EXPLORATION AND DEVELOPMENT ACTIVITIES

Austria

WOLFSBERG LITHIUM PROJECT

Drilling

No additional drilling took place during Q4/2022.

In an effort to increase the Wolfsberg Project's resource base, in Q4/2022 the Company completed planning for the Zone 2 exploration drilling program. An application for approval of the program was lodged at the mining authority.

Definitive Feasibility Study (DFS)

During the quarter, the Company continued to work with their DFS team based in Europe, South Africa, and Canada to progress all aspects of the DFS. In Q4/2022 the DFS team completed the technical and financial planning work for the Wolfsberg Project including the underground mine, infrastructure, ore concentrator facilities located underground and on surface, as well as the chemical conversion plant to produce battery grade lithium products.

EUR continues to closely monitor new identified and validated risks for European markets, including increasing inflation rates, unexpected high prices for consumables, especially for energy (gas and electricity) and chemical reagents, and the supply chain for these critical materials. These risks could culminate in national and international shortages for the executable project layout within Europe and are being reviewed and assessed to be integrated into the final DFS. The Company anticipates the completion and reporting of the DFS by end of Q1, 2023.

During the quarter, the Company's independent metallurgic consultants, Dorfner, commenced work on optimizing the concentrator flow to increase the spodumene concentrate levels with the aim to reduce energy consumption for all further processing.

Hydrogeology

The Company continued its hydrogeology monitoring program during Q4/2022, collecting the data and interpretations for integration into the DFS.

All hydrogeological data continues to be stored and secured within the Company's database.

The preparation work by SRK, and the geological consultant, GEO Unterweissacher GmbH (**GEO Unterweissacher**), continues to ensure in-hole hydrogeological test work has been completed appropriately and can continue in the future.

Data from the above activities is fed into a water measuring database from which an annual report is produced.

Environmental

During Q4/2022, the Company continued work with Hasslinger & Nagele in Vienna (**Hasslinger**) on the application process which is to be lodged with the relevant authorities once the DFS is completed. Hasslinger's engagement includes facilitation of numerous discussions with municipal, state and federal authorities to introduce the project rollout and the integration of the DFS findings into the environmental approvals process.

Monitoring of water flows and quality from the mine is continuing.

Product Marketing

The strategy for the Company remains unchanged and focuses on the supply of lithium hydroxide to the nascent lithium battery plants of Europe. During the quarter, the Company signed the LTA with European auto manufacturer BMW AG (**BMW**) to secure EUR's first long term offtake of battery grade lithium hydroxide. EUR and BMW are now engaged in a long term partnership.

Horizon 2020

In Q4/2022, the Company's 100% owned subsidiary, ECM Lithium AT GmbH (**ECM**), continued work on the infield and underground geophysical survey program for which reporting is required in respect to ECM's participation in the European Union funded Horizon 2020 - GREENPEG project.

The Company continued to work proactively in the already approved and funded Horizon 2020 LithRef program.

Continued participation shows the Company's abilities and eligibility to contribute with EU-level support to the sustainable supply of battery grade lithium, sourced and produced in Europe.

COVID-19

During the quarter, Europe experienced fluctuating infection rates. European restrictions may continue to impact the Company's operational activities at its Wolfsberg Project. The Company continues to monitor and address the changing circumstances with suitable COVID-19 measures implemented.

Other Business

The Company continues to develop technical solution to incorporate recycled lithium-ion battery materials into the flowsheets for final lithium carbonate and LiOH production. Pursuant to a letter of intent, this project is technically supervised by a research group from the University of Graz.

The Company continues to assess its options to assess the Wolfsberg Project eligibility to achieve Carbon Neutrality.

EV Resources

The Company previously announced that it had entered into a Collaboration Agreement with EV Resources Limited (formerly Jadar Resources Limited) (ASX: EVR) (**EVR**) and an agreement to acquire a 20% interest in EVR's Austrian Lithium assets from their JV partner (**EVR Acquisition**) (refer ASX announcement 11 May 2021).

For personal use only

EVR holds an 80% interest in Subsidiary EV Resources GmbH (previously Jadar Lithium GmbH), the holder of the Weinebene and Eastern Alps Projects which lies 20km to the east of the Company's Wolfsberg Project (refer figure 1).

The Technical Advisory Committee established pursuant to the EVR Acquisition, continues to identify the best options to advance the assets and operations.

Australia

E47/4144

E47/4144 is progressing through the WA Mining Act regulatory application process. The Company is continuing discussions with a stakeholder and remaining objector to negotiate access with respect to areas of existing or intended infrastructure.

Ukraine

DOBRA AND SHEVCHENKIVSKE PROJECTS

On 4 November 2021, the Company announced it had entered into binding agreements under which EUR will acquire European Lithium Ukraine LLC (formerly Petro Consulting LLC) (**European Lithium Ukraine**), a Ukraine incorporated company that is applying (through either court proceedings, public auction and/or production sharing agreement with the Ukraine Government) for 20-year special permits for the extraction and production of lithium at the Shevchenkivske project and Dobra Project in Ukraine (Figure 2), from Millstone and Company Global DW LLC (**Millstone**)(**Millstone Transaction**). The parties have entered into an agreement to extend the End Date of the Millstone Transfer to 17 February 2023 to allow the parties additional time to consider how to proceed. The Company continues to monitor closely the conflict in Ukraine.
