

**Drilling to Uncover a Tier-1 Nickel Sulphide
Discovery in the East African Nickel Belt**

**RIU Resurgence
Conference
Perth**

23-24 November 2022 | ASX: ADD

Important Notice and Disclaimer

This presentation has been prepared by Adavale Resources Ltd (ASX:ADD). This presentation contains background information about ADD current at the date of this presentation. The presentation is in summary form, has not been independently verified and does not purport to be all inclusive or complete nor does it contain all the information that a prospective investor may require in evaluating a possible investment in ADD or its assets.

Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. Recipients of this presentation who decide to invest in ADD do so at their own risk.

This presentation is for information purposes only. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of securities in any jurisdiction. This presentation is not a prospectus and does not contain all of the information which would be required to be disclosed in a prospectus. This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This presentation does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek their own professional, legal, tax, business and/or financial advice when deciding if an investment is appropriate.

To the fullest extent permitted by law, ADD and its related bodies corporate, its directors, officers, employees and representatives (including its agents and advisers), disclaim all liability, take no responsibility for any part of this presentation, or for any errors in or omissions from this presentation arising out of negligence or otherwise and do not make any representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimates, forecasts, conclusions or other representations contained in this presentation.

This presentation contains forward looking statements concerning Adavale. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this presentation are based on Adavale's beliefs, opinions and estimates of Adavale as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of nickel, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws. No representation, warranty or undertaking, express or implied, is given or made by the Company that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur.

Competent Person Statement

The information in this release that relates to "exploration results" for the **Nickel** Project is based on information compiled or reviewed by **Mr David Dodd** of MSA, South Africa. Mr Dodd is a consultant for Adavale Resources Limited and is a member of the SACNASP. Mr Dodd has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration as well as to the activity that is being undertaking to qualify as a Competent Person under the ASX Listing Rules. Mr Dodd consents to this release in the form and context in which it appears.

The information in this release that relates to "exploration results" for the **Uranium** Project is based on information compiled or reviewed by **Mr Patrick Harvey** MAppSci, Australia. Mr Harvey is a consultant for Adavale Resources Limited and is a member of the AIG. Mr Harvey has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration as well as to the activity that is being undertaking to qualify as a Competent Person under the ASX Listing Rules. Mr Harvey consents to this release in the form and context in which it appears.

Why invest in Adavale?

Exposure to critical minerals - Nickel and Uranium

- Electrification and Decarbonisation

A dominant Nickel exploration portfolio in the East African Nickel Belt ("EANB")

- Region poised to become an epicentre for nickel discovery and production in Tanzania

Success through dedicated methodology and a considered exploration program

- Gravity survey identified 32 new large-scale Ni sulphide targets
- Initially 20 targets flown with Heli - EM surveys covered

Drilling program underway (8,000m)

- RC/DD priority testing 7 coincident gravity and Heli EM anomalies
- Drilling to ~300+m to target conductors identified prospective for Ni Sulphides

Team assembled has deep African experience + track record of major Ni discoveries

Fully funded to execute imminent drill programs and ongoing exploration

- Recent placement and rights issue completed to raise ~\$3M

Board & Capital Structure

Grant Pierce

Non-Executive Chairman

Mining engineer with ED, NED, GM experience
Strong and long-standing affinity with Tanzania

David Riekie

Executive Director

Corporate experience, ASX roles (NED, MD, ED, CEO)
including Nickel, Uranium/Energy, African experience

John Hicks

Non-Executive Director

Accomplished Nickel Sulphide Geologist/Explorer, 15yrs of
GM level Geo/Explorer for ASX listed

Allan Ritchie

Chief Executive Officer

Experienced ASX/HKEx Energy and Resources CEO/ED/MD,
30+yr Investment Banking career

Leonard Math

Chief Financial Officer/ Company Secretary

Experienced Resources sector executive, ASX listed ED, CFO,
Coy Sec

Supply squeeze pushes nickel up 5% to 11-year high

Reuters

LONDON, Jan 19 (Reuters) - Nickel prices on Wednesday shot to their highest since 2011 as a supply shortage forced traders to pay huge premiums to get their hands on metal.

Deals

Wyloo to buy nickel miner Noront after BHP drops off from race

Reuters

Tanzania - Country Dynamics + Recent Nickel Focussed Actions

Tanzania as a destination

- Numerous projects for various minerals are progressing or in the pipeline for government consideration and approval
- Dedicated negotiation teams to progress projects
- Clear government ownership interest (16%) established

BHP has made a significant investment in Kabanga Nickel (equity/technology)

- US\$40m stage 1
- US\$10m technology
- US\$50 stage 2 milestone (scope for future commitments) to secure ~18% interest in Kabanga Nickel

Relevance and context

- BHP responsible for the original regional surveys 1990's (foundation for Kabanga discovery)
- Global relevance of Tanzanian Ni Sulphide deposits as a destination
- Signals changing sentiment - Tanzania as an investment destination
- Benefit to ADD of proximal green processing and mining operation/jurisdiction
- Significant local economic benefit current and ongoing anticipated

Nickel Portfolio, Tanzania

**A dedicated methodology and exploration program to
uncover a large-scale Ni sulphide discovery in East African
Nickel Belt**

Kabanga Jirani and Luhuma – Dominant Position in East African Nickel Belt

Dominant nickel licence portfolio within the **East African Nickel Belt** of Tanzania **covers 1,267 sq kms**

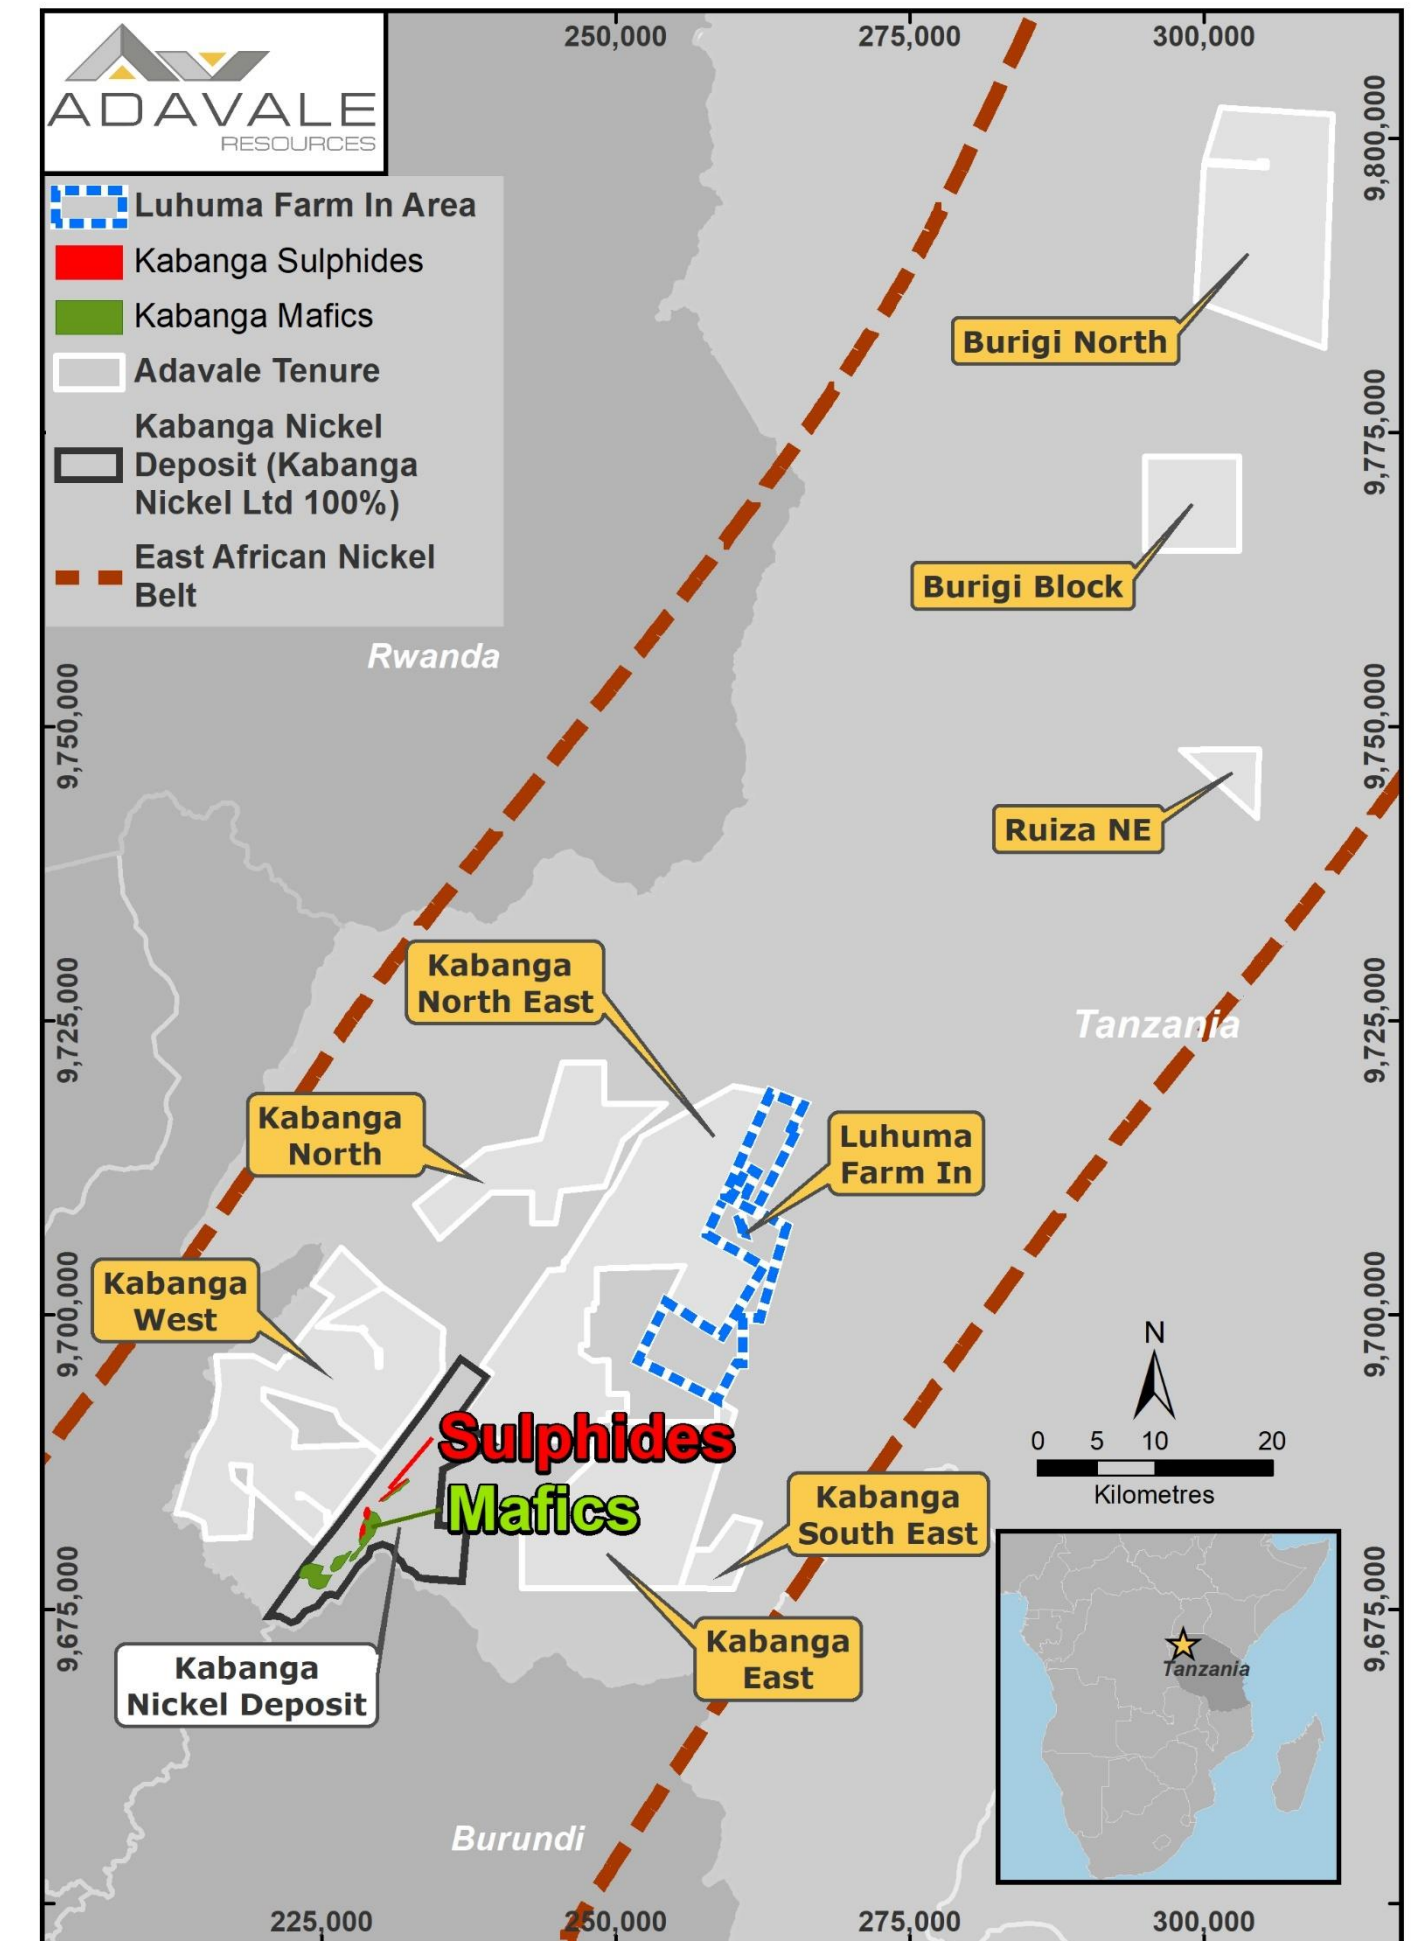

Portfolio Overview

- 100% owned Licences + Luhuma Farm – In ground (initially to 80%, trigger to 100%)
- Located along the Kabanga - Musongati mafic-ultramafic alignment within the Meso-Proterozoic Karagwe-Ankole Belt (age ~1350 to 1400Ma), prospective for Ni, Cu, Co, Cr and PGE's
- Notable setting similarity with:
 - Thomson Nickel Belt, Raglan and Voisey's Bay deposits in Canada
 - IGO's Nova in the Albany-Fraser Belt in Western Australia

Licenses are adjacent and along strike from the world's largest "under development" high-grade **Kabanga nickel sulphide deposit, 58Mt @ 2.62% Ni**

Adavale is poised to uncover a large-scale Ni sulphide discovery with a drilling program now underway

Drilling has commenced and is targeting high-priority conductors

Methodical Approach to Maximize Probability of Drilling Success

***Objective: Discovery / Campaign focused resource drilling**

***OBJECTIVE**
Dedicated Drilling Campaign

Overview of CY 2022/23 Nickel Exploration Program

Ground Based/Field Survey(s) ✓

- Field checking, logistics/Soil sampling (orientation);
- Initial gravity and preliminary drilling

Regional Scale Gravity Survey ✓

- 1,000 sq kms- 32 anomalies identified

Prospect Ranking for EM survey ✓

- Hierarchy to identify priority survey areas (200 sq kms)

Heli Airborne EM (HEM) Survey ✓

- 9 HEM areas outlined

Prospect Ranking - Drilling ✓

- Hierarchy of priority and type of drilling recommended
- Coincident/correlation review - gravity targets + HEM signatures

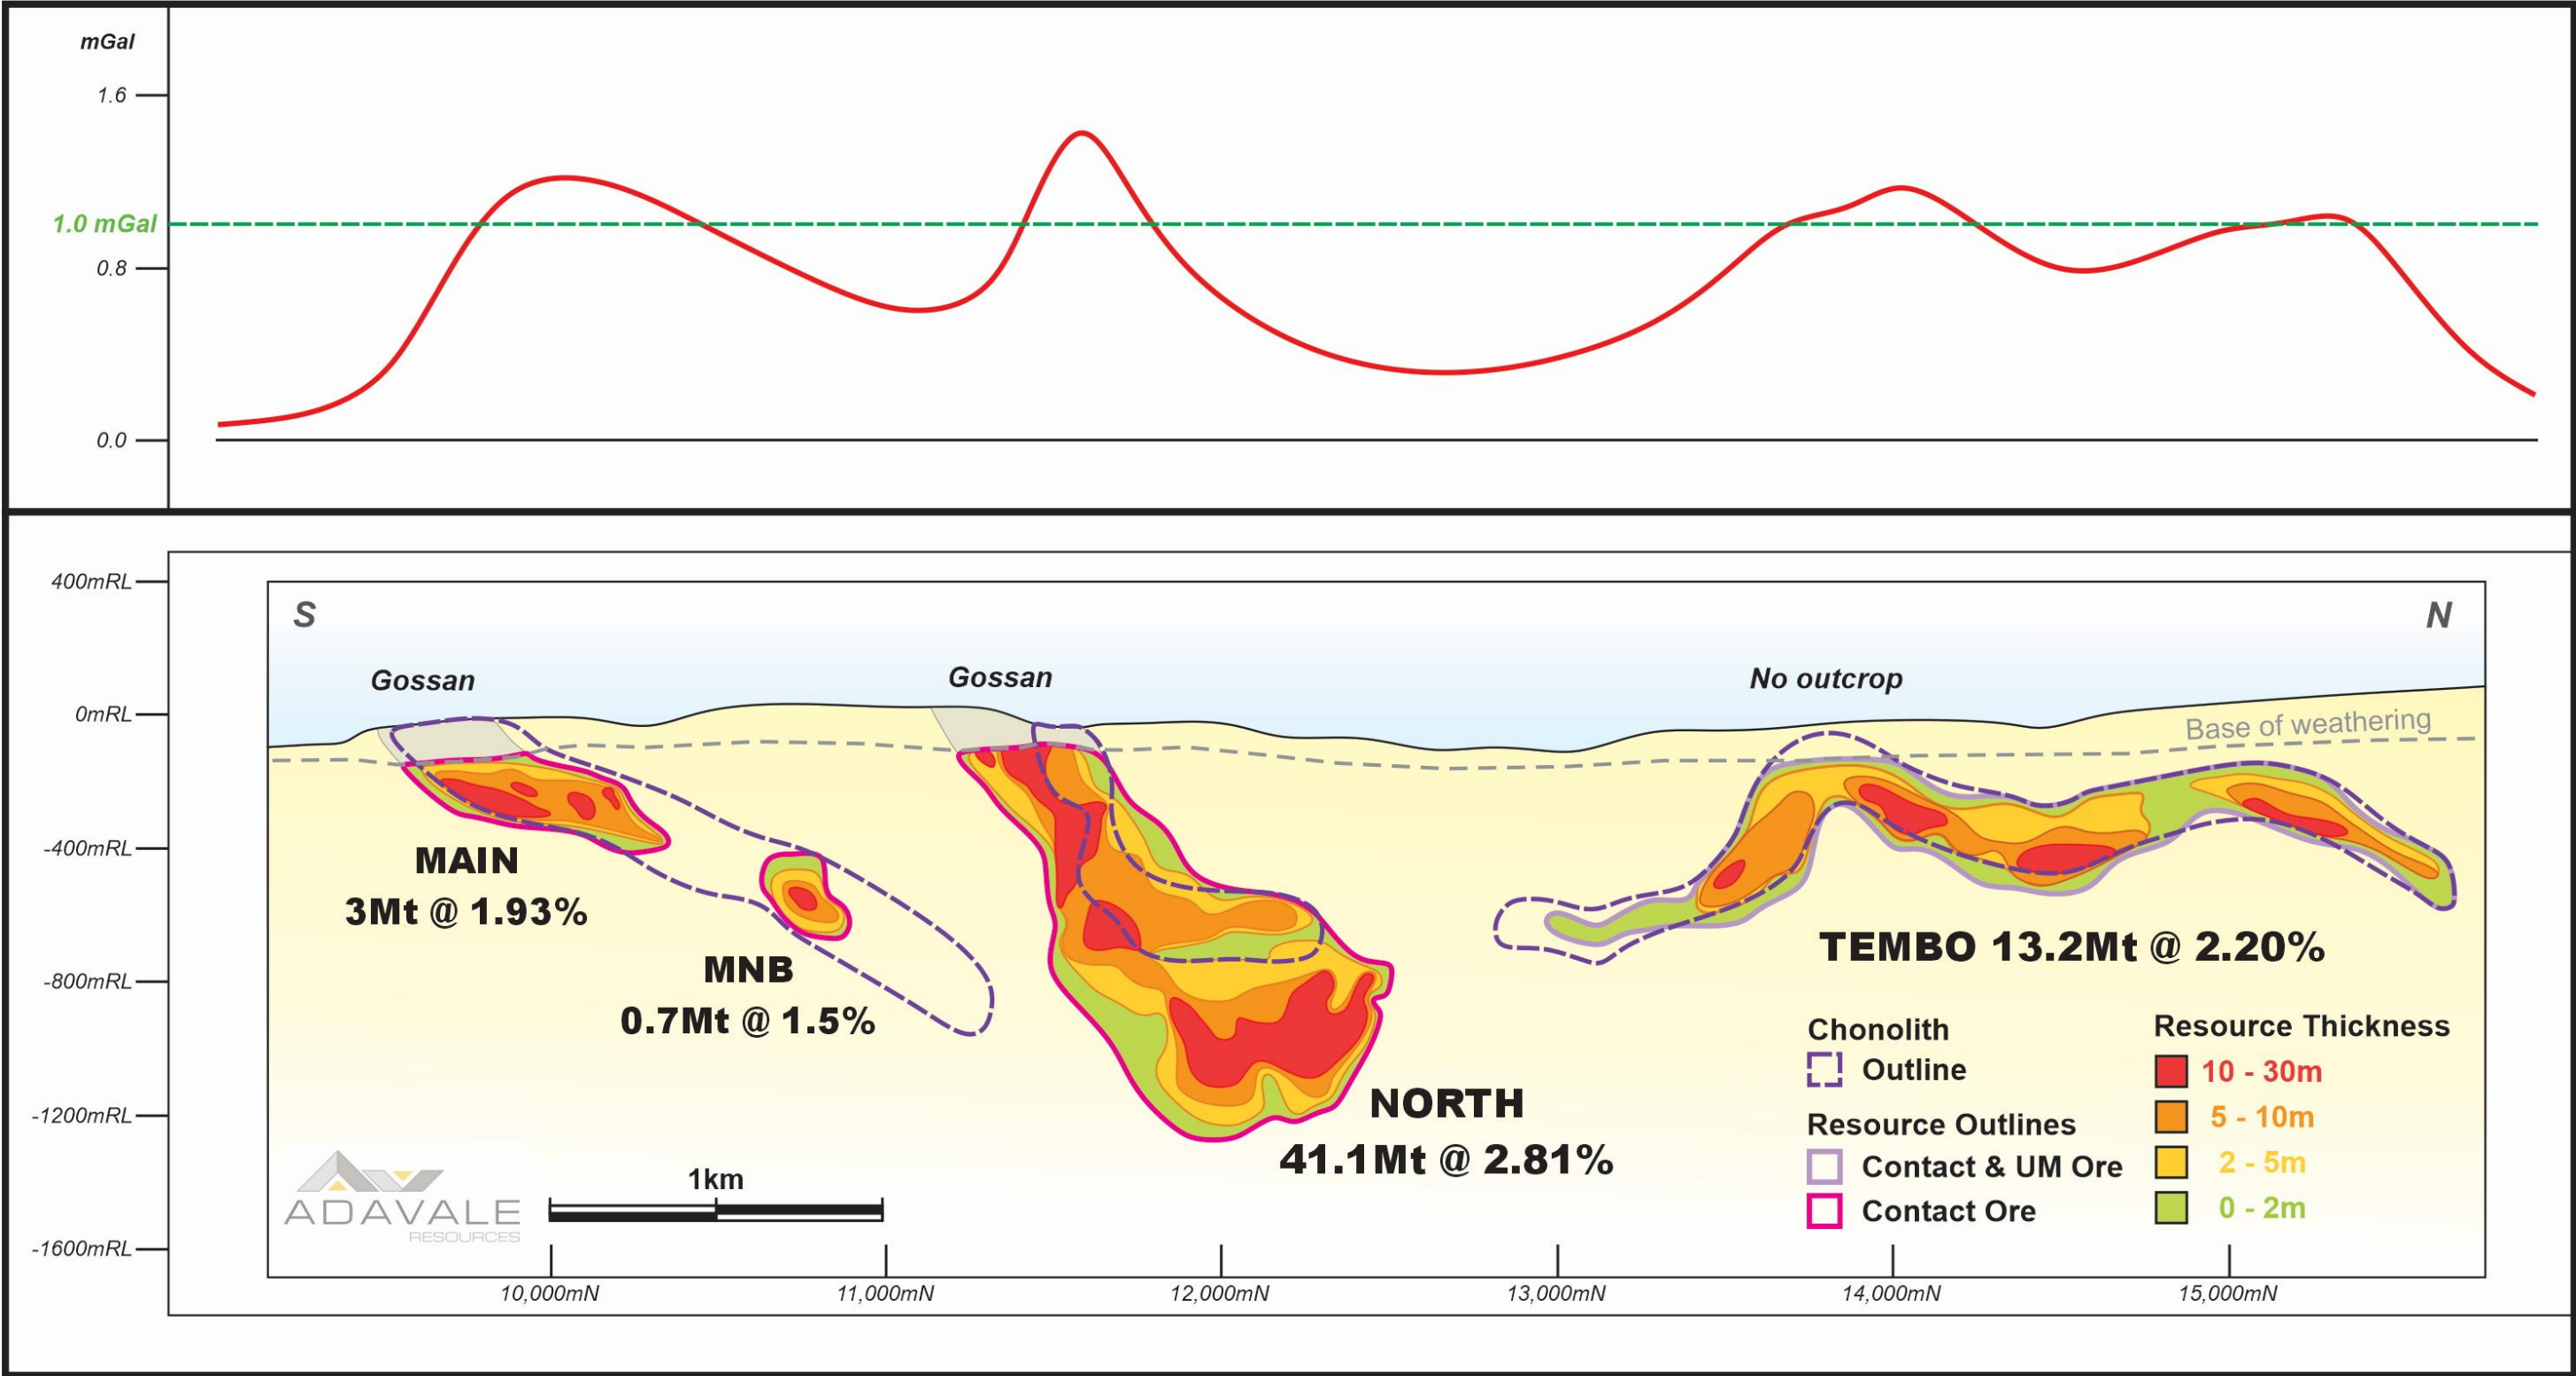

Campaign Drilling Underway

- Targeted (RC/Diamond) over high priority prospects
- Assay results/pXRF readings

Pathfinder Gravity Signatures – Modelled on Neighbouring Resource*

Priority gravity ranking for anomalies + 0.75mGal Bouguer

Modelling & Outcomes

- Modeling has been undertaken by ADD based on the underlying deposits and Resources at Kabanga* to generate a range of corresponding (mGal) gravity signatures
- These indicative gravity signatures show mGal amplitudes of between ~ 0.6 to 1.4mGal around the large scale mafic/ultramafic intrusions
- ADD originally applied an exploration target threshold of +0.75mGal for the current gravity program to identify larger scale mafic/ultramafic intrusions
- ADD has already identified 16 discrete priority targets with gravity signatures+1mGal (increased density)

****ADD ASX Release dated 7 July 2022 titled 32 Nickel Targets Identified in the East African Nickel Belt**
***Source: Evans, D. M., Hunt, J. P. P. M. and Simmonds, J. R., 2016. An overview of nickel mineralisation in Africa with emphasis on the Mesoproterozoic East African Nickel belt (EANB). Episodes, 39/2, 319-333. DOI: 10.18814/epiugs/2016/v39i2/95780**

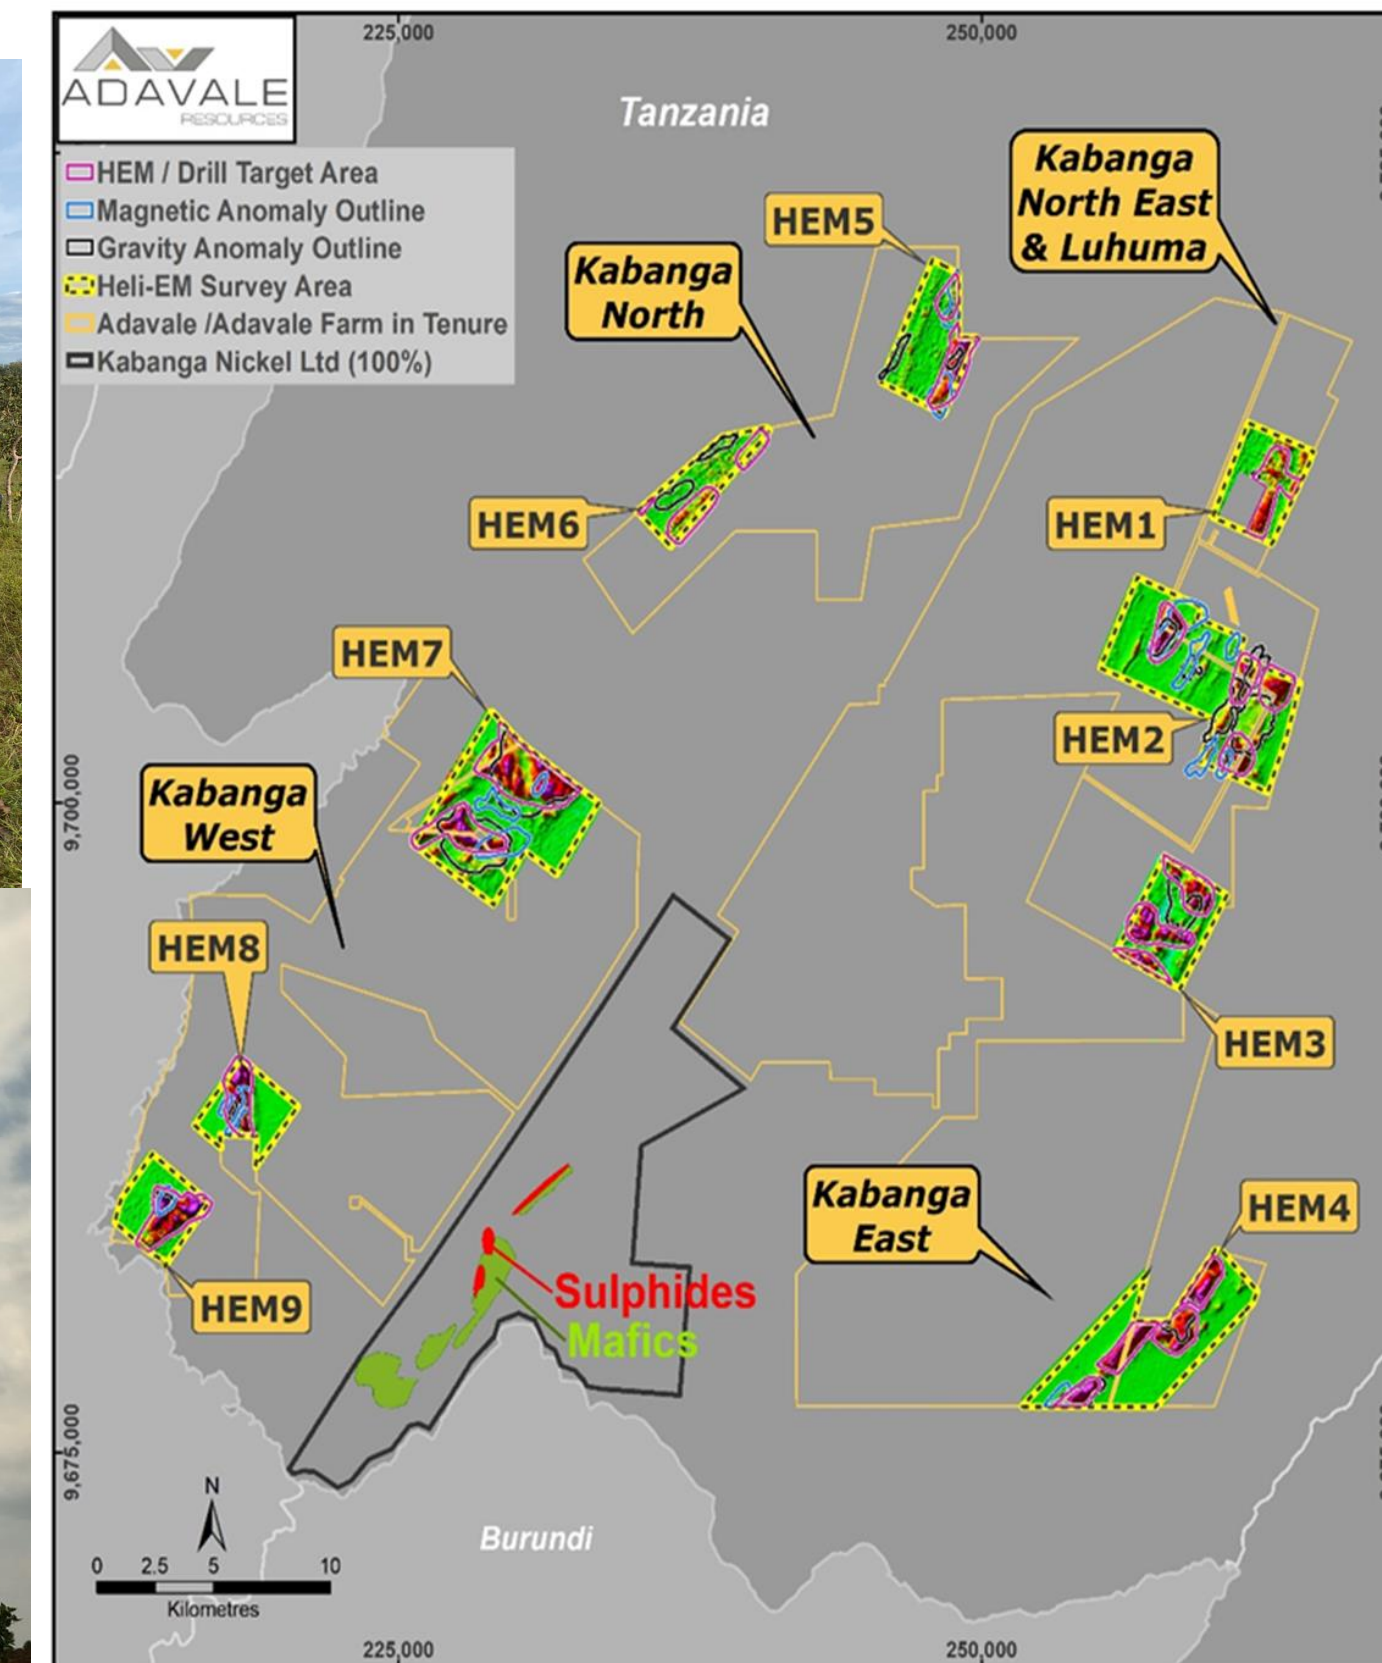

Gravity + Heli Electromagnetic Surveys – Co-incident

Gravity initiated foundations for exploration success*

- ~1,000 sq km gravity readings with **32 newly discovered and unexplored gravity targets**
- Confirmed prospectivity and large-scale nickel exploration potential **~55 km strike length** became the focus of Adavale's exploration program and **Heli-borne Electro Magnetic (HEM) survey**

Heli Electro Magnetic Surveys – 9 HEM Targets

- HEM survey has initially focused on 18 higher mGal amplitude anomalies of the 32 identified gravity targets
- **9 HEM target areas were flown using deep penetrating (~500m) high powered** time domain EM (TDEM) and magnetic survey equipment* ~2,100-line kms (210 sq kms) -September 2022
- Objective being **to identify** coincident areas of both strong EM and gravity targets~ conductors

Plan view of the nine HEM target areas flown

*ADD ASX Release dated 7 July 2022 titled 32 Nickel Targets Identified in the East African Nickel Belt

Drilling Campaign – Commenced in October 2022

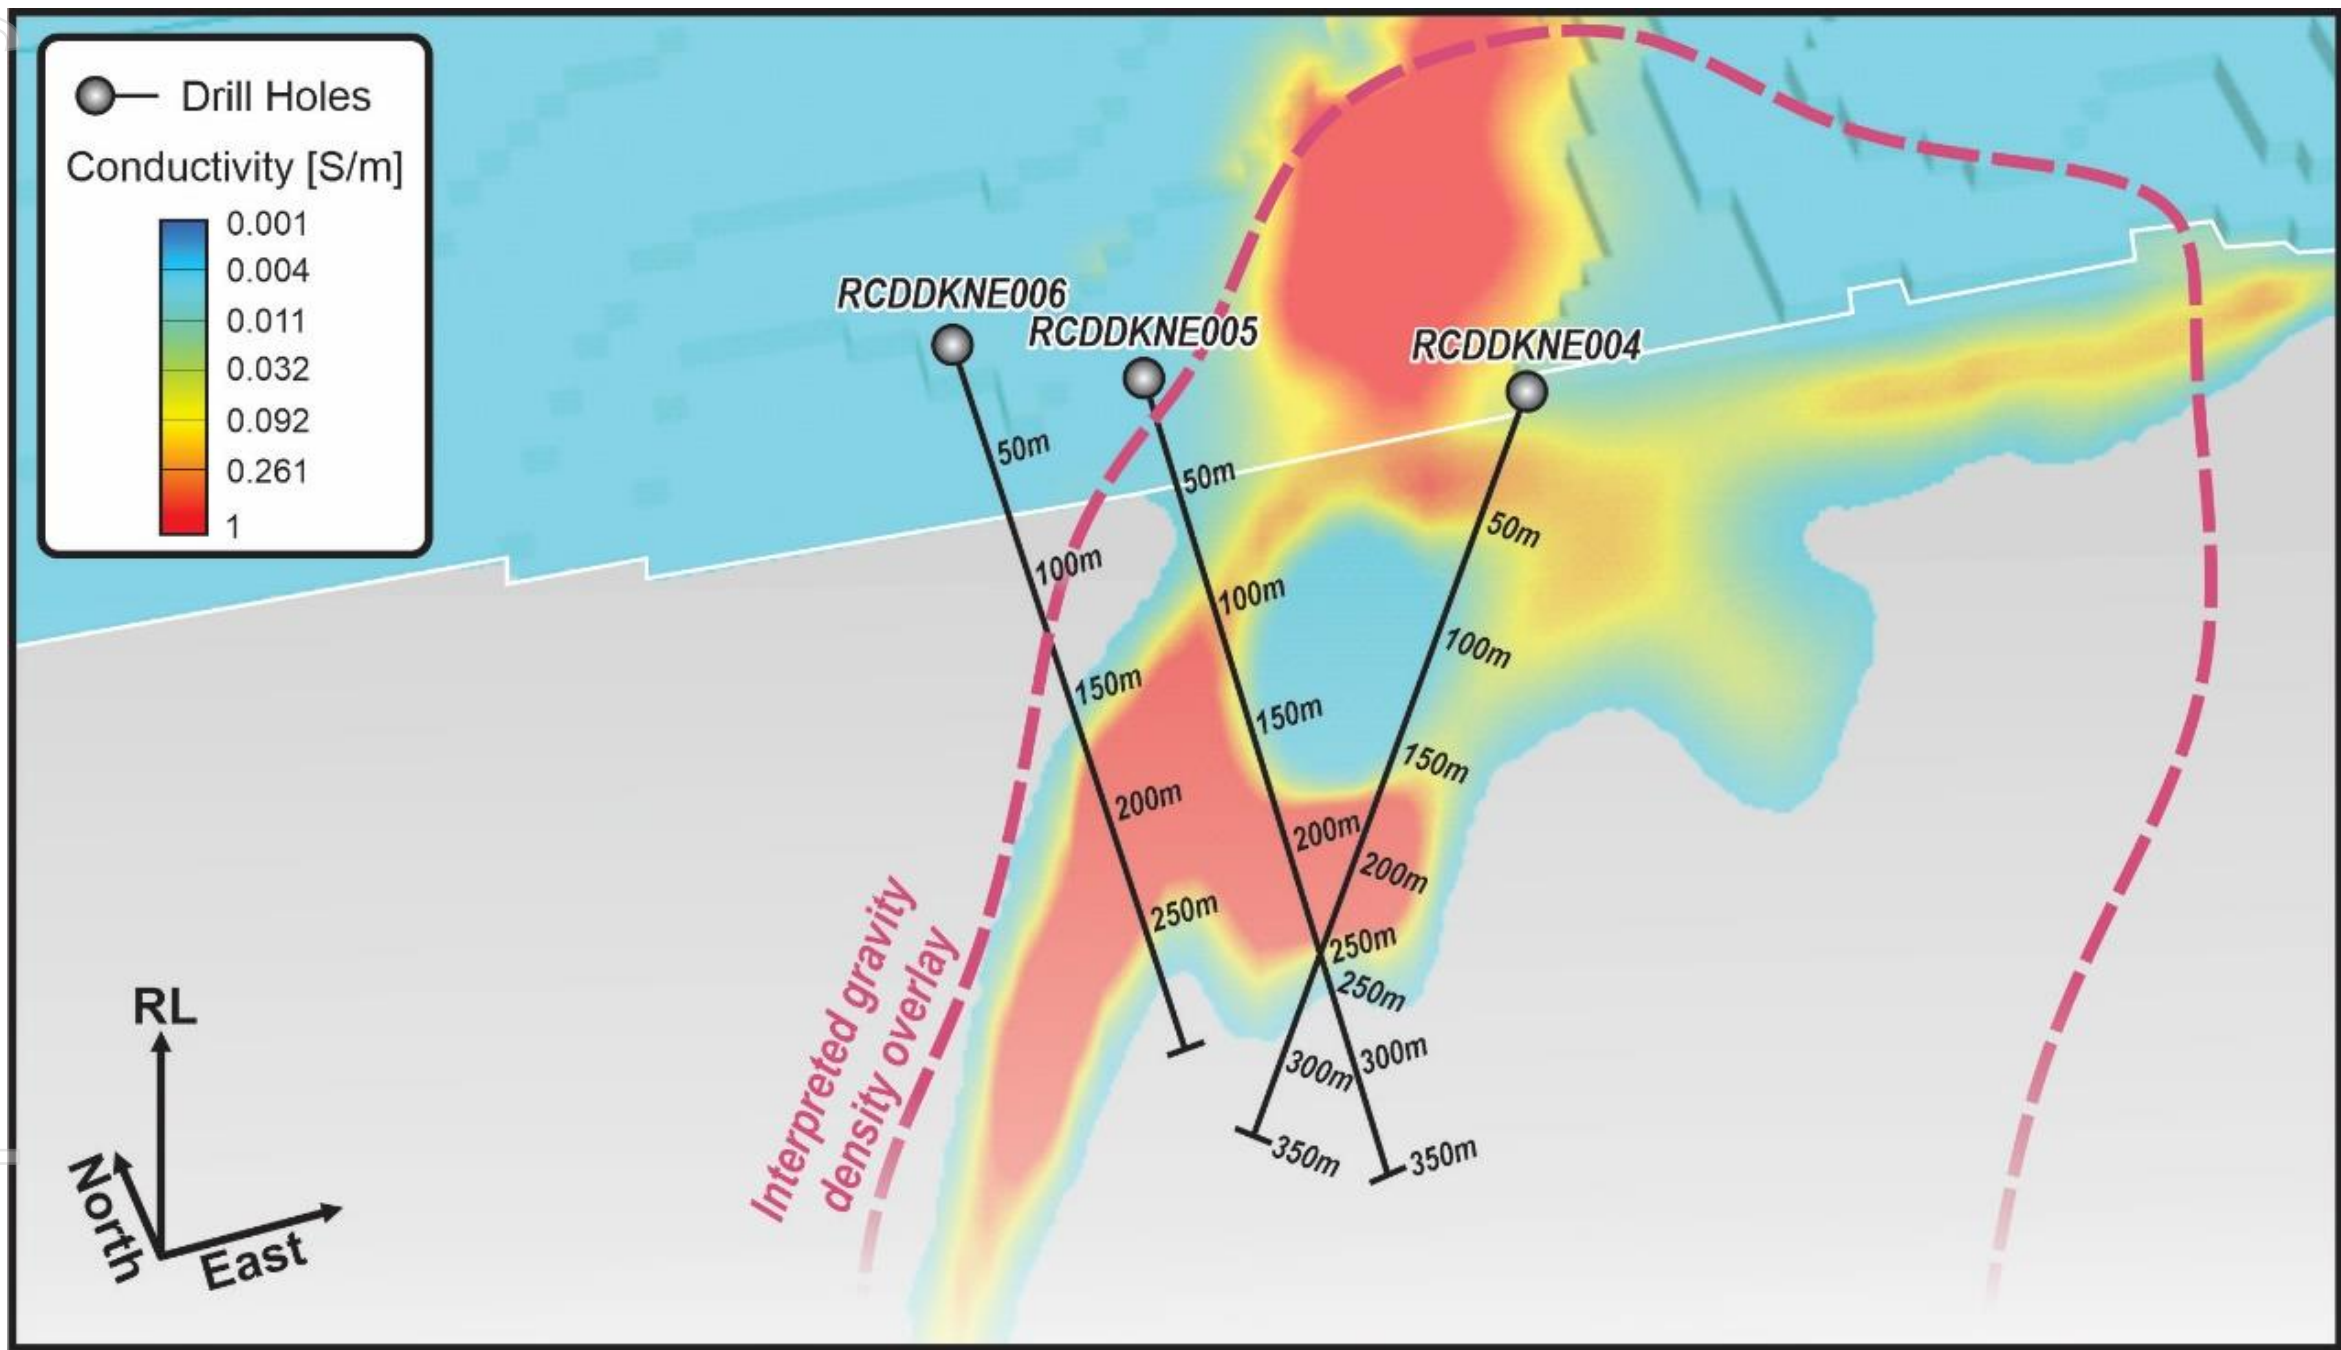

- High impact **6,000m to 8,000m** “Priority Target Testing” **drilling program** now underway and accelerating
- Multi-purpose RC/DD drill rig(s) in operation RC pre-collar drilling ~100m; diamond drilling depths up to 500m
- Ongoing assessment and adjustment to drill program anticipates the initial drill program is expected to test approximately **20 initial anomalies within 7 priority HEM/Nickel target areas**
 - ✓ Initial **RC Drilling commenced at HEM area 2**
 - ✓ Additional drilling to follow at **HEM areas 3 & 4**
 - ✓ **Relocation to HEM 7-9**, proximal and on similar latitude to Kabanga Nickel Resource 58Mt @ 2.62% Ni
- Downhole EM to aid ongoing drill targeting
- Visual outcomes from drilling expected during the December quarter

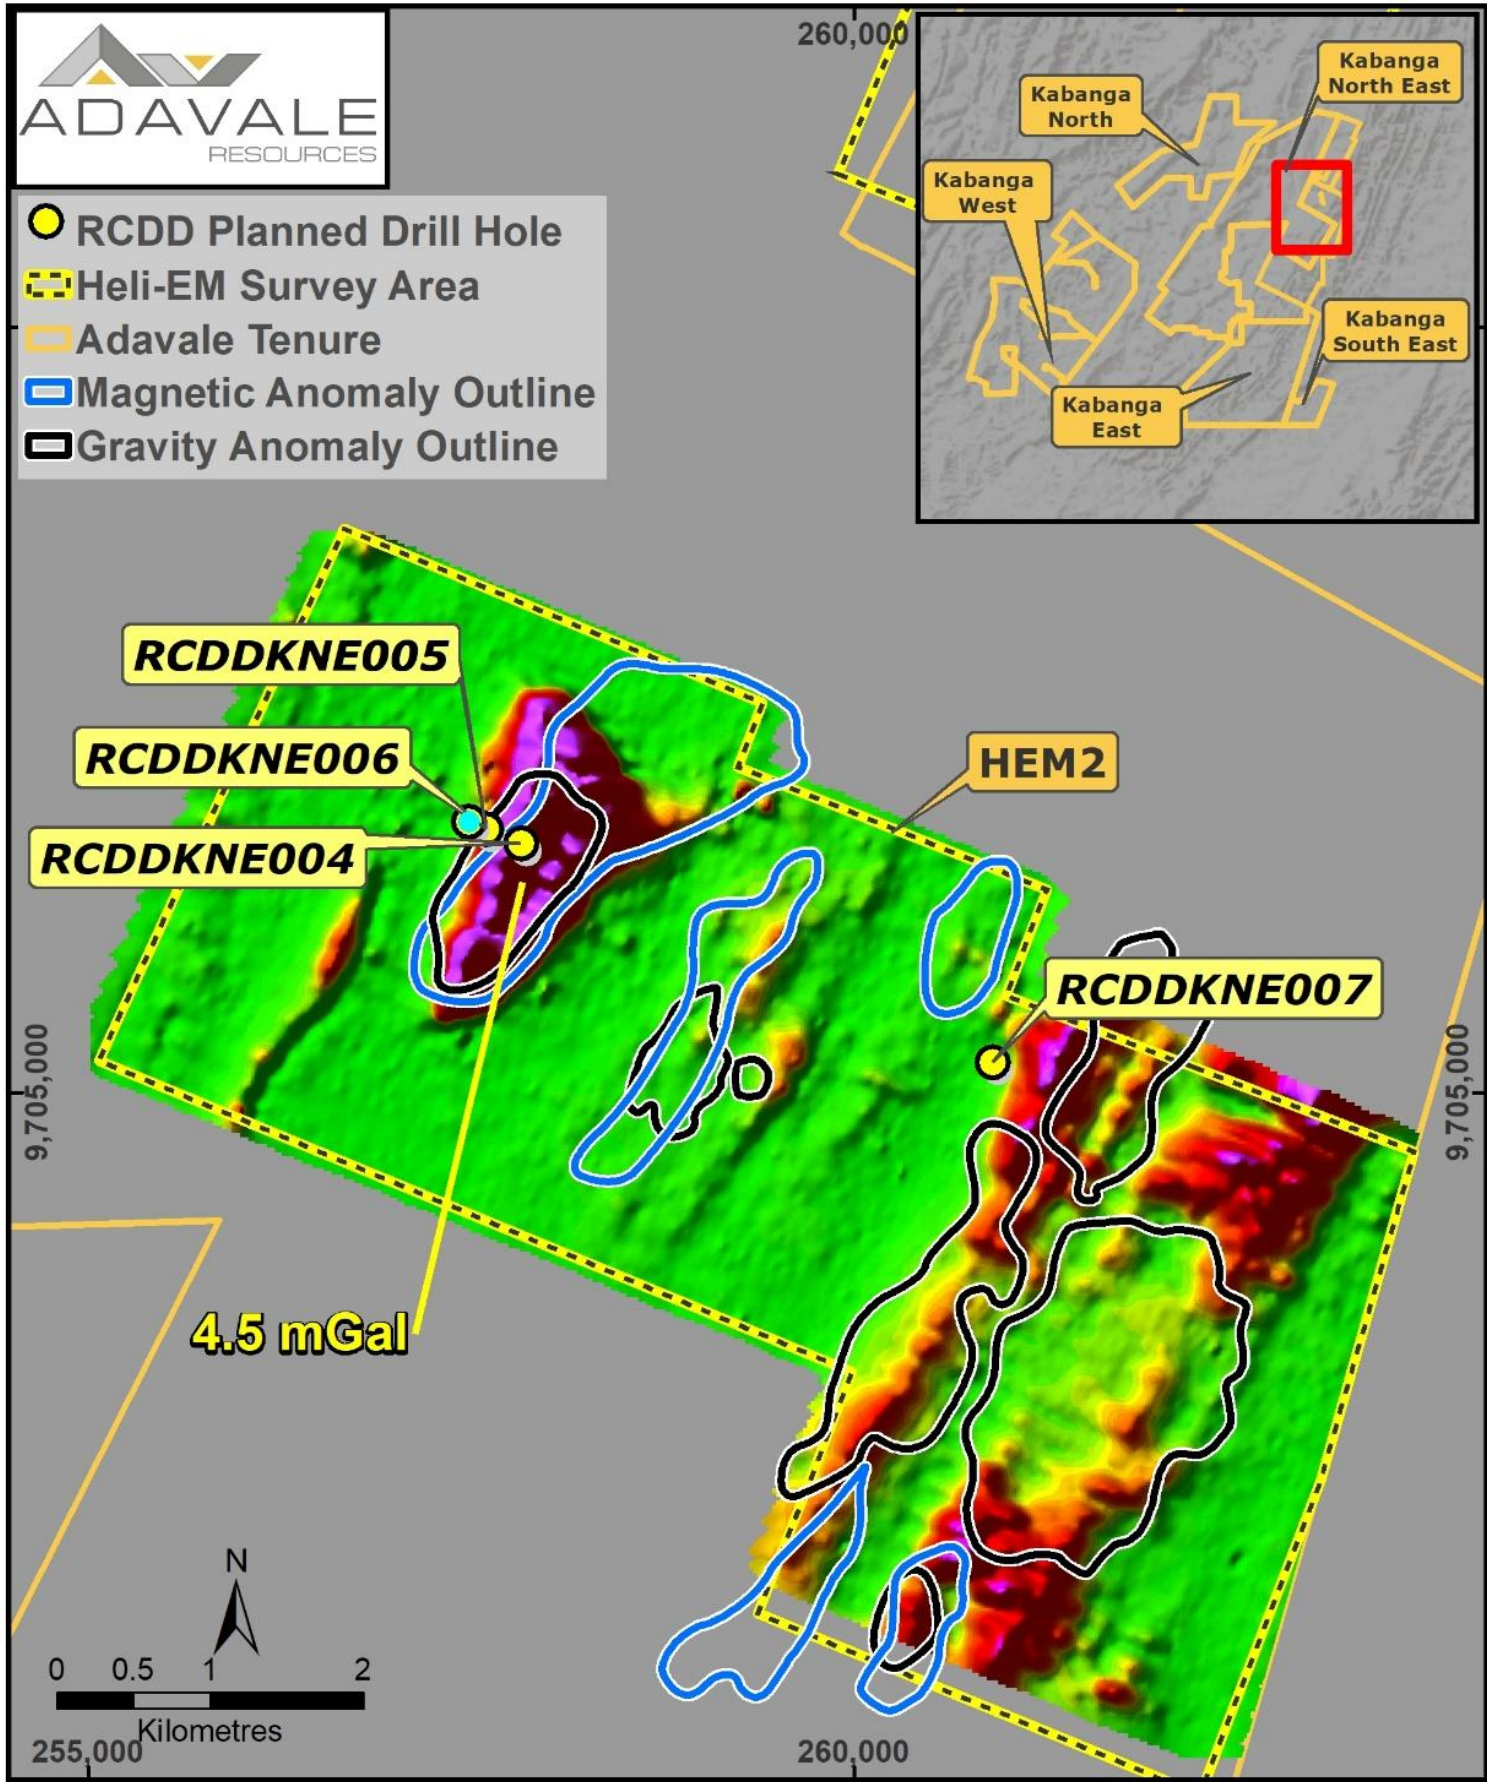

RCDDKNE 004 pre-collar installation at HEM 2 - Kabanga North-East

**ADD ASX Release dated 28 October 2022 titled "Diamond Drilling underway at Kabanga Jirani Nickel Project"*

Sulphide Nickel – Drill Target Areas - HEM2*

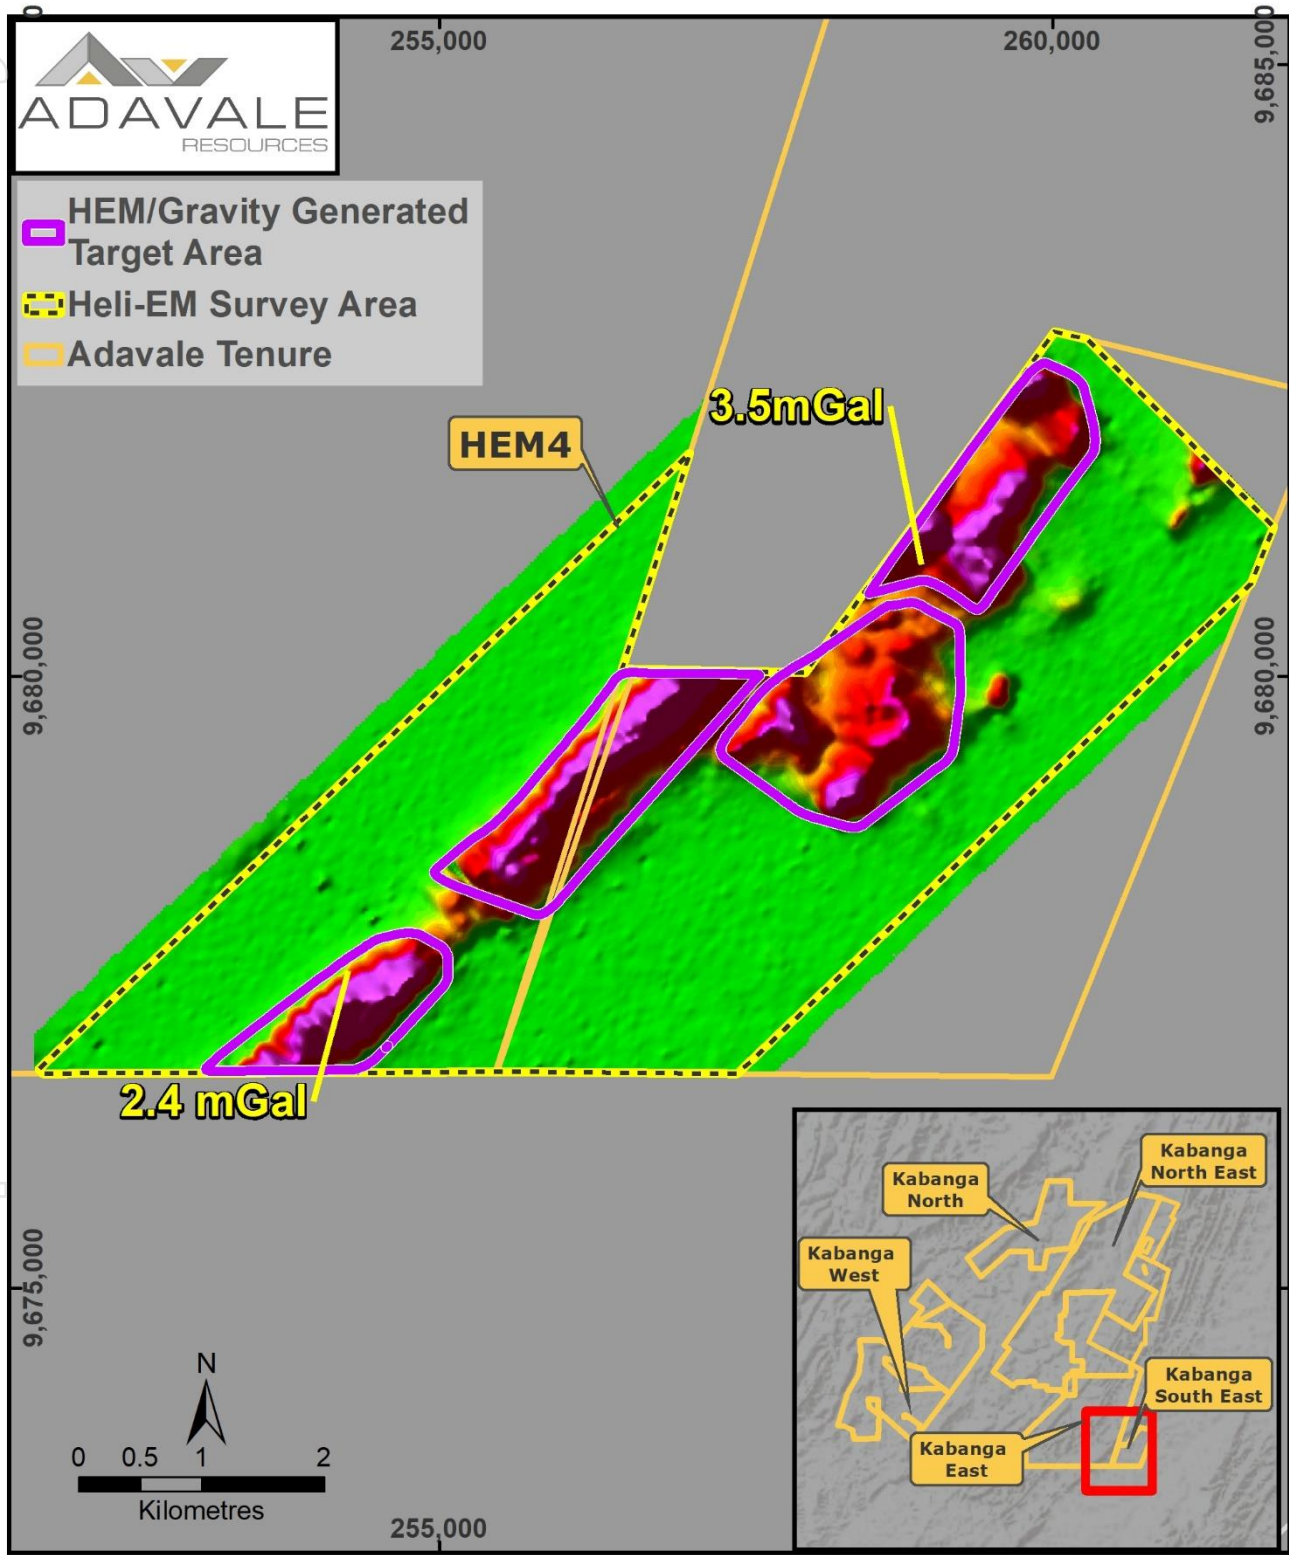

Interpreted extent of the intrusion based on a 3D Voxel generated image prepared from NRG 1D inversions, overlaid with 3 DD drill hole traces. RCDDKNE004 will be drilled first followed by RCDDKNE005 (scissor hole) and dependent on results, RCDDKNE006. The red dashed line represents the outline of the interpreted strong gravity anomaly associated with this target area.

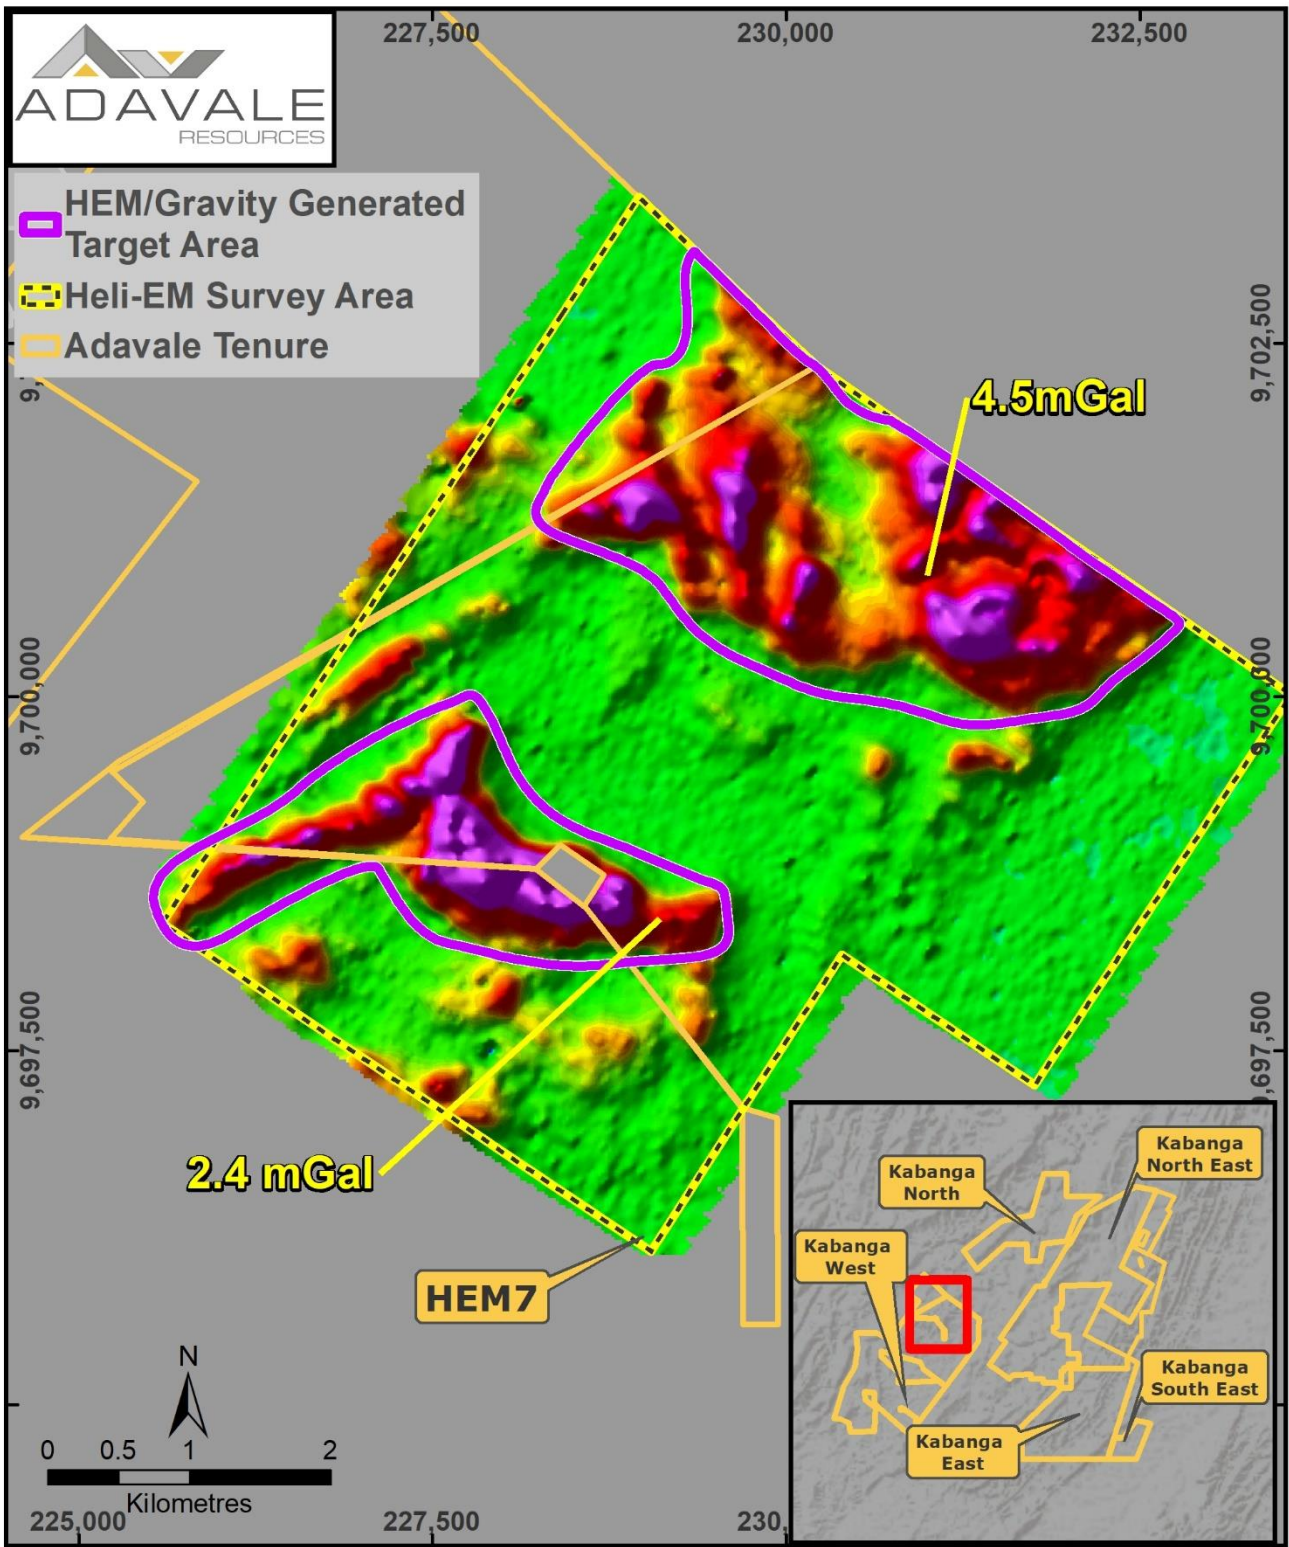

HEM survey area plan showing broad internal target areas based on gravity and EM signatures, together with the location of the Kabanga nickel sulphide deposits and associated mafic intrusions

Drilling Campaign – Priority Locations and Focus*

Plan view of HEM survey areas 4 showing background channel 20 data, overlain with colour polygons reflecting areas of associated strong gravity, magnetics and EM

Plan view of HEM survey areas 7 showing background channel 20 data, overlain with colour polygons reflecting areas of associated strong gravity, magnetics and EM

Plan view of HEM survey areas 8 & 9 showing background channel 20 data, overlain with colour polygons reflecting areas of associated strong gravity, magnetics and EM

Tanzanian Social and Community Focussed Initiatives

Regional contract and employment opportunities

- Local geological field assistants and contractors
 - Drilling
 - DHEM surveys
 - Ground based surveys (soil and gravity surveys)
 - Logistics

Local Community and Health focused initiatives

Bridge2Aid Australia

- Prevention of infant oral mutilation
- Training, awareness and treatment

VAKA Health Foundation (sponsorship)

- Providing professional development training for 60 nurses at Ngara District Hospital'
- AAMEG 2022 award winner:

“Best Workforce and Industry Development Initiative”

SCAN ME

Uranium Project, South Australia

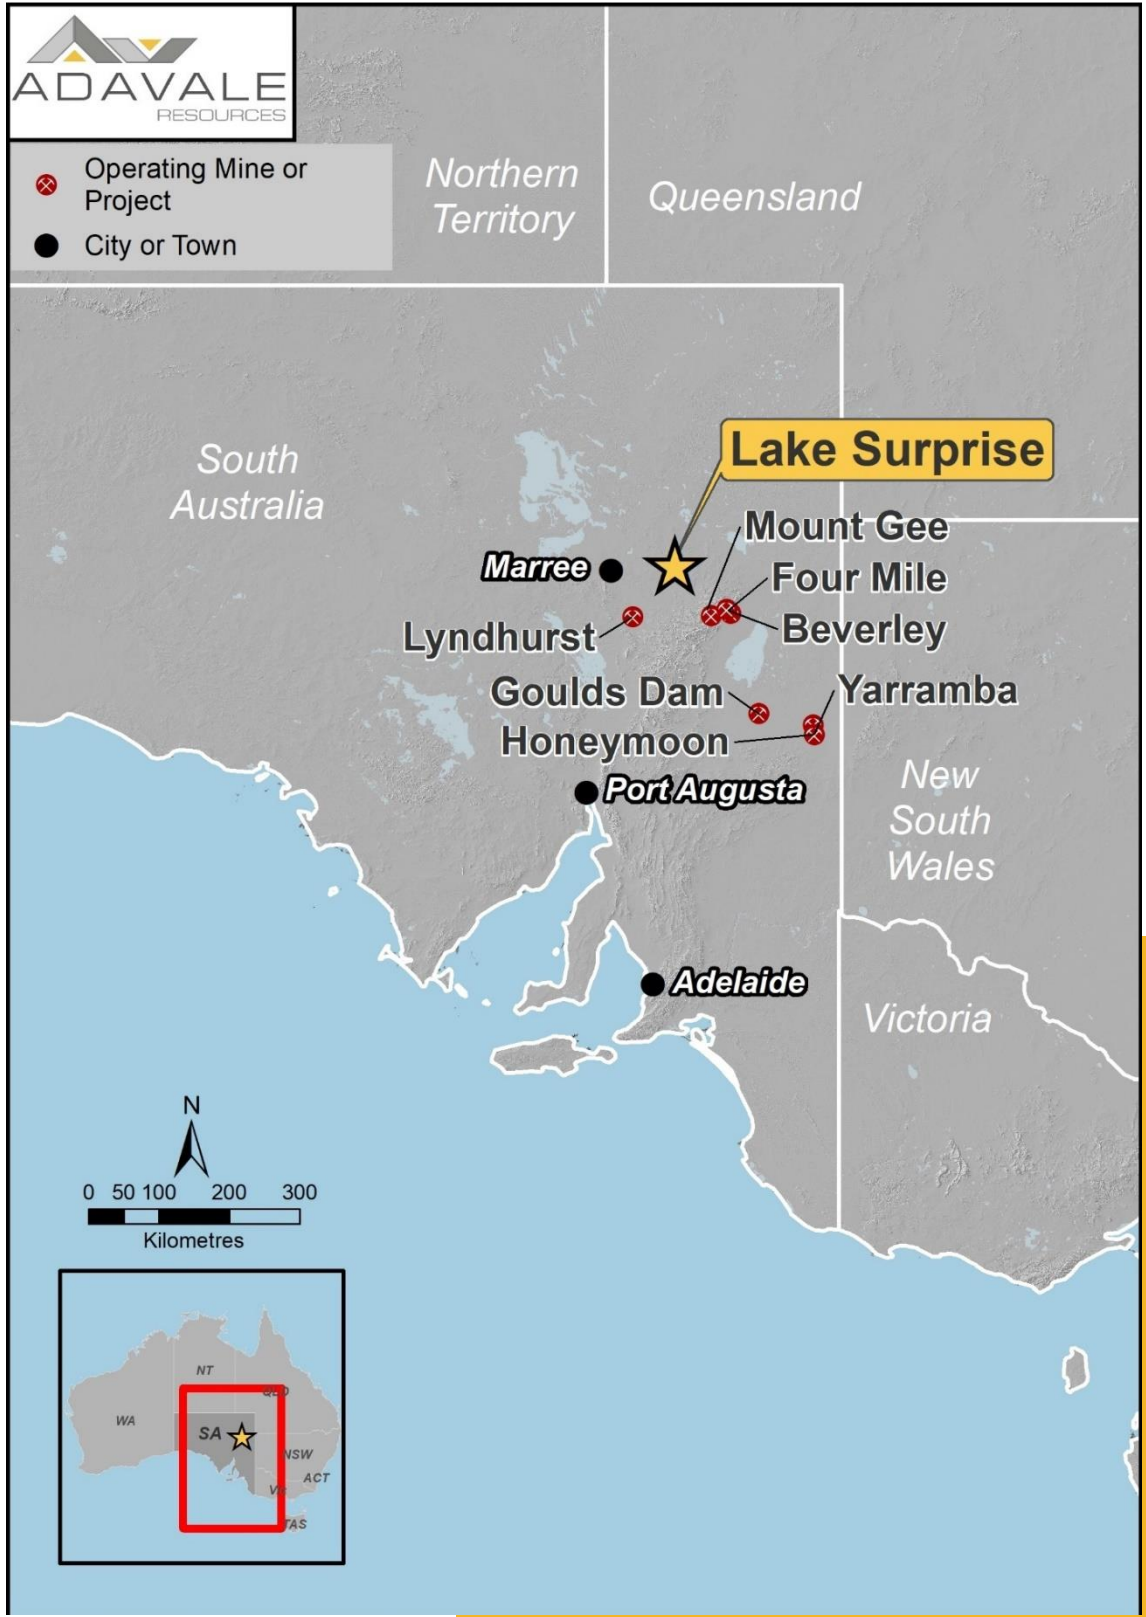

**Early and ongoing exploration success and Drilling to
commence in Jan 2023 in Australia's most prospective
region for uranium**

Lake Surprise South Australia

- Located in South Australia - 550km north of Adelaide and 75kms east of Marree
- Proven uranium province hosting multiple mines and deposits - ~90kms from Beverly Four Mile Uranium mine
- 100% owned tenure comprising 4 granted EL's (~1,080sqkms) on the northern flank of the Flinders Ranges (considered highly uraniferous)

Ministry ID	Area (km ²)	Project Location
EL 5892	60km2	Lake Arthur East, South Australia
EL 5893	167km2	Lake Arthur, South Australia
EL 6598	137km2	Canegrass Swamp, South Australia
EL 6821	714km2	Mundowdna, South Australia

- Helium study from satellite imagery indicated several anomalies coincident with gamma anomalies and better defines uranium targets for exploration.
- 400km gamma survey completed Nov 2021¹ interpreted to be hosted in the silicified sediments of a palaeochannel system discharging from northern Flinders Ranges
- Assay summary from rock chip samples² :
 - ✓ Highest uranium content of 356ppm
 - ✓ 11 of 28 rock chip samples with uranium content above 100ppm (7 above 200ppm)
 - ✓ Elevated gamma correlating with the uranium in samples

Location Map Lake Surprise South Australia

Approvals received for Drilling*

- 4,500m Air Core uranium drilling program (~ 150 holes av 30m target depth) scheduled to commence Jan 2023
- Uranium exploration Work Area Clearance (WAC) and Notice of Entry (NOE), Department of Energy and Mines (DEM) environmental approvals received
- Exploration and environmental management procedures to support drilling campaign finalised
- Drilling contractor confirmed

4WD mounted air core rig, for drilling at Lake Surprise

Planned drilling locations for the 150-hole program. Mapped gamma anomalies are shown with drilling targeting the buried extension of these anomalies.

Drone survey at Lake Surprise July 2022

Geologist pegging drill locations at site July 2022

* ASX release dated 20 June 2022 "Pathway Cleared for Uranium Drilling at Lake Surprise"

Investment Thesis

Alignment of opportunity and knowledge with activities focused on discovery with a highly prospective ground holding for sulphide Nickel and Uranium

Strong and experienced Board, Management and team: extensive Tanzanian experience, nickel exploration - discoveries and corporate actions and resource development

Board and key executives: material shareholdings, performance-based incentive: **leveraged to value uplift** via significant outcomes including discovery

Exposure to both Nickel and Uranium: Electrification and Decarbonisation

Proximal high-grade nickel sulphide Resources in the East African Nickel Belt

Contiguous with the world richest undeveloped nickel deposit – 58Mt @ 2.62% Ni

~1,300 sq km Licence/Farm ground holding

Multiple anomalies over 9 HEM/Gravity coincident target areas

Tanzanian Government is open to investment, mining and exploration

BHP have also re-emerged in via a strategic investment

High impact RC and DD drilling campaign now underway ~8,000m

Results expected from Dec 22
