

Investor Presentation “Leveraged to the Future”

Unlocking Value From
Strategic Future Minerals Portfolio

Disclaimer

This presentation has been prepared by Auroch Minerals Ltd (Auroch or the Company). It contains general information about the Company’s activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation.

This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only. This presentation contains general summary information and does not take into account the investment objectives, financial situation and particular needs of any individual investor. It is not financial product advice and investors should undertake their own due diligence and obtain their own independent advice from qualified professional advisors having regard to their objectives, financial situation and needs. Neither Auroch nor any of its related bodies corporate is licensed to provide financial product advice.

This presentation and information, opinions or conclusions expressed in the course of this presentation contains forecasts, projections and opinions which constitute forward looking statements. Forward looking statements include, but are not limited to, statements concerning the Company’s exploration programme, outlook and target sizes. They include statements qualified by words such as “potential”, “target”, “scheduled”, “planned”, “estimate”, “possible”, “future”, “prospective” and similar expressions. Such forward looking statements are not a guarantee of future performance, and are subject to numerous risks, uncertainties and other factors, including unknown ones. Actual results and developments will almost certainly differ materially from those expressed or implied. There are a number of risks, both specific to Auroch and of a general nature which may affect the future operating and financial performance of Auroch and the value of an investment in Auroch including but not limited to title risk, renewal risk, economic and general market conditions, stock market fluctuations, price movements, regulatory risks, operational risks, reliance on key personnel, uncertainties relating to interpretation of exploration results, geology and resource estimations, native title risks, foreign currency fluctuations, uncertainties relating to the availability of/access to additional capital, infrastructure or environmental approvals, and mining development, construction and commissioning risk. Auroch expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events, or otherwise.

To the maximum extent permitted by law, no representation, warranty or undertaking, express or implied, is made and no responsibility or liability is accepted, by the Company or any of its officers, employees, agents or consultants or any other person, as to the adequacy, accuracy, completeness or reasonableness of the information in this presentation. An investment in the shares of the Company is to be considered highly speculative.

The exploration targets or conceptual exploration targets in this presentation or expressed during the course of this presentation are subject to completion of the necessary feasibility studies, permitting and execution of all necessary infrastructure agreements. In relation to any statements pertaining to future exploration targets or conceptual exploration targets, the nature of the exploration target means that the potential quantity and grade is conceptual in nature. This presentation and information, opinions or conclusions expressed in the course of this presentation should be read in conjunction with Auroch’s other periodic and continuous disclosure announcements lodged with the ASX, which will be available on the Auroch website.

The information in this report that relates to Exploration Results is based on information compiled by Mr Robin Cox and represents an accurate representation of the available data. Mr Cox (Member of the Australian Institute of Mining and Metallurgy) is the Company’s Chief Geological Officer and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ ("JORC Code 2012"). Mr Cox consents to the disclosure of this information in this report in the form and context in which it appears. The information in this release that relates to Mineral Resources for the Saints Project and the Nepean Nickel Project is based on information compiled by Mr Shaun Searle who is a Member of the Australasian Institute of Geoscientists. Mr Searle is an employee of Ashmore Advisory Pty Ltd and independent consultant to Auroch Minerals Limited. Mr Searle has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he has undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Mr Searle consents to the inclusion in this report of the matters based on this information in the form and context in which it appears. The information in this report that relates to Mineral Resources for the Leinster Project was reported by Breakaway Resources Ltd to the ASX on 14th April 2008 under JORC Code 2004 (refer <https://www.asx.com.au/asxpdf/20081024/pdf/31d3x55rpn6dxy.pdf>). A Competent Person (as defined in the JORC Code 2012) has not done sufficient work to classify this Mineral Resource in accordance with JORC Code 2012. The information in this report in relation to Mineral Resources for the Leinster Project is an accurate representation of the available data and studies for the project which have been compiled by Mr Aidan Platel. Mr Platel (Member of the Australian Institute of Mining and Metallurgy) is the Company’s Chief Geological Officer and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the JORC Code 2012. Mr Platel consents to the disclosure of this information in this report in the form and context in which it appears.

ASX Listing Rule Information

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the original market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the competent persons findings have not been materially modified from the original announcement

• HIGH GRADE LITHIUM DISCOVERED AT NEPEAN	24 November 2022	• EXPLORATION COMMENCES FOR 2022	07 January 2022	• NICKEL SULPHIDES INTERSECTED ALONG STRIKE AT NEPEAN	28 April 2021
• NEPEAN NICKEL PROJECT – EXPLORATION UPDATE	15 November 2022	• LITHIUM MINERALISATION CONFIRMED AT NEPEANG	08 December 2021	• NEW HIGH-GRADE NICKEL SULPHIDE DRILL INTERCEPTS AT NEPEAN	31 March 2021
• ROCK-CHIP RESULTS CONFIRM RARE EARTHS POTENTIAL AT ARDEN	19 October 2022	• NICKEL SULPHIDES INTERSECTED IN NEPEAN DEEPS DRILLING	25 November 2021	• DIAMOND DRILLING COMMENCES AT LEINSTER NICKEL PROJECT	25 March 2021
• NEVADA LITHIUM PROJECT UPDATE	15 September 2022	• GROUND IP SURVEY UNDERWAY AT NEPEAN	17 November 2021	• NEPEAN DRILLING UPDATE	10 March 2021
• NEPEAN NICKEL PROJECT – JORC MINERAL RESOURCE ESTIMATE	01 September 2022	• NEPEAN DEEPS EXPLORATION UPDATE	08 November 2021	• INTERSECTIONS OF OVER 5% Ni EXTEND MINERALISATION AT NEPEAN	15 February 2021
• RARE EARTHS EXPLORATION COMMENCES AT ARDEN	17 August 2022	• DIAMOND DRILLING TO COMMENCE AT RAGLESS RANGE ZINC TARGET	25 October 2021	• NEPEAN NICKEL PROJECT ACQUISITION COMPLETED	17 December 2020
• SAINTS NICKEL PROJECT – RESOURCE UPDATE	10 August 2022	• MULTIPLE HIGH PRIORITY DRILL TARGETS IDENTIFIED AT NEPEAN	20 October 2021	• FURTHER HIGH-GRADE MASSIVE NICKEL SULPHIDES AT THE HORN	14 December 2020
• SAINTS PROJECT UPDATE	7 July 2022	• PEGMATITES AT NEPEAN TO BE ASSESSED FOR LITHIUM POTENTIAL	14 October 2021	• HIGH-GRADE MASSIVE NICKEL SULPHIDES CONFIRMED AT THE HORN	01 December 2020
• AUROCH COMPLETES ACQUISITION OF THE NEVADA LITHIUM PROJECT	8 June 2022	• NEPEAN DEEPS EXPLORATION UPDATE	05 October 2021	• FURTHER MASSIVE NICKEL SULPHIDES INTERSECTED AT THE HORN	18 November 2020
• FURTHER HIGH-GRADE NICKEL SULPHIDES AT SAINTS	5 May 2022	• NEPEAN AND SAINTS SCOPING STUDIES UNDERWAY	01 September 2021	• DIAMOND DRILLING INTERSECTS MASSIVE Ni SULPHIDES AT THE HORN	11 November 2020
• DRILLING COMMENCES AT THE LEINSTER NICKEL PROJECT	3 May 2022	• OPTIONS UNDERWRITING TO FUND EXPANDED NEPEAN DEEPS DRILLING	19 August 2021	• AUROCH TO ACQUIRE HIGH-GRADE NEPEAN NICKEL PROJECT	11 November 2020
• POSITIVE METALLURGICAL RESULTS FOR HIGH-GRADE NI-S AT NEPEAN	27 April 2022	• RESULTS DEFINE NEW HIGH-PRIORITY DRILL TARGETS AT LEINSTER	11 August 2021	• NICKELIFEROUS MASSIVE SULPHIDES INTERSECTED AT SAINTS	6 August 2020
• AUROCH TO ACQUIRE US LITHIUM PROJECT	20 April 2022	• NEPEAN NICKEL PROJECT DRILLING UPDATE	29 July 2021	• AUROCH INCREASES TENEMENT PACKAGE IN PROSPECTIVE NICKEL BELT	27 July 2020
• DRILLING INTERSECTS LITHIUM MINERALISATION AT NEPEAN	7 April 2022	• MLEM SURVEY IDENTIFIES PRIORITY DRILL TARGET AT NEPEAN	07 July 2021	• MORE HIGH-GRADE NICKEL INTERSECTED AT SAINTS	14 November 2019
• HIGH-GRADE NICKEL INTERSECTED AT SAINTS	9 March 2022	• MAIDEN NEPEAN DEEPS DRILLING PROGRAMME	23 June 2021	• AUROCH TO ACQUIRE HIGH-GRADE WA NICKEL PROJECTS	28 May 2019
• IP SURVEY IDENTIFIES PRIORITY DRILL TARGETS AT NEPEAN	10 February 2022	• NICKEL SULPHIDES INTERSECTED AT NEW LEINSTER PROSPECTS	10 June 2021		
• SAINTS DIAMOND DRILLING UNDERWAY	25 January 2022	• EXPLORATION UPDATE NEPEAN NICKEL PROJECT	25 May 2021		

This presentation contains information extracted from the following ASX market announcements which are available on the Company’s website at www.aurochminerals.com

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Auroch Minerals Limited’s planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential", "should," and similar expressions are forward-looking statements. Although Auroch Minerals Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

Competent Persons Statement

The information in this report that relates to Exploration Results is based on and fairly represents information compiled by Mr Robin Cox BSc (Hons), a Competent Person, who is a Member of the Australian Institute of Mining and Metallurgy (AusIMM). Mr Cox is the Company’s Senior Geological Officer and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Cox consents to the inclusion in the announcement of the matters based on his information in the form and context in which it appears.

Auroch's Battery Minerals Portfolio

High quality lithium exploration projects, consisting of high grade hard rock and large scale sedimentary potential.

High-grade shallow nickel sulphide resources that are being driven towards development and production to leverage the strong nickel price and the EV demand

Total JORC (2012) resource inventory of ~ 25,000t of contained nickel plus further historic resources – viability to fast-track to near-term development and cash flow being evaluated

Exploration for key future minerals including lithium, Rare Earth Elements (REE's), nickel, copper and zinc in stable pro-mining jurisdictions

Highly prospective exploration targets and experienced technical team driving systematic work programmes to advance new discoveries

Transformative High Grade Lithium Discovery

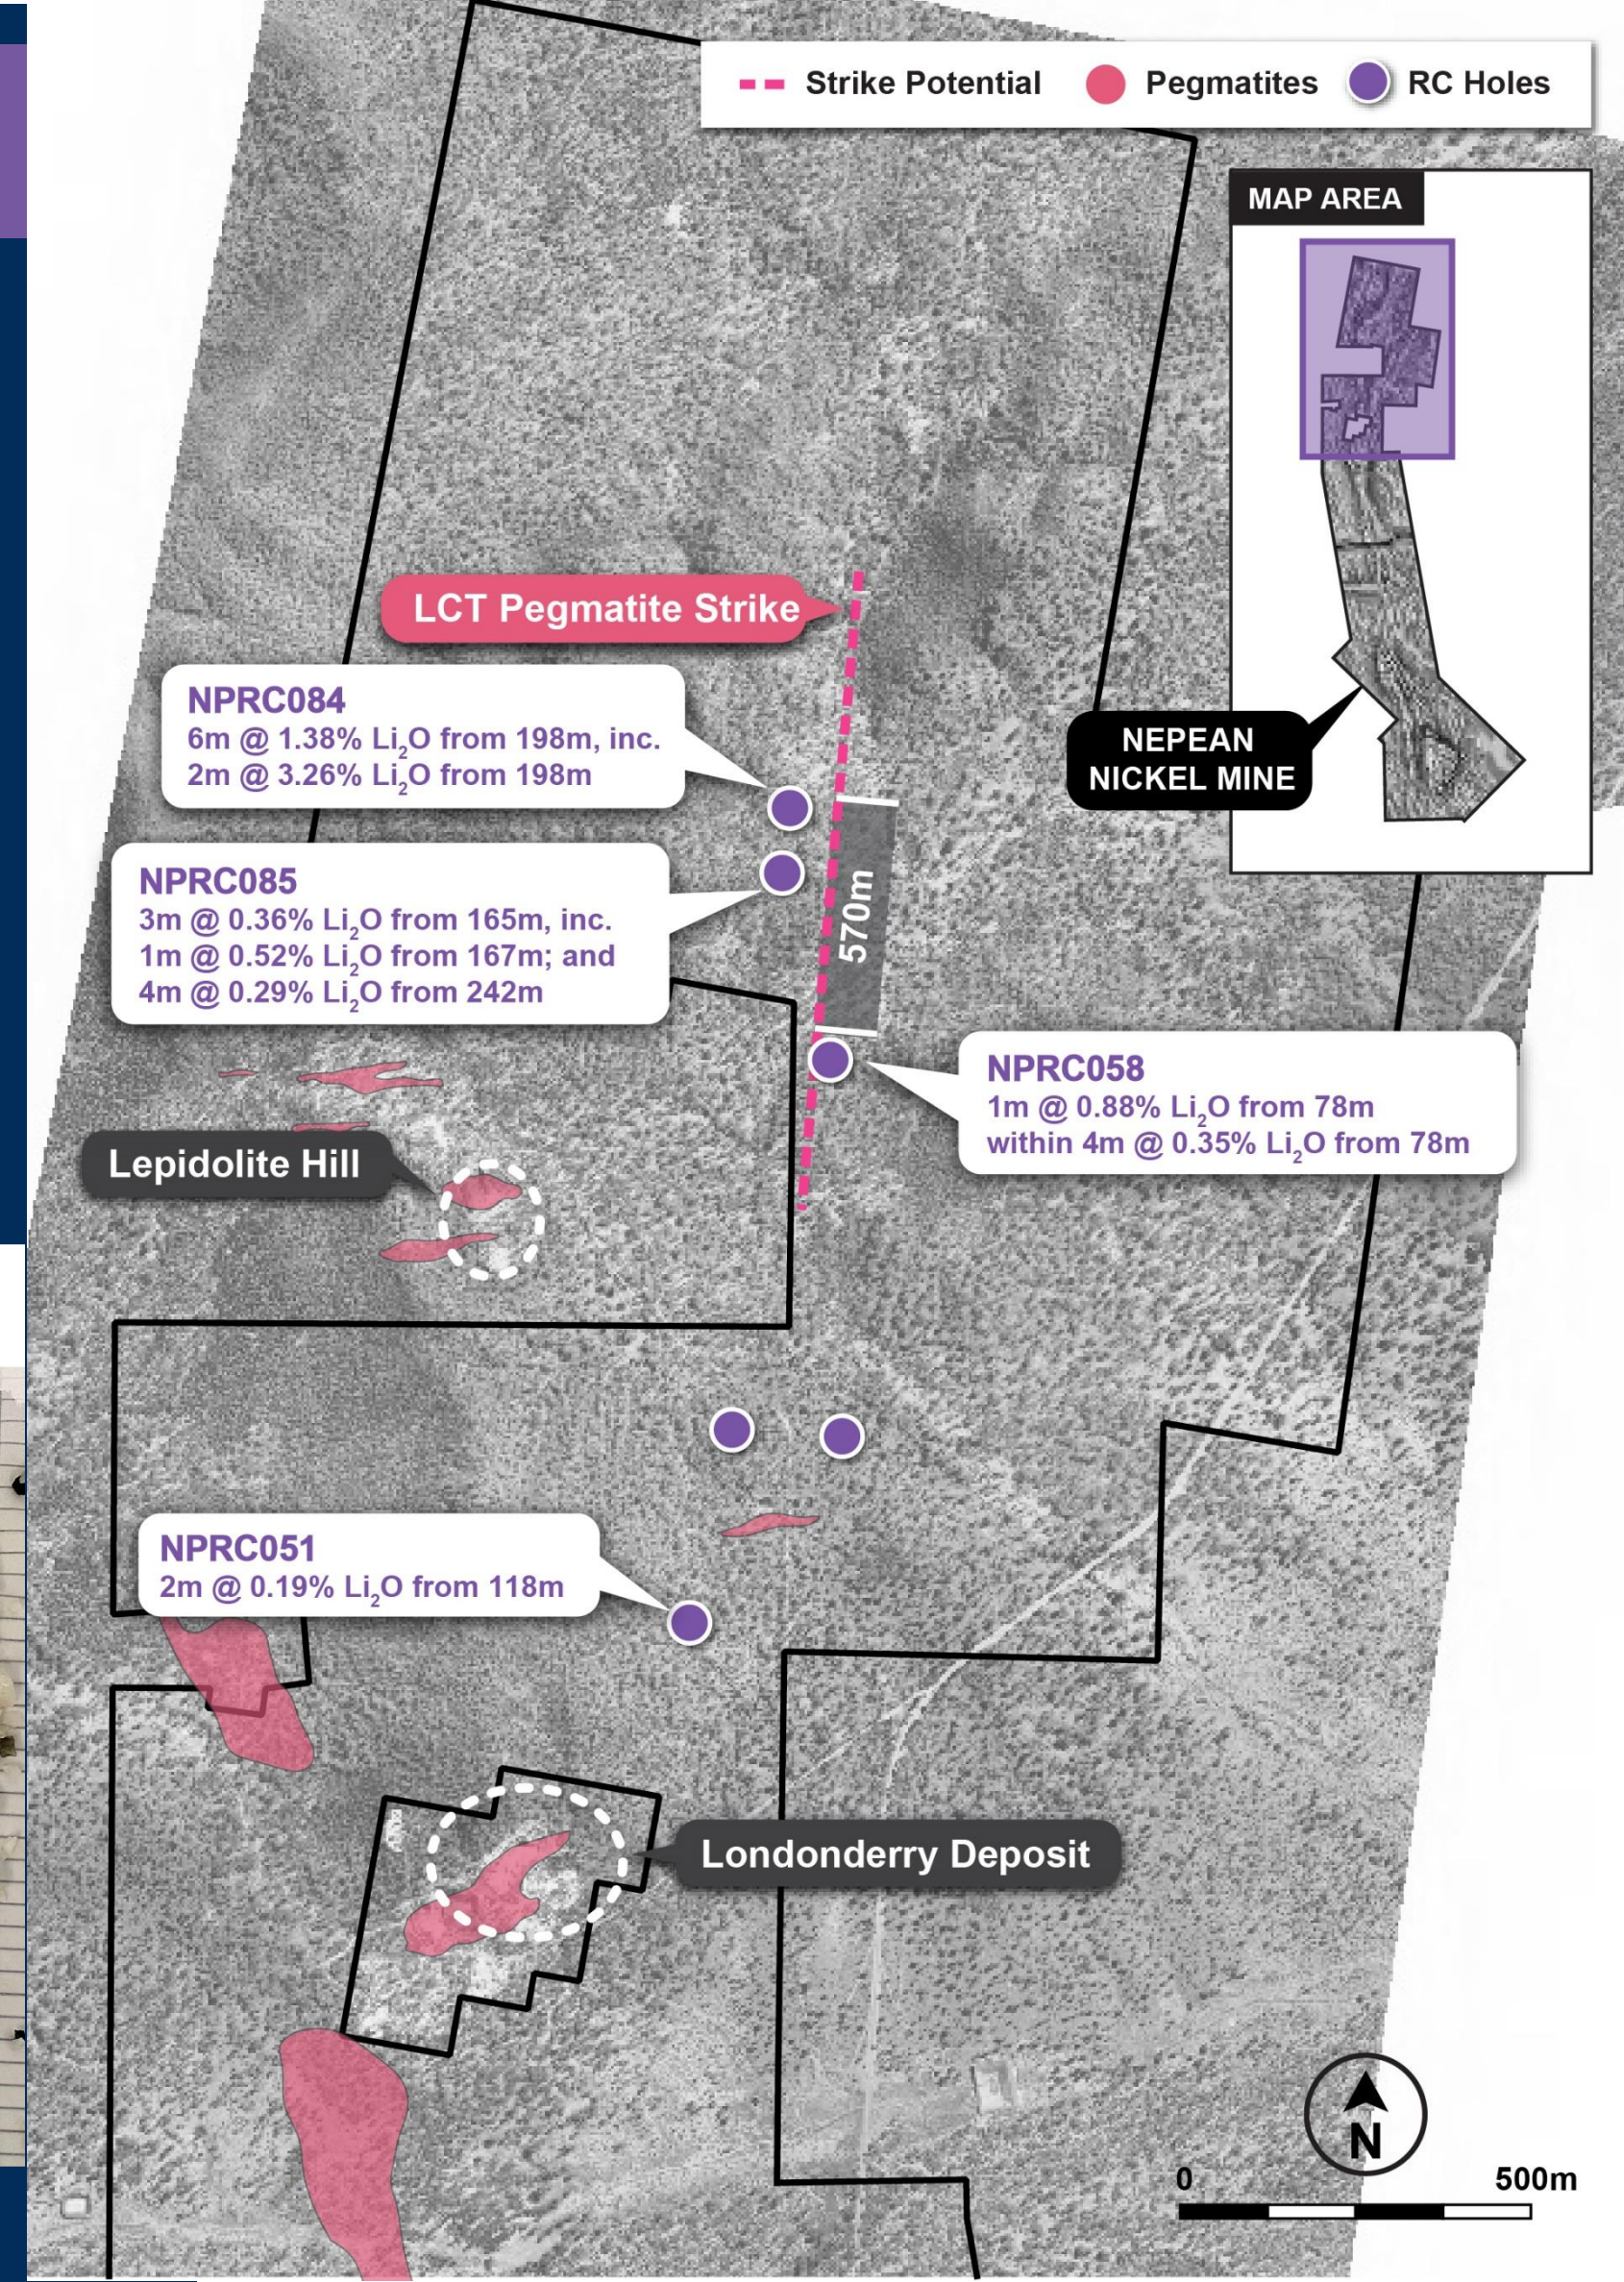

Kangaroo Hills Lithium Project (Nepean Project 80%)

Hard Rock LCT Pegmatite

- High grade **Spodumene** pegmatite intersected in recent exploration drill hole consisting of;
 - 6m @ 1.38% Li_2O from 198m, including
 - 2m @ 3.26% Li_2O from 198m (NPRC084)
- Result highlights the LCT potential of the exploration ground
- ~3km of under-explored strike for LCT pegmatites
- Follow up ground exploration underway!**

Work Programmes

- Mapping & Sampling of Northern Tenure Q4 2022
- Drill target generation - Q4 2022
- Phase 1 targeted RC drill campaign - Q1 2023
- Permitting/planning, phase 2 Exploration - Q2 2023

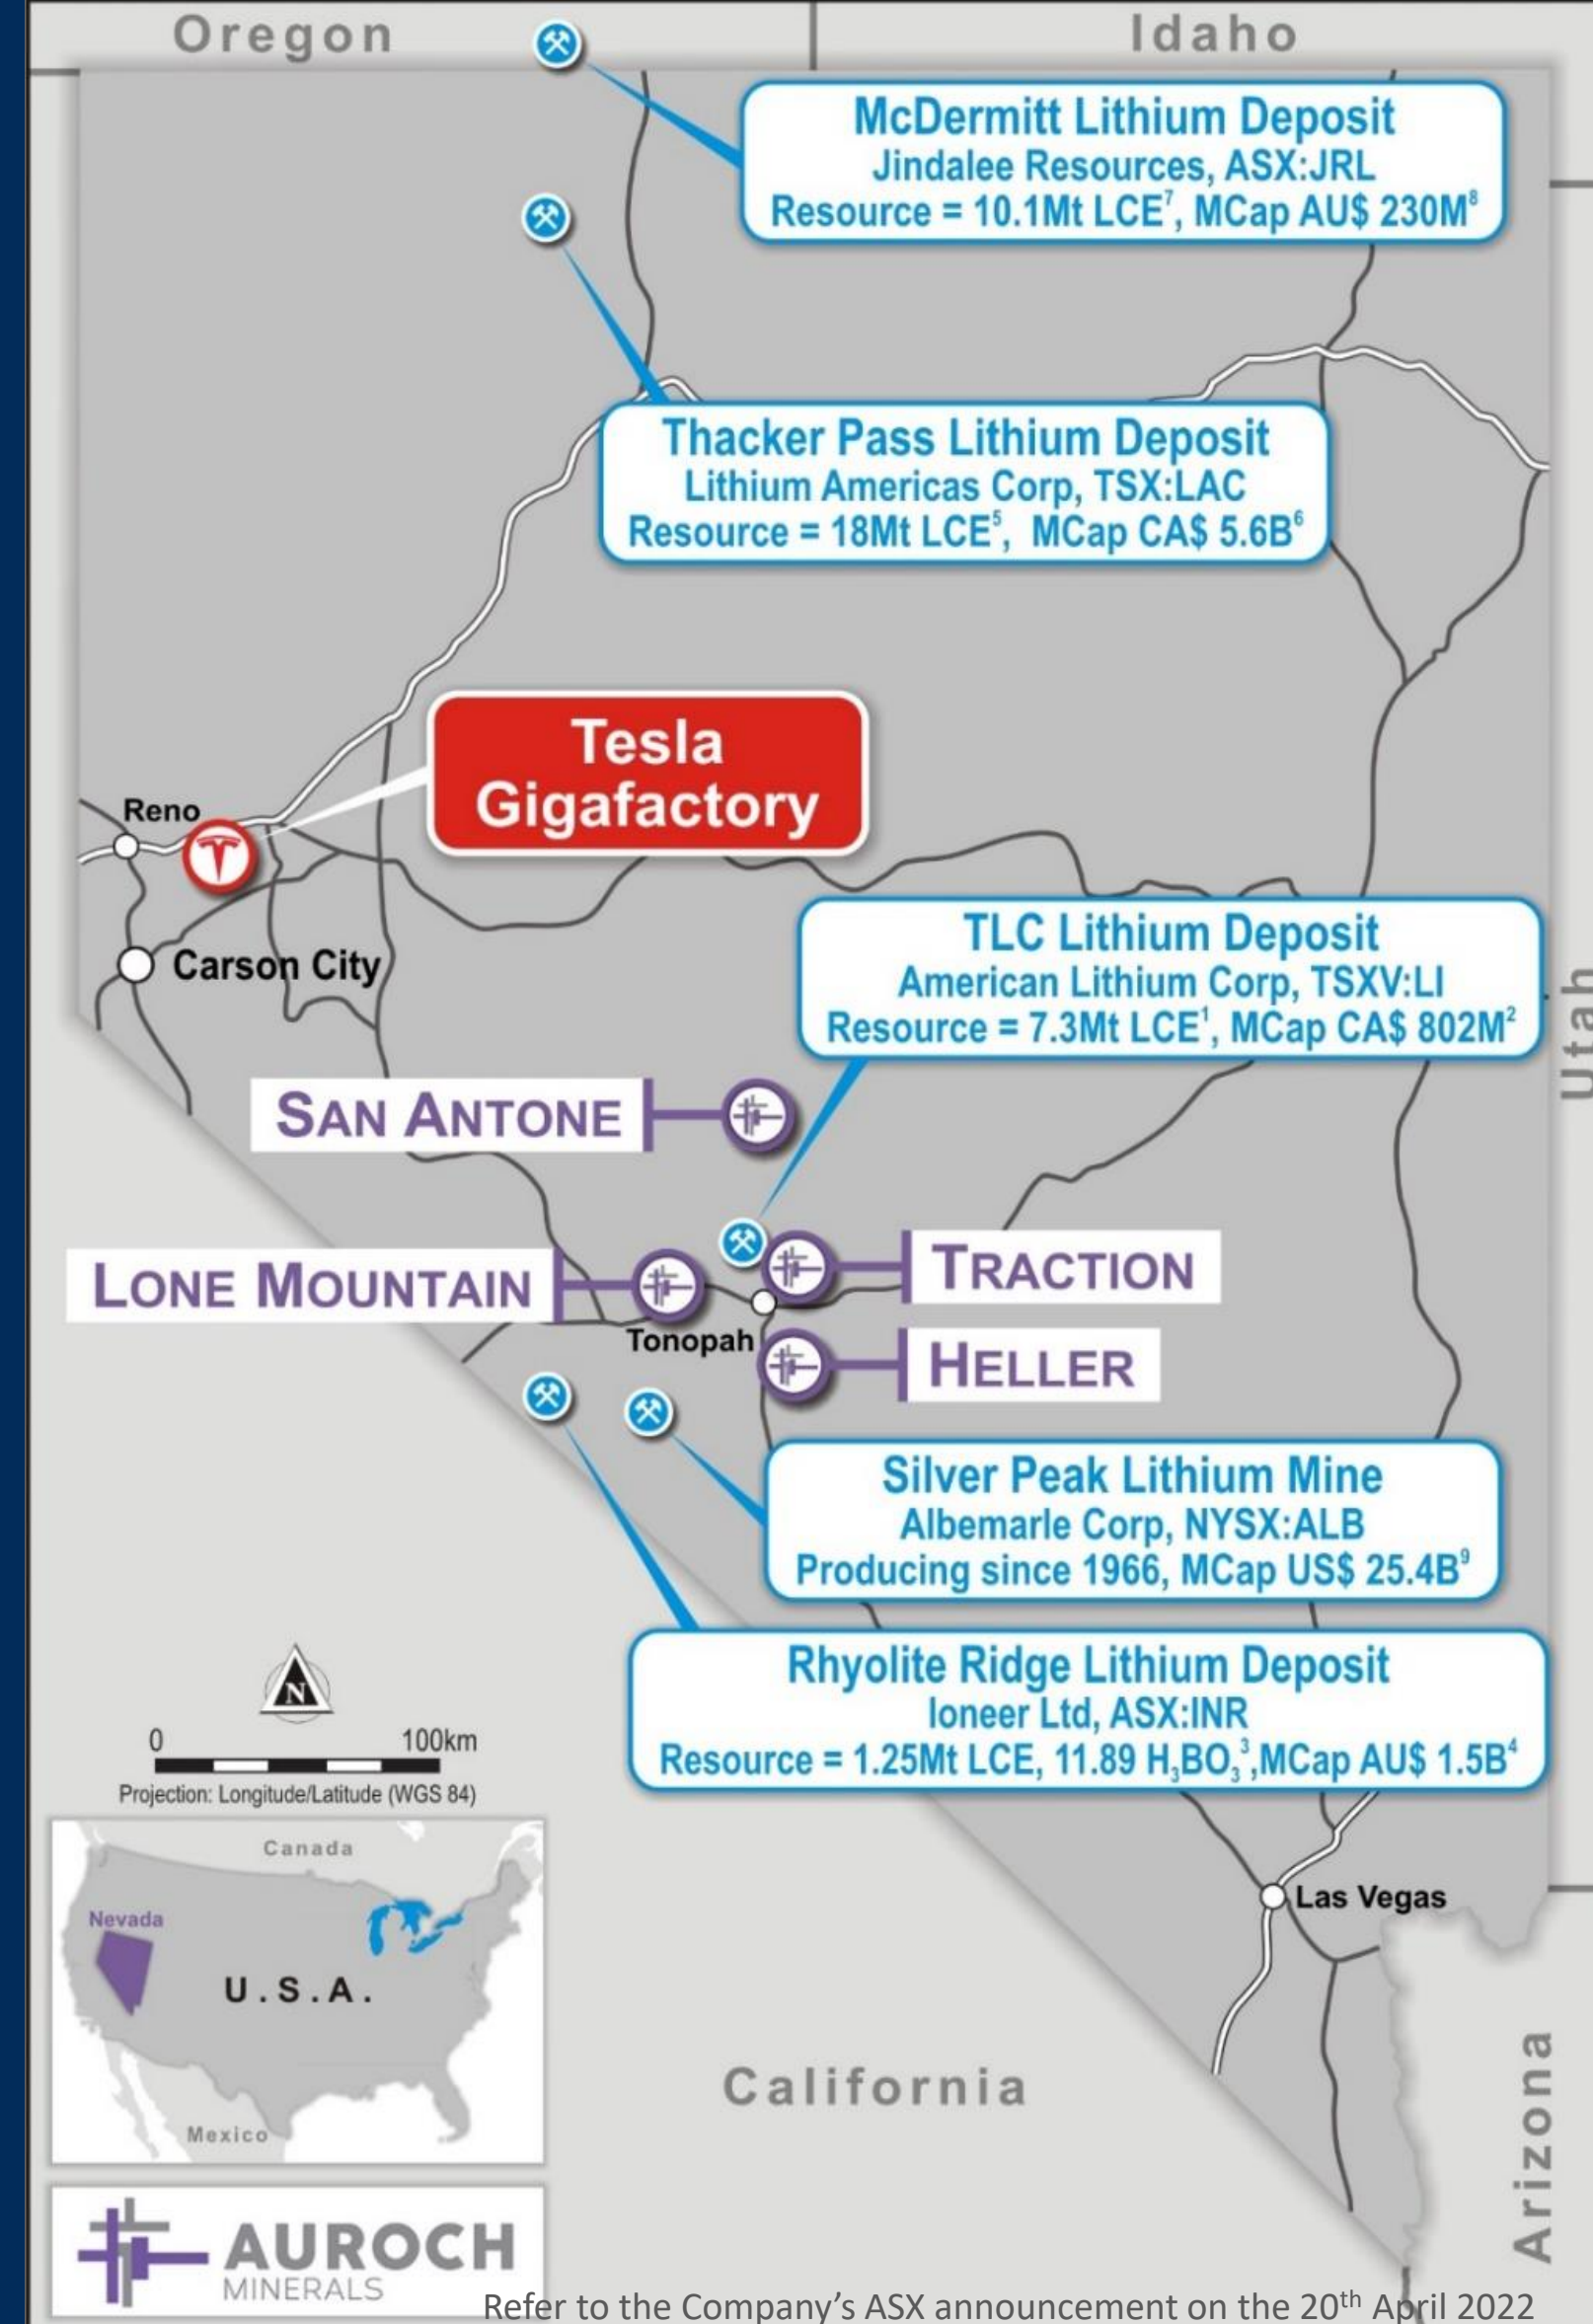

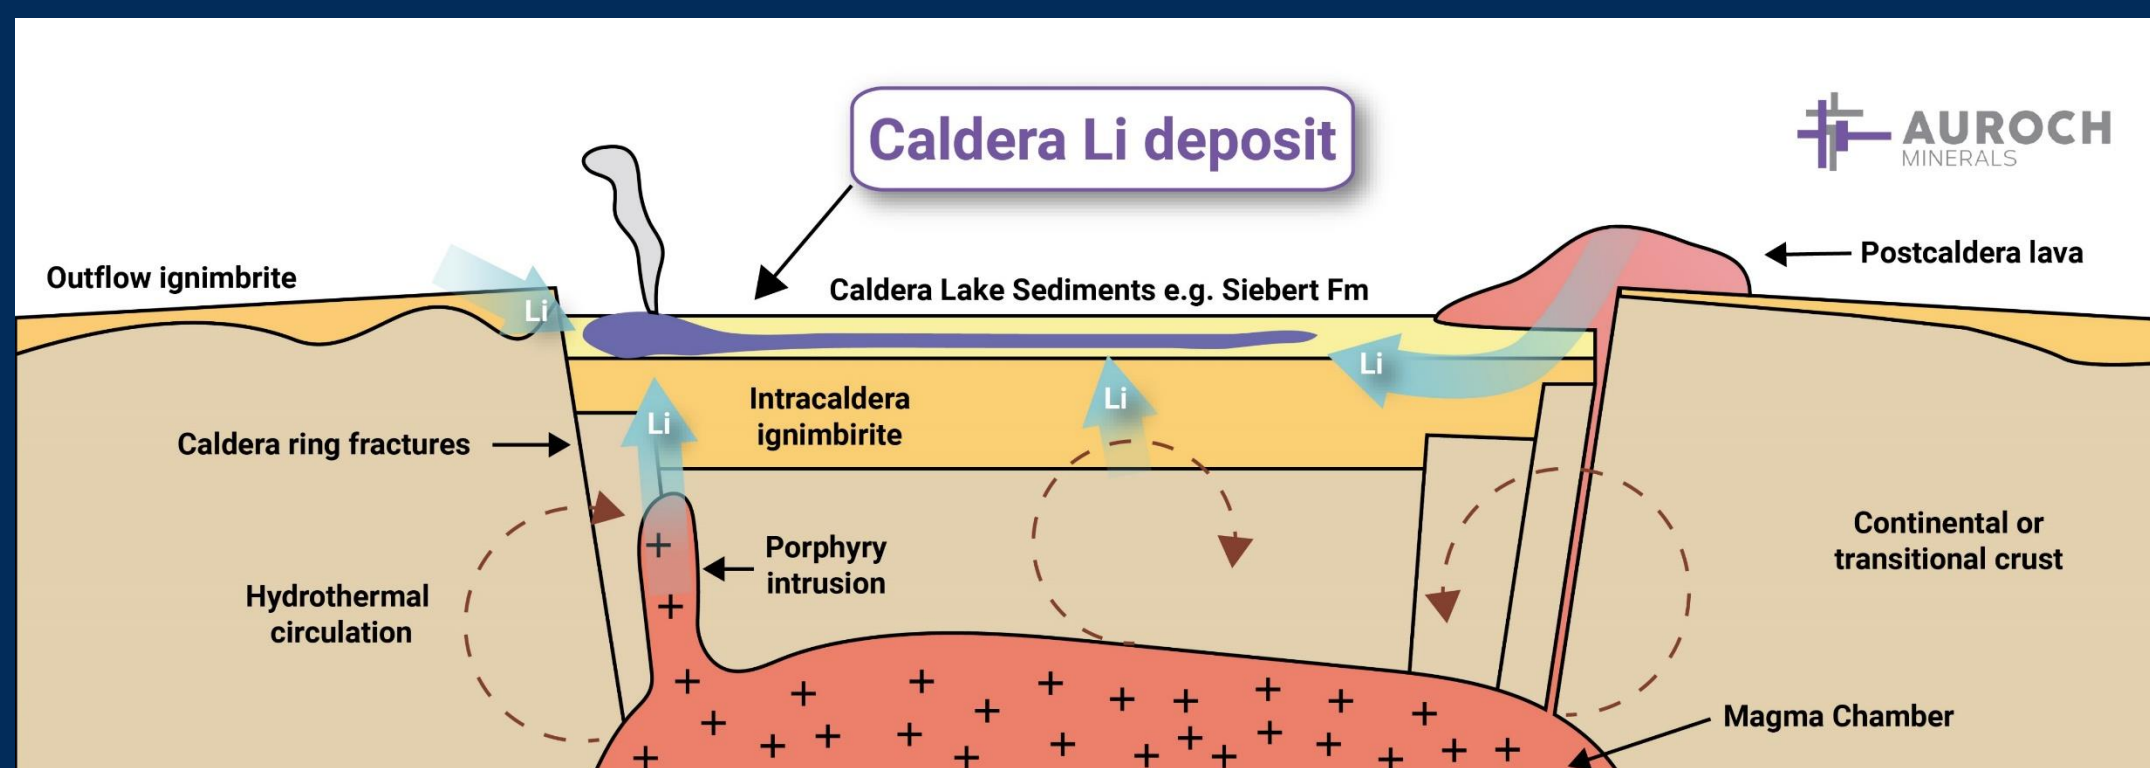

Strategic Acquisition: Battery Minerals Focus

Nevada Lithium Project (80%)

Highly prospective for large sedimentary-hosted lithium deposits

- Strategic acquisition in April 2022 of an 80% interest in the Nevada Lithium Project
- Four prospects comprising an area of 65km² – Traction, San Antone, Heller and Lone Mountain
- Region is home to multiple large sedimentary-hosted lithium deposits, including American Lithium Corp's TLC Deposit
- 340km southeast of the Tesla Gigafactory and close proximity to major California ports

Nevada Lithium Project (80%)

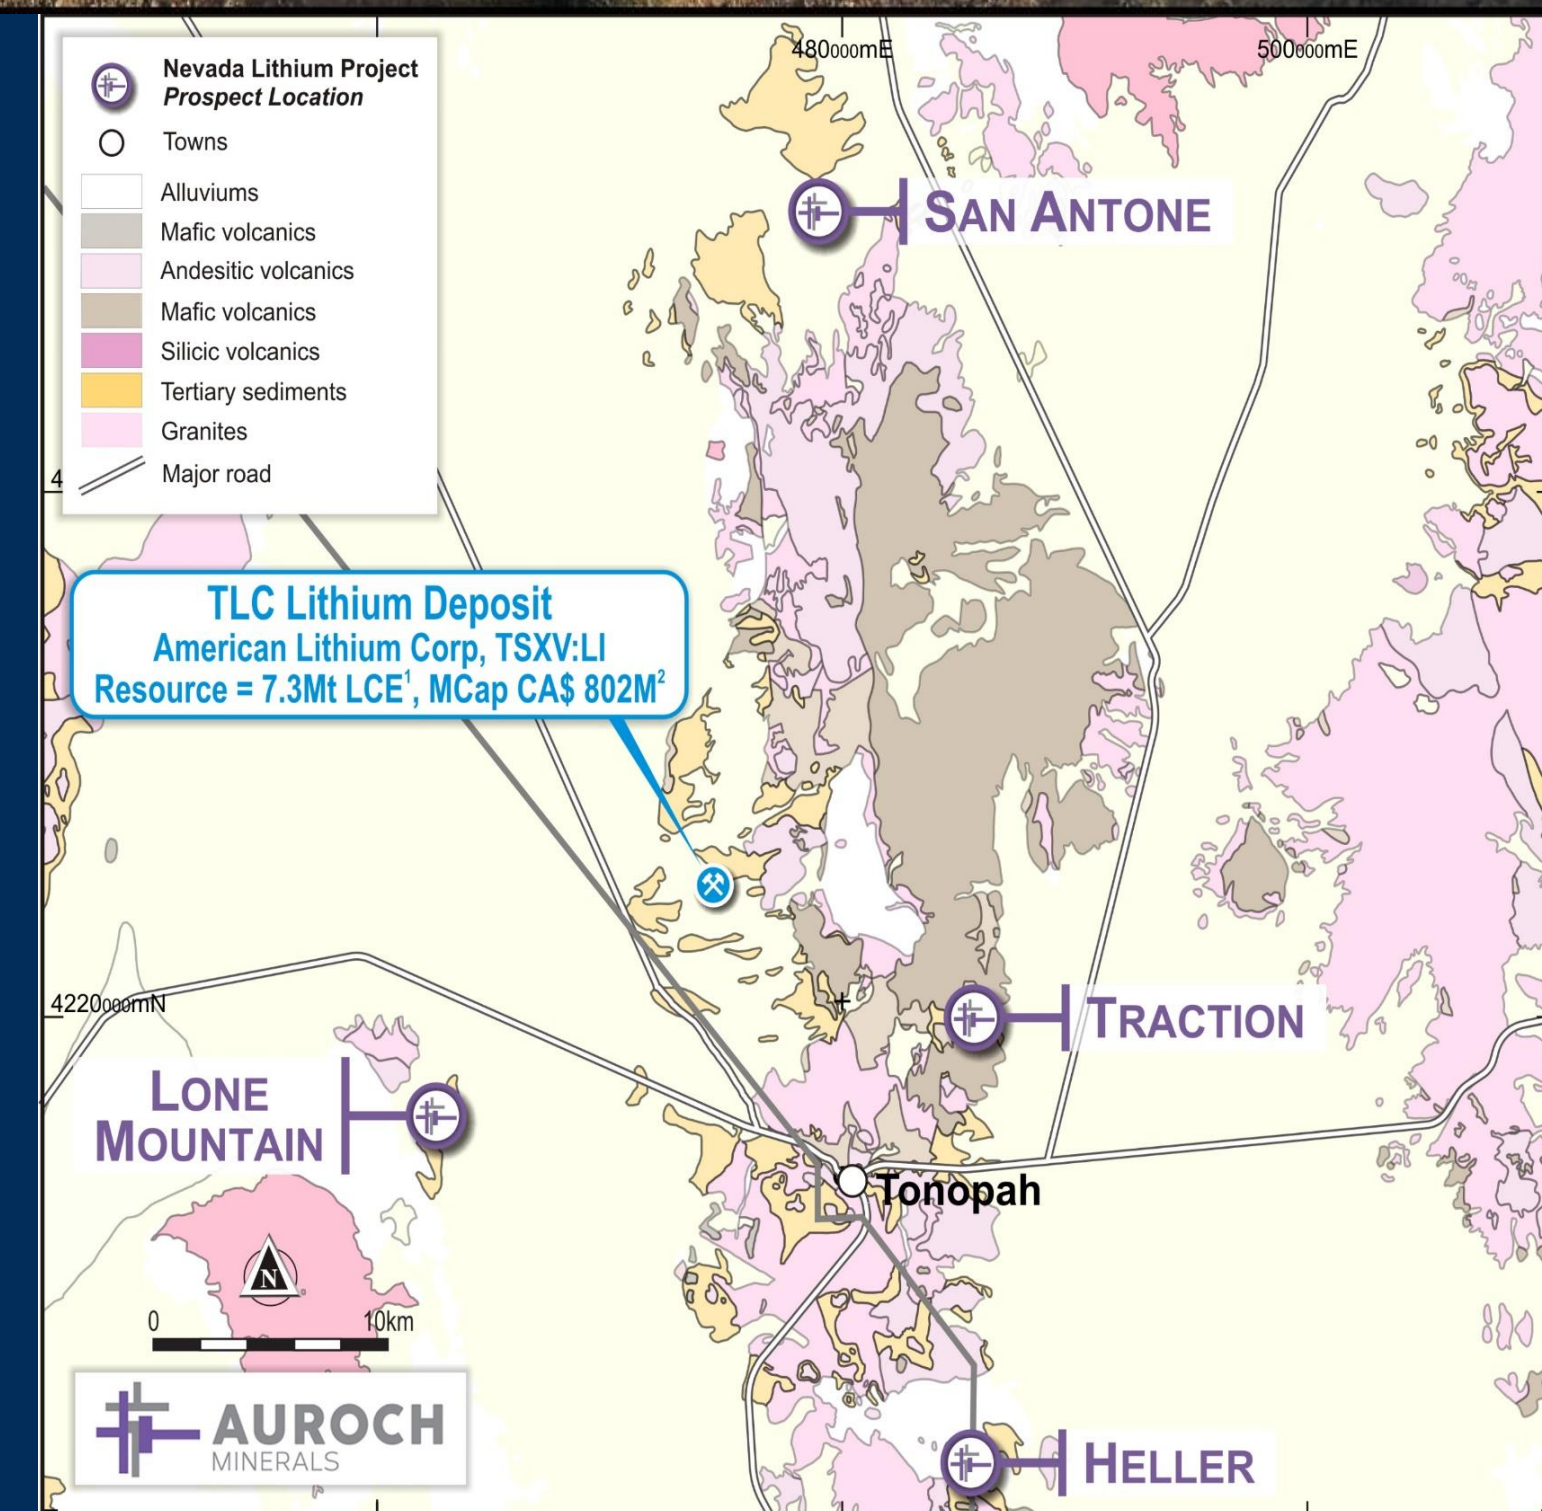

Highly prospective for large sedimentary-hosted lithium deposits

- Project areas cover same Tertiary lacustrine sedimentary formations that are known to host large Li deposits in the region; e.g. TLC Deposit
- First-pass soil samples indicate zones of anomalous Li: assays up to 590ppm Li
- Historic water bores within project area indicate thick packages of the sedimentary formation from surface

Work Programmes

- ✓ Completed initial site visit in July
- ✓ Experienced in-country team established in August
- ✓ Work permits for maiden drill programme have been applied for
- First pass drill campaign scheduled for Q1 2023

Strategically Located Nickel Sulphide Portfolio

Auroch (ASX:AOU) holds some of the most prospective nickel sulphide tenure in the Norseman-Wiluna Greenstone Belt

Scoping studies nearing completion to assess the potential development of existing shallow high grade nickel sulphide resources

Create further value via new nickel sulphide discoveries – exploration and drilling at priority prospects to build resources inventory

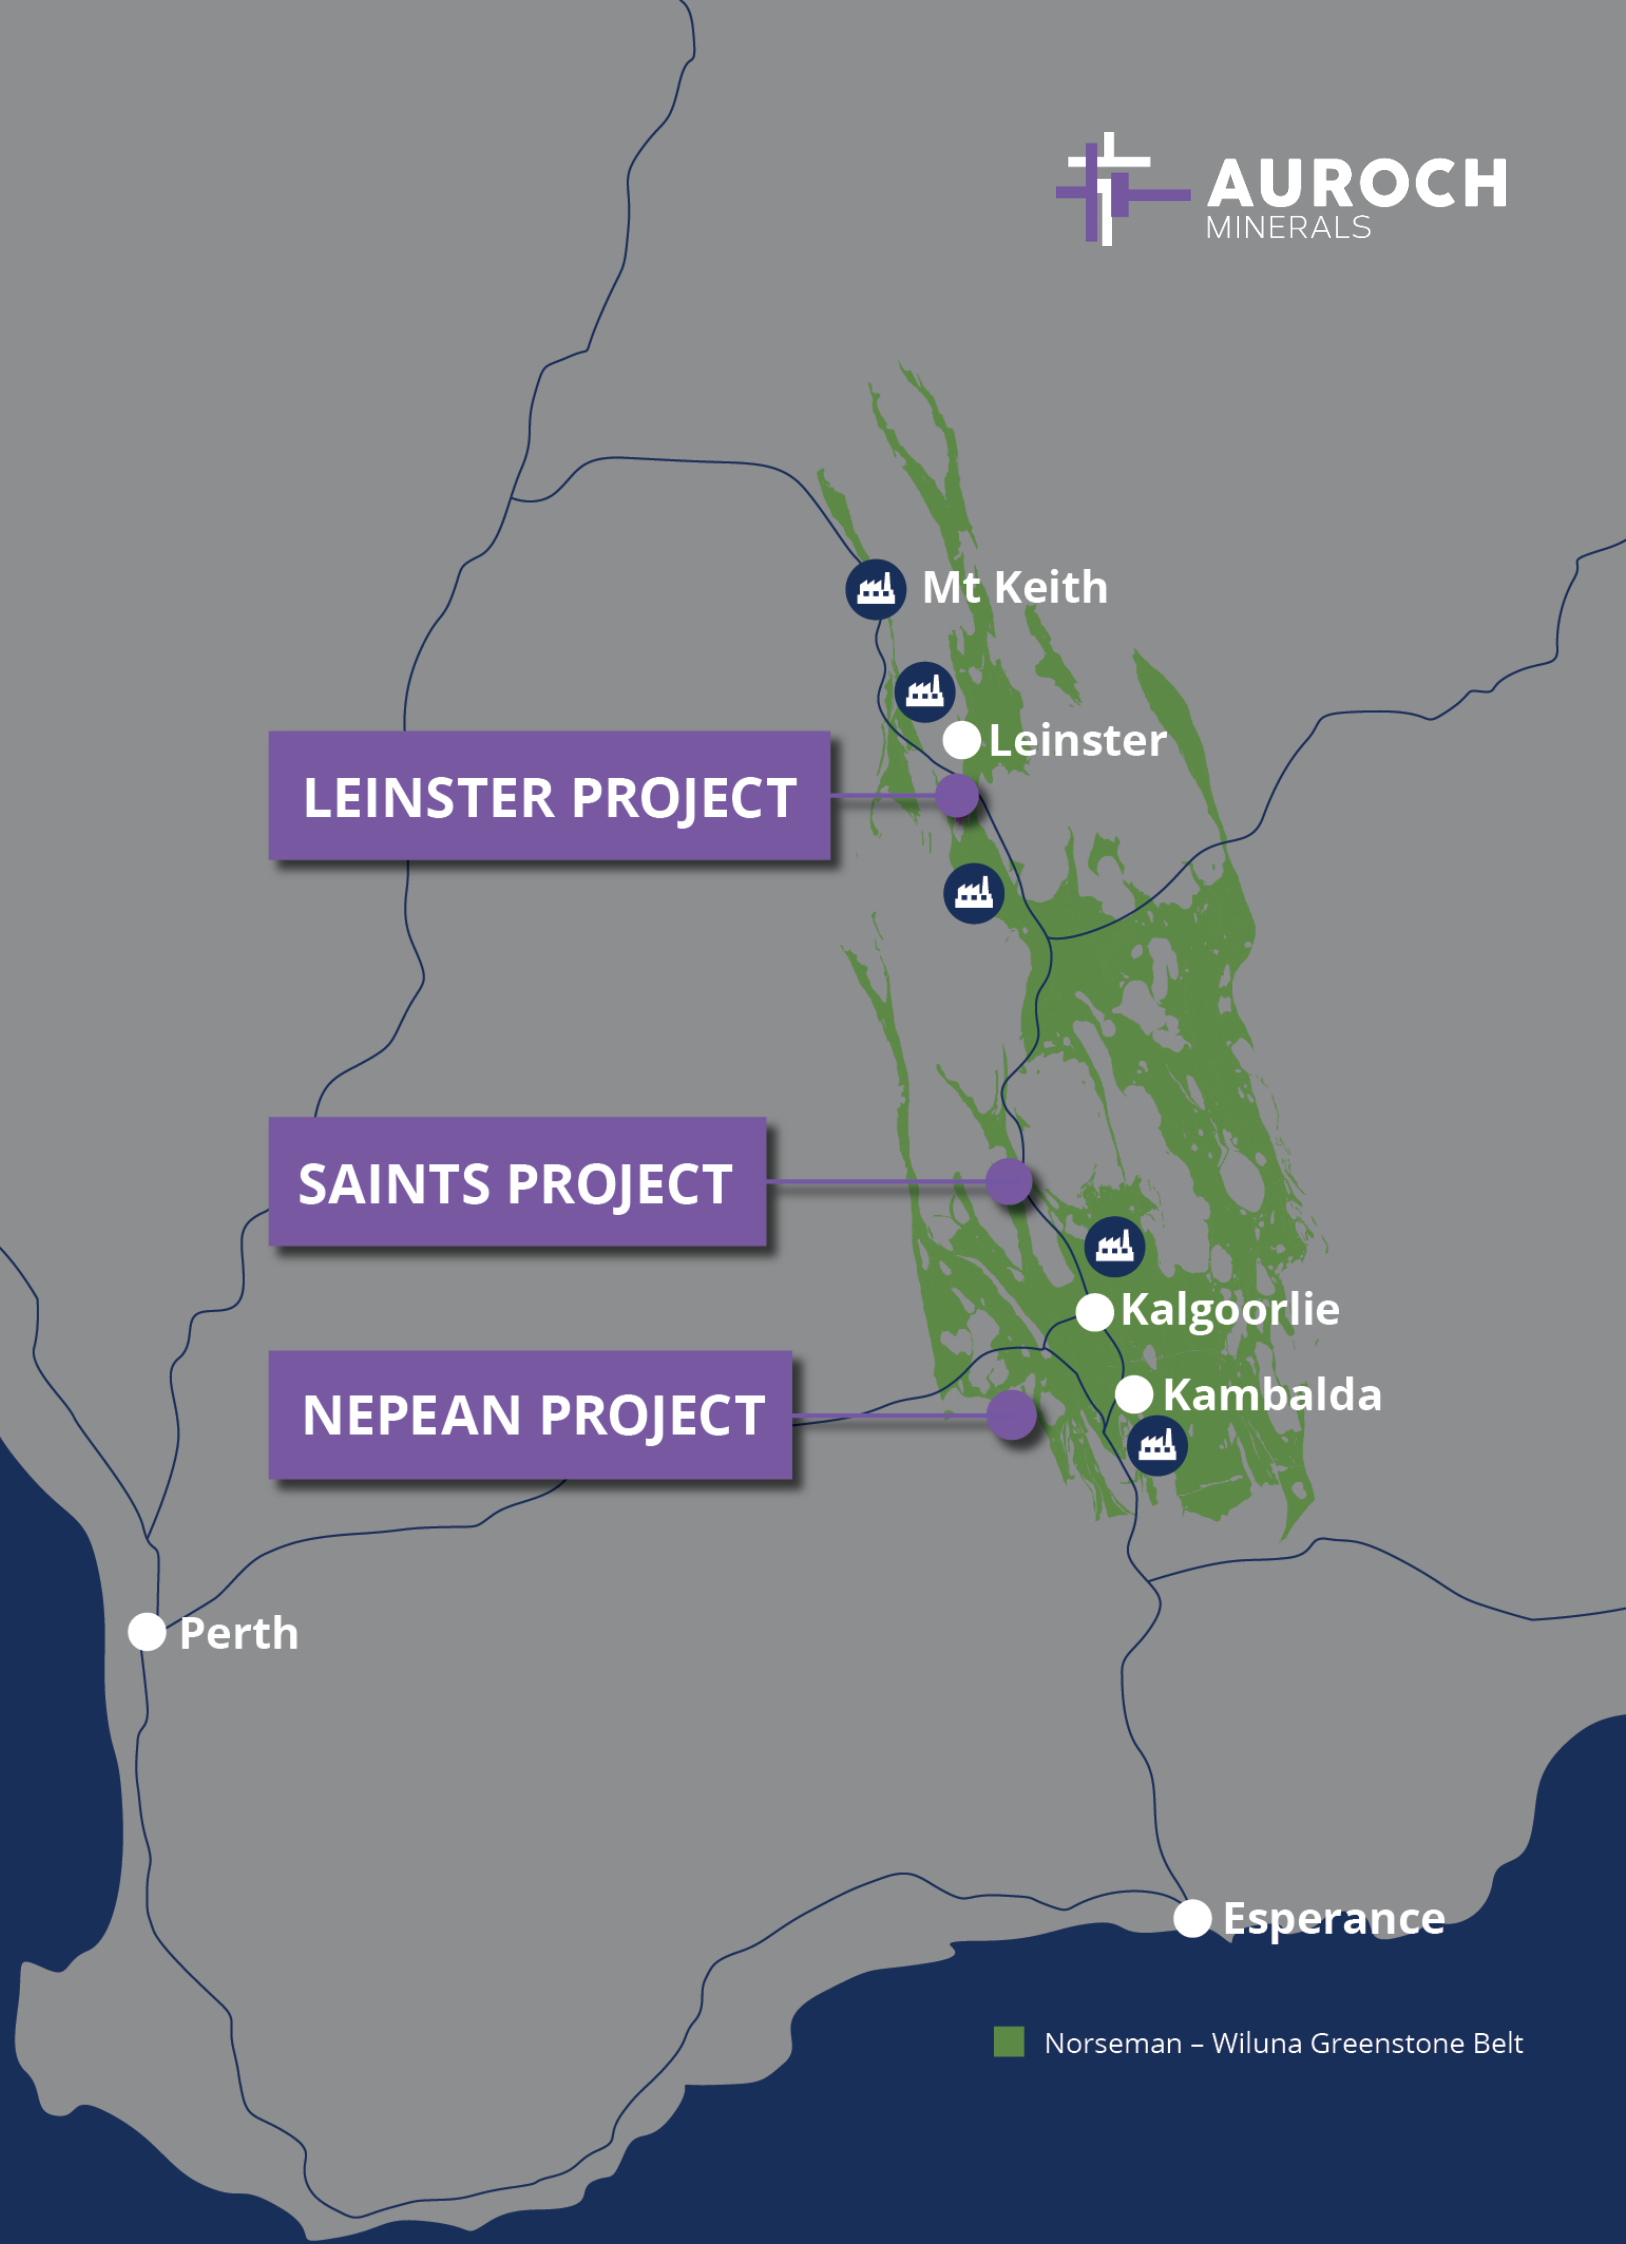

Excellent Infrastructure

- Home to some of the best nickel sulphide deposits globally (e.g. Leinster, Mt Keith, Kambalda, Widgiemooltha)
- **5 processing plants within trucking distance**

Exploration Potential

- Kilometres of underexplored prospective ultramafics
- Lack of modern-day exploration techniques

Saints Nickel Project (100%)

High-grade nickel sulphide resource with exploration potential

High-grade JORC (2012) -compliant Mineral Resource Estimate (MRE) updated in August 2022:

911kt @ 2.3% Ni & 0.2% Cu for 21kt Ni & 1.6kt Cu

- ✓ 15% increase in average nickel grade
- ✓ Upgrade in confidence level: two-thirds of contained Ni metal now in the Indicated Resources category

Type	Indicated Mineral Resource						
	Tonnage kt	Ni %	Cu %	Co %	Ni t	Cu t	Co t
Transitional	1	3.0	0.21	0.09	33	2	1
Fresh	552	2.5	0.19	0.08	13,530	1,055	432
Total	553	2.5	0.19	0.08	13,563	1,058	433

Type	Inferred Mineral Resource						
	Tonnage kt	Ni %	Cu %	Co %	Ni t	Cu t	Co t
Transitional	15	1.9	0.14	0.05	284	21	7
Fresh	343	2.1	0.14	0.06	7,147	492	191
Total	358	2.1	0.14	0.06	7,432	513	198

Type	Total Mineral Resource						
	Tonnage kt	Ni %	Cu %	Co %	Ni t	Cu t	Co t
Transitional	16	2.0	0.15	0.05	317	23	8
Fresh	895	2.3	0.17	0.07	20,677	1,547	623
Total	911	2.3	0.17	0.07	20,995	1,570	631

Saints Nickel Project (100%)

High-grade nickel sulphide resource with exploration potential

Saints Scoping Study based on upgraded high-grade MRE to assess viability of potential development and production from UG nickel mine at Saints

Metallurgical testwork – produced high-grade (>13%Ni) concentrate with desirable Fe:Mg ratios and no deleterious (e.g. As) elements

Saint Patricks and Saints Andrews remain open down-plunge – excellent exploration potential to increase current resource

WORK PROGRAMMES

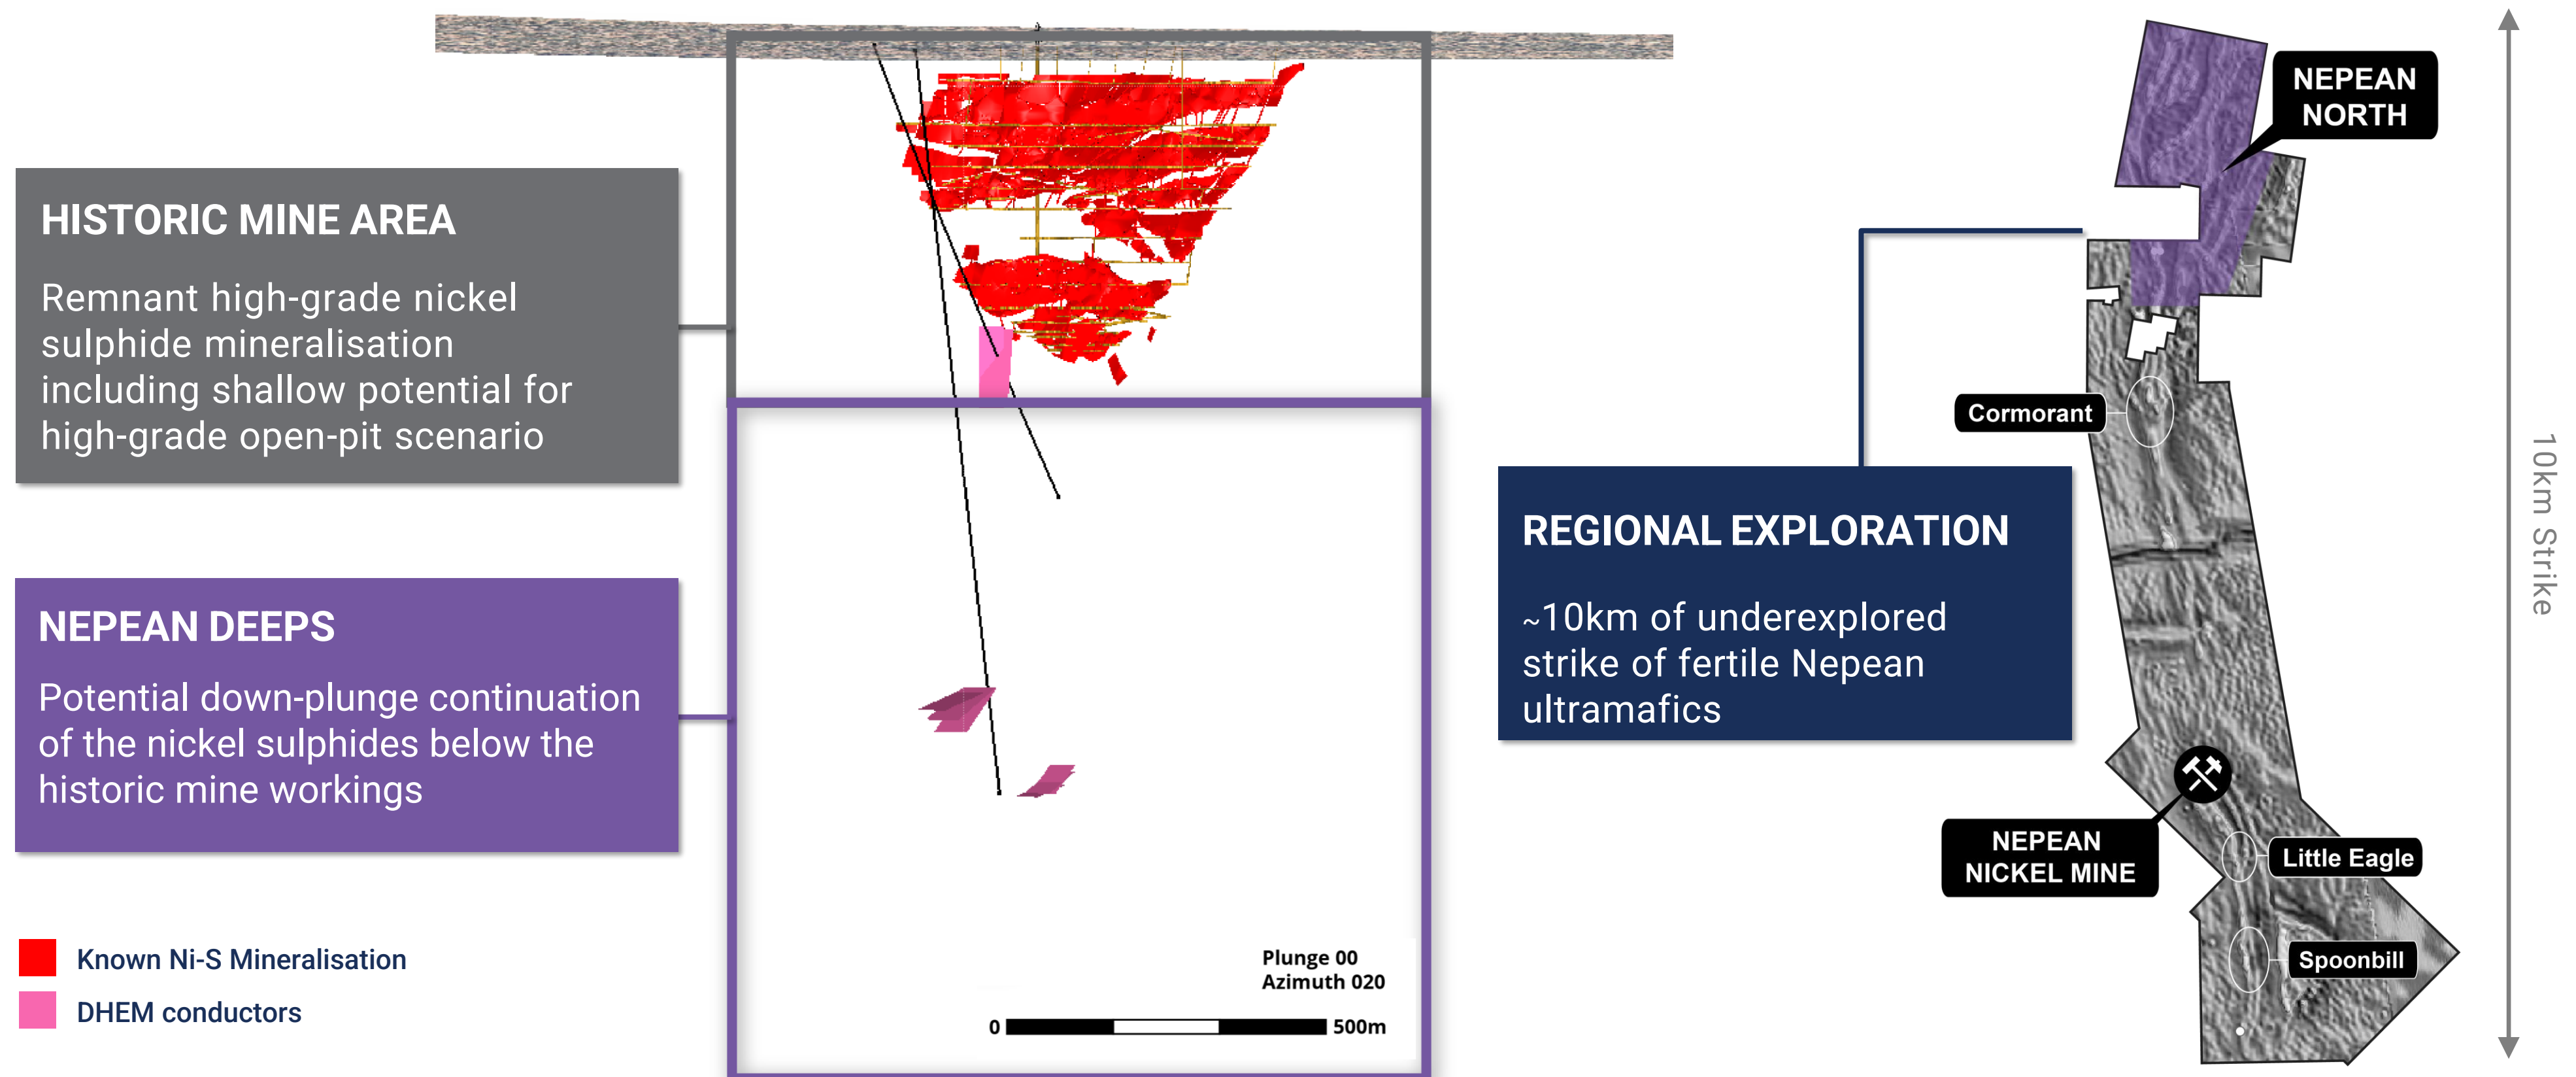

- **Scoping Study nearing completion**– including infill drilling, metallurgical test work, MRE update and baseline environmental studies – **due Q1 2023**
- **Positive Scoping Study to define next work programmes at Saints:**
 - Exploration drilling below existing resource
 - Further testing along strike at the Western Contact
 - Infill drilling in critical areas of the resource

Nepean Nickel Project (80%)

Historic high-grade nickel mine with remnant mineralisation and exploration upside

Real potential to build a significant high-grade nickel sulphide inventory via 3 focus areas:

Historic Mine Area

Remnant high-grade nickel sulphide mineralisation with potential for open-pit and subsequent UG mining scenario

JORC (2012) Mineral Resource Estimate (MRE) FOR SHALLOW MINERALISATION ONLY completed in September 2022:

236kt @ 1.5% Ni & 0.1% Cu for 3,625t Ni & 252t Cu

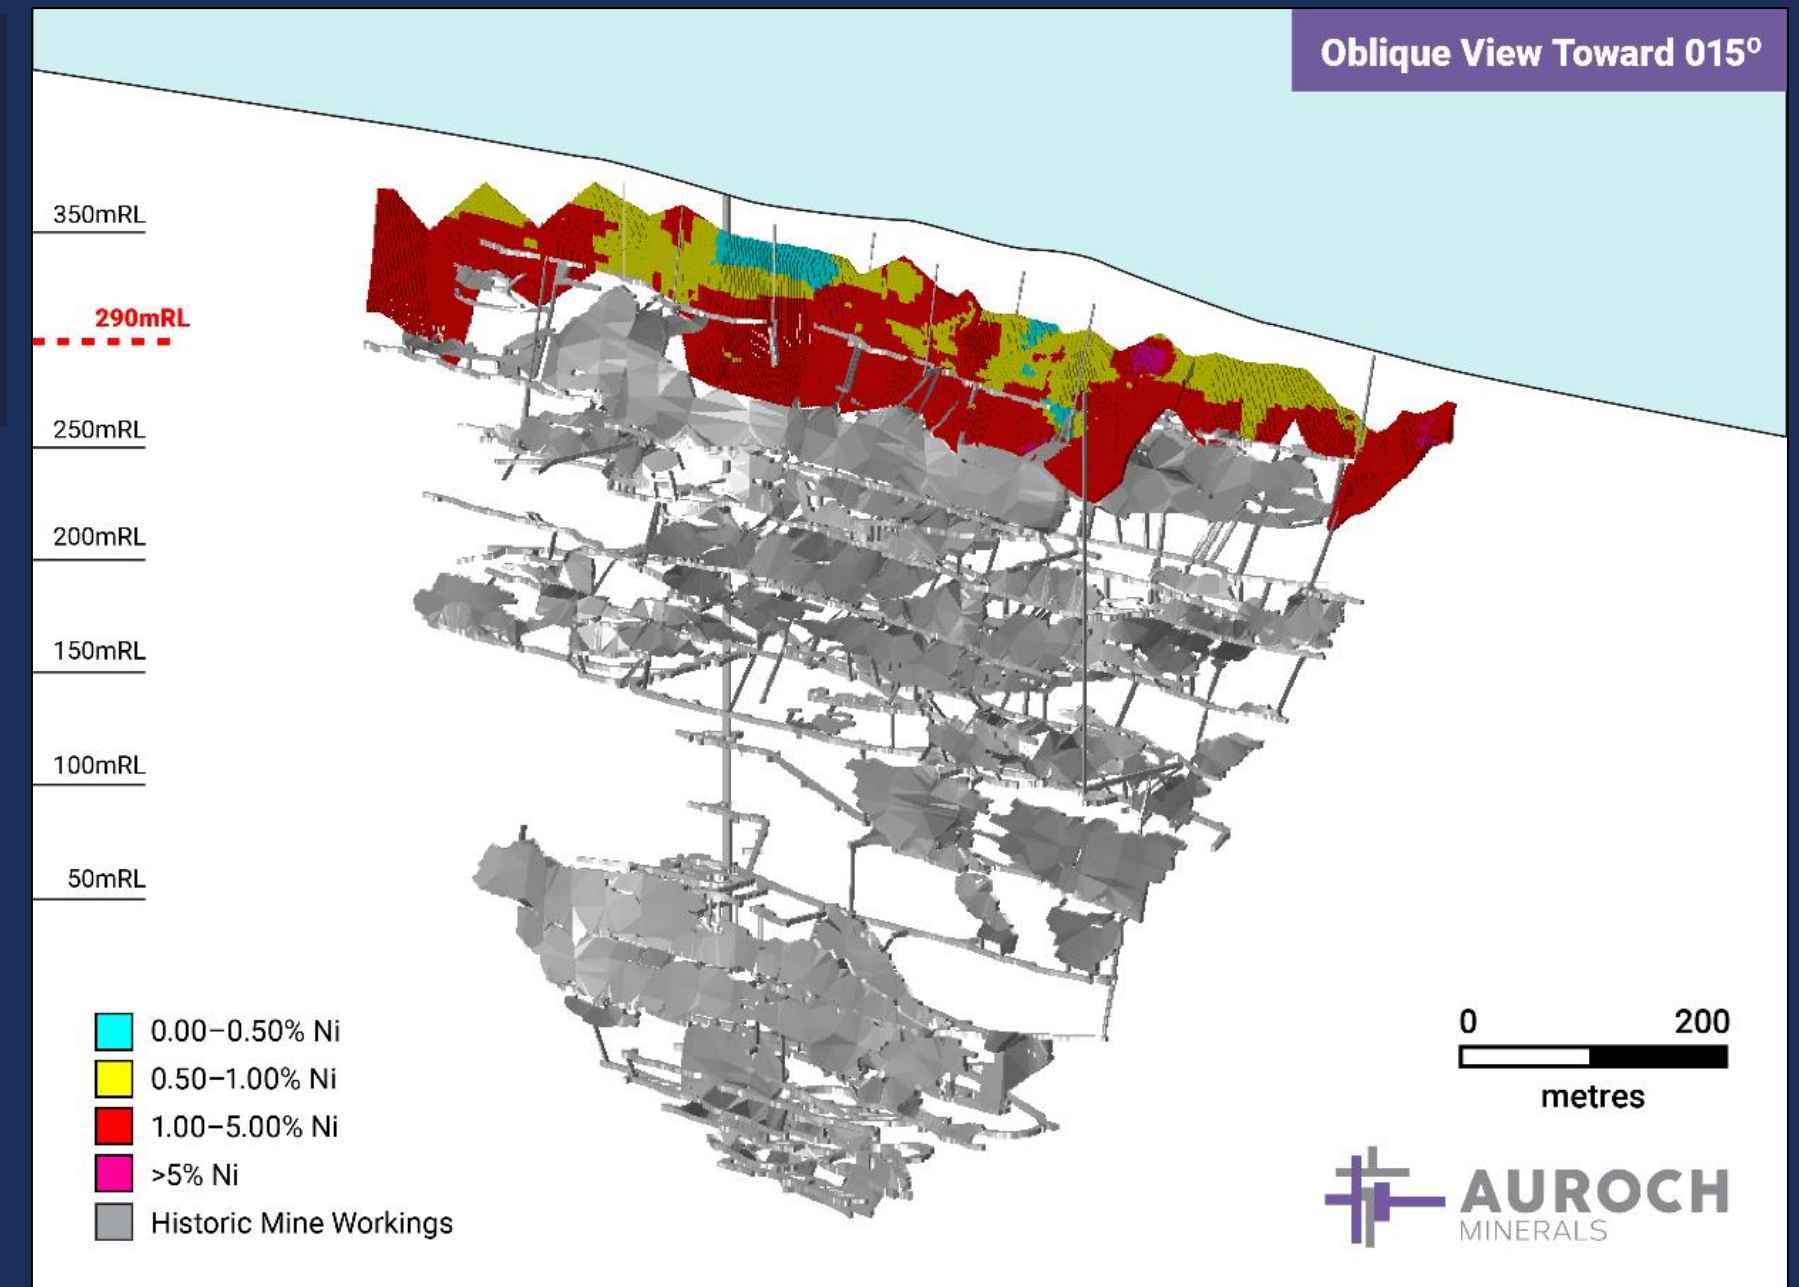

- ✓ High confidence level: approx. half of contained Ni metal in the Indicated Resources category
- ✓ Good Metallurgy: testwork produced saleable concentrate grades (>13%Ni) at good recoveries (85-97%)

WORK PROGRAMMES

- Internal Scoping Study for potential open pit development – **underway**
- Evaluation of remnant high-grade Ni mineralisation at depth

Type	Indicated Mineral Resource						
	Tonnage kt	Ni %	Cu %	Co %	Ni t	Cu t	Co t
Oxide	38	1.3	0.09	0.04	496	34	16

Total	236	1.5	0.11	0.03	3,625	252	82

Leinster Nickel Project (100%)

Known massive nickel sulphide mineralisation with excellent exploration potential

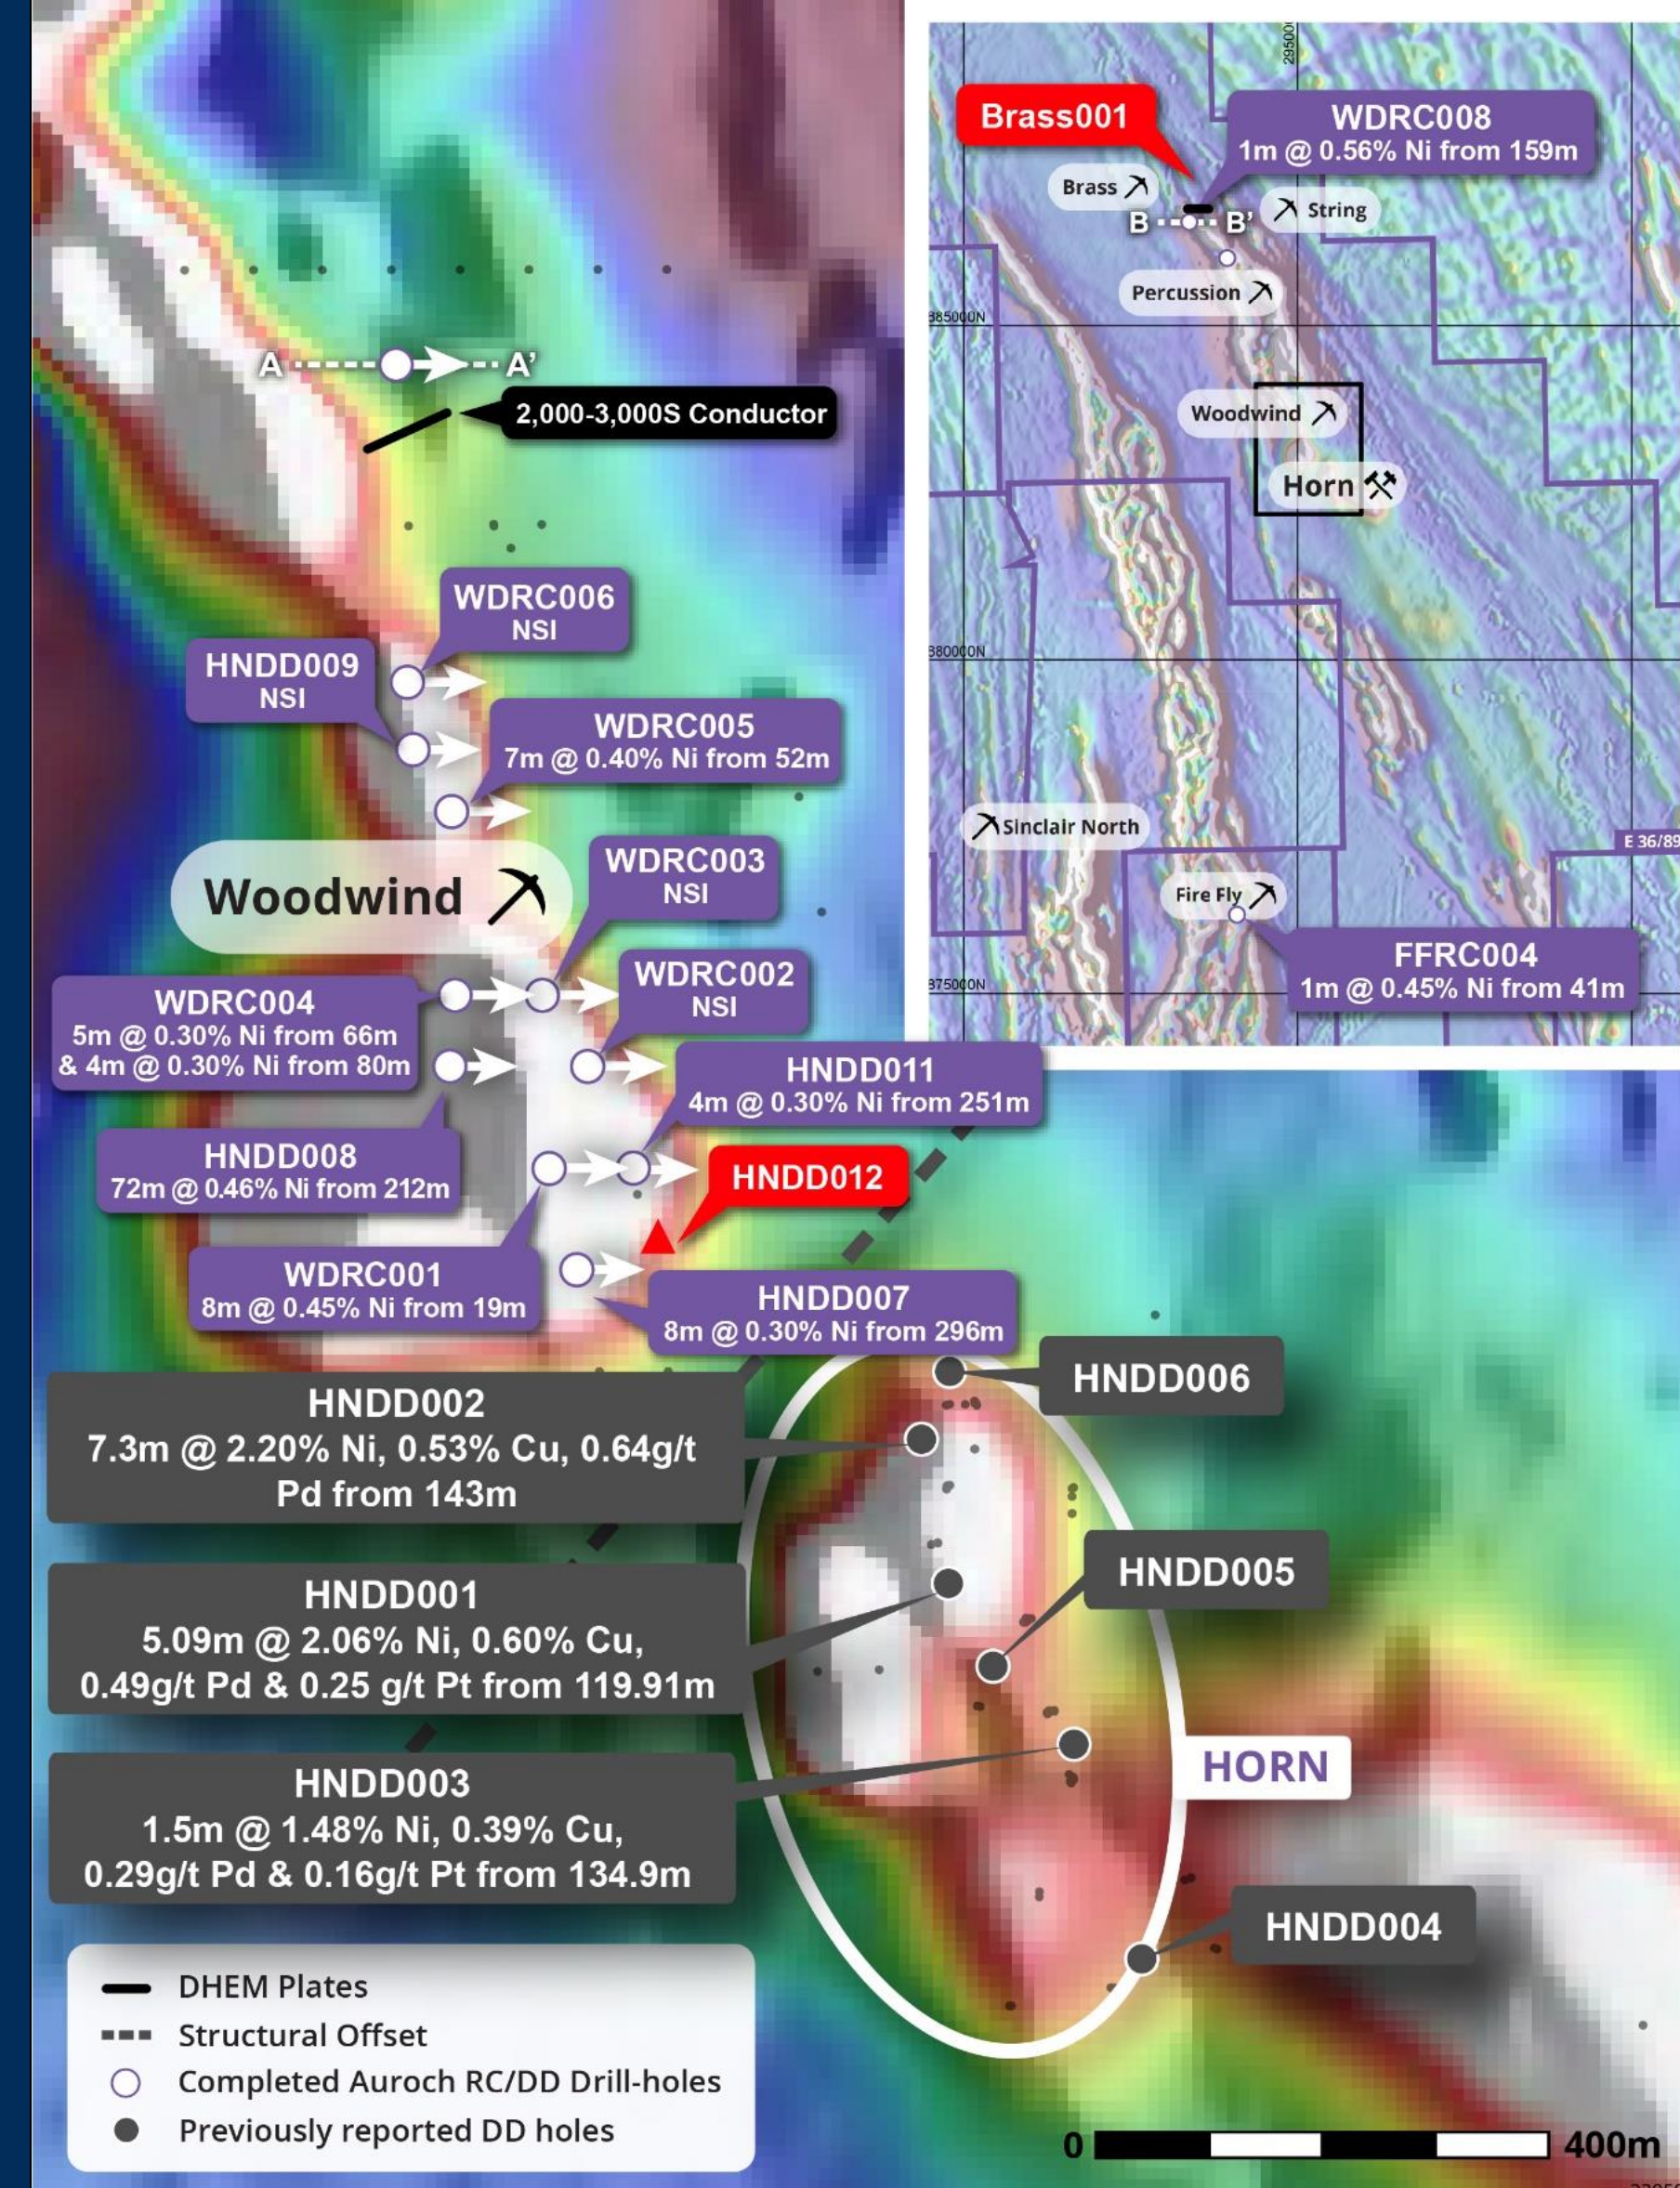

Underexplored fertile ultramafic units in close proximity to known massive Ni-S mineralisation

WORK PROGRAMMES

- ✓ **Historic resource at the Horn: relatively high Cu, Co and PGEs and low Mg associated with the Ni-S mineralisation** – attractive for potential mining scenario
- Modelling of the Woodwind prospect
- Ongoing regional targeting across the fertile ultramafic strike

Massive Ni-Cu sulphides from the Horn

Arden Project (90%) – South Australia

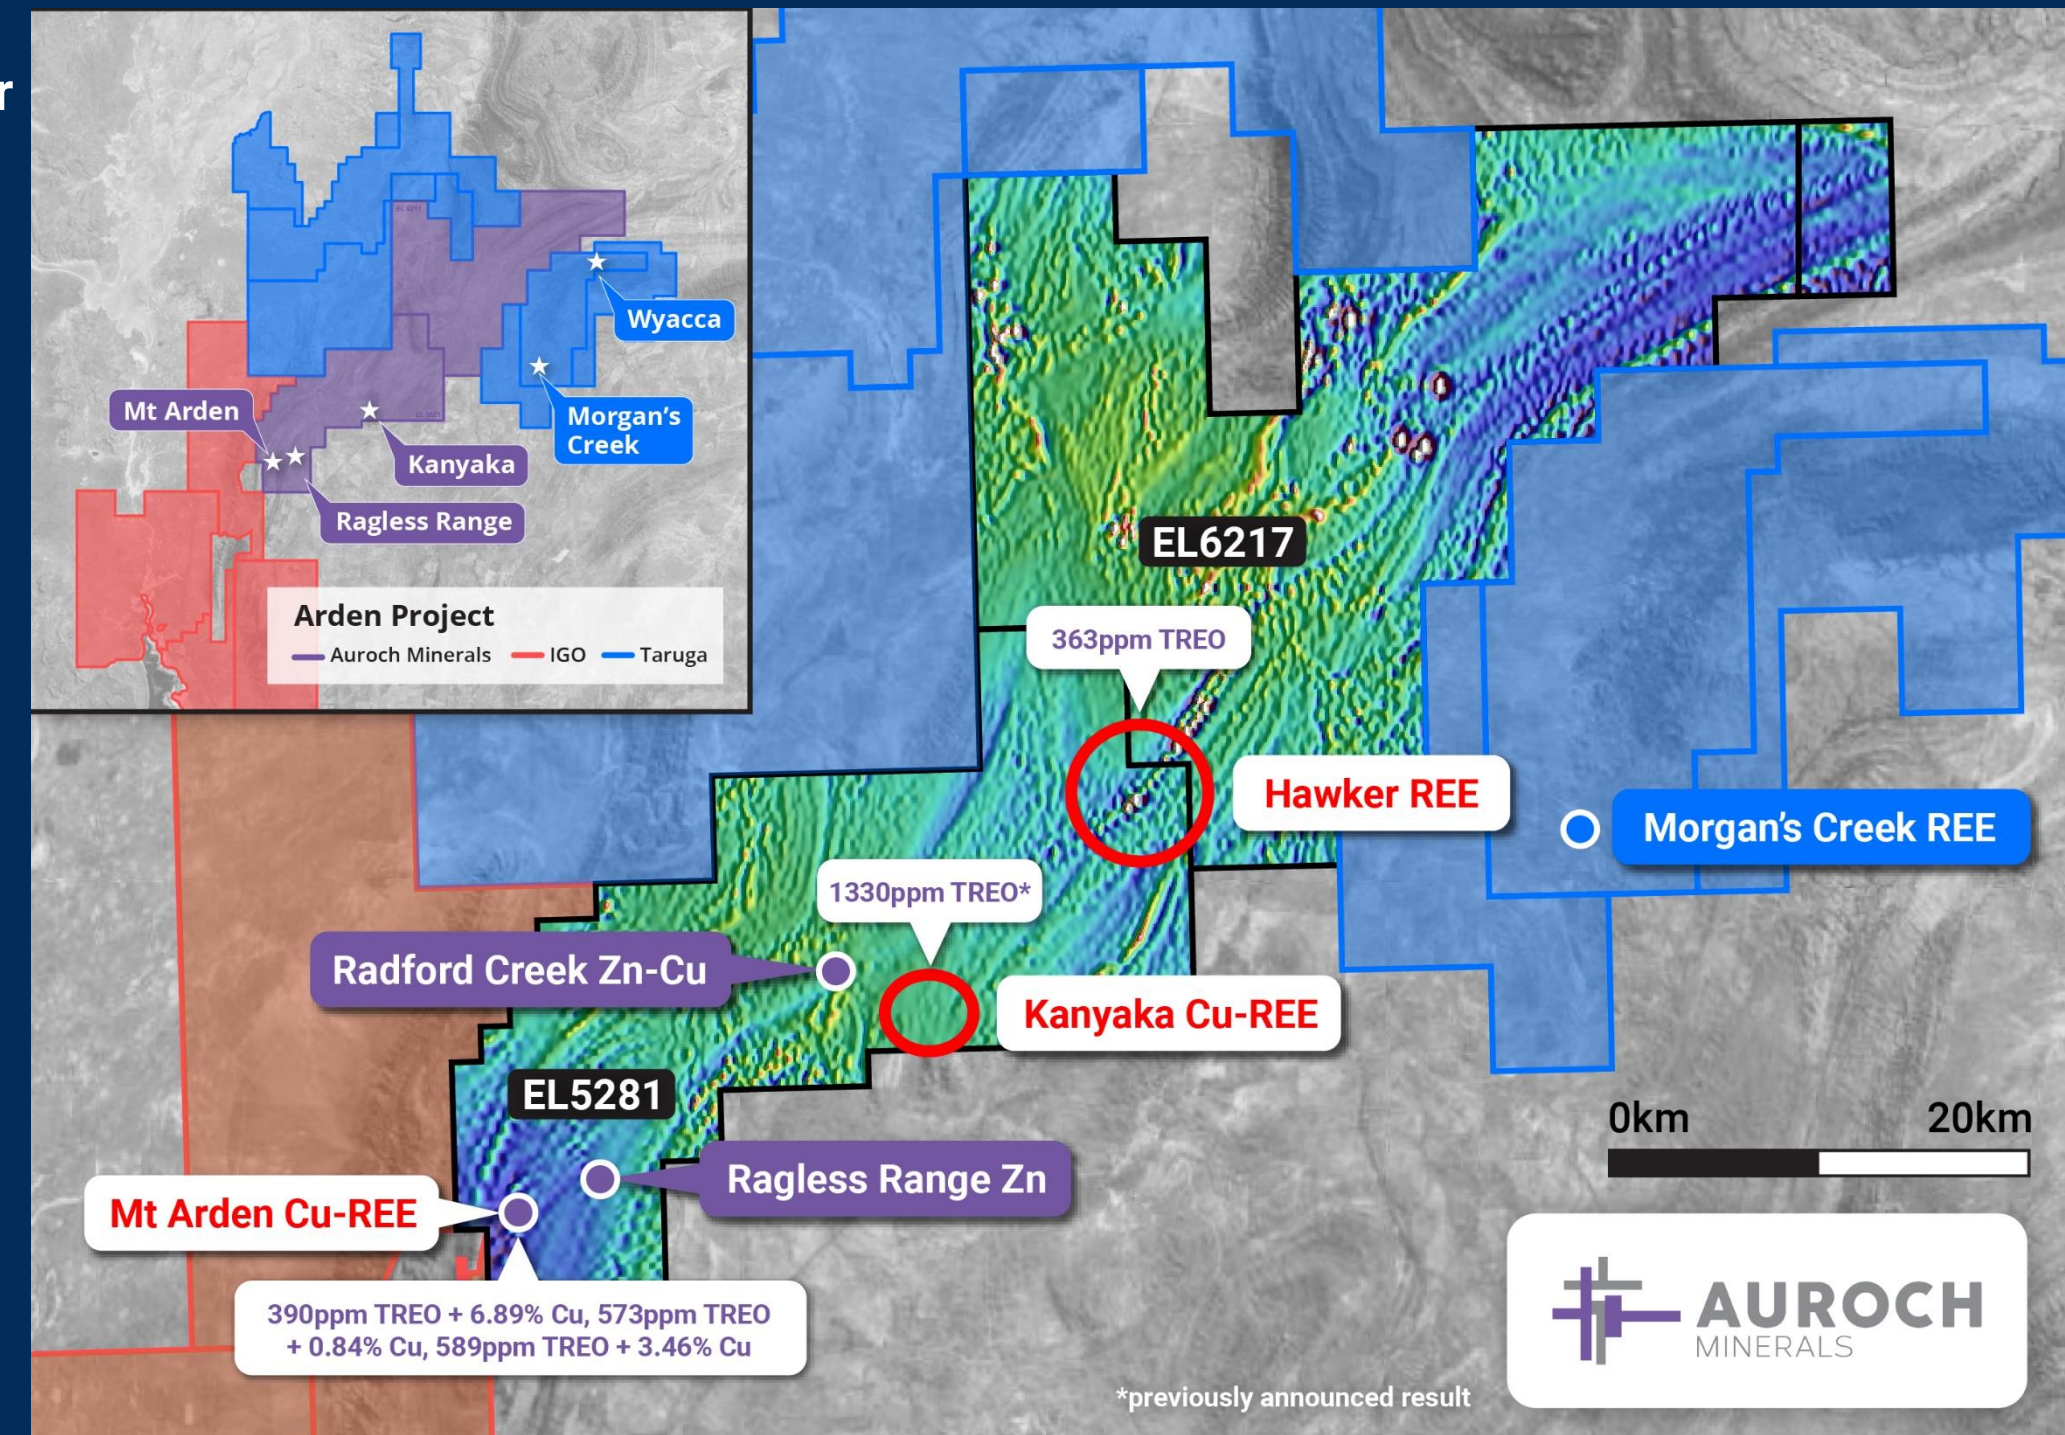

High potential for Cu, REE and Zn mineralisation

- Cu and REE mineralisation discovered on neighbouring tenements in similar geology to our tenements – focus for systematic exploration in 2022:
 - Desktop review of historical geochemical and geophysical data along with field mapping identified priority REE prospects: Hawker, Kanyaka and Mt Arden
 - Historic assays up to 1,330ppm Total Rare Earth Oxides (TREO)
- Ragless Range Zn Target: drilling identified high-grade mineralisation:
 - 12.80m @ 5.0% Zn from 53m,
 - incl 3.65m @ 15.5% Zn from 62.15m (RRDD007)
- Strong gravity anomaly >3.5km long
 - drilling & DHIP produced new anomalies to test with drilling

Work Programmes

- ✓ Desktop review of historic geochemical and geophysical data
- ✓ Field mapping and soil sampling of Hawker and Kanyaka Prospect areas – assays pending
- Work permitting and access approvals underway
- Maiden AC drill programme to test for significant REE mineralisation – Q1 2023

Critical Minerals in Clean Energy Transition

The energy sector becomes a leading consumer of minerals as energy transitions accelerate

Li

Lithium

To keep up with increasing demand for lithium, its anticipated that an additional 200,000-300,000 tonnes of new lithium supply to come online every year.

<https://www.fastmarkets.com/insights/lithium-supply-battery-raw-materials-2022-what-we-learned#:~:text=Fastmarkets%20research%20currently%20forecasts%20that,of%2089%2C000%20tonnes%20in%202023.>

REE

Rear Earth Elements

Market growth for Rare Earth Elements will accelerate at a CAGR of 9.1% during 2021-2030. Primarily due to increasing usage in consumer electronics.

<https://www.psmarketresearch.com/market-analysis/rare-earth-metals-market>

Ni

Nickel

The combination of limited supply and exponential demand growth from battery manufactures has caused nickel to be listed on the critical minerals list.

<https://www.fastmarkets.com/article/3992672/th-e-many-forces-driving-nickel-price-volatility>

Cu

Copper

Used extensively in in the green energy industry, copper is expected to remain in **deficit until 2026** due to a lack of new large-scale discoveries worldwide.

S&P Global Commodity Quarterly: Copper Q4 2021

Corporate Overview

Experienced Board and Management team to execute Auroch’s corporate strategy

Aidan Platel Managing Director & CEO¹

Mr Platel is a geologist with over 20 years’ experience in the minerals industry including 12 years in South America in mining and exploration. He has a proven track record of exploration success having discovered and developed several major deposits including the world-class Santa Rita Nickel deposit (>1Mt contained Ni metal).

Trevor Eton Non-Executive Director

Mr Eton is a well-respected finance executive with over 35 years’ extensive experience in corporate finance within the minerals industry. His previous full-time role was as CFO and company secretary of sulphide nickel producer, Panoramic Resources Limited (ASX:PAN) from 2003 to 2020. Mr Eton also held corporate finance roles with MPI and ACM.

Mike Edwards Executive Chairman

A geologist and economist with over 20 years’ experience in senior management in both the private and public sector. Mr Edwards spent three years with Barclays Australia in their Corporate Finance department and then eight years as an exploration and mine geologist with companies including Gold Mines of Australia, Eagle Mining and International Mineral Resources.

Robin Cox Exploration Manager

Mr Cox is an exploration geologist with over 12 years’ experience in the management of green and brown fields exploration. He has held project and senior positions in a number of ASX listed companies. His passion for mineral exploration has resulted in multi commodity experience including nickel, lithium, gold and uranium in various mineralisation styles and models.

Why Invest?

Exciting new LCT pegmatite discovery with high grade Li results. Aggressive Q1 2023 Lithium exploration programmes planned to run in parallel at Nepean and Nevada

Leveraged to future green nickel demand from friendly stable jurisdictions - High-grade nickel sulphide resources with potential to drive to near-term development and production

High potential exploration targets to create value through new discoveries across a range of future minerals: Li, Ni, REEs, Cu & Zn

Experienced in-country technical teams driving systematic exploration programmes
