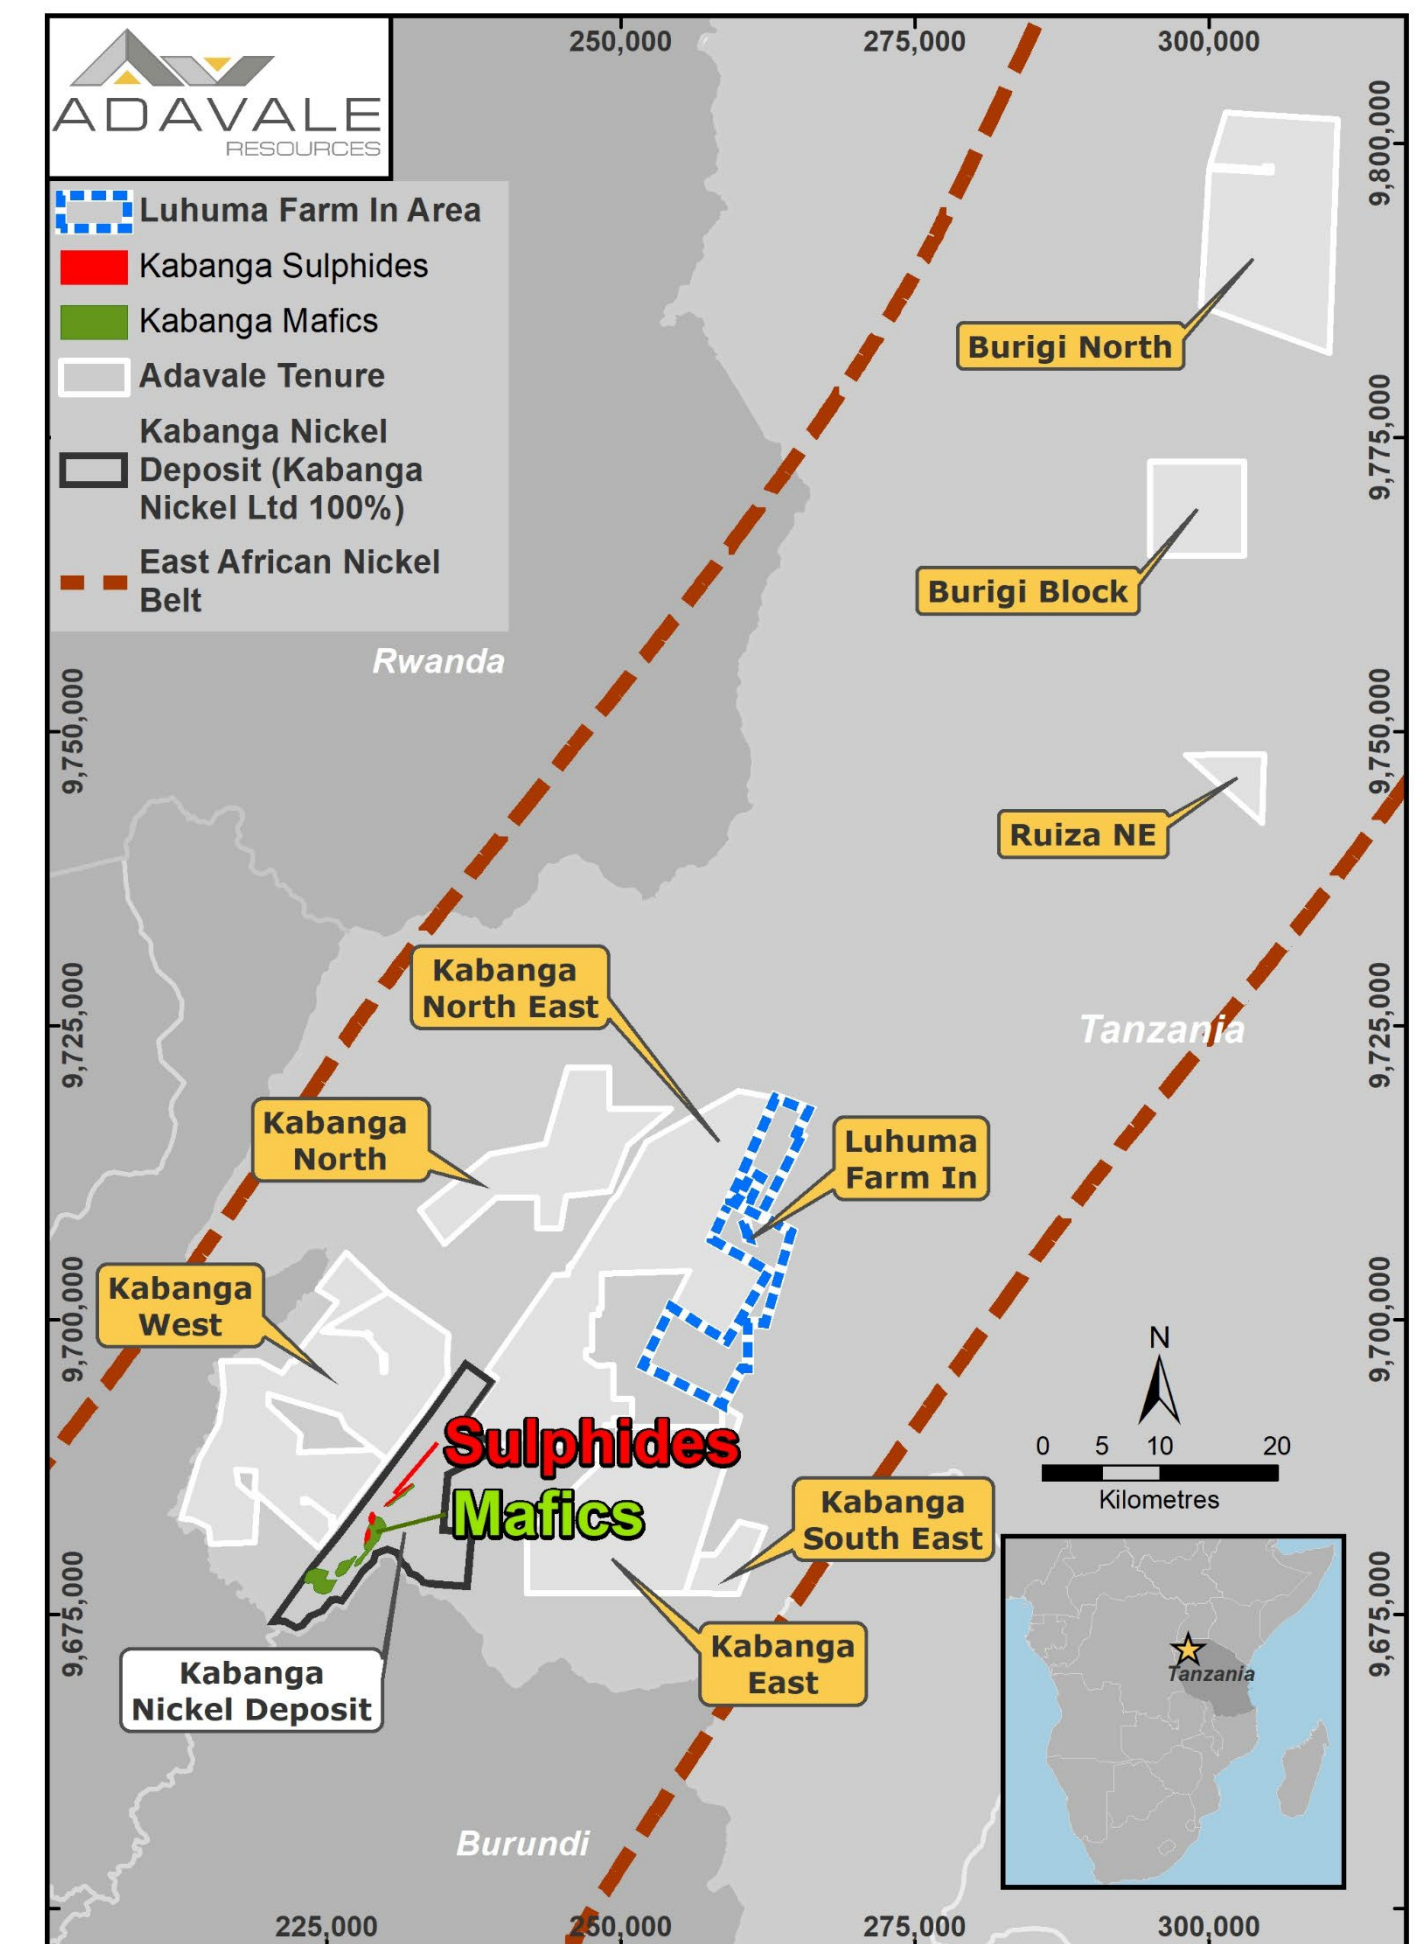

Adavale is poised to uncover a large-scale Ni sulphide discovery with a drilling program now underway

Licenses are adjacent and along strike from the world's largest undeveloped high-grade Kabanga nickel sulphide deposit, 58Mt @ 2.62% Ni

Portfolio Overview

- 100% owned Licences (exception Luhuma Farm –In) covers 1,267 km²
- Located along the Kabanga - Musongati mafic-ultramafic alignment within the Meso-Proterozoic Karagwe-Ankole Belt (age ~1350 to 1400Ma)
 - Prospective for Ni, Cu, Co, Cr and PGE's
- Notable setting similarity with:
 - Thomson Nickel Belt, Raglan and Voisey's Bay deposits in Canada
 - IGO's Nova in the Albany-Fraser Belt in Western Australia

Drilling is now targeting high-priority conductors

Adavale's Kabanga Jirani and Luhuma farm-in Licences

Methodical Approach to Maximize Probability of Drilling Success

***Objective: Discovery / Campaign focused resource drilling**

***OBJECTIVE**
Dedicated Drilling Campaign

Overview of CY 2022/23 Nickel Exploration Program

Ground Based/Field Survey(s) ✓

- Field checking, logistics/Soil sampling (orientation);
- Initial gravity and preliminary drilling

Regional Scale Gravity Survey ✓

- 1,000 sq kms- 32 anomalies identified

Prospect Ranking for EM survey ✓

- Hierarchy to identify priority survey areas (200 sq kms)

Heli Airborne EM (HEM) Survey ✓

- 9 HEM areas outlined

Prospect Ranking - Drilling ✓

- Hierarchy of priority and type of drilling recommended
- Coincident/correlation review - gravity targets + HEM signatures

Campaign Drilling Underway

- Targeted (RC/Diamond) over high priority prospects
- Assay results/pXRF readings

Exploration Methodology – Gravity a Key Exploration Insight

Target 7 Results in Nov 2021 signaled validation of revised exploration methodologies*

Outcomes achieved have enabled the ongoing refinement and reprioritisation of target selection criteria

Gravity data – target definition

Preliminary Drilling to confirmed source of the gravity anomalies (mafic-ultramafic intrusions)

Localised Deep penetrating EM survey coverage validates intrusions

Development and refinements of exploration culminated in **discovery of Target 7** (Kabanga NE) around known regional potential of Luhuma to prospect target identification

Justification to proceed with **Luhuma farm-in transaction – Feb 22**

Luhuma Nickel Corridor

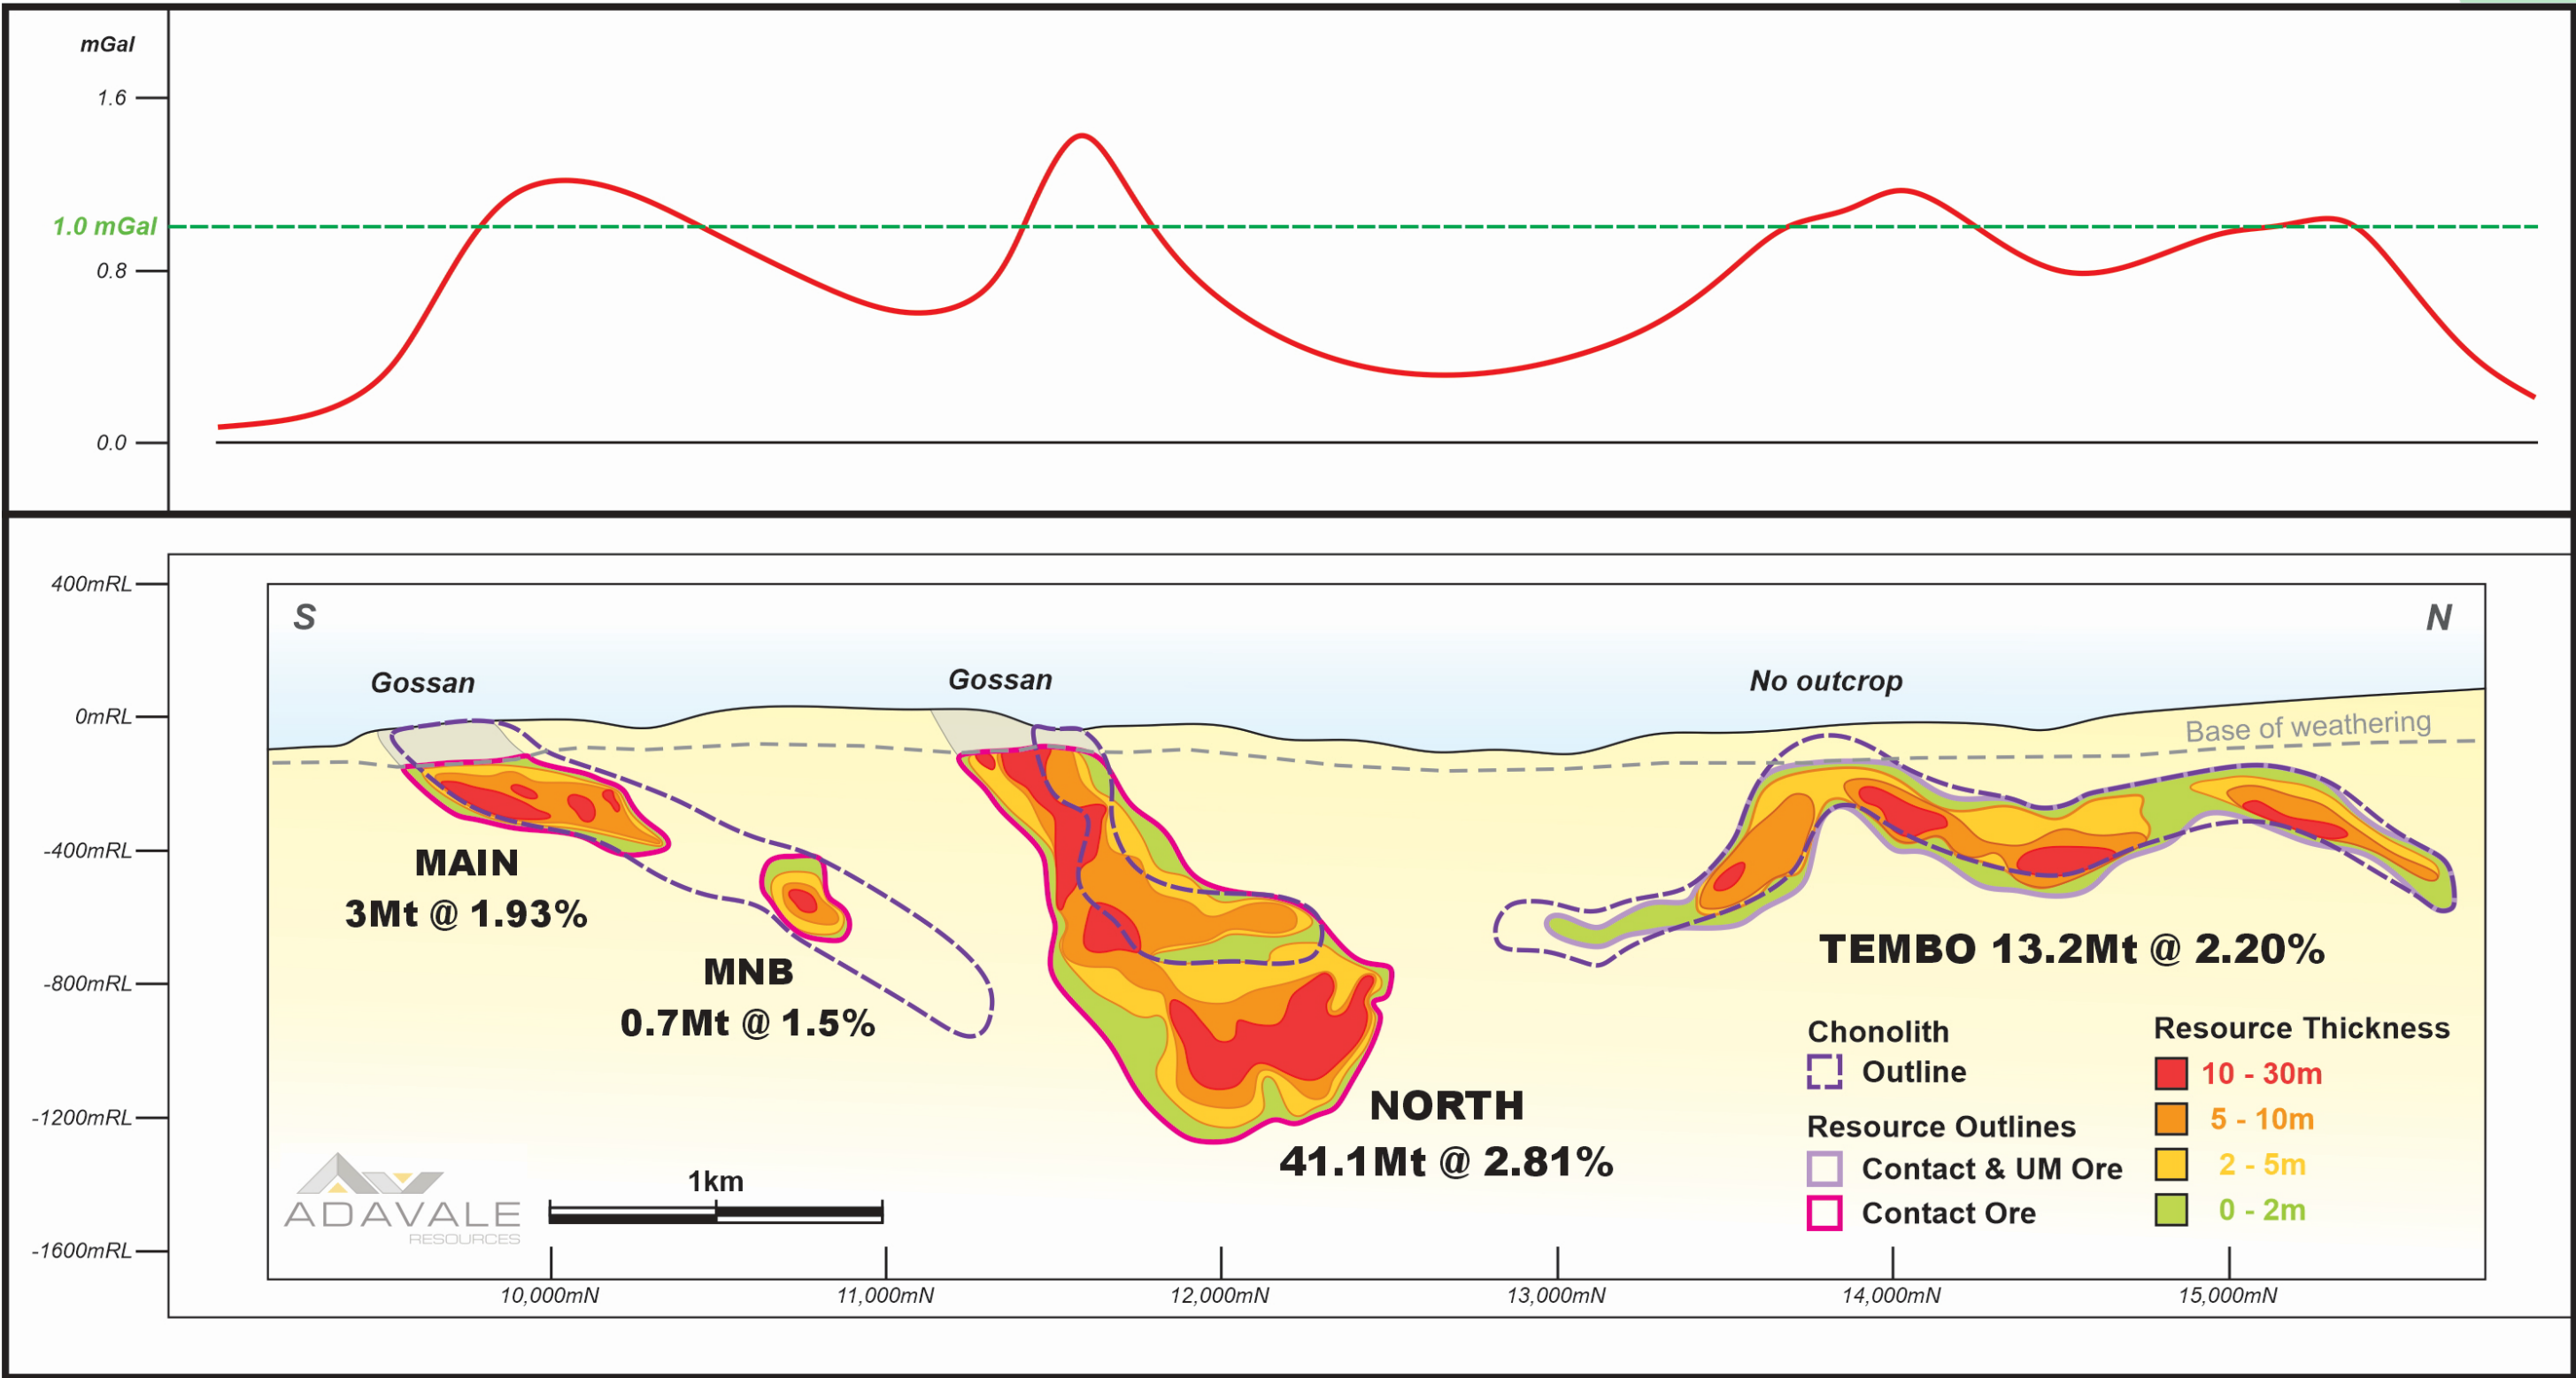

Encouraging **Target 7** result was the catalyst to secure **Luhuma Farm-in** tenure and consolidate strike extension ground holdings which is known to contain historical massive NiS intersections

Plan showing relative location between Target 7 and historic Luhuma drill hole LUH-06. Also shown is the possible strong gravity connection between Target 7 and the mineralised Luhuma intrusion

Pathfinder Gravity Signatures – Modelled on Neighbouring Resource*

Priority gravity ranking for anomalies + 0.75mGal Bouguer

Modelling & Outcomes

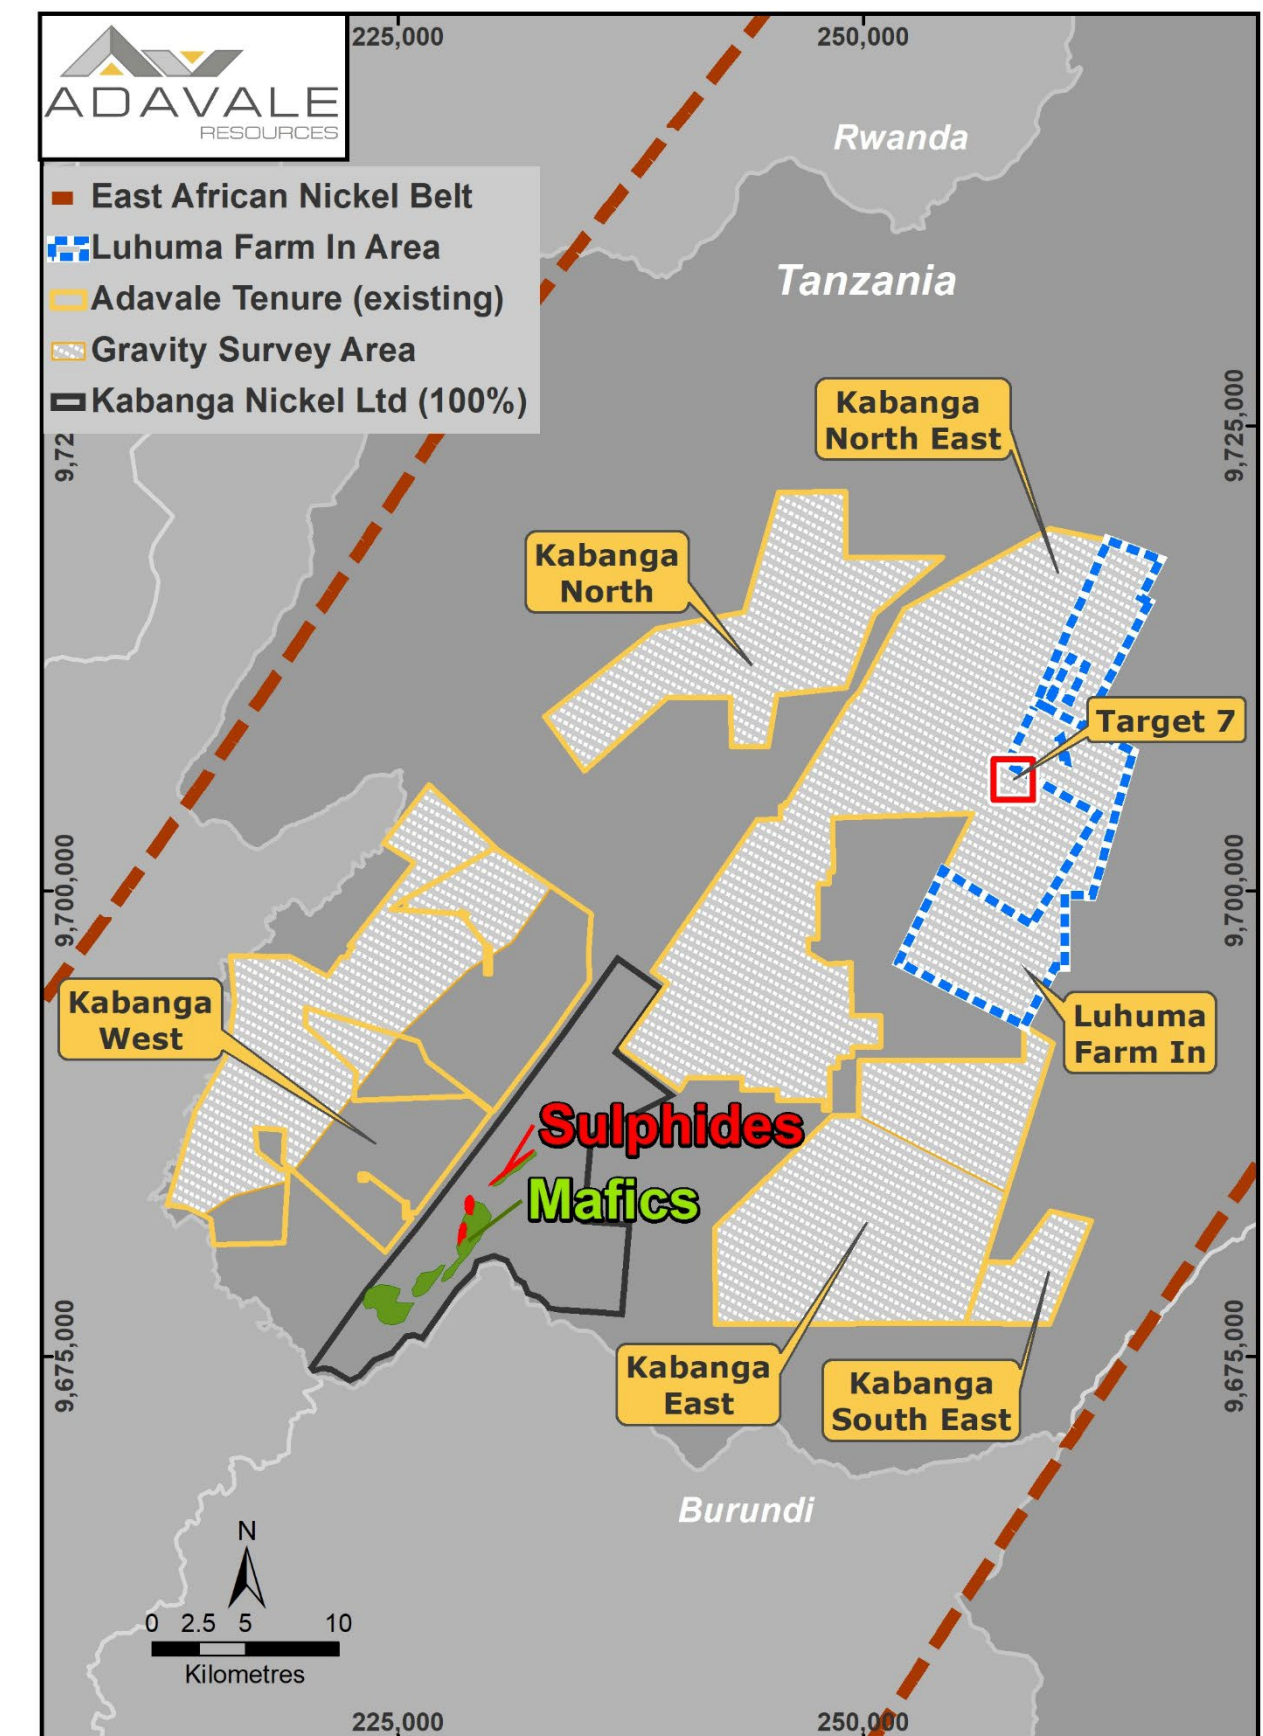

- Modeling has been undertaken by ADD based on the underlying deposits and Resources at Kabanga* to generate a range of corresponding (mGal) gravity signatures
- These indicative gravity signatures show mGal amplitudes of between ~ 0.6 to 1.4mGal around the large scale mafic/ultramafic intrusions
- ADD originally applied an exploration target threshold of +0.75mGal for the current gravity program to identify larger scale mafic/ultramafic intrusions
- ADD has already identified 16 discrete priority targets with gravity signatures+1mGal (increased density)

**ADD ASX Release dated 7 July 2022 titled 32 Nickel Targets Identified in the East African Nickel Belt
*Source: Evans, D. M., Hunt, J. P. P. M. and Simmonds, J. R., 2016. An overview of nickel mineralisation in Africa with emphasis on the Mesoproterozoic East African Nickel belt (EANB). Episodes, 39/2, 319-333. DOI: 10.18814/epiugs/2016/v39i2/95780

Gravity Surveys Identified 32 New Nickel Targets

Gravity providing a foundation for exploration success*

- **24,000 gravity readings over ~1,000 sq km** generated a total of **32 newly discovered and unexplored gravity targets**
- The **number and order of magnitude** of the gravity targets generated has **confirmed the prospectivity and large-scale nickel exploration potential** of Adavale's licences within the globally significant **East African Nickel Belt**
- Newly discovered **priority targets cover ~55 km strike length** that has become the focus of Adavale's exploration program and **Heli-borne Electro Magnetic (HEM) survey**
- HEM survey has **initially focused on 18 higher mGal amplitude anomalies** of the 32 identified gravity targets

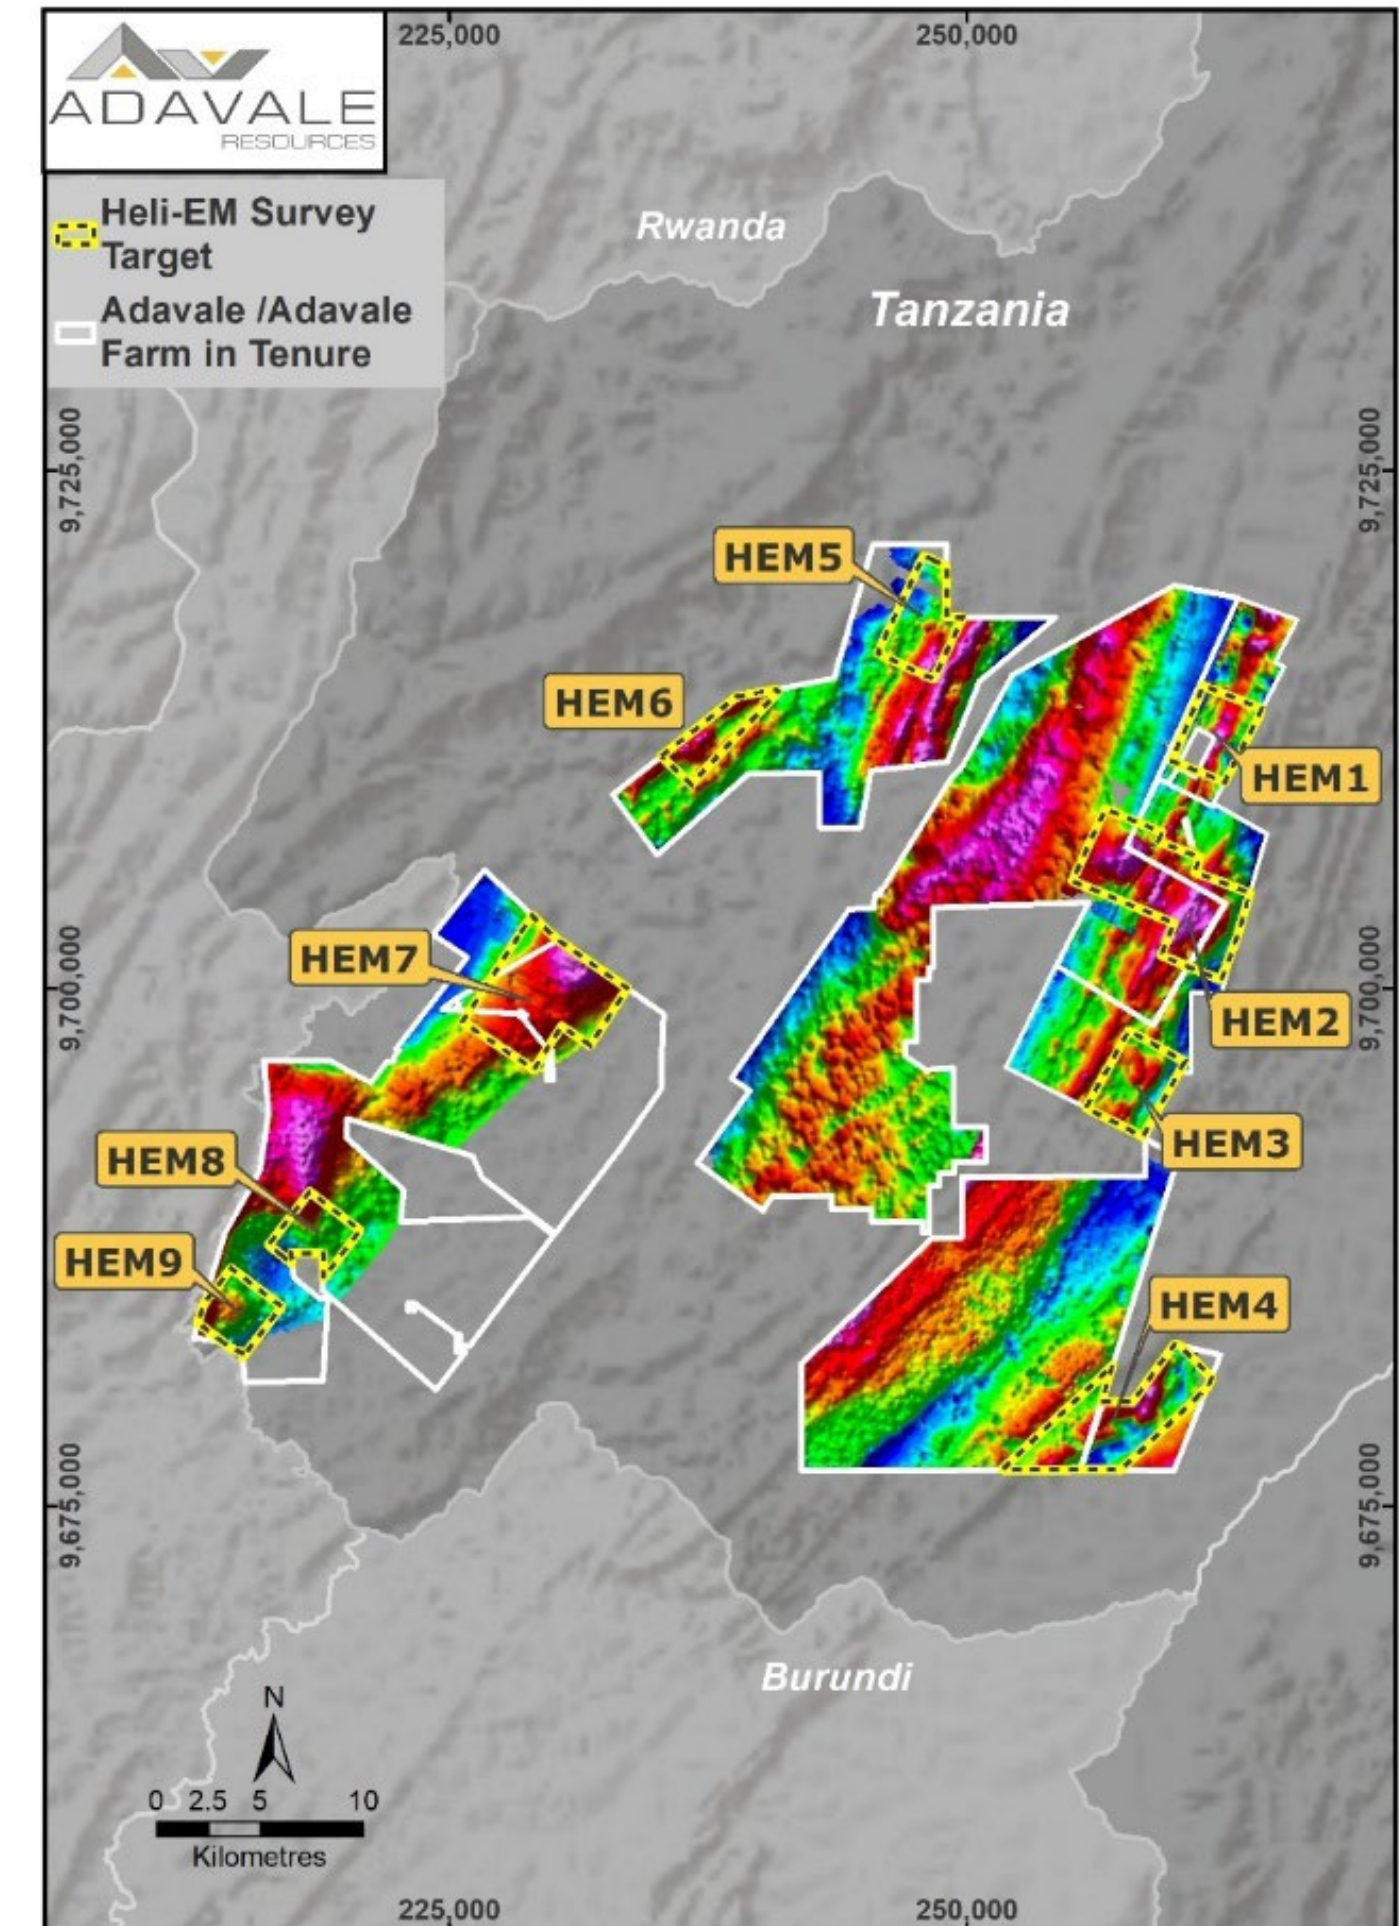

: Regional gravity survey areas showing location of identified targets

Heli Electro Magnetic Surveys – 9 HEM Target Areas

- Multiple priority gravity targets identified for the initial **Heli-borne Electro Magnetic (HEM) survey**
- **9 HEM target areas were flown using deep penetrating (~500m) high powered** time domain EM (TDEM) and magnetic survey equipment*
- Objective being **to identify** coincident areas of both strong EM and gravity targets~ conductors
- Survey completed with ~2,100-line kms (210 sq kms) during August/September 2022

Images: Gravity survey loop and helicopter in operation.
Airport logistics hub, Ngara
Tanzania August 2022

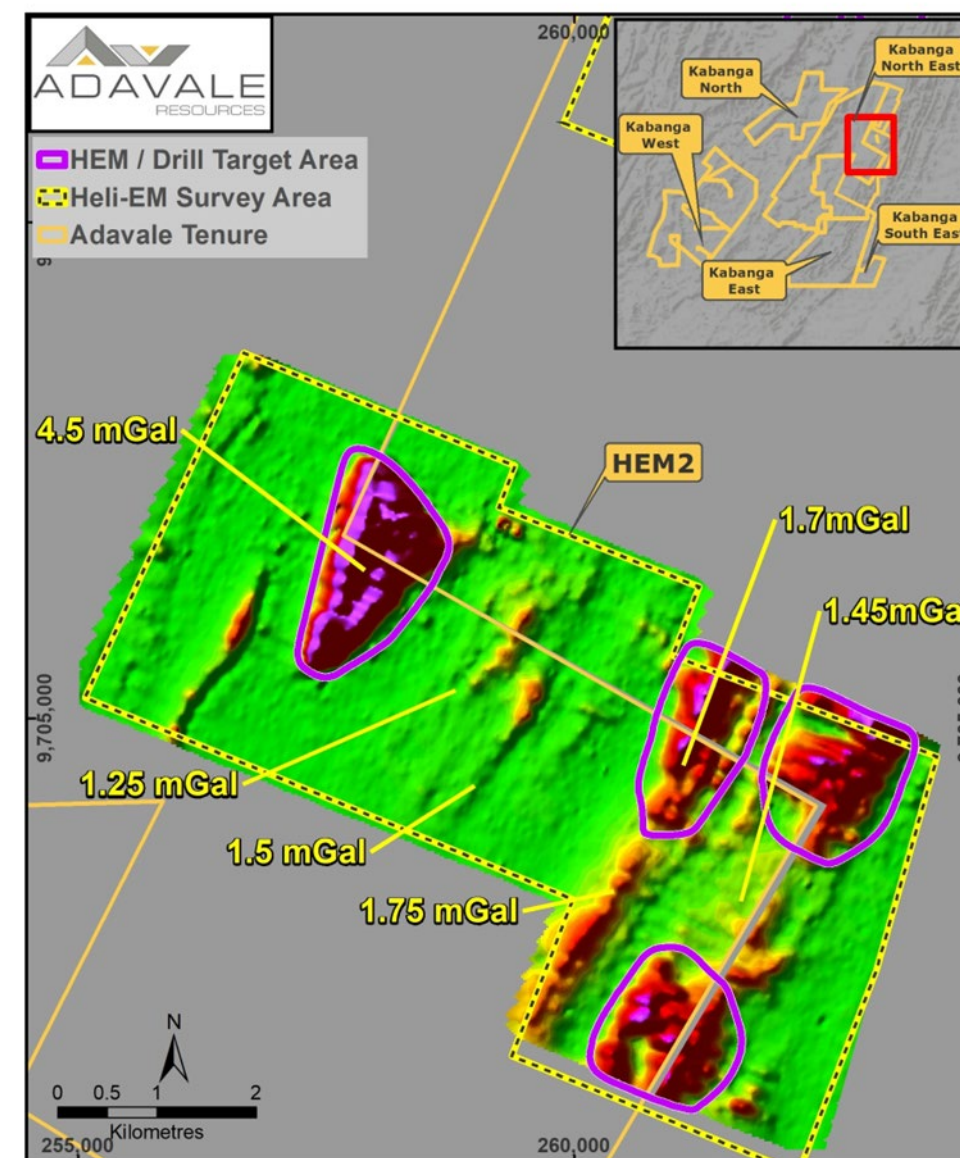

Plan view of the nine HEM target areas flown

Prioritisation of HEM/Gravity Target Areas for Drilling

- Initial processing of HEM and gravity data has been distilled down from 32 gravity targets to 20 gravity and EM target priority areas over all Adavale southern Licence holdings and farm-in areas
- Target areas selection has been based on coincident Heli-borne Electro Magnetic (HEM), gravity anomalies and localised previous exploration
- EM conductors identified will be tested with Reverse Circulation and Diamond **Drilling campaigns now underway***

HEM 8 & 9 survey area showing target area polygons reflecting areas of strong coincident gravity and EM anomalies overlain on mid-time (channel 20) HEM background

HEM 2 survey area showing target area polygons reflecting areas of strong coincident gravity and EM anomalies overlain on mid-time (channel 20) HEM background

"HEM survey area plan showing broad internal target areas based on gravity and EM signatures, together with the location of the Kabanga nickel sulphide deposits and associated mafic intrusions"

*ADD ASX Release dated 27 September 2022 titled "Drill Rig Mobilising to Kabanga Luhuma Ni Projects"

Drilling: Now Underway!*

- Multi-purpose RC/DD **drill rig mobilised to site**
- High impact **6,000m to 8,000m** "Priority Target Testing" **drilling program** now underway
- Drill target area selection has been based on coincident Heli-borne Electro Magnetic (HEM) and gravity anomalies
- **Ongoing assessment and adjustment to drill program anticipated** on final processing of HEM survey data
- Initial drill program expected to test approximately **20 initial anomalies within 7 priority HEM/Nickel target areas**
- Initial **RC Drilling commenced at HEM area 2**
- Additional drilling to follow at **HEM areas 7-9**, proximal and on **similar latitude to Kabanga Nickel Resource 58Mt @ 2.62% Ni**
- RC drilling **depths up to 200m**; diamond drilling **depths up to 500m**
- **Downhole EM to aid ongoing drill targeting**
- **Results expected during the December quarter**

Image of Contract driller undertaking RC and Diamond drilling at the Company's Licences November 2021,

*ADD ASX Release dated 27 September 2022 titled ""Drill Rig Mobilising to Kabanga Luhuma Ni Projects""

Luhuma Nickel Corridor – The “Enigma”

The “Enigma” target has the scale and scope to generate multiple new targets*

Hosts four distinct Cu anomalies that overlie the regional gravity high

More work is still needed to unlock the “Enigma”but that’s exploration

*ADD ASX Release dated 9 June 2022 titled "Outstanding Success with Multiple Previously Unknown Nickel Targets Discovered at Kabanga NE"

Tanzanian Social and Community Focussed Initiatives

Regional contract and employment opportunities

- Local geological field assistants and contractors
 - Drilling
 - DHEM surveys
 - Ground based surveys (soil and gravity surveys)
 - Logistics

Local Community and Health focused initiatives

Bridge2Aid Australia

- Prevention of infant oral mutilation
- Training, awareness and treatment

VAKA Health Foundation (sponsorship)

- Providing professional development training for 60 nurses at Ngara District Hospital'
- AAMEG 2022 award winner:

“Best Workforce and Industry Development Initiative”

SCAN ME

Investment Thesis

Alignment of opportunity and knowledge with activities focused on discovery with a highly prospective ground holding for sulphide Nickel and Uranium

Strong and experienced Board, Management and team: extensive Tanzanian experience, nickel exploration - discoveries and corporate actions and resource development

Board and key executives: material shareholdings, performance-based incentive: **leveraged to value uplift** via significant outcomes including discovery

Exposure to both Nickel and Uranium: Electrification and Decarbonisation

Proximal high-grade nickel sulphide Resources in the East African Nickel Belt

Contiguous with the world richest undeveloped nickel deposit – 58Mt @ 2.62% Ni

~1,300 sq km Licence/Farm ground holding

Multiple anomalies over 9 HEM/Gravity coincident target areas

Tanzanian Government is open to investment, mining and exploration

BHP have also re-emerged in via a strategic investment

High impact RC and DD drilling campaign now underway 6,000 to 8,000m

Results expected during - Dec 22 quarter
