Disclaimer and compliance statement

This presentation has been prepared by Strategic Energy Resources Limited (ASX: SER) (SER or the Company). It contains general information about the Company's activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation should observe any such restrictions on the distribution of this presentation and warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation. This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only and is not a recommendation as to whether to invest in SER shares. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Unless otherwise specified, data and tables set out in this presentation are based on SER management estimates.

This presentation does not include all available information on SER, and any potential investor should also refer to SER's Annual Reports and ASX releases and take independent professional advice before considering investing in SER. For more information about Strategic Energy Resources Limited, visit the website at <http://www.strategicenergy.com.au/>.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of SER or its directors, or any of their employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, projections, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. Past performance is no guarantee of future performance.

This presentation may contain "forward-looking statements" within the meaning of securities laws of applicable jurisdictions. Forward-looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "believe", "continue", "objectives", "outlook", "guidance" or other similar words, and include statements regarding certain plans, strategies and objectives of management and expected financial performance. These forward-looking statements involve known and unknown risks, uncertainties and other factors, many of which are outside the control of SER and any of its officers, employees, agents or associates. Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Readers are cautioned not to place undue reliance on forward-looking statements and SER assumes no obligation to update such information.

This announcement has been approved for release by the Board of Strategic Energy Resources.

Company Overview

Tight capital structure with an invested team

Corporate Snapshot

Share Price ¹	1.9c
Share on Issue	284M
Market Cap	\$4.7M
Cash ²	\$1.0M
Assets	ASX: RML: 13M Shares Ionic Industries: 6.5% (Unlisted)

Major Shareholders

Graeme Kirke	15.6%
Datt Capital	13.6%
Rechner Group	8.0%

Directors and Management Team

Stuart Rechner, Executive Chairman

BSc (Geology) LLB MAIG MAusIMM MSEG GAICD

- Experienced company director & exploration / development geologist
- Director at Kingston Resources Ltd a junior gold producer in NSW

David DeTata, Managing Director

BSc MSc PhD (Chemistry) MBA GAICD

- Accomplished scientist and senior executive with over 20 years experience
- Previous director roles in mineral exploration and technology companies

Anthony McIntosh, Non-Executive Director

BCom GAICD

- Experienced company director across several listed and unlisted companies
- Board member of Echo Resources Ltd until takeover by Northern Star Resources

Neil Chalmers, Exploration Manager

BSc MSc (Geology) MAIG

- Exploration geoscientist with 15+ years experience across various commodities
- Extensive expertise in leading undercover exploration programs

Chris Yeats, Exploration Manager, NSW

BSc MSc (Geology) MAIG

- Former Executive Director of the Geological Survey of NSW
- Accomplished Geologist and foremost expert in NSW geology

¹Closing price on 15 November 2022

²Cash balance at 15 November 2022

Our Strategy

Specialised Undercover Explorers and Project Generators

SCIENCE DRIVEN

Targeting Tier-1 discoveries along
the undercover extensions of
mineralised terrains
Internal project generation;

TECHNICAL EXCELLENCE

Collaborate with industry experts;
Utilise emerging technologies;
Proven success exploring for
mineralisation at depth

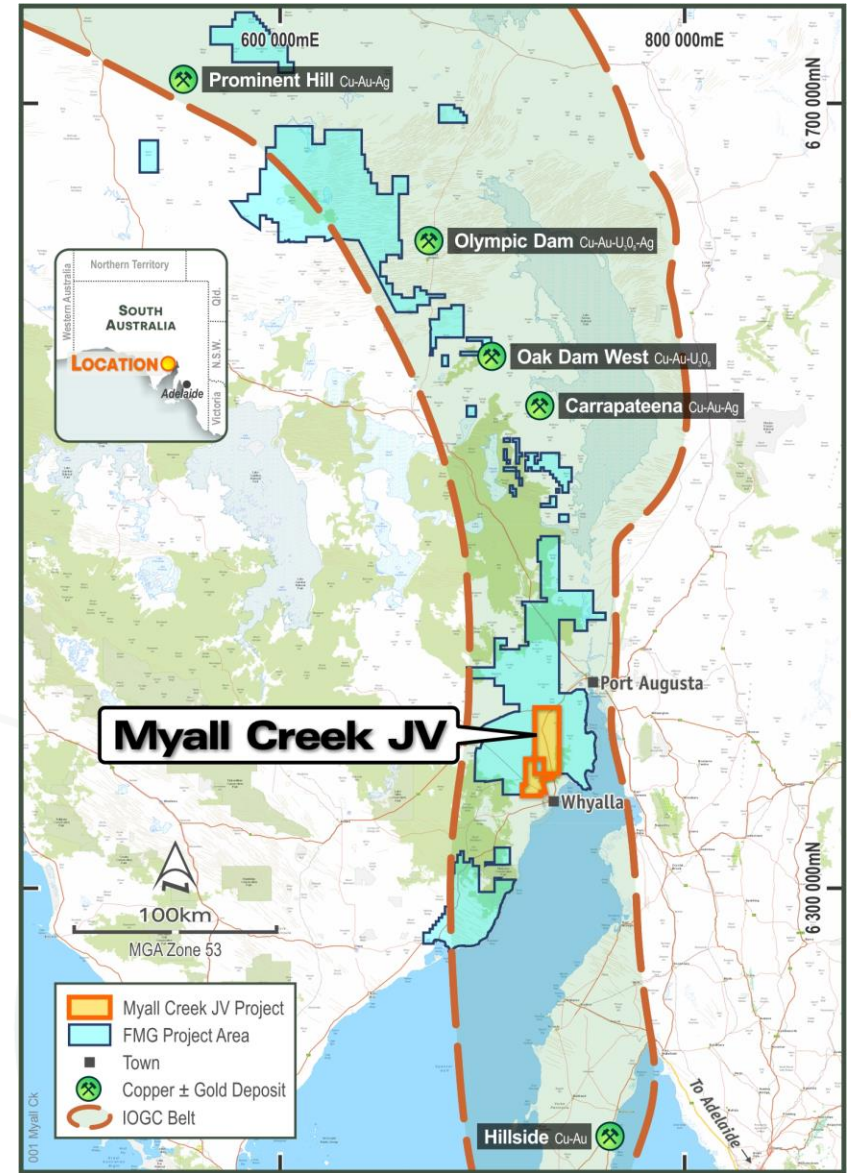

SHARE RISK & REWARD

Leverage co-funding;
Maintain exposure to projects;
Return cash to fund future
Greenfield exploration

Myall Creek Copper Project

The wait is almost over

- Compelling exploration project in the Olympic Copper-Gold Province, home to giants including Olympic Dam, Prominent Hill and Carrapateena
- Targeting IOCG mineralisation in the Proterozoic basement and sediment hosted mineralisation in overlying sediments
- Over 15km strike length sediment-hosted copper sulphide hosted in the basal units of the Tapley Hill Formation
- 2019 Fortescue Metals Group (ASX:FMG) entered into a Farm-in and JV (FJV) covering Myall Creek
- FMG to earn 80% interest by funding \$1.5m exploration (**minimum 1,500m drilling**) over 5 years
- 2020 FMG completed a detailed magnetic / radiometric survey¹, **gravity survey due to commence shortly** with drill program to follow

¹ASX:SEK Announcement March 2020

Cowal Gold Projects

The strategy at work

- Located within the Cowal Igneous Complex, nearby Evolution Mining's >11Moz Cowal Gold Mine and the >1Moz Marsden Cu-Au deposit
- Aligned with strategy of identifying and securing projects within the same geological setting as major mineral deposits – in open ground
- Minimal work undertaken to identify and secure these projects over the last 2 years, no on-ground activities
- 2022 Binding Agreement signed with Evolution Mining for a 2-year Option to purchase one/both tenements¹
 - \$300k cash Option fee already received
 - \$1M cash per tenement
- Cash to be used as seed funding for next phase of project generation and development – limits the need for future capital raises

¹ASX SER Announcement September 2022

Major Assets

East Tennant Cu-Au Project

- Large tenement holding between Tennant Creek and Mt Isa mineral fields
- Emerging Copper Province host to multiple explorers

Isa Undercover Initiative

- Canobie Project: Ni-Cu sulphide and IOCG mineralisation present
- Isa North: IOCG and Sediment-hosted Copper Greenfields project

Mundi Cu-Au Project

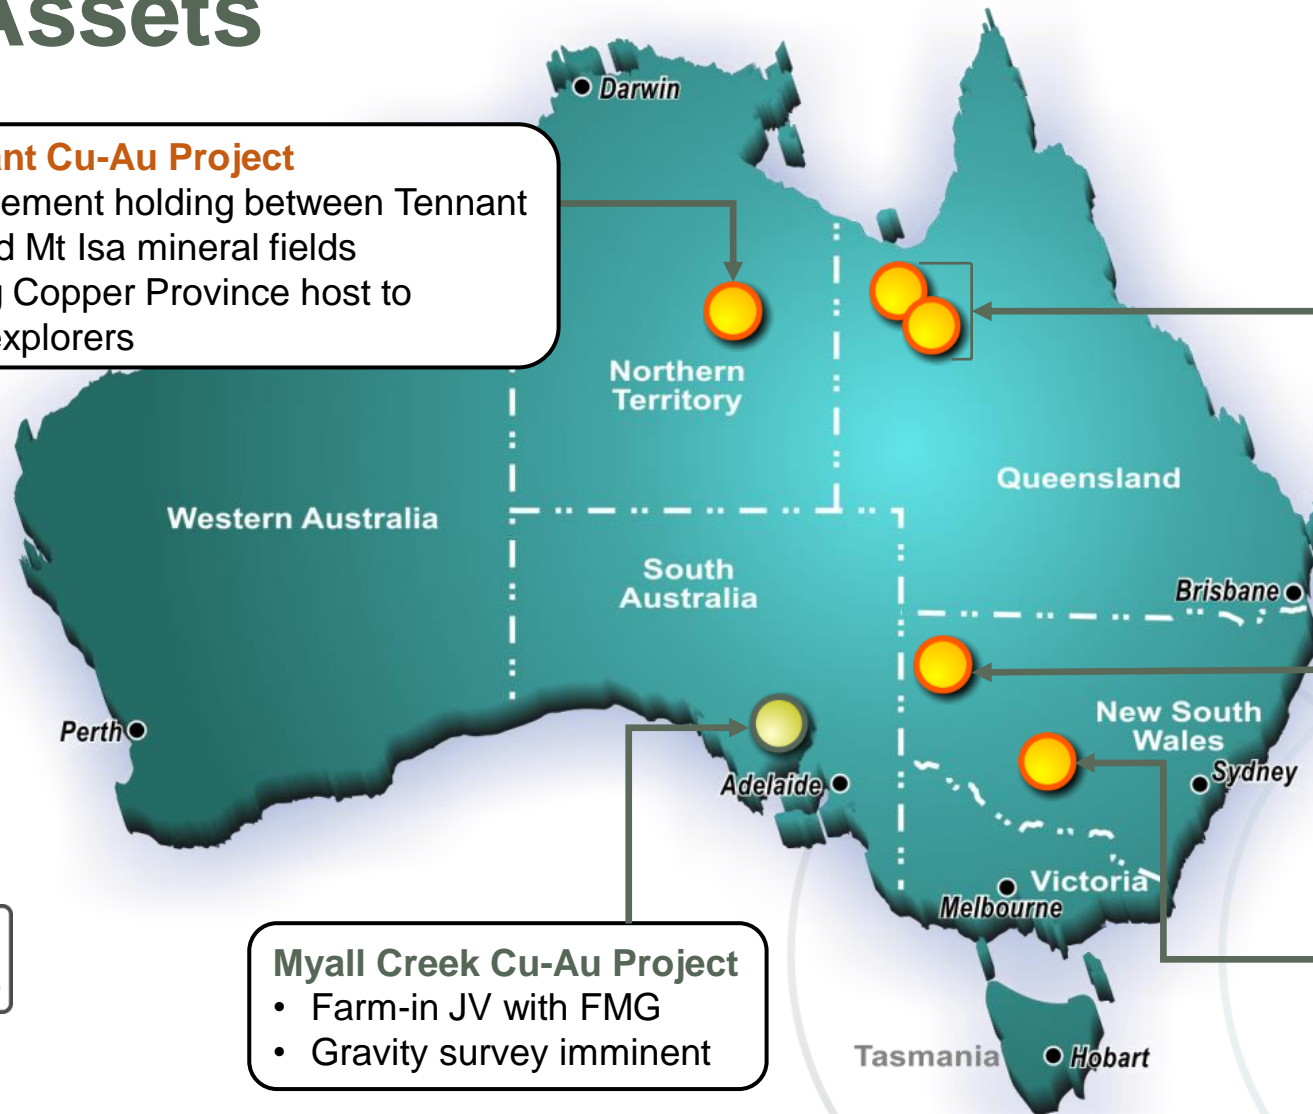

- True Greenfields project
- 'Finger-shaped' MT derived conductor with similarities to Olympic Dam

South Cobar Polymetallic Project

- Achilles 1 Prospect set for drill testing next year
- GSNSW co-funding secured

Myall Creek Cu-Au Project

- Farm-in JV with FMG
- Gravity survey imminent

-  SER Project
-  FMG Joint Venture

Isa Undercover Initiative

Searching Deep Undercover ...

- Two regionally significant projects covering over 2,500km² of the undercover extensions of known mineralised terrains

Canobie Project

- Captures >1,800km² within the Mt Isa Eastern Succession, including a 100km N/S undercover extension of the Quamby fault host to Evolution Mining's Ernest Henry Cu-Au Gold mine (140km to the south)
- Significantly underexplored (<30 drill holes) with historical high-grade Au hits at Lucky Squid and Ni intersections at the Tea Tree and Kalarka Prospects

Isa North Project

- Captures >900km² along the projected northern extension of the mineralised Mt Gordon fault, host to several large deposits to the south including the Gunpowder deposits held by 29 Metals (ASX: 29M)
- Highly prospective for IOCG and Sediment hosted Copper style mineralisation with majors now surrounding the project

Canobie Ni-Cu + Cu-Au Project

A Forgotten Polymetallic Province

- High-grade Gold intercepts drilled at the Lucky Squid Prospect include:
 - 2008 Anglo American: SXDD005 - **17m @ 6.75g/t Au** from 631m
 - 2010 AngloGold Ashanti: SXDD014 - **15m @ 9.09g/t Au** from 699m
 - 2019 SER: SXDD020 - **6m @ 12.08 g/t Au** from 519m **incl. 2m @ 32g/t Au**¹
- Significant Nickel intercepts at the Tea Tree and Kalarka Prospects including;
 - 1994 MIM Exploration: TT001D - **10.4m @ 0.25% Ni, 0.28% Cu** from 508.2m
 - 2021 SER: CNDD001A - 132m @ 0.1% Ni from 507m incl. **2m @ 0.68% Ni**, 0.17% Cu from 635m
 - 2021 SER: CNDD002 - 43m @ 0.1% Ni from 615m and **0.6m @ 0.96% Ni**, 0.11% Cu from 661.6m¹
- Gravity survey and Magnetic Remanence study identified numerous clusters of vector magnetic anomalies coincident with **interpreted chonoliths** modelled in the gravity² – analogous to Noril'sk – Talnakh (Russia), and Nova-Bollinger (Western Australia)
- Drill program scheduled for 2023 to test significant magnetic/gravity targets

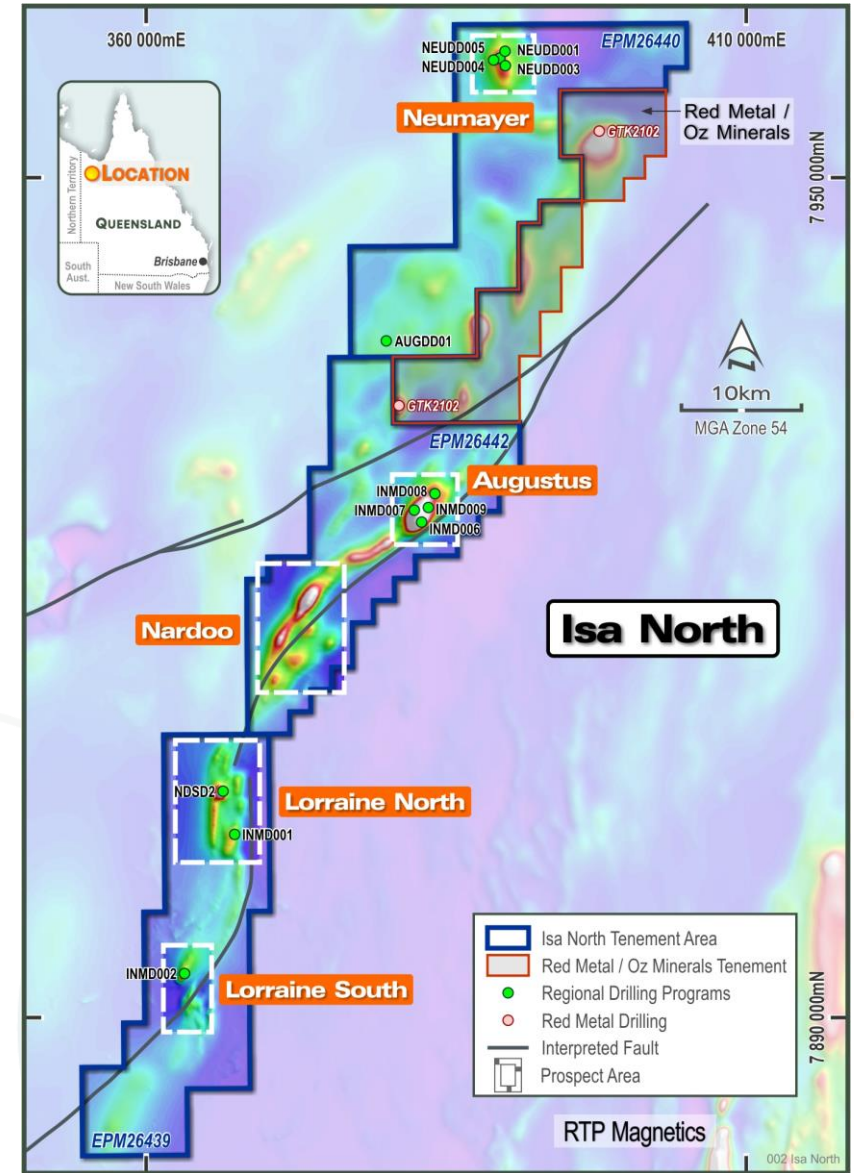

¹ ASX SER Announcement December 2021

² ASX SER Announcement November 2022

Isa North Cu-Au Project

First mover advantage

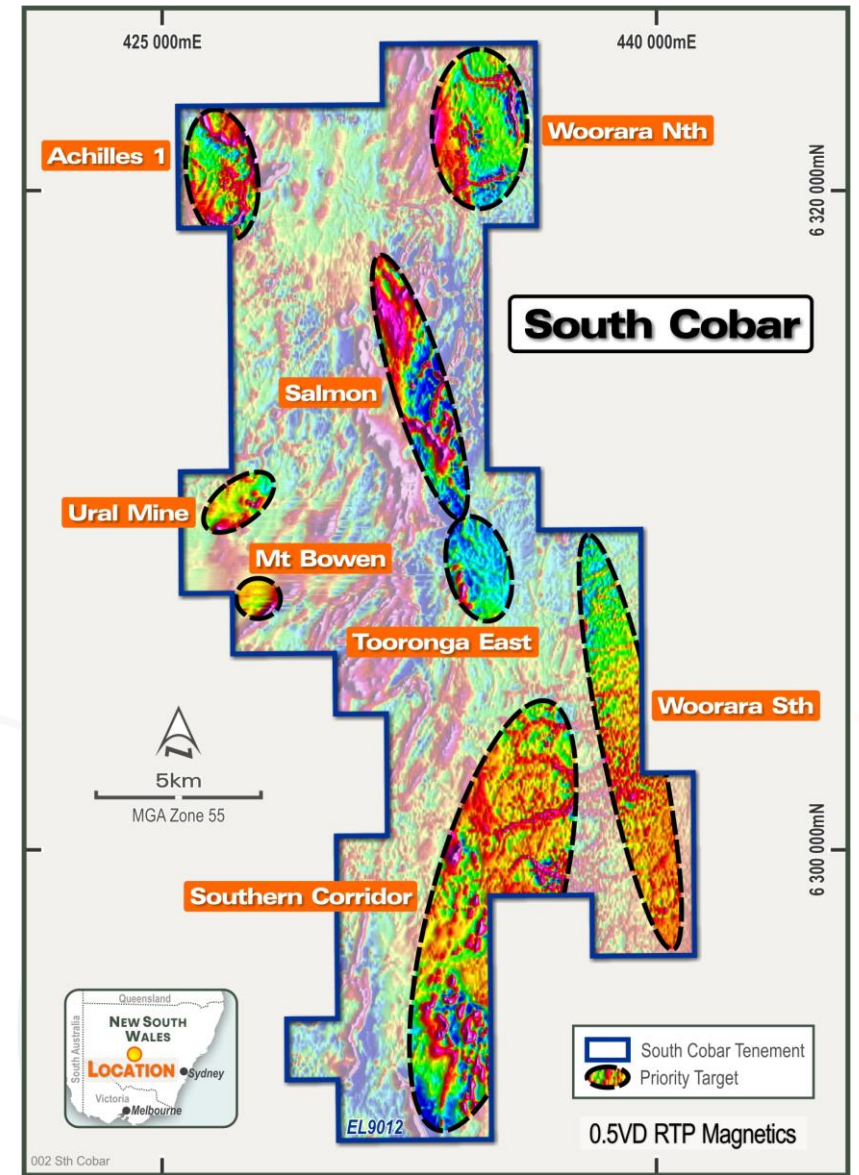

- Acquired from Newcrest in 2021 who retain a FROR and 1% NSR (10yrs)¹
- Post acquisition, entire surrounding area pegged by RIO, FMG & Anglo American
- Limited drilling undertaken across 4 targets (5,190m) with the Lorraine North Prospect (INMD001) identified as a near-miss;
 - Chalcopyrite in hydrothermal breccia and carbonate veins²
 - **Interpreted Tier-1 halo intercept** within a >5km hydrothermal system – High Priority Target
- Follow-up drilling limited due to landholder access – now secured
- 2021 Red Metal Limited (ASX:RDM) intersected 44.4m of hydrothermal ironstone and breccia at GTK2101, copper assay numbers up to 0.34% providing proof of concept³, assays from recent drill program bordering SER ground pending⁴
- Further landholder agreements under negotiation prior to target ranking and a project wide drill program scheduled for next year

South Cobar Cu-Au Project

The next exploration 'hot-spot'

- Located at the southern end of a proven mineral region hosting the Federation Deposit (ASX:AMI) and the CSA Copper Mine (Metals Acquisitions Corp)
- Eight quality targets identified from recent magnetic survey¹, three outcropping
- **Achilles 1 Prospect:** Southern end of a major shear zone is the first target;
 - 2005 Western Plains Gold (WPG): DDH-A1-2 (300.4m) intersected a broad zone of intense hydrothermal alteration, peak values of 0.33% Cu from 90 to 92m, **within a 64m zone averaging 0.10% Cu**, from 76m to 140m proximal to defined soil anomaly – never followed up
 - DDH-A1-1 abandoned due to caving at 184.1m – did not reach target depth
- 2021 Australian Gold and Copper (ASX:AGC) intersected **85m @ 0.13% Cu** from 165m in RC hole from Achilles 3 to the north along the Achilles shear²
- 2022 *Ultrafine+*TM soil geochemistry program identified a significant coincident Cu-Au and multi-element anomaly – 800m strike extent gold in soils anomaly¹
- GSNSW New Frontiers Drilling grant (\$120k) secured to test for Cobar-style Cu-Au mineralisation along the Achilles shear - Postponed to 2023 due to flooding
