# only FY23 Ansarada Annual General Neeting

# <sup>2</sup>Hear from Sam Riley, Our CEO

Ansarada believes when information and processes are structured correctly, organisations gain the insight and confidence required to achieve better outcomes, for their business, their people and the world.

Bring order to organisational chaos to increase business value and help companies realise their potential by becoming greater forces for good and for growth.

Good growth.

Our vision is to see thousands of businesses establish the foundations that strengthen the sustainability of their business, enabling them to create and deliver more value to their stakeholders and the planet.

We do this by providing a software platform that helps bring order to the chaos they face in managing the information and processes required to operate a truly sustainable business.

# **Barbe Problem**

# Never before has the management of information and processes been so critical to outcomes for companies, society and the planet.

Companies that are poor at organising, daily chaos and uncertainty.

They are increasingly placing their futures at risk, especially as momentum continues with the sustainability revolution triggering more regulation and rising demands from company stakeholders:

securing and optimising their management of information and critical processes experience

Poor management of information and processes equals poor business performance and decreased value

## Unorganis

Unorganised, r and wrong info

Confusion and impaired decision making quality speed.

## 3 typical information and process management gaps

sed	Inadequate process	Risk		
missing ormation	<sup>02</sup> Generic tools overused (spreadsheets, emails, general storage) combined with inadequate processes	<sup>03</sup> Poor visibility, contr and security over information and processes		
delays, ion and	Misalignment, mistakes, inefficiencies, silo's and unscalable	Risk, loss of reputation, trust and business value		

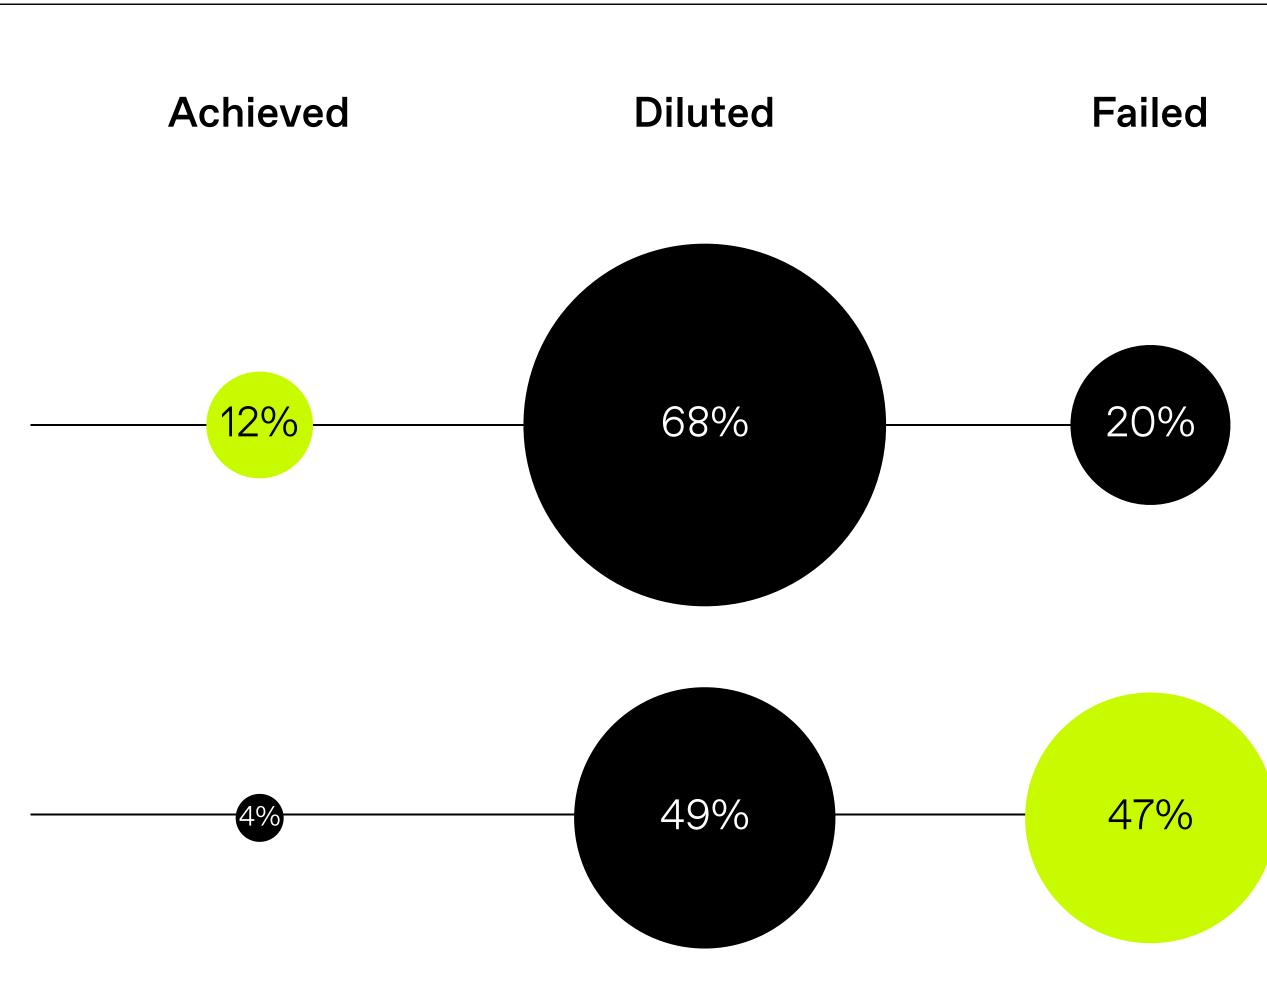

## Sustainability change proves harder than other types of change

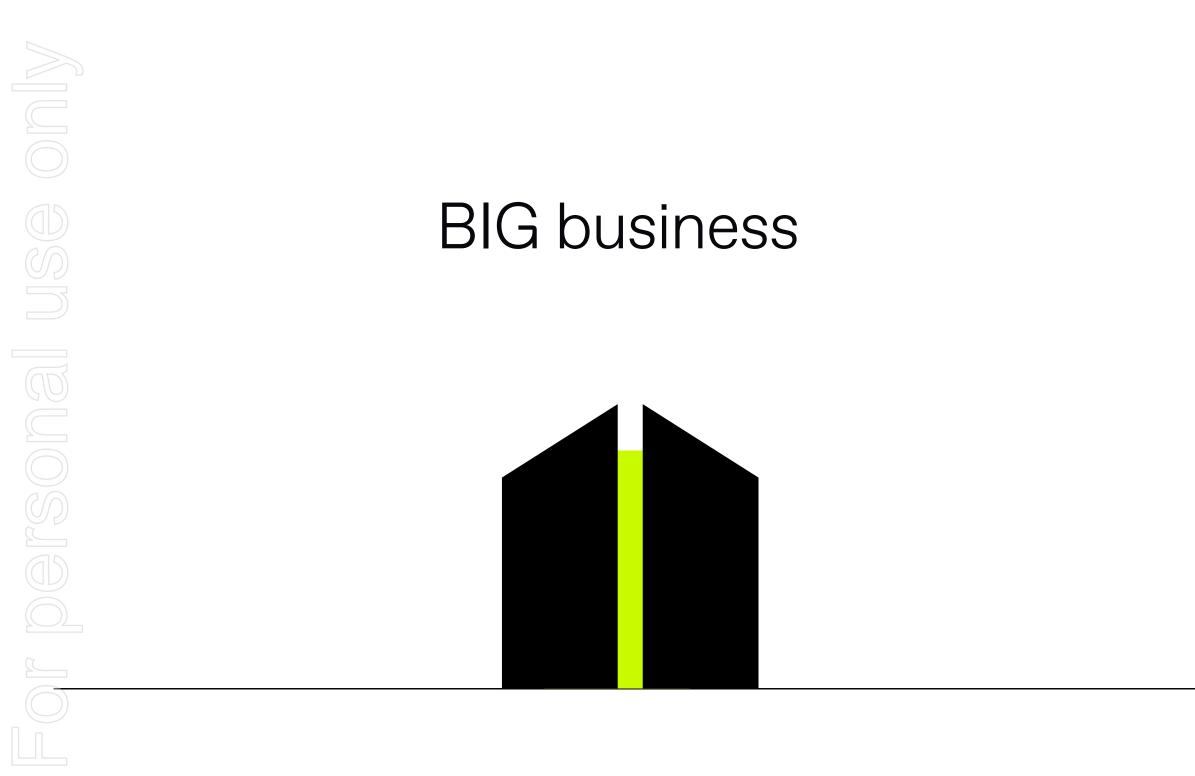

All change efforts

Sustainability programs (2018)

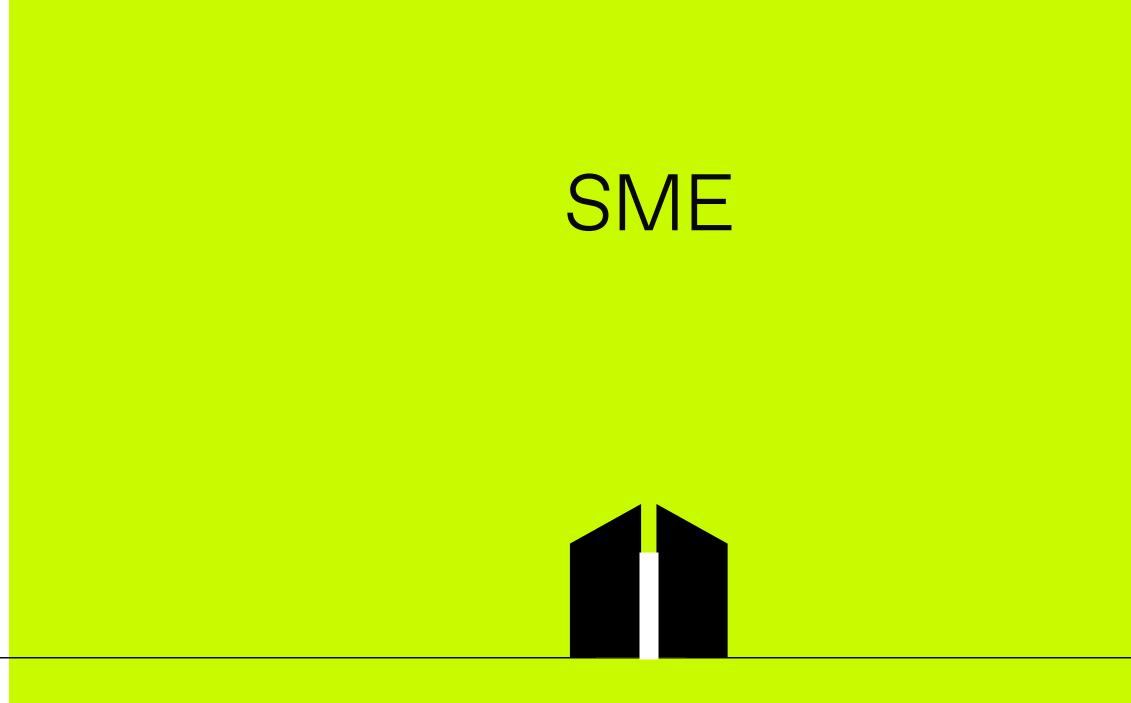

Are equipped with the resources and capability to address the risks, demonstrate progress and maximise the rewards of improving on sustainability.

Lack the capabilities and resources to address the problems that are amplifying and increasing risks further. Harder to maximise the rewards of improving on sustainability.
