Important notice and disclaimer

This presentation has been prepared and issued by American West Metals Limited (the Company or American West) to inform interested parties about the Company and its progress. The material contained in this presentation sets out general background information on the Company and its activities. It does not constitute or contain an offer or invitation to subscribe for or purchase any securities in the Company nor does it constitute an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for or purchase securities in the Company will be entered into on the basis of this presentation.

The information supplied is in summary form and does not purport to be complete. The Company, its directors, officers, employees, agents, affiliates and advisers have not verified the accuracy or completeness of the information, statements and opinions contained in this presentation. Accordingly, to the maximum extent permitted by law, the Company makes no representation and gives no assurance, guarantee or warranty, express or implied, as to, and takes no responsibility and assumes no liability for, the authenticity, validity, accuracy, suitability or completeness of, or any errors in or omission from, any information, statement or opinion contained in this presentation.

You should neither act nor refrain from acting in reliance on this presentation material. This overview of the Company does not purport to contain all information that its recipients may require in order to make an informed assessment of the Company's prospects. You should conduct your own investigation and perform your own analysis in order to satisfy yourself as to the accuracy, and completeness of the information, statements and opinions contained in this presentation and when making any decision in relation to this presentation or the Company. The information in this presentation does not take into account the objectives, financial situations or needs of any particular individual. You should consider seeking independent professional advice based on your own objectives. To the extent permitted by law the Company, its directors, officers, employees, agents, affiliates and advisers exclude any and all liability (including, without limitation, in respect of direct, indirect or consequential loss or damage or loss or damage arising out of negligence) arising as a result of the use of anything contained in or omitted from this presentation.

This presentation may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning American West's planned exploration program and other statements that are not historical facts. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties and other factors that are in some cases beyond American West's control, and which may cause actual results, performance or achievements to differ materially from those expressed or implied by the forward-looking statements. American West makes no representation or warrant as to the accuracy of any forward-looking statements in this Presentation and undue reliance should not be placed on such statements.

The forward-looking statements included in this document speak only as of the date of this document. The Company does not intend to update the forward looking statements in this document in the future.

Foreign and historical resources:

The estimates of minerals resources referred to in this presentation in regard to the West Desert Project and the Seal Zinc Project are historical and foreign in nature and are reported in accordance with Canadian NI 43-101 Standards and not in accordance with the 2012 JORC Code. A competent person has not done sufficient work to classify these estimates as mineral resources or ore reserves in accordance with the 2012 JORC Code. It is uncertain that following evaluation and/or further exploration work that the historical and foreign resource estimates of mineralisation will be able to be reported as mineral resources or ore reserves in accordance with the 2012 JORC Code. Further details of the historical and foreign estimates are contained in the Appendix to this Presentation.

This Presentation has been approved for release by the Board of American West Metals Limited.

Competent persons statement

The information in this Presentation that relates to Exploration Targets and Exploration Results for the West Desert Project is based on information compiled by Mr Dave O'Neill, a Competent Person who is a Member of The Australasian Institute of Mining and Metallurgy. Mr O'Neill is employed by American West Metals Limited as Managing Director, and is a substantial shareholder in the Company.

Mr O'Neill has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr O'Neill consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

This Presentation contains information extracted from the following reports which are available on the Company's website at <https://www.americanwestmetals.com/site/content/>

22 November 2022 – New Copper Targets at Copper Warrior

3 November 2022 – High-Grade Copper Hits Continue at Storm

19 October 2022 – Excellent Metallurgical Results at West Desert

28 September 2022 – New Copper System Confirmed at Storm

19 September 2022 – Assays Confirm Growth Potential at West Desert

8 September 2022 - Outstanding Drilling Results Continue at Storm

23 August 2022 – Major Copper Discovery at Storm

8 August 2022 – Extensive Shallow Copper Intersected in Canada

25 July 2022 – Thick Intervals of Copper in First Drill Holes at Storm

12 July 2022 – Further Strong Assay Results for West Desert

8 June 2022 – Exceptional Drill Hole Results at West Desert

25 May 2022 – New Mineralised Zone Discovered at West Desert

18 May 2022 – High Grades Confirmed Near Surface at West Desert

4 May 2022 – Drilling Continues to Deliver at West Desert

26 April 2022 – Assays Confirm High Grades at West Desert

11 April 2022 – Over 53% Cu Direct Shipping Ore Generated at Storm Copper

14 February 2022 - Extensive Mineralisation Identified at West Desert

11 January 2022 - Strong Gravity Results as Drilling Begins at West Desert

ASX Listing Rule 5.12:

The Company has previously addressed the requirements of Listing Rule 5.12 in its Initial Public Offer prospectus dated 29 October 2021 (released to ASX on 9 December 2021) (Prospectus) in relation to the West Desert Project. The Company is not in possession of any new information or data relating to the West Desert Project that materially impacts on the reliability of the estimates or the Company's ability to verify the estimates as mineral resources or ore reserves in accordance with the JORC Code. The Company confirms that the supporting information provided in the Prospectus continues to apply and has not materially changed.

This Presentation contains information extracted from the following reports which are available on the Company's website at <https://www.americanwestmetals.com/site/content/>

The Company confirms that it is not aware of any new information or data that materially affects the exploration results included in the Prospectus. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the Prospectus.

Right assets, right timing

Tier 1

jurisdictions with existing infrastructure and close to existing mines.

Existing Resource

base of critical metals with near-term development potential.

High-grade

zinc and copper mineralisation with outstanding growth potential.

High-value

products from proposed operations with strong ESG credentials.

Proven track record

Driven by experienced management with track record of exploration success and project development.

Strategy for accelerated growth

ersonal use only

Drilling to recommence at Storm to expand the near-surface footprint and follow-up deep discovery.

Delivery of upgraded JORC compliant resource and PFS for West Desert.

Test high-priority exploration targets and confirm expansion potential of West Desert.

Maiden drilling program at Copper Warrior to confirm mineable volumes of copper.

High quality board and management team

JOHN PRINEAS
Non-Executive Chairman

Founder of American West and a major shareholder.

John is also the founder and Executive Chairman of St George Mining Limited (ASX: SGQ). John holds a Bachelor of Economics and Bachelor of Laws from the University of Sydney and is a Fellow of Financial Services Institute of Australasia.

John is also a director of BMG Resources Limited (ASX: BMG).

DAVE O'NEILL
Managing Director

Founder of American West and a major shareholder.

A geologist with over 20 years experience in the resources sector gained in Australia and internationally.

Dave has expertise in base metals and gold exploration as well as business development gained in senior roles with Anglogold, WMC, BHP and Western Areas.

DAN LOUGHER
Non-Executive Director

Daniel Lougher is a highly regarded mining executive with a distinguished career of over 40 years' experience in the resources sector. He has successfully built multiple mines, managing all facets of project development from resource definition, feasibility studies, project financing, mine construction and the negotiation of off-take contracts.

In his role as Managing Director of Western Areas Limited, Dan built the company into the leading independent nickel producer in Australia ahead of a \$1.3 billion takeover by IGO Limited in 2022.

MICHAEL ANDERSON
Non-Executive Director

Dr Michael Anderson has extensive technical experience as well as substantial business development experience built up over a 30-year career.

Previously Managing Director of ASX listed companies with development and producing assets. As a Director at Taurus Funds Management in Australia, he managed the fund's investment in precious and base metals projects in a number of continents.

TOM PEREGOODOFF
Non-Executive Director

More than 30 years of resource industry experience, much of it greenfield and brownfield exploration and resource development.

Tom is currently President CEO and Director of Apollo Silver Corp. and an independent director of American Copper Development Corp. Formerly President of Peregrine Diamonds Ltd, Tom also spent 18 years in global leadership roles within BHP.

VP OPERATIONS North America

ROCKY PRAY

Rocky is a senior mining professional with expertise in pre-feasibility and feasibility studies, Federal and State permitting, environmental management mine operations, project engineering and construction.

More than 30 years of engineering and project development focused on mining projects across several jurisdictions in the USA and abroad. Rocky has a successful track record directing teams to safely build new mines, and expand existing mines on schedule and under budget.

1. 58,224,999 shares are escrowed for 24 months from the date of quotation. 2,400,00 shares to be issued subject to shareholder approval
2. As at 29 November 2022.
3. As at 30 September 2022. On 1 November 2022 the Company raised **\$3.4 million** via a placement to various institutional, sophisticated and professional investors.
4. Unlisted Options exercisable at \$0.30 per share, various exercise dates.
5. Listed Options exercisable at \$0.20 on or before 20 September 2024. 16,897,832 Listed Options to be issued subject to shareholder approval.
6. Issued under the Company's performance rights plan to the AW1's VP of Operations, see 9 December 2021 Prospectus for more details.

West Desert Project

UTAH, USA

West Desert

Utah

Located within the world class Sevier Orogenic Belt and close to the Bingham Copper Deposit and Tintic District.

Cautionary Statement:

The estimates of minerals resources referred to in this Presentation in regard to the West Desert Project and the Seal Zinc Project are historical and foreign in nature and are reported in accordance with Canadian NI 43-101 Standards and not in accordance with the 2012 JORC Code. A competent person has not done sufficient work to classify these estimates as mineral resources or ore reserves in accordance with the 2012 JORC Code. It is uncertain that following evaluation and/or further exploration work that the historical and foreign resource estimates of mineralisation will be able to be reported as mineral resources or ore reserves in accordance with the 2012 JORC Code.

Large Zinc-Copper skarn

and carbonate replacement deposit (CRD).

Over 59Mt of resources

with a **higher grade core of 16.5Mt @ 6.3% Zn, 0.3% Cu, 33g/t In** for 1.03Mt Zn, 45Kt Cu and 19.2Moz In.
(NI 43-101, historical and foreign resource)

Strategically important
as the only source
of Indium in the
USA.

100% ownership
and fully permitted
for open pit and
exploration shaft
construction.

Outstanding infrastructure
and close to rail
and smelters.

Existing resources

with outstanding growth potential

Robust existing development case

Large and coherent orebody

supports a range of potential development scenarios.

Simple and clean metallurgy

Excellent metallurgical recoveries from sulphide and oxide ores and 55% Zn and 32% Cu concentrates with traditional processing techniques.

Feasibility studies

PFS level activities underway with a focus on bulk open-pit resources with a high-grade underground development.

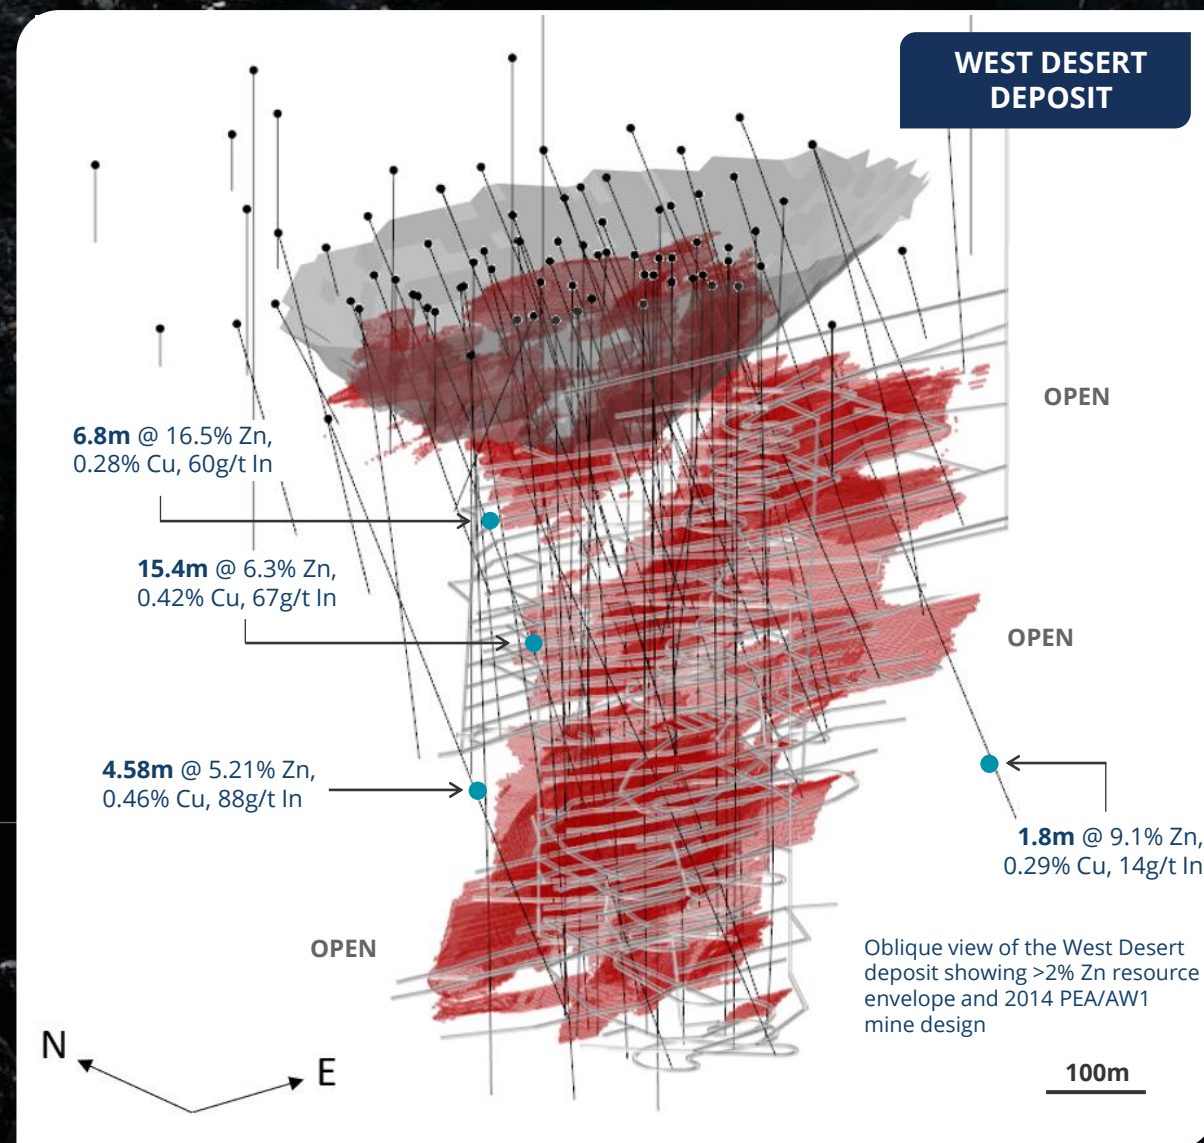

Outstanding opportunity to add value

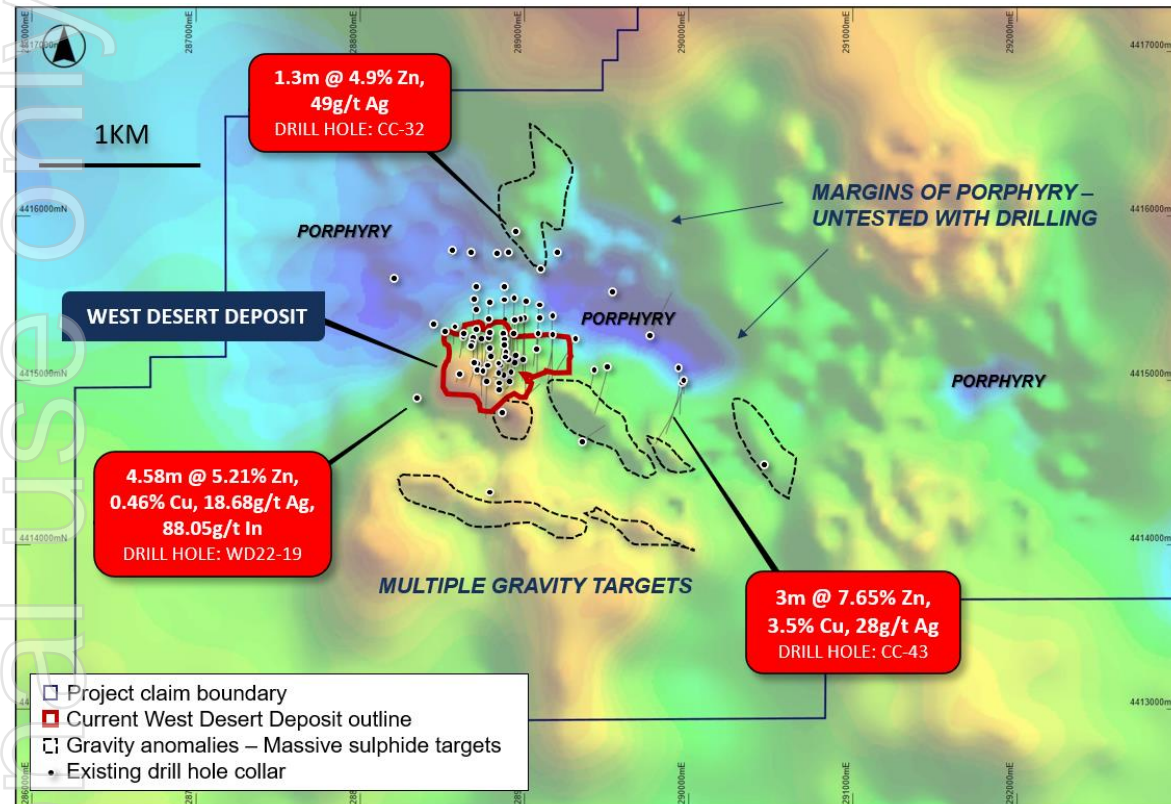

Silver and gold not estimated in 2014 PEA despite significant historical drill intersections.

West Desert is the only **indium** deposit in the USA

Large, high-quality **magnetite Iron-Ore** content – **68% Fe**.

Regional growth potential

West Desert geophysics and expansion potential

Plan view showing resource outline and drilling overlaying gravity image (Residual Bouguer anomaly). Note multiple, untested West Desert sized gravity targets around the central porphyry stock.

<10% of mineral system explored

with similarities to Bingham Canyon and Tintic.

Multiple geophysical anomalies

defined in the near mine area that are West Desert lookalikes.

New mineralised zones discovered

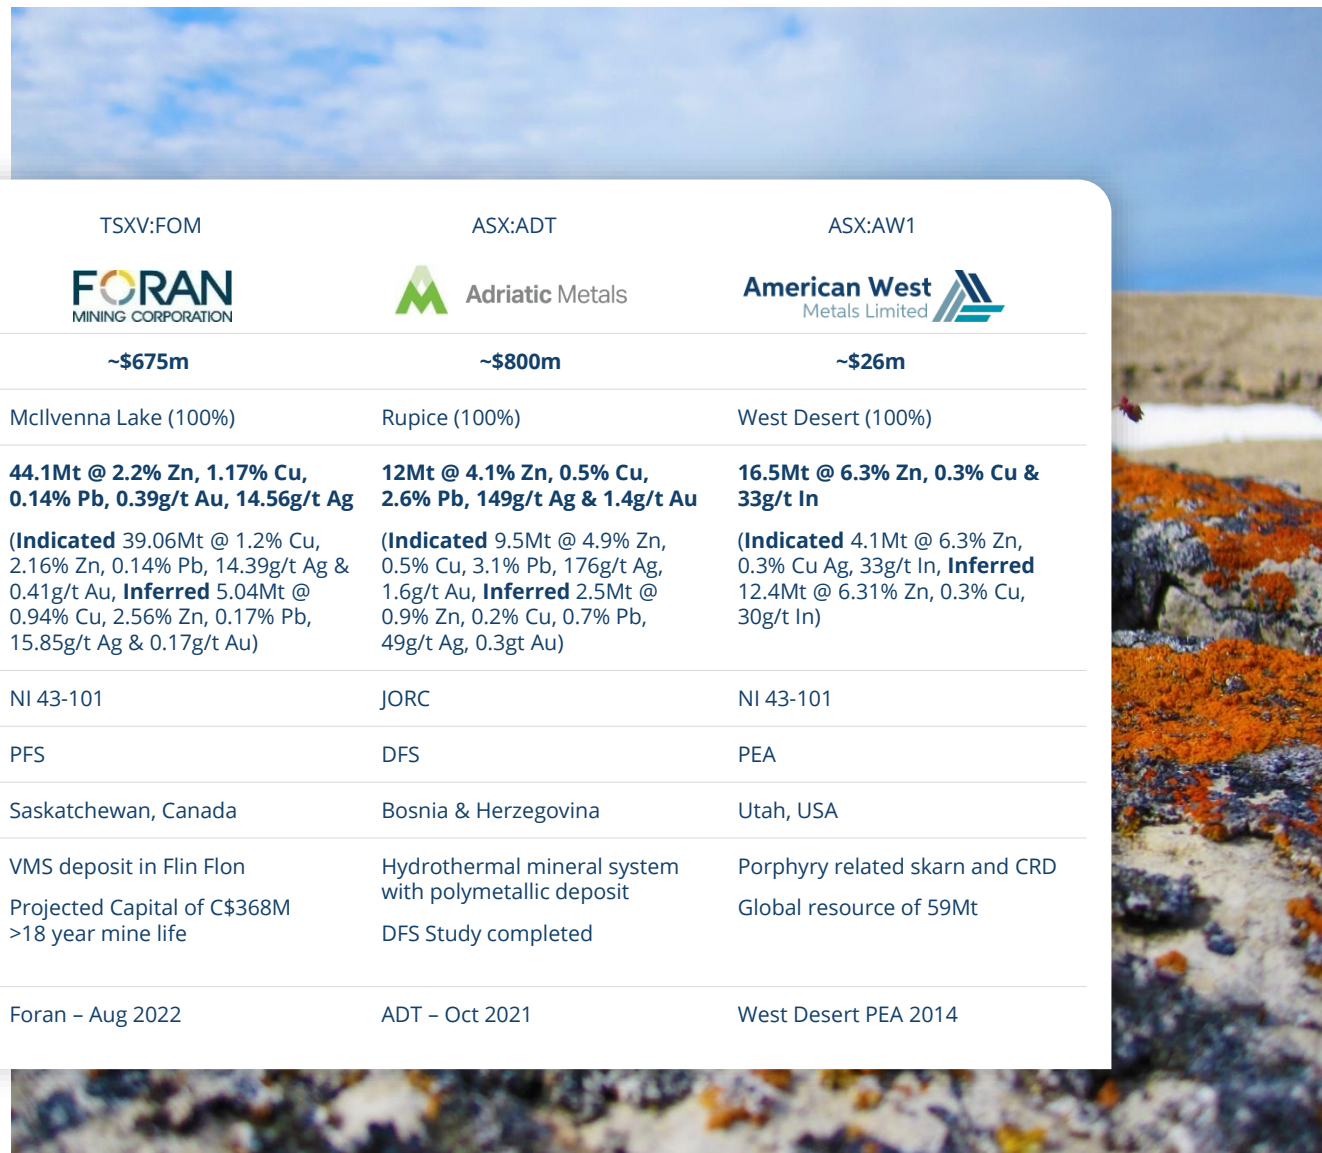

Exploration drilling has intersected high-grade mineralisation to the east and west of the current West Desert resource.

High-grade copper zones have been defined outside of the current West Desert resource. Drill core from WD22-01C (418m).

Compelling valuation versus peers

West Desert has scale and grade

Storm Copper Project and Seal Zinc deposit

NUNAVUT, CANADA

Storm and Seal Projects

Nunavut

Storm Copper Project

Widespread high-grade copper mineralisation near surface.

Significant new discovery of stratiform copper at depth

4,145 km²
land package

Dominant regional project with extensive land package.

Seal Zinc Project

Stratabound zinc deposit with large scale potential.

Initial resources of 1Mt @
10.24% Zn, 46.5g/t Ag
for 103kt Zn, 1.5Moz Ag
(NI 43-101, historical and foreign).

Highly accessible location
with turn-key exploration

Historical mining district, experienced in-country exploration and logistics team.

Cautionary Statement:

The estimates of minerals resources referred to in this Presentation in regard to the West Desert Project and the Seal Zinc Project are historical and foreign in nature and are reported in accordance with Canadian NI 43-101 Standards and not in accordance with the 2012 JORC Code. A competent person has not done sufficient work to classify these estimates as mineral resources or ore reserves in accordance with the 2012 JORC Code. It is uncertain that following evaluation and/or further exploration work that the historical and foreign resource estimates of mineralisation will be able to be reported as mineral resources or ore reserves in accordance with the 2012 JORC Code.

Emerging copper district

Two distinct copper sulphide systems discovered

Multiple near surface high-grade copper zones identified in drilling across 15km²

World class scale potential with intercepts including 41m @ 4.18% Cu.

New discovery at depth is evidence of a major sedimentary copper system

>100m intersection of stratiform chalcopyrite and sphalerite.

Outstanding growth potential

numerous surface gossans and geophysical anomalies remain untested.

Storm

METALS FOR THE CLEAN ENERGY FUTURE

Storm and Seal Projects

Schematic exploration concept of the Storm and Seal Deposit areas.

World class scale

Storm

Significant volume of mineralisation defined

The near surface copper mineralisation shows continuity across 4 main prospects

Excellent expansion potential with untested EM and IP anomalies

Large scale, open pit potential with mineralisation from surface

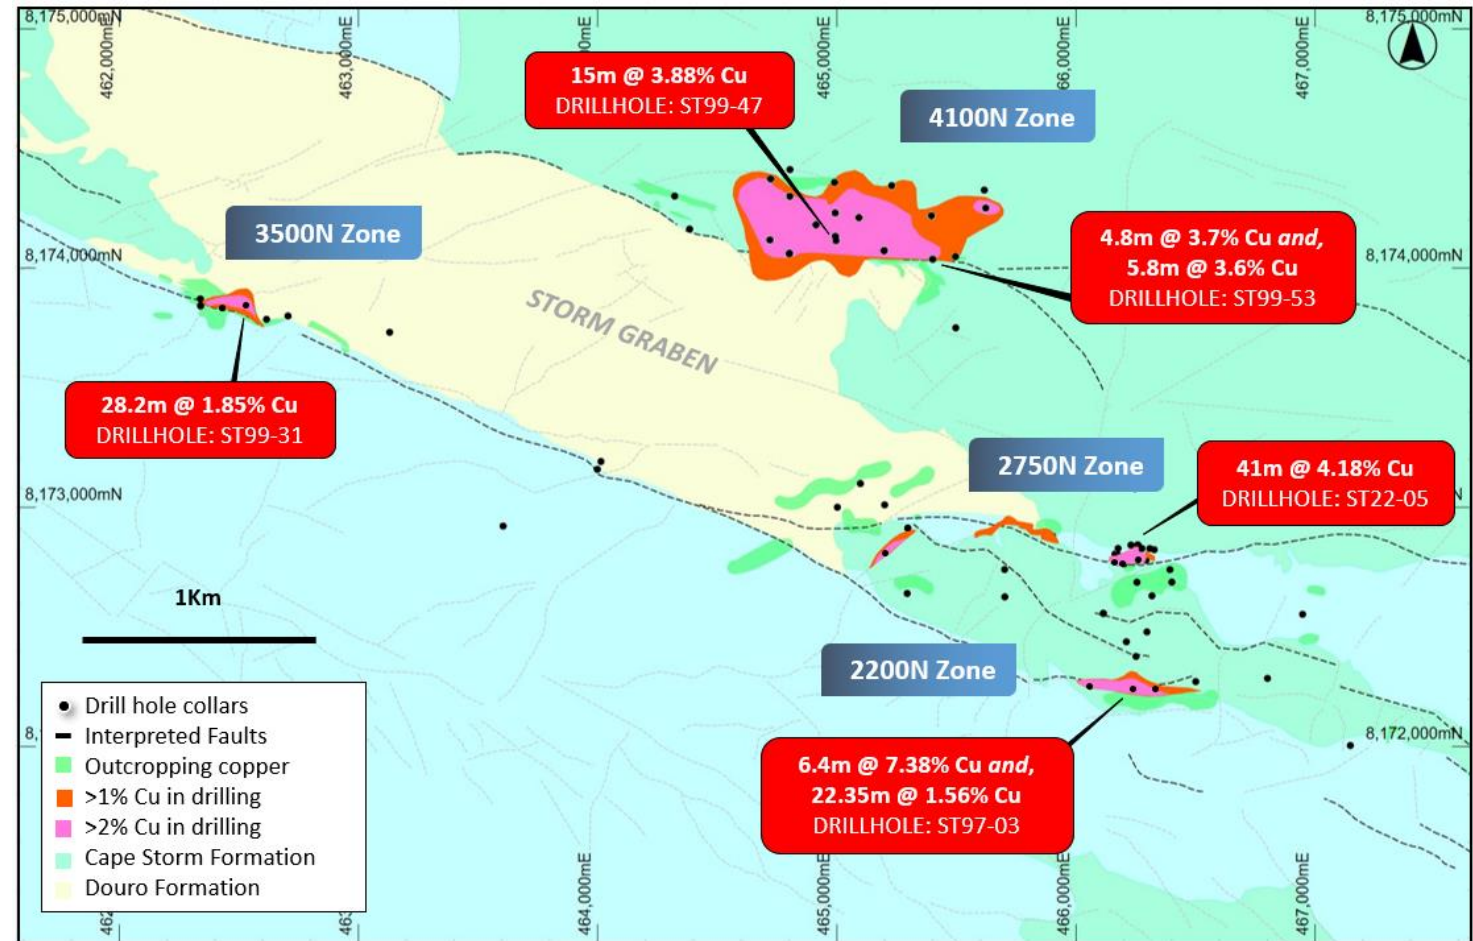

32 drill holes have intersected high-grade copper mineralisation

AVERAGE MINERALISED INTERVAL THICKNESS: 24m

AVERAGE MINERALISED INTERVAL GRADE: 2.15% Cu

Massive/breccia bornite hosted within dolomite (light grey) in drill hole ST22-05.

Storm area has a known footprint of copper mineralisation in outcrop and drilling that extends over 15km²

Game changing discovery

New style of mineralisation discovered

Exploration drill hole ST22-10

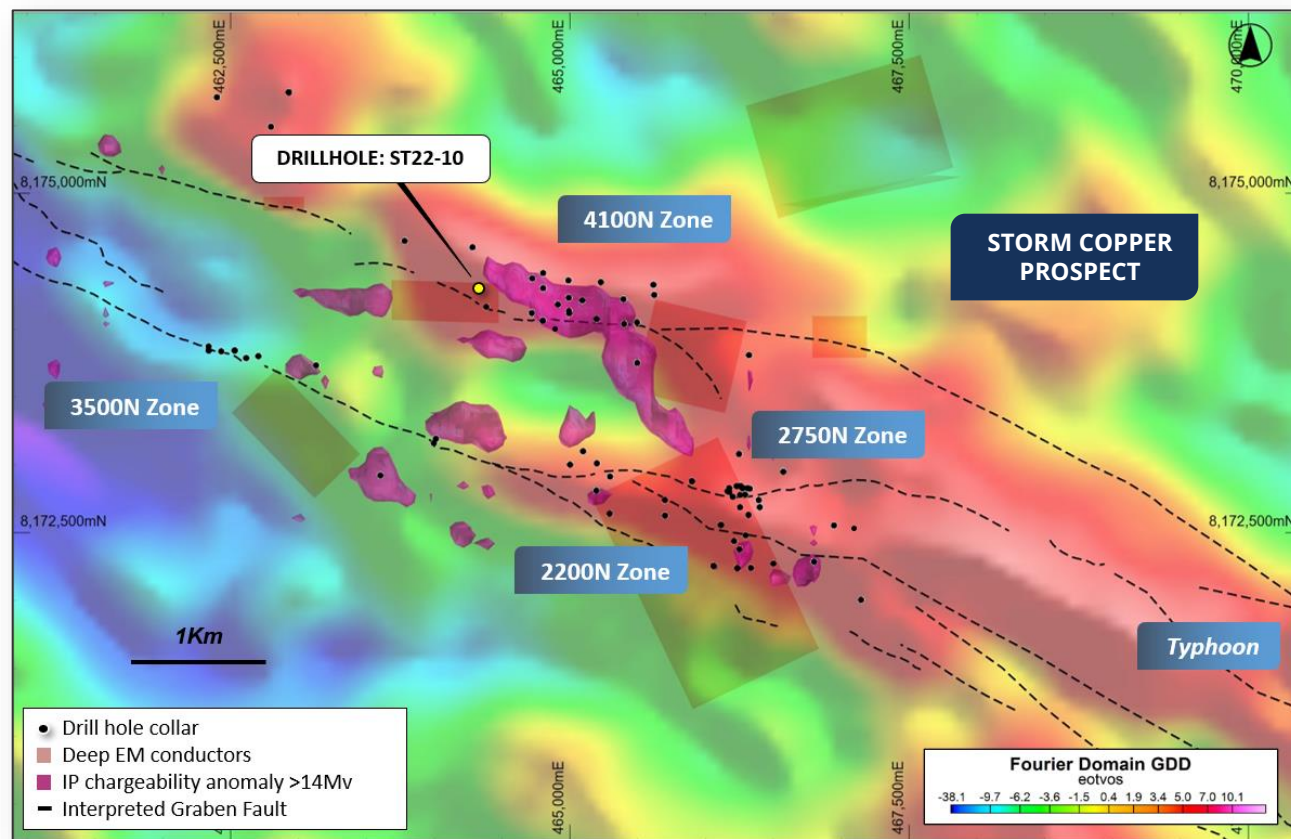

intersected over 100m of sedimentary copper and zinc sulphide mineralisation.

The mineralisation is associated with an **800m x 300m EM plate**.

Six other similar EM plates are yet to be tested.

Large gravity and IP anomalies also remain untested.

New style of mineralisation at Storm evidence of major copper system at depth.

Large scale potential

Plan showing EM and IP anomalies overlaying Falcon gravity image.

Breccia/vein style chalcopryite hosted

within vuggy and fractured carbonate unit from 313m in drill hole ST22-10.

Storm

METALS FOR THE CLEAN ENERGY FUTURE

DSO potential confirmed

Low footprint, sustainable mining potential

>53% copper product

Ore sorting on Storm mineralisation from the 4100N Zone has produce spectacular **DSO** results

Copper extraction from DSO product highly amenable to **conventional flotation** processing.

Potential for low capital, low footprint, mobile mining operation with strong ESG credentials.

High-value product will ship to global markets.

Storm

METALS FOR THE CLEAN ENERGY FUTURE

Steinert full-scale ore sorter used for test work in Perth, Western Australia

Storm Copper Project

Three ore-sorting products generated from Storm drill core (STOR1601D – 4m @ 4.16% Cu from 97m)

High grade zinc and silver deposit

High-grade deposit with strong expansion potential:

- ✓ Deposit is open along strike and down dip
- ✓ Confirmed as being related to the Polaris Zn-Pb mineralisation event – regional scale potential
- ✓ Widespread Zn soil anomalies associated with prospective stratigraphy

SEAL DEPOSIT | Mineral resource estimate (4.0% ZnEq Cut-Off)

Classification	Tonnage (Kt)	Zn %	Contained Zn (t)	Ag g/t	Contained Ag (Oz)
Inferred	1,006	10.24	103,000	46.5	1,505,0000

Cautionary Statement:

The estimates of minerals resources referred to in this Presentation in regard to the West Desert Project and the Seal Zinc Project are historical and foreign in nature and are reported in accordance with Canadian NI 43-101 Standards and not in accordance with the 2012 JORC Code. A competent person has not done sufficient work to classify these estimates as mineral resources or ore reserves in accordance with the 2012 JORC Code. It is uncertain that following evaluation and/or further exploration work that the historical and foreign resource estimates of mineralisation will be able to be reported as mineral resources or ore reserves in accordance with the 2012 JORC Code.

Copper Warrior Project

UTAH, USA

Copper Warrior Project

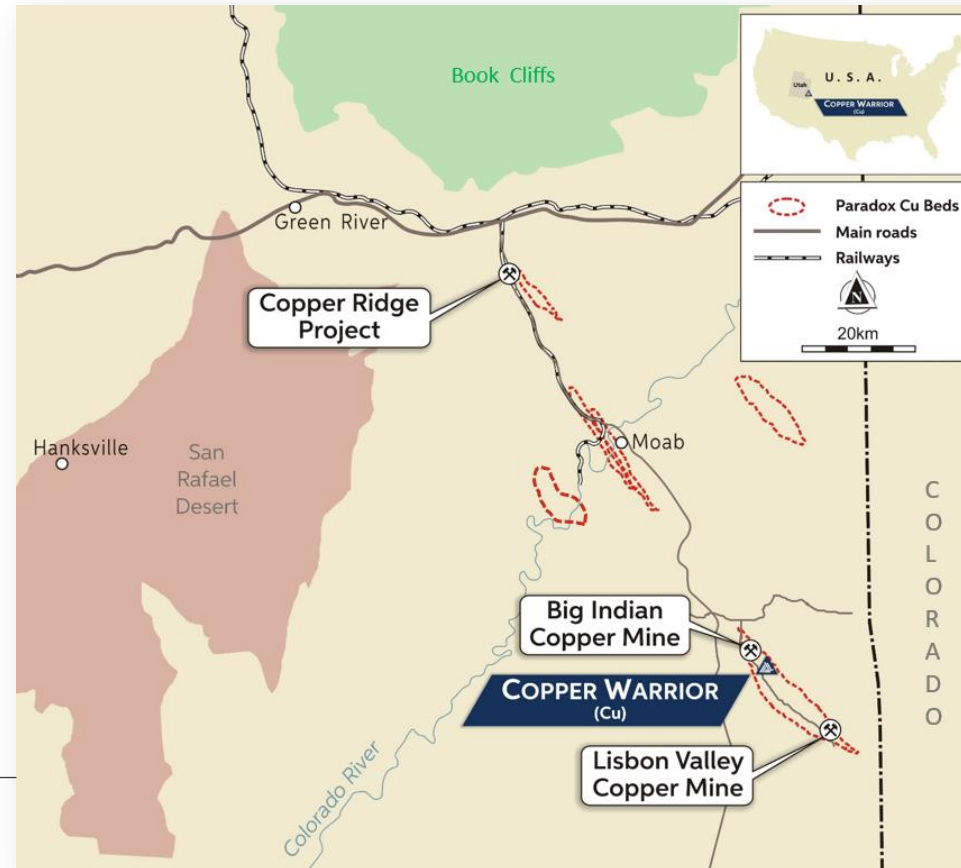

Strategic address in copper heartland

Located in the world class Paradox Basin, SE Utah.

15km from Utah's 2nd largest copper mine - **Lisbon Valley Copper Mine (37Mt @ 0.46% Cu).**

Direct road access to mine infrastructure and processing plant.

Project location and regional infrastructure.

Utah

Compelling geology and fast tracked activities

- ✓ Lisbon Valley mine geology and mineralising structure mapped within Copper Warrior Project.
- ✓ Large volumes of outcropping copper confirmed across the landholding.
- ✓ Strong Induced Polarisation (IP) anomalies defined in recent survey.
- ✓ Shallow, drill ready targets.

Copper oxides replacing chalcocite in outcropping sandstone.

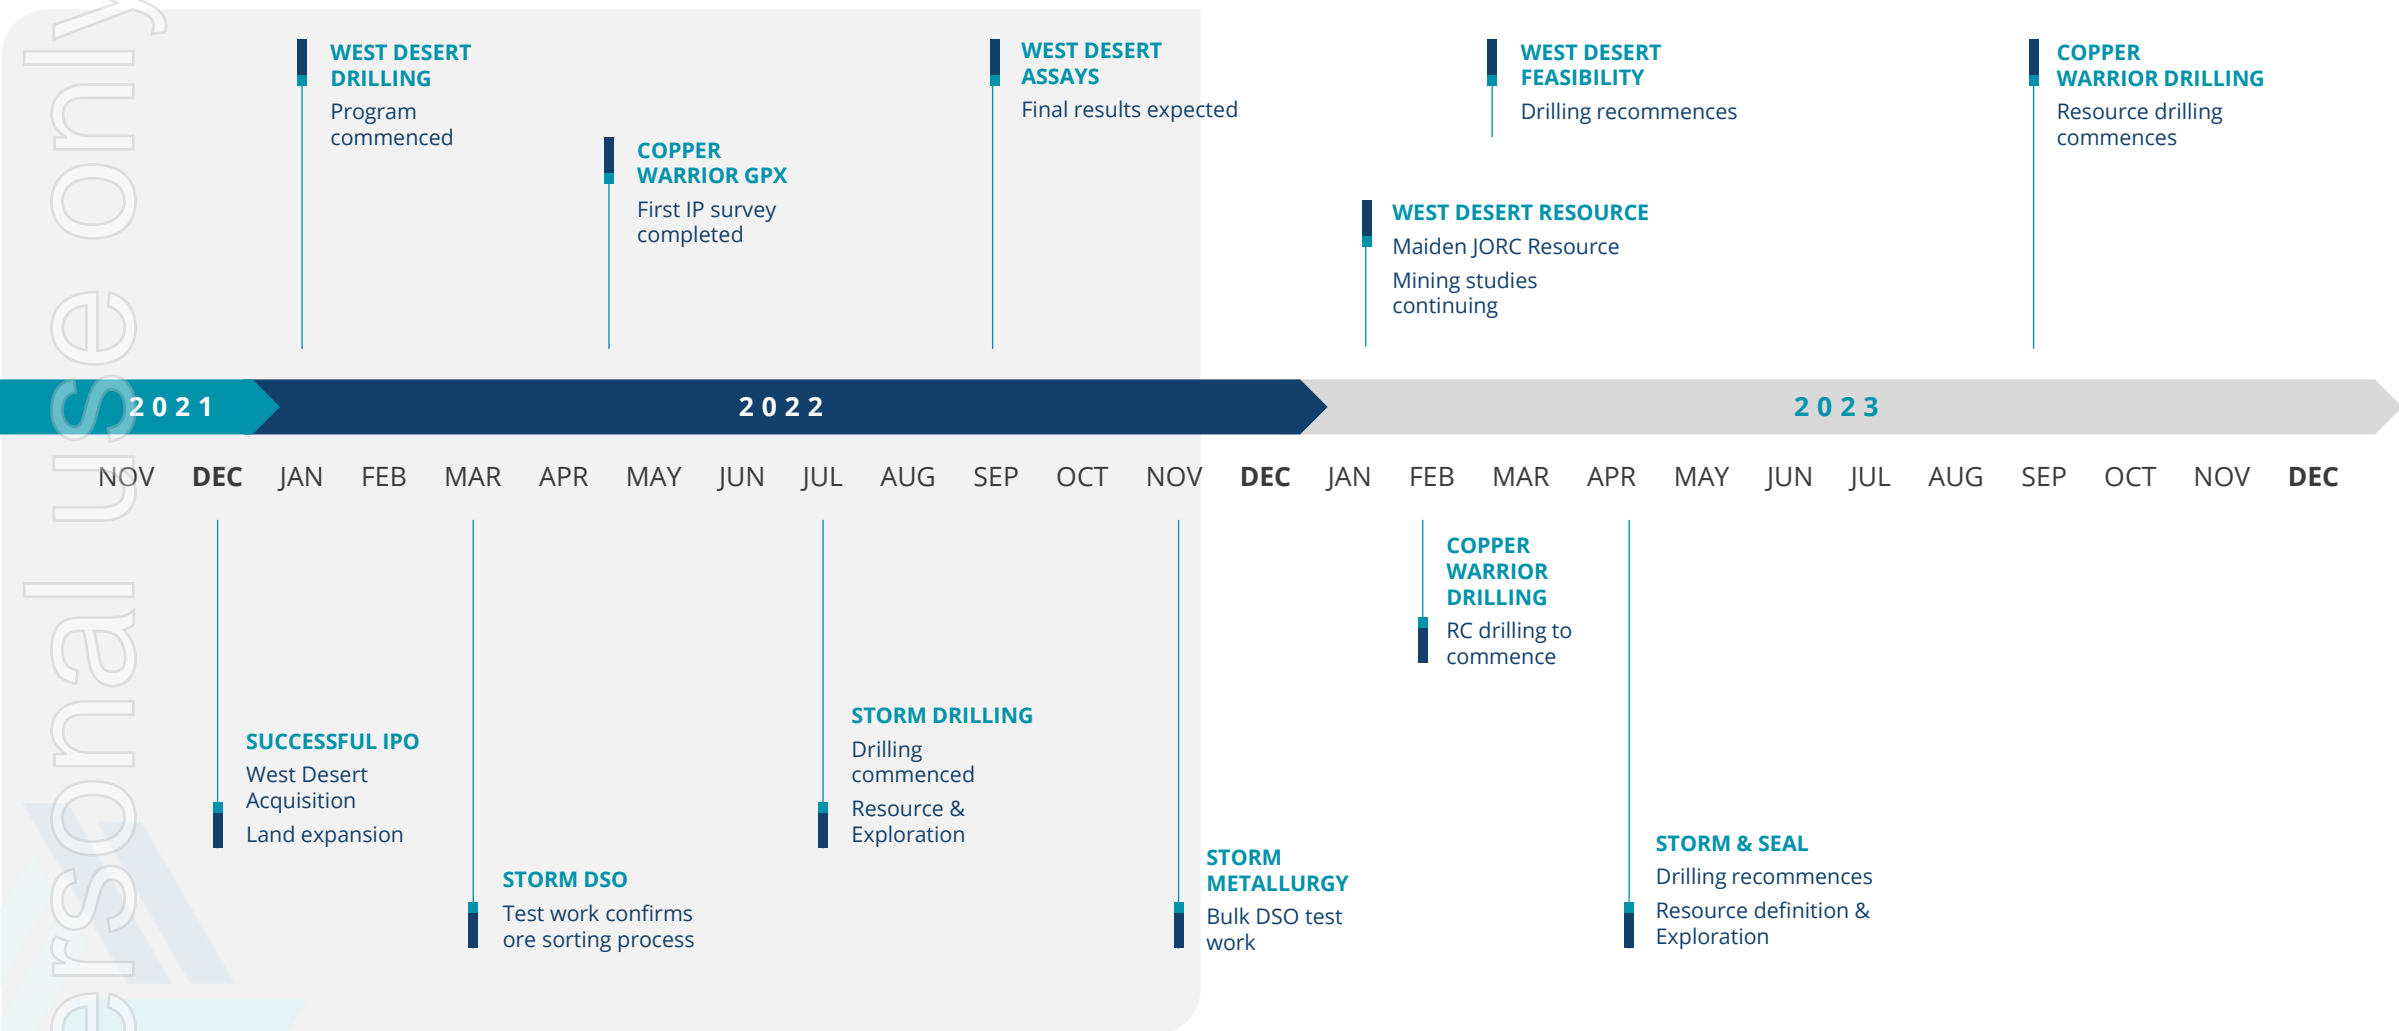

Investment Summary

Why invest in American West Metals?

Value drivers and key milestones

Existing resources

West Desert Resource

NI-43-101 & 43-101F1 Technical Report with effective date of 17 March 2017 prepared by Mine Development Associates and titled: **“Technical Report on the West Desert Zinc-Copper-Indium-Magnetite Project Preliminary Economic Assessment, Juab County, Utah”**.

Resource estimate:

59Mt @ 5.78% Zn Eq. for 1Mt Zn, 131Kt Cu, 1,534t Indium and 28Mt Iron.

A full copy of the Technical Reports can be viewed on the American West website at

→ www.americanwestmetals.com

Cautionary Statement:

The estimates of minerals resources referred to in this Presentation in regard to the West Desert Project and the Seal Zinc Project are historical and foreign in nature and are reported in accordance with Canadian NI 43-101 Standards and not in accordance with the 2012 JORC Code. A competent person has not done sufficient work to classify these estimates as mineral resources or ore reserves in accordance with the 2012 JORC Code. It is uncertain that following evaluation and/or further exploration work that the historical and foreign resource estimates of mineralisation will be able to be reported as mineral resources or ore reserves in accordance with the 2012 JORC Code.

Seal Zinc Resource

NI-43-101 & 43-101F1 Technical Report with effective date of 6 October 2018 prepared by P&E Mining Consultants Inc. and titled: **“Initial Mineral Resource Estimate and Technical Report for the Seal Zinc Deposit, Aston Bay Property, Somerset Island, Nunavut for Aston Bay Holdings Ltd”**.

Resource estimate:

1Mt @ 10.24% Zn, 46.5g/t Ag for 103kt Zn, 1.5Moz Ag.
