

QUARTERLY REPORT

September 2022

Highlights

FINANCIAL AND CORPORATE

- Record YTD results & strong liquidity allow for declaration of \$225 million (US 13.4 cents per CDI) Special Dividend and Senior Secured Notes purchase offer of \$200 million. Dividend payment date to be 12 December 2022 (AEST).
- Record YTD 2022 Group Revenue of \$2,854 million, up 107.8% on YTD 2021 Group Revenue of \$1,374 million.
- September quarter Group Revenue of \$875 million, down 15.3% on the prior record June quarter due to lower pricing.
- Closing Cash of \$699 million and Net Cash of \$386 million at 30 September 2022.
- YTD 2022 Group Capital Expenditure was \$140 million.
- YTD 2022 Group Average Mining Costs Per Tonne Sold were \$87.6 per tonne, principally impacted by continued higher inflationary pressures and wet weather impacts to production at Curragh.

SAFETY AND PRODUCTION

- Australia TRIFR of 4.15 and U.S. TRIR of 2.08 as of 30 September 2022, both regions below industry averages.
- Group ROM production for the September quarter was 6.4 Mt, up 16.5% on the June quarter.
- Group Saleable production for the September quarter was 4.1 Mt, up 26.4% on the June quarter.
- Commenced mining operations at the newly constructed Winifrede mine at Logan.
- Successfully completed 143 hectares of rehabilitation works at Curragh.

COAL SALES

- Group Sales volumes for the September quarter were 4.1 Mt, up 4.8% compared to the June quarter.
- September quarter Group Realised Price Per Tonne of Met Coal Sold of \$253.0 per tonne (mix of FOR / FOB / Domestic pricing), down 21.2% compared to the record June quarter.
- North American annual contract negotiations for FY 2023 are largely complete. Coronado anticipates a volume weighted average price across all grades of Met Coal (inclusive of Thermal switching) of approx. \$201 per metric tonne (FOR), reflecting a price that is \$14 per metric tonne higher than average prices contracted in FY 2022. These fixed price Met and Thermal tonnage contracts currently cover approx. 40% of anticipated U.S. production and approx. 90% of anticipated U.S. mine cash costs and royalties in FY2023.

About Coronado

Coronado Global Resources Inc. is a leading international producer of high-quality Met Coal, an essential element in steel production. Our coals, transformed in the steelmaking process, support the manufacture of everyday steel-based products, including renewable energy infrastructure, that enrich lives around the world.

Coronado has a portfolio of operating mines and development projects in Queensland, Australia, and Pennsylvania, Virginia and West Virginia in the United States. Coronado is one of the largest Met Coal producers globally by export volume, serving customers on five continents. Coronado is committed to operating in an ethical and sustainable manner and supporting the communities in which we operate.

The management team has extensive global experience with blue-chip resource companies. It has a successful track record of building and operating coal mining operations in Australia, the United States and globally. This operational experience is supplemented with a strong knowledge base of domestic and international coal markets and their key drivers.

Coronado was listed on the ASX on 23 October 2018.

All \$ values are US dollars unless otherwise stated. All production and sales tonnages are in metric tonnes unless otherwise stated.

All information contained within this release is unaudited.

Coronado will release its Quarterly Report on Form 10-Q for the period ended 30 September 2022 with the ASX and SEC on 9 November 2022 (AEST).

Message from the CEO

Gerry Spindler, Chief Executive Officer

During the September quarter, Coronado continued to deliver on its capital management strategy. We continued to manage a strong balance sheet with improved liquidity; we delivered further shareholder returns via dividends;

we delivered improved production and sales volumes over the prior June quarter; and also continued to pursue our capital investment plans in both the U.S. and Australia.

Today I am pleased to report that Coronado declares a third quarter special dividend to Shareholders of US\$0.134212 per CDI, totalling \$225 million. In conjunction with this special dividend, Coronado also makes a Senior Secured Notes purchase offer up to the value of \$200 million. Today's declaration aligns with our existing policy of distributing between 60% - 100% of free cashflow, and we do so while expecting to remain in a Net Cash position post payment.

During the quarter, due to forces outside of our control, our operations have been impacted by unseasonal wet weather and global economic circumstances that are driving higher inflation across the globe. These events have contributed to our lower production levels and higher mining costs year-to-date. While we accept that the La Nina weather patterns in Queensland and global inflationary impacts will dissipate in time, today we revise our FY 2022 production and cost guidance.

As we enter the fourth quarter, I remain extremely confident in our ability to address these challenges due to our strong balance sheet and capital investment plans which have us well positioned to continue to enhance value for our organisation.

Q3 2022 Operational Overview

As of 30 September 2022, our Australian TRIFR was 4.15 and our US TRIR was 2.08, both aligned with rates at the end of June 2022. On a consolidated basis, the Group's TRIR stands at 1.31, compared to a rate of 1.47 as of 30 September 2021. This reflects a 11% year-on-year improvement. The health and safety of our workforce remains our #1 priority and we continue to advance several initiatives to improve our safety rates.

Coronado completed the third quarter with Group ROM coal production of 6.4 Mt (up 16.5%), saleable production of 4.1 Mt (up 26.4%) and sales volumes of 4.1 Mt (up 4.8%) compared to the June quarter.

Our U.S. operations delivered their best quarterly production and sales volumes this year. At our Buchanan mine, prior quarter geological issues from a rock intrusion are now behind us. At Logan, we have commenced mining operations in our new Winifrede mine and production rates have normalised with improved labour availability. Capital investment plans are also progressing well underpinning the growth potential of our U.S. business.

Despite the significantly improved production levels quarter-on-quarter, elevated rainfall levels in the Bowen Basin continued during the September quarter and impacted production at Curragh. The town of Blackwater, the nearest town to Curragh, received 178mm of rain in the quarter, representing nearly 3-times the 10-year rainfall average for the area. The consistent rain since April has been a key contributor to the lower production volumes year-to-date. However, despite the weather impacts, quarter-on-quarter Curragh achieved higher ROM coal production (up 29%), higher saleable production (up 31%), higher sales volumes (up 4%), higher closing coal stockpiled (up 14%), higher waste movement (up 2%), higher CHPP feed rates and availability (up 12%), higher dragline utilisation (up 13%), and higher operating time from the recently converted four contractor fleets to Coronado operator model (up 8%).

Balance Sheet and Liquidity

Coronado reports quarterly and year-to-date revenue of \$875 million and \$2,854 million respectively. Year-to-date revenues are up 108% compared to the prior year and reflect the significant improvement in Met Coal markets over the last 18 months. Met Coal sales in the September quarter make up 96% of total coal revenues reinforcing our position as the world's leading pure-play Met Coal producer. Coronado ended the quarter with Net Cash of \$386 million and Available Liquidity of \$799 million.

Metallurgical Coal Markets

Coronado's North American annual contract negotiations for FY 2023 are largely complete. Coronado anticipates a volume weighted average price across all grades of Met Coal (inclusive of Thermal switching) of approx. \$201 per metric tonne (FOR), reflecting a price that is \$14 per metric tonne higher than average prices contracted in FY 2022. These fixed price Met and Thermal tonnage contracts cover approx. 40% of anticipated U.S. production and approx. 90% of anticipated U.S. mine cash costs and royalties in FY2023.

In the September quarter, the average PLV HCC FOB AUS price index decreased 46% over the prior quarter with Met Coal prices impacted negatively by a slower global growth outlook, higher inflation, and a continuation of the COVID-19 lockdowns in China.

Met Coal prices have recently improved supported by supply concerns from Australia and Canada and high Thermal coal prices continuing to support Met Coal crossover tonnes into the Thermal market. Coronado has continued to take advantage of this price arbitrage with planned sales of approx. 410 Kt into the Thermal market in Q4 2022.

For the rest of 2022, Coronado anticipates Met Coal prices to remain above historical averages due to the ongoing trade constraints for Russian coal and elevated Thermal coal demand and prices. Coronado remains well positioned to take advantage of the current price arbitrage noted in the markets to maximise price realisations.

Production and Sales

Quarterly Production and Sales Performance

Summary Information (unaudited)		Sep Q22	Jun Q22	Change	Sep 2022 YTD	Sep 2021 YTD	Change
ROM Production	Mt	6.4	5.5	16.5%	18.6	20.0	(6.9%)
Australia	Mt	3.0	2.3	28.6%	8.8	10.3	(14.5%)

Group - Realised Met Price (combination of FOB / FOR)	US\$/t	253.0	321.2	(21.2%)	279.4	114.6	143.8%
% of PLV HCC FOB AUS Index	%	101.3%	72.1%	29.2%	71.2%	64.7%	6.5%

Note: Coronado reports its production and financial information on a geographical segment basis. Please refer to the Appendix for operation specific production and sales data. Some numerical figures in the above table have been subject to rounding adjustments. Accordingly, numerical figures shown as totals may not equal the sum of the figures that follow them.

ROM coal production for the Group in the September quarter was 6.4 Mt, 16.5% higher than the June quarter. Saleable production for the Group in the September quarter of 4.1 Mt was 26.4% higher compared to the June quarter.

Saleable production from the U.S. operations of 1.7 Mt was 20.0% higher compared to the June quarter and reflects the U.S. operations best production quarter this year. The production impacts from the rock intrusion experienced at the Buchanan mine in April are now behind us. Operations at the new Winifrede mine commenced during the quarter at the Logan complex. Operational performance at Logan is now at more normalised levels as labour availability improves.

Saleable production from the Australian operations of 2.5 Mt was 31.2% higher compared to the June quarter. This significant increase reflects the return on investment made in the first half of the year, and in part, marginally improved weather conditions quarter-on-quarter. The transition of four fleets at Curragh North to a Coronado operator model is complete. Sustained performance improvement from these fleets were a major contributor to the quarter's improvement. Despite the impacts of the Bowen Basin rain events, YTD Curragh has executed its capital investments in the mine plan, specifically investments targeting dragline performance and waste movement, which have translated to improved performance per the expectations of the 'One Curragh Plan'. YTD waste movement is broadly aligned with the same period in the prior year despite the above average rainfall (September 2022 YTD: 134.5 Mbcms vs September 2021 YTD: 138.4 Mbcms). Furthermore, in the September quarter the planned high-wall mining operations commenced at Curragh North to liberate restricted coal under the over land conveyor.

While production improvements quarter-on-quarter are evident, the rain events in the Bowen Basin continued in the September quarter which did further hinder coal production levels. The town of Blackwater, the nearest town to Curragh, received 178mm of rain in the quarter (June Quarter: 213mm), representing rainfall nearly 3 times the 10-year rainfall average for the area. The consistent rain this year has been a key contributor to the lower production volumes and higher mining costs per tonne.

September quarter sales volumes for the Group were 4.1 Mt, 4.8% higher than the June quarter. Sales from the U.S. were 1.7 Mt, up 5.8% on the prior quarter and sales from Curragh of 2.4 Mt were 4.2% higher than the prior quarter.

The Group Realised Price Per Tonne of Met Coal Sold for the September quarter (mixture of FOB / FOR / Domestic pricing) was \$253.0 per tonne, a decrease of 21.2% from the June quarter. Australia's Realised Price Per Tonne of Met Coal Sold was \$313.0 per tonne (FOB) for the September quarter, a decrease of 12.4% compared to the previous record June quarter. Similarly, the U.S. operations achieved a Realised Price Per Tonne of Met Coal Sold for the September quarter of \$191.6 per tonne (mixture FOB / Domestic fixed) that was 33.1% lower than the prior record June quarter. Realised price decreases across the range of Coronado products were directly related to the fall in the Australian and U.S. Met coal indices during the quarter.

Source: S&P Global Platts 31 December 2019 to 21 October 2022.

As a percentage of total sales for the September quarter, export sales of 66.8% were aligned with the previous quarter. Coronado's proportion of Met Coal sales revenue as a percentage of total coal revenues in the September quarter was 95.8%.

Q3 FY22 Sales Volume Mix

■ Export ■ US Domestic ■ AUS Domestic

Q3 FY22 Revenue Mix

■ Metallurgical Coal ■ Thermal Coal

Financial and Corporate

YTD 2022 Group revenues were at record levels of \$2,854.5 million and reflect a 107.8% increase over YTD 2021 Group revenues of \$1,374.0 million. September quarter revenue was \$874.7 million, down 15.3% compared to the record prior June quarter.

YTD 2022 Average Mining Costs Per Tonne Sold for the Group was \$87.6 per tonne. Higher mining costs per tonne are attributable to continued inflationary pressures, wet weather events resulting in lost production at Curragh, and the completion of planned major maintenance activities at Buchanan and Curragh in the first half of the year.

YTD 2022 Capital Expenditure of \$140.0 million was up 100.3% on YTD 2021 (\$69.9 million). As previously guided, FY22 Capital Expenditure is expected to be higher than 2021, as the Group invests in capital works while pricing remains elevated to increase production rates from the Australian and U.S. operating segments.

On 20 September 2022, Coronado completed the payment to Shareholders of the US 7.5 cents per CDI unfranked half year ordinary dividend. The dividends totalling \$125.4 million were paid to Shareholders from available cash and in accordance with Coronado's distributions policy.

Strong cash flow generation in the September quarter saw Coronado maintain a strong Balance Sheet and healthy liquidity. As of 30 September 2022, the Company's Net Cash position was \$385.7 million, consisting of a closing cash balance (excluding restricted cash) of \$698.4 million and \$312.7 million aggregate principal amount of 10.750% Senior Secured Notes due 2026. Coronado has Available Liquidity of \$798.4 million as of 30 September 2022, comprising cash and cash equivalents (excluding restricted cash) and undrawn available borrowings under our senior secured asset-based revolving credit facility dated 12 May 2021.

Subsequent to the end of the quarter, Coronado confirmed that it is in confidential discussions with Peabody Energy Corporation (NYSE : BTU) regarding a potential combination transaction. However, as no transaction has been agreed and the discussions are ongoing, Coronado is not yet in a position to provide further details. There is no certainty that the discussions will lead to a transaction. Coronado will keep the market informed in accordance with its continuous disclosure obligations.

Coronado will release its third quarter and YTD 2022 financial results (FORM 10-Q) to the market on 9 November 2022 (AEST).

Special Dividend and Senior Secured Notes Purchase Offer

On 30 October 2022, the Directors of Coronado declared an unfranked Special Dividend of US 13.4212 cents per CDI, equating to \$225 million. CDI's will be quoted ex-dividend on 18 November 2022 (AEST). The Special Dividend will have a record date of 21 November 2022 (AEST) and be payable on 12 December 2022 (AEST).

In conjunction with the Special Dividend declaration, Coronado has commenced an offer to purchase for cash up to \$200 million aggregate principal amount of its 10.750% Senior Secured Notes (the "Notes") due 2026. The offer is being made at a purchase price equal to 104% of the aggregate principal amount thereof, plus accrued and unpaid interest up to, but excluding, the settlement date. The offer is made in accordance with the terms of the Indenture. The Notes purchase offer expires on 1 December 2022 (New York City time) and payment to Note holders who accept will occur on 5 December 2022 (New York City time).

For further information relating to the Special Dividend and Notes purchase offer, please refer to separate announcements made to the ASX and SEC dated 30 October 2022.

The distribution of up to \$425 million by way of the Special Dividend and Notes purchase offer will be funded from available cash and in accordance with Coronado's distributions policy.

After payment of the Special Dividend in December, Coronado will have returned \$699 million in cash dividends to Shareholders in 2022.

Guidance Update

Coronado provides the following update to guidance for FY2022:

	Revised FY22 Guidance	FY22 Guidance (Advised July)
Saleable Production (Mt)	16.9 – 17.1	18.0 – 19.0 (low-end)
Average Mining Costs Per Tonne Sold (\$)	81.0 – 83.0	79.0 – 81.0
Capital Expenditure (\$m)	No change	170 – 190 (high-end)

Saleable Production guidance for FY2022 is revised to 16.9 – 17.1 Mt due to the YTD impacts of wet weather at our Curragh operations. Rainfall totals between April – September for the town of Blackwater (nearest town to the Curragh mine) have totalled 391mm which is 3.3 times higher than the 10-year average for the town (118mm) over that period. The revised guidance has been determined based on the impacts of wet weather YTD and our production plans for the fourth quarter and is subject to change based on rainfall levels between October and December. The revised guidance incorporates fourth quarter production estimates for the Group of between 5.3 – 5.5 Mt, subject to weather and any other unforeseen events.

Blackwater (Curragh Mine) Average Rainfall (millimeters)

Source: Australian Government Bureau of Meteorology

Average Mining Cost per Tonne Sold guidance for FY2022 is revised to \$81.0 - \$83.0 due to unforeseen events outside of our control including persistently high global inflationary pressures exceeding our estimates and YTD wet weather impacts and geological issues impacting production. Inflation levels at 30 September 2022 in the U.S. remained elevated at 8.2% and in Australia reached 7.3%. Coronado anticipates that continued high inflation and production impacts from wet weather will be partly mitigated by lower FX and incremental productivity improvements as the year progresses. The revised guidance estimates Average Mining Cost per Tonne Sold for the fourth quarter to be between \$68.0 - \$70.0 subject to the achievement of the production plan, inflation rates remaining stable and a fourth quarter FX assumption of \$0.65 (AUD : USD).

Coronado retains its Capital Expenditure guidance of \$170 - \$190 million (high – end).

Sustainability

At our Curragh Mine, significant progress on completing rehabilitation targets for 2022 has occurred. During the September quarter, the Curragh mine successfully rehabilitated 143 hectares (pictured below) of land with plans for further works as the year progresses.

The Buchanan Ventilation Air Methane (VAM) abatement project on Vent Shaft 16 (pictured below) was officially commissioned on July 27th. The project utilizes the latest technology to convert fugitive methane gas emissions to carbon dioxide. It is envisaged that this project will reduce the Buchanan mines emissions intensity by 22.25 times and reduce total emissions from the mine by 61% by 2030. The initial performance from the VAM unit is encouraging with the project achieving 94% emission destruction efficiency. While Coronado is also investigating other projects to reduce its carbon footprint, if the VAM projections are achieved, this project alone will meet the Group's 30% reduction target by 2030.

Operational Overview and Outlook

Health and Safety

The safety and well-being of our people continue to be Coronado's number one priority.

In Australia, the 12-month rolling average Total Reportable Injury Frequency Rate (TRIFR) as of 30 September 2022 was 4.15, compared to 4.00 as of 30 September 2021.

In the U.S., the 12-month rolling average Total Reportable Incident Rate (TRIR) as of 30 September 2022 was 2.06, compared to 2.54 as of 30 September 2021

The Group TRIR as of 30 September was 1.31, compared to 1.47 as of 30 September 2021, reflecting an 11% year-on-year improvement. Reportable rates in Australia and the U.S. remain below the relevant industry averages.

New and revised health and safety initiatives continue to be implemented across Coronado operations quarterly. In Australia, Curragh has rolled out 'Our Life-Saving Rules' program, implemented upgrades to its safety health management system, increased training initiatives including FELT leadership and continue to focus on hazard identification and mitigation plans. In the U.S., we continued to focus on training our existing workforce and developing new miners. This has resulted in more than 58,000-man hours YTD of discretionary training that has helped set solid expectations for new hires and articulate Coronado's safety culture and focus.

Australia (Curragh)

ROM production for the September quarter was 3.0 Mt (28.6% higher), saleable production was 2.5 Mt (31.2% higher), and sales volume was 2.4 Mt (4.2% higher) compared to the June quarter.

The significant improvements quarter-on-quarter reflect the return on investment made in the first of half of the year from initiatives implemented under the 'One Curragh Plan', and in part, from lower rainfall in the September quarter.

However despite the improved production and sales, the rain events in the Bowen Basin continued in the September quarter which did further hinder production levels. The town of Blackwater received 178mm of rain in the quarter (June Quarter: 213mm), representing rainfall nearly 3 times the 10-year rainfall average for the area. The above average rainfall this year has been a key contributor to the lower production volumes and higher mining costs per tonne.

While the rain has impacted coal production, YTD Curragh has successfully completed major planned maintenance activities on the CHPP and two Draglines; completed the conversion of four fleets to a Coronado operator model; commenced high-wall mining operations; and continued to focus on waste movement activities and its capital projects.

In the September quarter, Curragh's Realised Price Per Tonne of Met Coal Sold was \$313.0 per tonne (FOB), 12.4% lower than the prior record June quarter. Curragh seaborne contracts are traditionally negotiated every quarter relative to the average prior three-month index. As a result of these contract terms and the benchmark index price falling as low as \$188.0/t in early August, Curragh has a Met price realisation of 125.3% in the September quarter.

Curragh's focus for the fourth quarter is to drive operational performance to the mine plan and execute higher production levels, subject to weather. The conversion of four contractor fleets to a Coronado operating model is now complete and operating efficiencies are being realised. Investments in box-cuts this year will continue to enable higher Dragline utilisation and improved strike length. Box-cut investment in new mining areas is also progressing and will ultimately decrease congestion in existing pits allowing improved productivities to flow and underpin higher CHPP utilisation.

United States (Buchanan and Logan)

ROM production for the September quarter was 3.4 Mt (7.7% higher), saleable production was 1.7 Mt (20.0% higher), and sales volume was 1.7 Mt (5.8% higher) compared to the June quarter.

September quarter production and sales volumes for the U.S. business were the highest this year with the prior period impacts from the rock intrusion at Buchanan now behind us. Production levels were higher despite storms early in the quarter which resulted in some downtime to operations.

In the September quarter, the U.S. Realised Price Per Tonne of Met Coal Sold was \$191.6 per tonne, down 33.1% to the prior record June quarter. YTD 2022 U.S. Realised Price Per Tonne of Met Coal Sold was \$232.4/t, up 108.4% compared to the prior year. U.S. price realisations reflect export tonnages being sold mostly on an FOR basis and one-third of production sold under annual domestic contracts at an average price of \$187 per tonne.

The focus for the U.S. operations entering the fourth quarter is to continue to optimise production levels to meet the demand for U.S. sourced coal, particularly in China and Europe. Compared to other Met Coal producers, Coronado maintains a competitive advantage given its geographical diversification and ability to access the Chinese market, plus the unique ability to take advantage of the existing Met and Thermal coal price disparity and switch tonnes into the Thermal export market (primarily to Europe) to generate higher margins when it makes sense to do so.

The Greenbrier mine remains idle and held for sale. Negotiations with various third parties for the sale of the mine continue.

Coal Market Outlook

The benchmark PLV HCC FOB AUS average index price for the September quarter was \$250 per tonne (June Quarter: \$445 per tonne), while the benchmark LV HCC FOB USEC average index price for the September quarter was \$259 per tonne (June Quarter: \$431 per tonne).

The short-term global economic environment and steel demand outlook remains subdued driven by the conflict in Ukraine, the resulting energy crisis in Europe and high inflation rates. This continues to be offset by a combination of low spot Met Coal supply availability and Met Coal crossover trades into the Thermal market which has seen price support and stability return to the benchmark PLV HCC FOB AUS which was trading at \$270 per tonne on 30 September.

Coronado's North American annual contract negotiations for FY 2023 are largely complete. Coronado anticipates a volume weighted average price across all grades of Met Coal (inclusive of Thermal switching) of approx. \$201 per metric tonne (FOR), reflecting a price that is \$14 per metric tonne higher than prices contracted in FY 2022. These fixed price Met and Thermal tonnage contracts currently cover approx. 40% of anticipated U.S. production and approx. 90% of anticipated U.S. mine cash costs and royalties in FY2023.

Coronado Met Coal remains in high demand. Our high-quality products and unique geographical diversification allow us to switch products into different geographical markets or market segments that provide the highest return. For example, moving U.S. production from China to Europe, or high-volatile coking coals marketed as Thermal coals, to take advantage of current unique market fundamentals created by the trade restrictions on Russian coal.

For the remainder of 2022 and into 2023, Coronado expects Met Coal prices to remain elevated as more Met tonnes are switched into the Thermal market given the high demand for energy as winter approaches in the northern hemisphere, continued supply disruption from Australia due to weather, and the ongoing trade-flow impacts from Russian sanctions.

Exploration & Development

During the September quarter at our U.S. operations, Coronado commenced mining at the new Winifrede Met coal underground mine, which is part of the Logan Mine Complex, and continued capital works at its Buchanan mine to expand its raw coal storage space and initiation of the construction of the second set of skips. Growth plans at our U.S. operations to produce 6.9 Mt by 2025 remain on target.

Consultation and engagement with communities and state and local governments on our U.S. expansion plans is proceeding well. Coronado has recently worked with local County's and the Governor of Virginia, Mr. Glenn Youngkin, to secure grants and incentives to progress our Buchanan expansion plans.

Coronado continues to pursue plans and strategies to develop a new underground Met Coal mine in southwest Pennsylvania. Met Coal from the proposed Mon Valley mine will ultimately be produced from the Upper Freeport Coal Seam in the safest, lowest-cost, and most environmentally responsible manner. Mon Valley retains 134 Mt of marketable Met Coal reserves. It is envisaged that this project will create a significant number of new permanent jobs in the region, have a minimal footprint of surface facilities, and supply high quality Met Coal to U.S. customers for the manufacture of steel. Permitting plans on this project are continuing.

Capital plans at the Curragh mine continue in accordance with existing expansion plans to reach 13.5 Mtpa by 2025. Planned growth activities continued with the completion of the Curragh North underground pre-feasibility study and the Z Pit expansion study. These results are under review and are showing positive results.

Additionally, a project at Curragh targeting the capture and use of coal seam methane as a diesel substitute project commenced in the quarter. Drill contractors are mobilising to site to commence a drilling program in the fourth quarter. This project forms part of Coronado's strategy to reduce emissions from open cut mining operations.

This announcement was authorised for release by the Disclosure Committee of Coronado Global Resources Inc.

APPENDIX

Cautionary Notice Regarding Forward-Looking Statements

This report contains forward-looking statements concerning our business, operations, financial performance and condition, the coal, steel and other industries, and our plans, objectives and expectations for our business, operations, financial performance and condition. Forward-looking statements may be identified by words such as "may," "could," "believes," "estimates," "expects," "intends," "plans," "considers," "forecasts," "anticipates," "targets" and other similar words that involve risk and uncertainties. Forward-looking statements provide management's current expectations or predictions of future conditions, events or results. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future are forward-looking statements. They may include estimates of revenues, income, earnings per share, cost savings, capital expenditures, dividend payments, share repurchases, liquidity, capital structure, market share, industry volume, or other financial items, descriptions of management's plans or objectives for future operations, or descriptions of assumptions underlying any of the above. All forward-looking statements speak only as of the date they are made and reflect the Company's good faith beliefs, assumptions and expectations, but they are not a guarantee of future performance or events. Furthermore, the Company disclaims any obligation to publicly update or revise any forward-looking statement, except as required by law. By their nature, forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. Factors that might cause such differences include, but are not limited to, a variety of economic, competitive and regulatory factors, many of which are beyond the Company's control, that are described in our Annual Report on Form 10-K filed with the ASX and SEC on 23 February 2022 (AEST), as well as additional factors we may describe from time to time in other filings with the ASX and SEC. You may get such filings for free at our website at www.coronadoglobal.com. You should understand that it is not possible to predict or identify all such factors and, consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

Quarterly Production and Sales Performance by Mine

Summary Information (unaudited)		Sep Q22	Jun Q22	Change	Sep 2022 YTD	Sep 2021 YTD	Change
ROM Production	Mt	6.4	5.5	16.5%	18.6	20.0	(6.9%)
Curragh	Mt	3.0	2.3	28.6%	8.8	10.3	(14.5%)
Buchanan	Mt	2.0	1.6	25.3%	5.4	5.4	(0.4%)
Logan	Mt	1.4	1.6	(10.4%)	4.5	4.4	3.1%
Greenbrier	Mt	0.0	0.0	0.0%	0.0	0.0	0.0%
Saleable Production	Mt	4.1	3.3	26.4%	11.6	13.3	(10.6%)
Curragh	Mt	2.5	1.9	31.2%	7.0	8.5	(14.8%)
Buchanan	Mt	1.2	0.9	34.9%	3.1	3.3	(7.9%)
Logan	Mt	0.5	0.5	(3.9%)	1.6	1.5	7.3%
Greenbrier	Mt	0.0	0.0	0.0%	0.0	0.0	0.0%
Sales Volumes	Mt	4.1	3.9	4.8%	12.4	13.5	(8.0%)
Curragh	Mt	2.4	2.3	4.2%	7.5	8.5	(11.6%)
Buchanan	Mt	1.1	1.1	3.4%	3.2	3.3	(2.1%)
Logan	Mt	0.5	0.5	9.9%	1.6	1.6	(0.5%)
Greenbrier	Mt	0.0	0.0	0.0%	0.1	0.1	0.0%

Some numerical figures in the above table have been subject to rounding adjustments. Accordingly, numerical figures shown as totals may not equal the sum of the figures that follow them. The Greenbrier mine is currently idle and held for sale. YTD sales volumes relates to stockpile coal sales.

Reconciliation of Non-GAAP financial measures

This report includes a discussion of results of operations and references to and analysis of certain non-GAAP measures (as described below) which are financial measures not recognised in accordance with U.S. GAAP. Non-GAAP financial measures are used by the Company and investors to measure operating performance.

Non-GAAP financial measures used in this report include (i) Realised Price Per Tonne of Met Coal Sold, which we define as Met Coal revenues divided by metallurgical sales volume; (ii) Average Mining Costs Per Tonne Sold, which we define as mining costs divided by sales volumes; and (iii) Net Cash, which we define as cash and cash equivalents (excluding restricted cash) less the outstanding aggregate principal amount of 10.750% senior secured notes due 2026.

We evaluate our mining cost on a cost per metric tonne basis. Mining costs is based on reported cost of coal revenues, which is shown on our statement of operations and comprehensive income exclusive of freight expense, Stanwell rebate, other royalties, depreciation, depletion and amortization and selling, general and administrative expenses, adjusted for other items that do not relate directly to the costs incurred to produce coal at the mine.

Reconciliations of certain forward-looking non-GAAP financial measures, including market guidance, to the most directly comparable GAAP financial measures are not provided because the Company is unable to provide such reconciliations without unreasonable effort, due to the uncertainty and inherent difficulty of predicting the occurrence and the financial impact of items impacting comparability and the periods in which such items may be recognised. For the same reasons, the Company is unable to address the probable significance of the unavailable information, which could be material to future results.

A reconciliation of consolidated costs and expenses, consolidated operating costs, and consolidated mining costs are shown below:

	For the nine months ended 30 September 2022
(In US\$000, except for volume data, unaudited)	Total Consolidated
Total costs and expenses	1,909,212
Less: Selling, general and administrative expense	(28,657)
Less: Depreciation, depletion and amortization	(126,901)
Total operating costs	1,753,654
Less: Other royalties	(299,711)
Less: Stanwell rebate	(124,160)
Less: Freight expenses	(189,316)
Less: Other non-mining costs	(94,940)
Total mining costs	1,045,527
Sales Volume excluding non-produced coal (MMt)	11.9
Average Mining Costs Per Tonne Sold	87.6

A reconciliation of Net Cash is shown below for each of the periods presented in this report:

	30 September 2022
(In US\$000, except for volume data, unaudited)	Total Consolidated
Cash and restricted cash	698,647
Less: Restricted cash	(251)
Cash and cash equivalents (excluding restricted cash)	698,396
Less: Aggregate principal amount of 10.750% Senior Secured Notes due 2026	(312,741)
Net Cash	385,655

A reconciliation of Realised Price Per Tonne of Met Coal Sold is shown below for each of the periods presented in this report:

For the three months ended 30 June 2022

(In US\$'000, except for volume data, unaudited)	Australian Operations	U.S. Operations	Consolidated
Total Revenues	578,388	454,316	1,032,704
Less: Other revenues	(10,042)	(1,665)	(11,707)
Total coal revenues	568,346	452,651	1,020,997
Less: Thermal coal revenues	(25,001)	(1,793)	(26,794)
Met Coal revenues	543,345	450,858	994,203
Volume of Met Coal sold (Mt)	1.5	1.6	3.1
Realised Price Per Tonne of Met Coal Sold	\$357.4/t	\$286.2/t	\$321.2/t

For the three months ended 30 September 2022

(In US\$'000, except for volume data, unaudited)	Australian Operations	U.S. Operations	Consolidated
Total Revenues	546,485	328,172	874,657
Less: Other revenues	(9,229)	(1,719)	(10,948)
Total coal revenues	537,256	326,453	863,709
Less: Thermal coal revenues	(19,246)	(16,844)	(36,090)
Met Coal revenues	518,010	309,609	827,619
Volume of Met Coal sold (Mt)	1.7	1.6	3.3
Realised Price Per Tonne of Met Coal Sold	\$313.0/t	\$191.6/t	\$253.0/t

For the nine months ended 30 September 2022

(In US\$'000, except for volume data, unaudited)	Australian Operations	U.S. Operations	Consolidated
Total Revenues	1,730,172	1,124,314	2,854,486
Less: Other revenues	(28,271)	(4,881)	(33,152)
Total coal revenues	1,701,901	1,119,433	2,821,334
Less: Thermal coal revenues	(86,537)	(21,247)	(107,784)
Met Coal revenues	1,615,364	1,098,186	2,713,550
Volume of Met Coal sold (Mt)	5.0	4.7	9.7
Realised Price Per Tonne of Met Coal Sold	\$323.9/t	\$232.4/t	\$279.4/t

For the nine months ended 30 September 2021

(In US\$'000, except for volume data, unaudited)	Australian Operations	U.S. Operations	Consolidated
Total Revenues	832,098	541,860	1,373,958
Less: Other revenues	27,341	2,364	29,705
Total coal revenues	804,757	539,496	1,344,253
Less: Thermal coal revenues	70,614	5,479	76,093
Met Coal revenues	734,143	534,017	1,268,160
Volume of Met Coal sold (Mt)	6.3	4.8	11.1
Realised Price Per Tonne of Met Coal Sold	\$117.0/t	\$111.5/t	\$114.6/t

Glossary

AS\$	Australian dollar currency	LTI	Lost Time Injury
ABL	Asset Based Lending facility	LV HCC FOB USEC index price	Low-Volatile Hard Coking Coal Free On Board United States East Coast benchmark index price
AEST	Australian Eastern Standard Time	Mbcms	Million Bank Cubic Metres of waste movement
AU / AUS	Australia	Met Coal	Metallurgical quality coal
ASX	Australian Securities Exchange	Mt	Million tonnes, metric
Available Liquidity	Cash and Cash Equivalents (excluding restricted cash) and available Borrowings under our senior secured asset-based revolving credit facility dated 12 May 2021 ("ABL facility")	NEWC Thermal index price	Thermal Coal Free On Board Newcastle (Australia) benchmark index price
Average Mining Costs Per Tonne Sold	Refer Non-GAAP Financial Measures section	PCI	Pulverised Coal Injection
Capital Expenditure	Expenditure included as a component of Investing Activities within the Coronado Consolidated Statement of Cash Flows	PLV HCC FOB AUS index price	Premium Low-Volatile Hard Coking Coal Free On Board Australian benchmark index price
CDI	Chess Depositary Interest	PLV HCC CFR China index price	Premium Low-Volatile Hard Coking Coal (including cost of freight) to China benchmark index price
