On Friday, 18 November 2022, the Company announced its intention to raise \$200 million (before costs) through the fully underwritten Entitlement Offer. The Retail Entitlement Offer will raise approximately a further \$53 million (before costs).

The Entitlement Offer is fully underwritten by the Underwriter.

Based on the number of Shares on issue as at the Record Date of the Entitlement Offer, approximately 46.6 million New Shares (subject to rounding) will be issued under the Entitlement Offer, comprising approximately 34 million New Shares under the Institutional Entitlement Offer and 12.6 million New Shares under the Retail Entitlement Offer.

The Entitlement Offer opens on 25 November 2022 and will close at 4:00pm (Perth time) on 8 December 2022 unless extended or withdrawn.

Further details on the Entitlement Offer are set out below.

2.2 Your Entitlement

Your Entitlement is set out on the accompanying personalised Entitlement and Acceptance Form and calculated on the basis of 1 New Share for every 8.8 Existing Shares you held as at the Record Date. If the result is not a whole number, your Entitlement will be rounded up to the nearest whole number of New Shares.

If you have more than one registered holding of Shares, you will be sent more than one personalised Entitlement and Acceptance Form and you will have a separate Entitlement for each separate holding.

New Shares issued under the Entitlement Offer will rank equally in all respects with Existing Shares.

The Entitlement Offer is non-renounceable and therefore your Entitlement will not be tradeable on the ASX or any other exchange, cannot be sold and is not otherwise transferable. 2.3 Consider the Entitlement Offer carefully in light of your particular investment objectives and circumstances

The Entitlement Offer is being made pursuant to provisions of the Corporations Act which allow entitlement offers to be made without a prospectus. This Retail Offer Booklet does not contain all of the information which may be required in order to make an informed decision regarding an Application for New Shares offered under the Entitlement Offer.

As a result, it is important for you to read carefully and understand the information on Sandfire and the Entitlement Offer made publicly available, prior to deciding whether to take up all or part of your Entitlement or do nothing in respect of your Entitlement. In particular, please refer to this Retail Offer Booklet and other announcements made available on the ASX website relating to Sandfire.

Please consult with your stockbroker, accountant or other professional adviser if you have any queries or are uncertain about any aspect of the Entitlement Offer. You should also refer to the "Key Risks" section of the Investor Presentation included in Section 4 of this Retail Offer Booklet.

2.4 How Eligible Retail Shareholders Can Accept or Renounce the Entitlement Offer

2.4.1 If you wish to take up all of your Entitlement

If you wish to take up all of your Entitlement, please pay your Application Monies via BPAY® or EFT by no later than 4:00pm (Perth time) on 8 December 2022 by following the instructions set out on the personalised Entitlement and Acceptance Form.

If you are unable to pay by BPAY® (for example if you are a New Zealand based shareholder without an Australian bank account) or are having difficulty paying by BPAY® please call the Sandfire Offer Information Line on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) between 6:00am and 5:00pm (Perth time) on Monday to Friday, before the Retail Entitlement Offer closes on 8 December 2022. Alternatively, you may pay by EFT by following the instructions set out in section 2.6 and your personalised Entitlement and Acceptance Form.

If you take up and pay for all of your Entitlement, before the close of the Entitlement Offer, it is expected that you will be issued New Shares on 15 December 2022.

Sandfire's decision on the number of New Shares to be issued to you will be final.

Sandfire also reserves the right (in its absolute discretion) to reduce the number of New Shares issued if Sandfire believes an applicant's claim to be overstated or if an applicant or their nominees fail to provide information to substantiate their claims to Sandfire's satisfaction.

Entitlements are non-renounceable and will not be tradeable on ASX or otherwise transferable. Eligible Retail Shareholders who do not take up their rights in full will not receive any value in respect of those rights they do not take up.

If you do not take up your Entitlement in full, you will have your percentage holding in the Company reduced as a result of dilution by the New Shares issued under the Entitlement Offer.

2.4.2 If you wish to take up part of your Entitlement

If you wish to take up part of your Entitlement and apply for New Shares, please pay your Application Monies via BPAY® or EFT by no later than 4:00pm (Perth time) on 8 December 2022 by following the instructions set out on the personalised Entitlement and Acceptance Form for the amount of New Shares you wish to apply.

If you are unable to pay by BPAY® (for example if you are a New Zealand based shareholder without an Australian bank account) or are having difficulty paying by BPAY® please call the Sandfire Offer Information Line on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) between 6:00am and 5:00pm (Perth time) on Monday to Friday, before the Retail Entitlement Offer closes on 8 December 2022. Alternatively, you may pay by EFT by following the instructions set out in section 2.6 and your personalised Entitlement and Acceptance Form.

Entitlements are non-renounceable and will not be tradeable on ASX or otherwise transferable. Eligible Retail Shareholders who do not take up their rights in full will not receive any value in respect of those rights they do not take up.

If you do not take up your Entitlement in full, you will have your percentage holding in the Company reduced as a result of dilution by the New Shares issued under the Entitlement Offer.

2.4.3 If you wish to do nothing, in which case your Entitlement will lapse and you will receive no value for those lapsed Entitlements

Your Entitlement is non-renounceable, which means it is non-transferrable and cannot be sold, traded on ASX or any other exchange, nor can it be privately transferred.

If you take no action you will not be allocated New Shares and your Entitlement will lapse. Shareholders who do not take up their Entitlements will not receive any payment or value for those Entitlements they do not take up.

Eligible Retail Shareholders who do not participate fully in the Retail Entitlement Offer will have their percentage holding in Sandfire diluted.

2.5 Ineligible Shareholders

All Shareholders who are not Eligible Retail Shareholders are ineligible Shareholders (**Ineligible Shareholders**). Ineligible Shareholders will not be entitled to participate in the Entitlement Offer.

Sandfire has determined pursuant to ASX Listing Rule 7.7.1 that it would be unreasonable on this occasion to extend the Entitlement Offer to Ineligible Shareholders, having regard to the number of Ineligible Shareholders, the number and value of securities to be offered to Ineligible Shareholders and the costs of complying with the legal and regulatory requirements which would apply to an offer of securities to Ineligible Shareholders in various jurisdictions.

2.6 Payment

You can pay by BPAY® or EFT.

If you are unable to pay by BPAY® (for example if you are a New Zealand based shareholder without an Australian bank account) or are having difficulty paying by BPAY®

please call the Sandfire Offer Information Line on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) between 6:00am and 5:00pm (Perth time) on Monday to Friday, before the Retail Entitlement Offer closes on 8 December 2022. Alternatively, you may pay by EFT by following the instructions set out below and in your personalised Entitlement and Acceptance Form

Cash payments will not be accepted. Receipts for payment will not be issued.

Sandfire will treat you as applying for as many New Shares as your payment will pay for in full up to your Entitlement.

Any Application Monies received for more than your Entitlement to New Shares will be refunded as soon as practicable after the close of the Entitlement Offer. No interest will be paid to applicants on any Application Monies received or refunded.

Payment by BPAY® or EFT

For payment by BPAY® or EFT, please follow the instructions on the personalised Entitlement and Acceptance Form. You can only make payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions.

If you are paying by EFT, please make sure you use the unique reference number on your personalised Entitlement and Acceptance Form. Failure to do so may result in your funds not being allocated to your application and New shares subsequently not issued.

If you are paying by BPAY®, please make sure you use the specific Biller Code and your unique Customer Reference Number (**CRN**) on your personalised Entitlement and Acceptance Form. If you have multiple holdings and consequently receive more than one personalised Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those holdings only use the CRN or unique reference number specific to that holding. If you do not use the correct CRN or unique reference number specific to that holding your Application will not be recognised as valid.

Please note that should you choose to pay by BPAY® or EFT:

- you do not need to submit your personalised Entitlement and Acceptance Form but are taken to make the declarations, representations and warranties on that Entitlement and Acceptance Form and in Section 2.7; and
- if you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares which is covered in full by your Application Monies.

It is your responsibility to ensure that your BPAY® or EFT payment is received by the Share Registry by no later than 4:00pm (Perth time) on 8 December 2022. You should be aware that your financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration in the timing of when you make payment.

2.7 Representations by acceptance

By applying for New Shares under the Retail Entitlement Offer (including making a payment by BPAY® or EFT), you will be deemed to have represented to Sandfire that you are an Eligible Retail Shareholder and:

The comments in this section are necessarily general in nature and are based on the Australian tax legislation and administrative practice in force as at the date of this Retail Offer Booklet. They do not take into account any financial objectives, tax positions, or investment needs of Eligible Retail Shareholders. The comments do not take into account or anticipate changes in Australian tax legislation or future judicial or administrative interpretations of law after this time unless otherwise specified. The comments also do not take into account tax law of any country other than Australia.

The taxation implications of the Entitlement Offer will vary depending upon your particular circumstances. Accordingly, you should seek and rely upon your own professional advice before concluding on the particular taxation treatment that will apply to you and deciding whether to take up your Entitlements.

3.1 Issue of Entitlements

The issue of the Entitlements should not, of itself, result in any amount being included in the assessable income of an Eligible Retail Shareholder.

3.2 Take-up of Entitlements

New Shares will be acquired where the Eligible Retail Shareholder takes-up all or part of their Entitlement under the Entitlement Offer. An Eligible Retail Shareholder should not derive any assessable income, or make any capital gain or capital loss at the time of taking up their Entitlement under the Entitlement Offer. For Australian capital gains tax (**CGT**) purposes, each New Share should:

- be taken to have been acquired on the date the New Share is issued to the Eligible Retail Shareholder; and
- have a cost base (and reduced cost base) that is equal to the Offer Price that is payable for the New Share plus certain non-deductible incidental costs incurred in acquiring, holding and disposing of the New Share.

3.3 Lapse of Entitlement

If an Eligible Retail Shareholder does not take-up all or part of their Entitlement in accordance with the instructions set out above, then that Entitlement will lapse and the Eligible Retail Shareholder will not receive any consideration.

There should be no Australian tax implications for an Eligible Retail Shareholder from the lapse of all or some of their Entitlements.

3.4 Dividends on New Shares

Any future dividends or other distributions made in respect of New Shares will constitute assessable income of an Eligible Retail Shareholder and will be subject to the same income taxation treatment as dividends or other distributions made on Existing Shares held in the same circumstances.

3.5 Disposal of New Shares

The disposal of a New Share will be a disposal for CGT purposes.

An Eligible Retail Shareholder should make a capital gain if the capital proceeds on disposal exceed the cost base of the New Share. An Eligible Retail Shareholder should make a capital loss if the capital proceeds are less than the reduced cost base of the New Share.

An Eligible Retail Shareholder that is an individual, complying superannuation entity or trustee and that has held their New Shares for at least 12 months (not including the dates of acquisition and disposal of the New Shares) at the time of disposal should be entitled (subject to meeting other conditions) to apply the CGT discount to reduce the capital gain (after the application of any current year or carry forward capital losses). The CGT discount is 50% for individuals and entities acting as trustees, and 33⅓% for complying superannuation entities.

The CGT discount is not available for companies (unless shares are held by the company in the capacity as trustee).

The previous Government proposed that managed investment trusts (**MITs**) and attribution managed investment trusts (**AMITs**) will be prevented from applying the 50% CGT discount at the trust level (but will still be able to distribute such income as a capital gain that can be discounted in the hands of the beneficiary). This proposed change is yet to be

enacted; however, the present Government has not expressed its position on the proposed change.

If a capital loss arises on disposal of the New Shares, the capital loss can only be used to offset capital gains; i.e. the capital loss cannot be used to offset amounts contributing to taxable income that are not capital gains. However, if the capital loss cannot be used in a particular income year it can be carried forward to use in future income years, provided certain tests are satisfied.

3.6 Other Australian taxes

No Australian GST or stamp duty will be payable by Eligible Retail Shareholders in respect of the issue or exercise of the Entitlements or the acquisition of New Shares.

Energy Costs

Historic spike in European Energy costs:

- Actual Electricity Price for 3 months to SEP22 was €270/MWh. However prices have moderated in October as overall Spanish demand has reduced.
- EU approved Gas price cap for Spain and Portugal continues to deliver lower electricity prices than many other parts of Europe.
- Spikes caused by Russia-Ukraine, Nord Stream gas pipeline disruptions and extreme weather impacting infrastructure and driving demand.
- Current forecast is €260-270/MWh for Q2 FY23⁽¹⁾

Response:

- 20MW Sotiel Solar farm in progress, estimated completion September 2023
- Sandfire is engaging with major electricity providers through a third party expert for an ongoing supply contract – this may be under a hybrid pricing structure (partial fixed / partial spot) – targeting to have this in place by end of CY23
- Development of a second solar facility near Aguas Teñidas is currently under permit application
- The gas compensation charge is expected to be abolished in May

Key Risks

Key risks

1. ENTITLEMENT OFFER RISKS

Underwriting

The Company has entered into an underwriting Agreement with Macquarie Capital Limited (Underwriter) (**Underwriting Agreement**). Pursuant to the Underwriting Agreement, the Company appointed the Underwriter as sole bookrunner and lead manager to the Entitlement Offer, and the Underwriter has agreed to fully underwrite the Entitlement Offer. See the Company's ASX announcement and Appendix 3B dated 18 November 2022 for further details of the material terms of the Underwriting Agreement.

Given the structure of the Entitlement Offer, in which the Institutional Entitlement Offer settles before the Retail Entitlement Offer, there is a risk that the Underwriting Agreement may terminate before or after the Institutional Entitlement Offer has settled.

If the Underwriting Agreement is terminated and the Entitlement Offer does not proceed or does not raise the funds required for the Company to meet its stated objectives, the Company would be required to find alternative financing or curtail its activities. In those circumstances, there is no guarantee that alternative funding could be sourced in the time required or at all or that the Company would be able to successfully negotiate the terms of any debt or equity funding arrangements in those circumstances.

Potential for dilution and control risk

Upon completion of the Entitlement Offer, the number of Shares in the Company will increase from 410,181,608 to up to approximately 456.8M. This equates to approximately 11.4% of all the issued Shares in the Company immediately following completion of the Entitlement Offer. This means that to the extent Shareholders do not participate in the Entitlement Offer their percentage holding in the Company will be lower following completion of the Entitlement Offer.

ASX quotation

A decision by ASX to grant Official Quotation of the New Shares is not to be taken in any way as an indication of ASX's view as to the merits of the Company, or the New Shares now offered for subscription.

2. COMPANY RISKS

Share market conditions

There are risks associated with any investment in securities. Publicly listed securities and, in particular, securities of mining and exploration companies, have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. General factors that may affect the market price of shares include variations in commodity prices, economic conditions in both Australia and internationally, investor sentiment and local and international share market conditions, changes in interest rates and the rate of inflation, the global security situation and the possibility of terrorist disturbances, geopolitical conditions, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

These factors may materially affect the market price of the Company's Shares, regardless of the Company's operational or financial performance. The past performance of the Company is not necessarily an indication as to the future performance of the Company. There can be no guarantee that there will continue to be an active market for the Company's Shares or that the price of the Company's Shares will increase. Neither the Company nor the Company's Board warrants the future performance of the Company or any return on an investment in the Company.

Key risks (cont.)

Dividends

The Company does not have an official dividend policy however it has a history of paying dividends in respect of financial periods prior to completion of the acquisition of MATSA. The payment of dividends (if any) by the Company is determined by the Company Board from time to time at its discretion and is dependent upon factors including the profitability and cash flow of the Company's business at the relevant time. Any dividends paid by the Company in the future will be subject to similar considerations. The Company operates in a cyclical sector, in which financial characteristics (such as commodity prices, foreign exchange rates and energy costs) vary and as a result will have an impact on profit and cash flow generation. This may result in variations in the capability of the Company to make dividend payments to shareholders through varying business cycles.

Commodity price volatility

The Company's revenues and cash flows are derived from the sale of copper, zinc, lead, silver and gold. The financial performance of the Company will be exposed to fluctuations in the prices of these commodities.

Commodity prices may be influenced by numerous factors and events which are beyond the control of the Company, including supply and demand fundamentals, currency exchange rates, interest rates, general economic, political and regulatory conditions, government imposed pandemic public health policies, speculative activities and other factors. These factors may have a positive or negative effect on the Company's product development and production plans and activities, together with the ability to fund those plans and activities. If the prices of precious metals and other minerals drop significantly, the economic prospects of the Company's operating mines and projects could be significantly reduced or rendered uneconomic. There is no assurance that even if commercial quantities of ore are discovered in new areas, a profitable market may exist for the sale of the same.

The Company does not have a policy in place to actively take steps to hedge its currency or commodity risks but may from time to time enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings, in order to reduce the exposure to fluctuations in copper price during the Quotational period (QP). The hedges are generally in the form of QP hedging via copper swaps to either fix the price of sales at the time of shipment or to reduce the length of the QP, therefore reducing the short and medium term exposure to the market price of metal for completed or imminent shipments. The Company will still be exposed to spot prices for the remainder of its anticipated future production of these and other commodities. Further, there is a potential impact of differential metal prices arising from the move to a lower carbon environment. The Company cannot provide any assurance as to the prices that the Company will achieve for its commodities in the future, or that there will always be a market for products.

Foreign exchange rates

The Company is an Australian business that reports in US dollars with the Company's revenue derived from the sale of commodities that are typically priced in US dollars. The majority of its costs as they relate to MATSA, and Australia operations are usually denominated in Euros and Australian dollars respectively, the Motheo project based in Botswana includes exposure on the cost side to US dollars, the Botswanan Pula and South African Rand while the Black Butte project in Montana USA has exposure to the US Dollar. Therefore, the Company will be exposed to movements in foreign exchange rates (in particular, the US dollar-to-Australian dollar and Euro and Botswanan Pula-to-Australian or US dollar exchange rates), the impact of which cannot be predicted reliably.

The Company may from time to time put in place certain derivative financial instruments in an attempt to mitigate some of its exposure to foreign exchange rates. However, the Company will still be exposed to foreign exchange risk in relation to currency that has not been hedged and in respect of foreign currency that is hedged, the potential that the spot currency rates outperform the hedged rates.

Bribery and corrupt practices

The Company's operations are governed by, and involve interaction with, many levels of government in Australia, the United States of America, the UK, Botswana and Spain. The Company is subject to various anticorruption laws and regulations which prohibit a company and its employees or intermediaries from bribing or making improper payments to foreign officials or other persons to obtain or retain business or gain some other business advantage.

Key risks (cont.)

The Company maintains anti-bribery policies, anti-corruption training programs, codes of conduct, procedures and other safeguards designed to prevent the occurrence of fraud, bribery and corruption. Botswana and Spain are lower on the Transparency International Corruption Perceptions Index for 2021 than Australia. However, wherever the Company operates it always needs to be aware of the potential risk of fraud, bribery and corruption. The Company is reviewing its compliance frameworks with a focus on best practice in this area, but this will not mitigate all potential risk. Instances of fraud, bribery and corruption, and violations of laws and regulations could have a material adverse effect on the Company's reputation, business, results of operations, financial condition and the price of shares of the Company.

The Company has and will engage a number of consultants and contractors globally in connection with its business operations and, although the Company believes its agreements are entered into on arm's length commercial terms and seeks appropriate comfort from consultants and contractors, as well as requiring its consultants and contractors to adhere to the highest standards in line with the Company's policies, there is a risk that agents or other persons or representatives acting on behalf of the Company may engage in corrupt activities without the knowledge of the Company.

Operational uncertainty

As with any mining company the Company's assets and mining operations will be subject to uncertainty with respect to (among other things): ore tonnes, mine grade, ground conditions, metallurgical recovery or unanticipated metallurgical issues (which may affect extraction costs), infill resource drilling, mill performance, the level of experience of the workforce, operational environment, funding for development, regulatory changes, accidents and other unforeseen circumstances such as unplanned mechanical failure of plant or equipment, storms, floods, bushfires or other natural disasters. The occurrence of any of these circumstances could result in the Company not realising its operational or development plans, or plans costing more than expected or taking longer to realise than expected. Any of these outcomes could have an adverse effect on the Company's financial and operational performance.

The speculative nature of resource exploration and development as mining activities will deplete the reserves and resources of the Company, the ability to continually find or replace reserves and resources is important for the ongoing stability of the Company's operations.

Exploration on the Company's existing exploration and mining concessions may be unsuccessful, resulting in a reduction of the value of those concessions, diminution in the cash reserves of the Company and possible relinquishment of the exploration and mining concessions.

Performance data on the processed grade and metallurgical performance of the mineralisation versus the model is also considered in the Mineral Resource estimation process.

The success of the Company depends on successful exploration and definition of reserves, design and construction of efficient processing facilities, competent operation and management, proficient financial management, access to required development capital (to the extent not able to be funded from cash flow), movement in the price of commodities, securing and maintaining title to the Company's pre-existing exploration and mining concessions and obtaining all consents and approvals necessary for the conduct of its exploration activities. Failure in any of these areas will adversely impact the profitability and financial position of the Company. For example, MATSA has a tailings dam which is subject to standard ongoing monitoring; further, there is required permitting and other matters to close out when considering additional capacity beyond that expected for 2026. Additionally, Motheo will have a dedicated tailings storage facility which is required to be code compliant (including ANCOLD and GISTM (Global International Standard for Tailings Management)). While the Company engages external advisers to assist ensuring tailings storage facilities are built to standard, there can be no guarantee that this will occur.

The Company has provided production guidance. While the Company considers that this guidance is reasonable, actual future production may vary from the guidance for various reasons, many of which cannot be foreseen and are beyond the control of the Company. These factors may cause the production guidance not to be achieved or to be achieved later than expected, or to be achieved at a higher cost than anticipated.

Further as the Company depletes its projects there is increased risk of the assumptions around remaining production guidance, mine closure and rehabilitation costs changing as circumstances evolve.

There is additional risk concerning the operations of MATSA, including relating to production and export (with similar risk to apply to Motheo once it begins production expected to be in 2023).

Key risks (cont.)

Country risk

The Company's business necessarily involves risks associated with operating in Spain, Botswana and other international markets, including any ongoing impacts of COVID-19 (discussed below).

Investors should note that developing countries could be subject to rapid change and that the information set out in this document may become outdated relatively quickly. Moreover, financial turmoil in developing countries tends to adversely affect prices in equity markets of other developing countries as investors move their money to more stable, developed markets.

Exploration and development activities may require protracted negotiations with host governments, local governments and communities, local competent authorities, national mining companies and third parties and may be subject to economic, social and political considerations outside of the Company's control, such as the risks of expropriation, nationalisation, renegotiation, forced interruption, suspension of operations, curtailment of sales, forced change or nullification of existing contracts or royalty rates, unenforceability of contractual rights, changing taxation policies or interpretations, adverse changes to laws (whether of general application or otherwise) in the jurisdictions in which the Company operates or the interpretation or enforcement thereof, foreign exchange restrictions, inflation, changing political conditions, the death or incapacitation of political leaders, local currency devaluation, currency controls and foreign governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction.

Any of the factors detailed above or similar factors could have a material adverse effect on the business, results of operations or financial condition of the Company. If disputes arise in connection with operations in developing countries the Company may be subject to the exclusive jurisdiction of foreign courts or foreign arbitration tribunals or may not be successful in subjecting foreign persons, especially foreign ministries and national companies, to the legal jurisdiction of Australia or England and Wales.

The Company cannot guarantee that there will not be regulations imposed on any individual or entity. Such measures, which would be beyond the Company control, could have a material adverse effect on the Company's business, reputation, results of operations, financial condition and the price of shares of the Company.

Financing risks and capital requirements

The Company's continued ability to operate its business and effectively implement its business plan over time will depend in part on its ability to raise additional funds for future operations and to repay or refinance debts as they fall due. The Company may require additional financial resources to finance future acquisitions, pay down debt or continue funding its operations. It is difficult to predict the level of funding that may be required with any accuracy at this time. No assurance can be given that any such additional financing will be available or that, if available, it will be available on terms acceptable to the Company or its shareholders.

If additional funds are raised through the issue of equity securities, the capital raising may be dilutive to the Company shareholders and such securities may, subject to requisite shareholder approval, have rights, preferences or privileges senior to those of the holders of the Company's shares then on issue.

The Company has existing debt facilities in place both at a corporate level, and at project level for MATSA and Motheo. Following completion of the Equity Raising, as part of its annual review of its financial and operating model with its MATSA lenders in Q1 CY23, Sandfire intends to seek to extend and/or amend its facility repayment schedule however there is no certainty this will be achieved. In the future, the Company may need to renegotiate or refinance the terms of its debt facilities or may seek further facilities or replacement facilities with alternative financiers to satisfy its capital requirements. The terms on which debt financiers are willing to offer or negotiate may vary from time to time depending on macro-economic conditions, the performance of the Company and an assessment of the risks and intended use of funds, and there can be no guarantee that this will occur. Further, the Company's respective MATSA and Motheo debt facilities have a level of restriction on cash repatriation to the corporate level until certain repayment conditions are met.

Debt finance, if available on terms acceptable to the Company, may involve restrictions on financing and operating activities.

Key risks (cont.)

Further, in the ordinary course of operations and development, the Company will be required to issue financial assurances, particularly insurances and bond/bank guarantee instruments, to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position. If sufficient funds are not available from either debt or equity markets to satisfy the Company's short, medium or long-term capital requirements, when required, the Company may be required to limit the scope of its anticipated operations, which could adversely impact on its business, financial condition and value of Company shares.

Infrastructure, transportation and remoteness of operations

The commodities currently produced and expected to be produced by the Company are and will be required to be transported to customers internationally and in some cases, will require transportation through a neighbouring country. Each stage of the transportation process poses risks, including the initial remoteness of the Company's projects, fuel costs, unexpected delays and accidents could materially impact upon the Company's financial position.

Further, there are risks associated with the availability of adequate trucking, rail and port facilities and the process for obtaining approvals to access these facilities (including the timing and conditions on which access may be granted) or cross state or country borders. If the Company is not able to access the required infrastructure within a certain time period or at a reasonable cost, this could adversely affect the Company's operations and financial performance.

The price of sea freight, smelting and refining charges are market driven and can vary throughout the life of each project. These will also impact on the overall profitability of the Company.

Fluctuations in the price and availability of energy and other resources

Fluctuations in the price and availability of resources required for the operations of the Company, including materials required for operations, water and energy resources such as grid power, diesel, gas and other fossil fuels and labor costs may materially impact the operations and financial position of the Company. In particular, MATSA is currently subject to power prices on the spot market which has seen significant increases in power costs in the last year and Motheo is expected to connect into the Botswana National Power Grid in December and is subject to the Botswana Energy Regulation Authority (BERA) setting tariffs for all users (Large Business) BERA publish the tariff's on their website with the next annual review due in April 2023.

Both MATSA and Motheo are progressing solar plant options, however there are construction and planning related risks that apply to these solar plants.

Legal and regulatory risks

There can be no assurance that title to any property interest acquired by the Company or any of its subsidiaries is secured. Although the Company has taken reasonable precautions to ensure that legal title to their properties is properly documented, there can be no assurance that their property interests may not be challenged or impugned. Such property interests may be subject to prior unregistered agreements or transfers or other land claims, and title may be affected by undetected defects and adverse laws and regulations.

In the jurisdictions in which the Company operates, legal rights applicable to mining concessions are different and separate from legal rights applicable to surface lands; accordingly, title holders of mining concessions in such jurisdictions must agree with surface land owners on compensation in respect of mining activities conducted on such land.

The definition of an asset according to the International Financial Reporting Standards is "a resource controlled by an entity as a result of past events and from which future economic benefits are expected to flow to the entity". Therefore, if an entity does not have a valid legal tenure to an asset, the definition of an asset is not met, and therefore, the value of the asset in the hands of the entity is deemed to be zero.

Key risks (cont.)

Regulatory requirements including exploration and mining permits and licences

The Company's operations are subject to various Federal, State and local laws in the countries in which it operates including Botswana, the United States of America, Australia and Spain. These laws include those relating to mining, prospecting, development permit and licence requirements, industrial relations, environment, land use, royalties, water, native title and cultural heritage, mine safety and occupational health. Any changes to such laws may have an impact on the Company and its operations.

Approvals, licences and permits required to comply with such rules are subject to the discretion of the applicable government officials. The Company will be required to obtain government permits to commence or expand operations, which can be a costly and time-consuming process that can be cross jurisdictional and may involve public hearings and costly undertakings.

No assurance can be given that the Company will be successful in obtaining any or all of the various approvals, licences and permits or maintaining such authorisations in full force and effect without modification or revocation. To the extent such approvals are required and not retained or obtained in a timely manner or at all, the Company may be curtailed or prohibited from continuing or proceeding with production and exploration.

The Company may be subject to legal challenges on the validity of any approvals, licences and permits that may delay or be prohibited from continuing or proceeding with production and exploration. These challenges can be costly and time consuming processes.

Renewal of mining authorisations

The Company cannot guarantee that all or any licences or permits in which it has interests will be renewed. Such renewals are at the discretion of relevant government bodies and ministries in the jurisdiction, and often depends on the Company being successful in obtaining other required statutory approvals for its proposed activities. There is no assurance that such renewals or grants will be granted, nor that they will be granted without different or further conditions attached.

Environment, rehabilitation and restoration

The operations and activities of the Company are subject to the environmental laws and regulations of Australia, Botswana, the United States of America and Spain and the other jurisdictions in which the Company may conduct business. As with most exploration projects and mining operations, the Company's operations and activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. Water management is a key element to manage during the construction phase of Motheo. The Company will attempt to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws and regulations, but there remains residual risk, particularly in relation to acquired projects, of future incidents or findings related to previous incidents. For further information on SFR's management of its environmental risks please refer to SFR's latest Annual Report and Financial Reports.

Any changes to government regulation or policy relating to climate change, including relating to greenhouse gas emissions or energy intensive assets, may directly or indirectly impact the Company's costs and operational efficiency.

The Company is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

Export and import regulations

The import and export policies of any jurisdiction in which the Company operates or sells product to may change in the future. As the revenues of the Company depend upon the process of exporting commodities, the profitability and financial position of the Company may be adversely affected by any such adverse import and export regulations. These include formal and informal import and export bans.

Key risks (cont.)

COVID-19

The outbreak of the coronavirus disease (COVID-19) has had a material effect on global economic markets. This has and may continue to have impacts on capital markets, supply chains, international travel and trade. The Company has a strong record of achieving guidance and continuing development and operational activities through the COVID-19 pandemic and has effective contingency plans already tested during COVID-19 that can be implemented in the event of worsening conditions. The Board continues to monitor the impact of COVID-19 on the Company's strategy.

Accounting

The Company makes estimates and assumptions about its business and revenues concerning the future.

These estimates and assumptions have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, and include:

- trade receivables;
- impairment of assets;
- reserve estimates;
- rehabilitation and restoration costs;
- income tax and recognition of deferred tax assets; and
- fair value measurement.

Any changes in accounting judgements or estimates may have an adverse impact on the Company, including global earnings outlook, rate of electrification, copper demand/supply, and cost inflation. There are no current plans for any material changes to judgements or estimates.

Insurance

The Company will endeavour to maintain insurance for the Company within ranges of coverage in accordance with industry practice. However, in certain circumstances, this insurance may not be of a nature or level to provide adequate cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the Company's operating and financial performance and financial position.

Insurance of risks associated with minerals exploration and production (including accidents, pollution and other hazards) is not always available and, where available, the costs can be prohibitive. There is a risk that insurance premiums may increase to a level where the Company considers it is unreasonable or not in its interests to maintain insurance cover to a level of coverage which is in accordance with industry practice. The Company will use reasonable endeavours to insure against the risks it considers appropriate for its needs and circumstances. However, no assurance can be given that the Company will be able to obtain such insurance coverage in the future at reasonable rates or that any coverage it arranges will be adequate and available to cover claims.

Key risks (cont.)

Wars, terrorism and natural disasters

Events such as acts of terrorism, particularly in Africa and Southern Europe, civil disturbance or protest, war, political intervention and natural activities such as earthquakes, floods, fires, pandemics, outbreaks of disease, adverse weather conditions or other natural or man-made events or occurrences may adversely impact the Company by affecting the market for commodities, the operations of the Company or its suppliers, service providers or customers, or the transport or other infrastructure relating to the operations of the Company.

Key personnel and labour

A number of key personnel are important to attaining the business goals of the Company, including the commencement of the recently announced new incoming CEO. One or more of these key employees could leave their employment, and this may adversely affect the ability of the Company to conduct its business and, accordingly, affect the financial performance of the Company and the price of the Company Shares.

Recruiting and retaining qualified personnel are important to the success of the Company. The number globally of persons skilled in the exploration and development of mining properties is limited and competition for such persons can be strong, depending on market conditions.

Any disputes with employees (through personal injuries, industrial matters or otherwise) change in labour regulations, or other developments in the area may cause labour disputes, work stoppages or other disruptions in production that could adversely impact the Company.

Mining and exploration companies rely on external contractors or service providers for many of their activities, and as such the failure of any current to proposed contractors, subcontractors or other service providers to perform their contractual obligations may negatively impact the business of the Company.

Community Relations and Social Licence to Operate

The Company's relationship with the communities in which it operates is important to ensure the future success of its existing operations and the construction and development of its projects. While the Company believes its relationships with the communities in which it operates are strong, there is an increasing level of public concern relating to the perceived effect of mining activities on the environment and on communities impacted by such activities. Certain non-governmental organizations (NGOs), some of which oppose globalization and resource development, are often vocal critics of the mining industry and its practices. Adverse publicity generated by such NGOs or others related to extractive industries generally, or its operations specifically, could have an adverse effect on the Company's reputation or financial condition and may impact its relationship with the communities in which it operates.

Litigation

As at the date of this Presentation, the Company is not aware of any material disputes or litigation being undertaken that have not been disclosed to the market. The status of litigation regarding the permitting for Black Butte is disclosed. This may adversely affect the Company's ability to carry out operations or result in concessions that may incur additional costs or be unacceptable to the Company. It is possible that the Company may be involved in other disputes and litigation in the course of its current and future operations, including industrial relations disputes. There is a risk that any material or costly dispute or litigation and compensation or damages could materially adversely impact the financial position or performance of the Company.

The Company completed an internal investigation into a water inrush event in relation to DeGrussa in February 2020. As is standard practice, findings are being reviewed by the Department of Mines, Industry Regulation and Safety.

Key risks (cont.)

Health, safety and hazardous materials

The potentially hazardous nature of exploration and mining means that health and safety regulations impact the activities of the Company, particularly in respect of acquired projects failing to meet appropriate standards. Any injuries or accidents that occur on a site of operations of the Company could result in legal claims, potential delays or stoppages and other actions that could adversely affect the Company.

The Company notes that the risk of safety incidents is inherently greater during the construction phase of projects. The Company notes there have been historic safety incidents, including fatalities, at MATSA prior to it being acquired by the Company.

Risks related to acquisitions and future growth initiatives

The Company regularly identifies and assesses potential opportunities for acquisitions and growth initiatives where it considers the opportunities may create shareholder value. The Company will continue to identify and assess such opportunities. However, while the Company intends to undertake appropriate due diligence to properly assess any such opportunities, benefits expected from investments, acquisitions or growth opportunities may take longer than expected to be achieved, or not be achieved at all, which may have a material adverse impact on the value of the Company.

DeGrussa Operations and tenement rationalisation

Mining activities have been completed at the Company's DeGrussa Operations, with depletion of run-of-mine (**ROM**) sulphide ore from the DeGrussa and Monty Copper-Gold Mines. Processing of the ROM stockpiles was completed in mid November 2022. The Company is currently undertaking a review of all potential options in respect to the future of its DeGrussa operations and is assessing which option will best maximise shareholder value. As at the date of this Presentation, the Company is still in the process considering all available options and no firm decision has been made in respect to DeGrussa. Australian tenement rationalisation is also underway.

Third party risks

The Company is and may in the future become a party to contracts with third parties in relation to its projects. There is a risk of insolvency or managerial failure by any of the contractors or other suppliers used by the Company in any of its activities, or that any of those agreements are terminated in accordance with their terms. There is also a risk of legal or other disputes between the Company and contractors or other suppliers. This may have an adverse effect on the interests and prospects of the Company.

Climate risk

Climate change is a risk that the Company has considered, particularly related to its operations in the mining industry. The climate change risks particularly attributable to the Company include the emergence of new or expanded regulations associated with the transitioning to a lower carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. Climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

Other risks

Additional risks and uncertainties not currently known to the Company may also have a material adverse effect on the business of the Company. The information set out above does not purport to be, nor should it be construed as representing, an exhaustive list of the risks affecting the Company.

Key risks (cont.)

Global economic conditions

The Company's funding position, financial performance and ability to execute its strategy is impacted by a variety of general global economic, political, social and business conditions. In addition to commodity prices and currency fluctuations, factors that have the potential to impact the Company's business include inflation, interest rates and other general economic factors. Deterioration in any of these conditions could have an adverse impact on the Company.

Domestic and global conditions may affect the value of the Company Shares. General worldwide economic conditions, changes in government policies, investor perceptions, movements in interest rates and stock markets, prices of the Company's products, variations in the operating costs and development and sustaining capital expenditure which the Company will require in the future will all impact the value of the shares, some outside of the control of the Company.

Tax risks

Future changes in tax laws in Australia and other jurisdictions in which the Company has activities and investment interests, including changes in interpretation or application of existing laws by the courts or taxation authorities, may affect taxation treatment of the Company securities or the holding or disposal of those securities. The tax consequences for individual investors in the Company will depend on the individual tax profile and circumstances of the investor and all investors should obtain independent taxation advice with respect to their personal position.

Offtake Agreements

The Company has life of mine offtake agreements for MATSA for Lead, Zinc and Copper with Trafigura and an Offtake Strategy in relation to the Motheo Copper Mine. If any offtake counterparty did not meet its obligations under their offtake agreement, this could negatively impact the financial performance of the Company.

This Information is dated 25 November 2022. This Information remains subject to change without notice and Sandfire is not responsible for updating this Information.

There may be additional announcements made by Sandfire after the date of this Retail Offer Booklet and throughout the period that the Entitlement Offer is open that may be relevant to your consideration of whether to take up or do nothing in respect of your Entitlement. Therefore, it is prudent that you check whether any further announcements have been made by Sandfire (by visiting the ASX website at www.asx.com.au) before submitting your Application to take up your Entitlement.

No party other than Sandfire has authorised or caused the issue of this Information, or takes any responsibility for, or makes, any statements, representations or undertakings in this Information.

This Information is important and requires your immediate attention.

You should read this Information carefully and in its entirety before deciding how to deal with your Entitlement. In particular, you should consider the risk factors outlined in the “Key Risks” section of the Investor Presentation included in Section 4 of this Retail Offer Booklet, any of which could affect the operating and financial performance of Sandfire or the value of an investment in Sandfire.

You should consult your stockbroker, accountant or other professional adviser to evaluate whether or not to participate in the Entitlement Offer.

To the maximum extent permitted by law, the Company and its related bodies corporate, directors, officers, employees and agents disclaim and do not assume any obligation or undertaking to release any updates or revisions to the information in this Retail Offer Booklet to reflect any change in expectation or assumptions, and disclaim all responsibility and liability for any loss arising from use or reliance on this Retail Offer Booklet or its content (including, without limitation, liability for fault or negligence).

5.1 Eligible Retail Shareholders

This information contains an offer of New Shares to Eligible Retail Shareholders in Australia and New Zealand and has been prepared in accordance with section 708AA of the Corporations Act as notionally modified by ASIC.

Eligible Retail Shareholders are those persons who:

- are registered as a holder of Existing Shares as at the Record Date;
- have a registered address on the Share Registry in Australia and New Zealand, is an Institutional Investor in another Permitted Jurisdiction, or are a person that the Company has determined in its discretion is an Eligible Retail Shareholder;
- are not in the United States and are not acting for the account or benefit of a person in the United States (to the extent such a person holds Shares for the account or benefit of such persons in the United States);
- the Company determines in its absolute discretion did not receive an invitation or an offer to participate in (other than as a nominee, trustee or custodian, in each

case in respect of other underlying holdings), or were otherwise ineligible to participate under, the Institutional Entitlement Offer; and

- are eligible under all applicable securities laws to receive an offer under the Retail Entitlement Offer without a prospectus or other disclosure document or any lodgement, filing, registration or qualification.

Shareholders who are not Eligible Retail Shareholders are Ineligible Shareholders.

Sandfire reserves the right to determine whether a Shareholder is an Eligible Retail Shareholder or an Ineligible Shareholder.

Applying for New Shares under the Retail Entitlement Offer (including making a payment by BPAY® or EFT), you will be taken to have represented and warranted that you satisfy each of the criteria listed above to be an Eligible Retail Shareholder. Nominees, trustees or custodians are therefore advised to seek independent professional advice as to how to proceed.

Sandfire has decided that it is unreasonable to make offers under the Retail Entitlement Offer to Shareholders who have registered addresses outside Australia and New Zealand, having regard to the number of such holders in those places and the number and value of the New Shares that they would be offered, and the cost of complying with the relevant legal and regulatory requirements in those places. Sandfire may (in its absolute discretion) extend the Retail Entitlement Offer to Shareholders who have registered addresses outside Australia and New Zealand in accordance with applicable law.

5.2 Ranking of New Shares

New Shares issued under the Retail Entitlement Offer will be fully paid and rank equally in all respects with Existing Shares. The rights and liabilities attaching to the New Shares are set out in the Constitution, a copy of which is available at <https://www.sandfire.com.au>.

You should consider these factors in light of your personal circumstances, including financial and taxation issues, before making a decision in relation to your Entitlement.
