Investor Presentation

February 2023

1-2-1 Conference
Mining Indaba

ASX: AM7

Disclaimer

The Company has prepared the Presentation based on information available to it at the time of preparation. No representation or warranty, express or implied, is made as to the fairness, accuracy or completeness of the information, opinions and conclusions contained in the Presentation. To the maximum extent permitted by law, the Company, its related bodies corporate (as that term is defined in the Corporations Act 2001 (Commonwealth of Australia)) and the officers, directors, employees, advisers and agents of those entities do not accept any responsibility or liability including, without limitation, any liability arising from fault or negligence on the part of any person, for any loss arising from the use of the Presentation or its contents or otherwise arising in connection with it.

Any forward-looking statements in this Presentation, including projections, forecasts and estimates, are provided as a general guide only and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainties, assumptions, contingencies and other important factors, many of which are outside the control of Arcadia and which are subject to change without notice and could cause the actual results, performance or achievements of Arcadia to be materially different from the future results, performance or achievements expressed or implied by such statements. Past performance is not necessarily a guide to future performance and recipients of this Presentation are cautioned not to place undue reliance on such forward-looking statements.

The information contained in this Presentation is for information purposes only, the Presentation does not constitute investment or financial product advice (nor tax, accounting or legal advice) and is not intended to be used for the basis of making an investment decision. Recipients should obtain their own advice before making any investment decision.

The Presentation does not comprise a prospectus, product disclosure statement or other offering document under Australian law (and will not be lodged with the Australian Securities and Investments Commission) or any other law. The Presentation also does not constitute or form part of any invitation, offer for sale or subscription or any solicitation for any offer to buy or subscribe for any securities nor shall they or any part of them form the basis of or be relied upon in connection therewith or act as any inducement to enter into any contract or commitment with respect to securities. In particular, the Presentation does not constitute an offer to sell or a solicitation to buy, securities in the United States of America.

Compliance Statement and Competent Person Statement

The Company confirms that the information in this presentation that relates to Exploration Results at the Company's projects have previously been released to the ASX inter alia in announcements dated 7 September 2021, 23 September 2021, 16 December 2021, 4 February 2022, 21 February 2022, 7 March 2022, 24 March 2022, 02 May 2022, 9 May 2022, 19 August 2022, 24 August 2022, 23 September 2022, 29 September 2022, 10 October 2022 and 11 October 2022 all of which will continue to apply and have not materially changed, and that the Company is not aware of any new information or data that materially affects the information that has been included in this presentation. The Company confirms that the form and context in which a Competent Person's findings are presented have not been materially modified from the original market announcements.

Mineral Resources

The Company confirms it is not aware of any new information or data that materially affects the information included in the Mineral Resource estimates of the Swanson and Bitterwasser Projects and all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed when referring to its resource announcements respectively made for Swanson on 23 September 2021 and 06 May 2022 and for Bitterwasser on 3 November 2021 and 24 August 2022. The Company confirms that the form and context in which a Competent Person's findings are presented have not been materially modified from the original market announcements. The independent geological experts have sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activities which they are undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (the JORC Code). Further details relating to the independence of the competent persons are detailed in the aforesaid announcements.

Cautionary Statement LR 5.16.4

There is a low level of geological confidence associated with the inferred mineral resources and there is no certainty that further exploration work will result in the determination of indicated mineral resources or that production target itself will be realised.

A Diversified Battery-Metals Explorer

Prospect Generators Focusing on "New-Era" Metals

Exploration-to-Mine Philosophy

"Step-up" Value-Accretive Approach to Reduce Exploration Risk

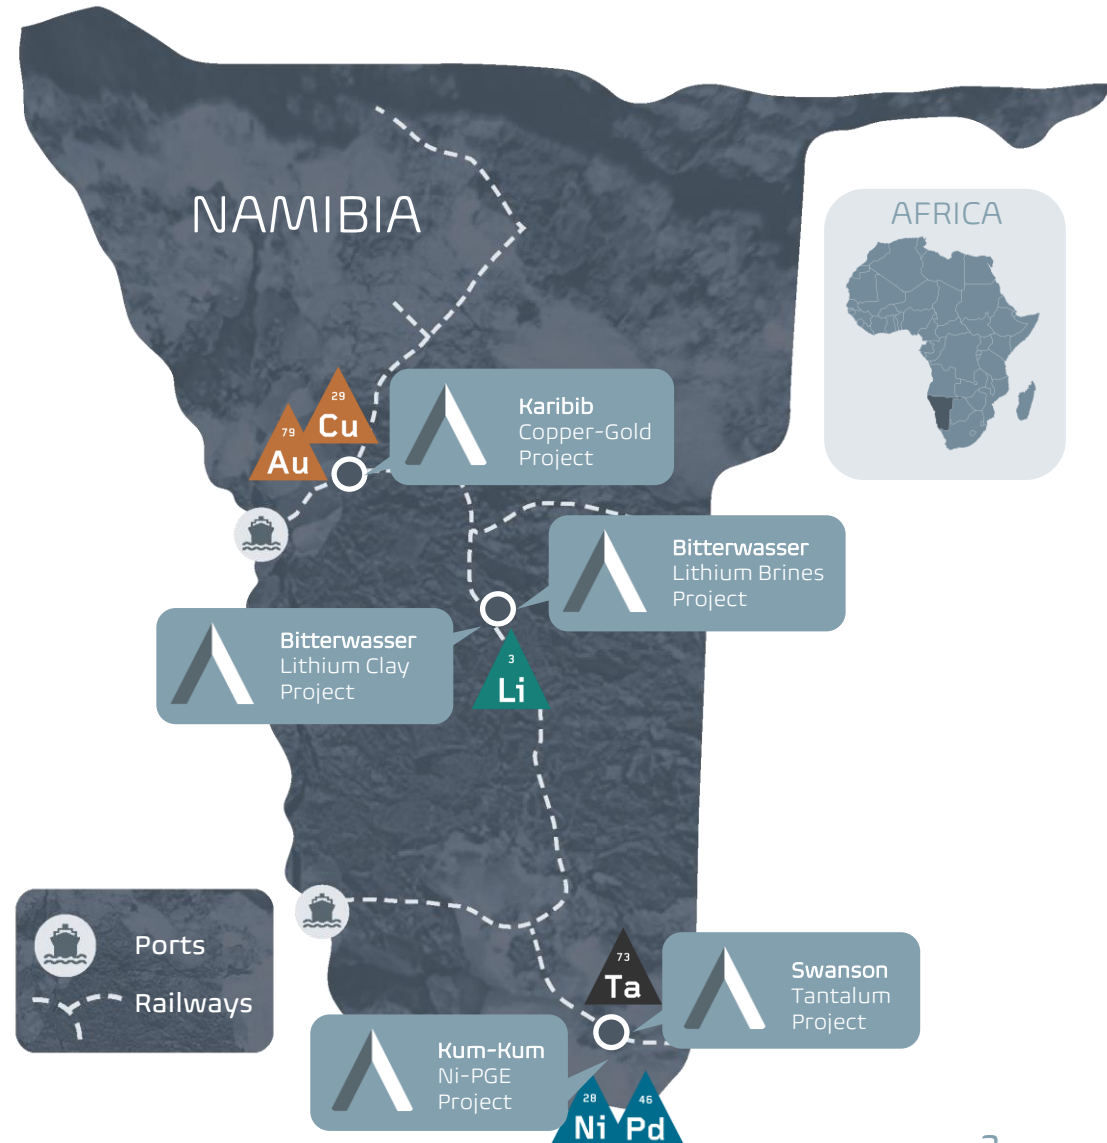

Proven Mine Finders

Focus on Potentially Company Transforming Assets

Large Tenements with Right Geology

Executive Directors & Management

Jurie Wessels	Philip Le Roux	Daniël Ellis	Lisias Pius	Dr. Ismael Kanguuehi
Executive Chairman Based in South Africa	Chief Executive Officer Based in Namibia	CFO Based in South Africa	Country Manager Based in Namibia	Geologist Based in Namibia
<p>Jurie has 26 years' experience in the exploration industry and co-founded a number of exploration and mining companies, including Bauba Resources Ltd (BAU.J), which owns two operating chrome mines, GoldStone Resources Ltd (GRL.L), which company is mining the Homase-Akrokerrri Gold Deposit in Ghana acquired and developed by GoldStone when Jurie was CEO, and Vanadium Resources Ltd that owns a tier 1 Vanadium Project undergoing fund raising for construction.</p> <p>Jurie has significant experience in the sourcing and assessment of exploration and exploitation projects and in the governance, funding and management of resource companies. He explored for various minerals in Africa, South America, the Indian sub-continent and Europe.</p>	<p>Philip has 30 years' experience in exploration, mining and economic geology, with extensive exposure in different geological terrains worldwide. He commenced his career as a Mine Geologist for Gencor Limited, then became a Mining Analyst for the Industrial Development Corporation of South Africa and operated as an independent consultant to several junior and mid-tier mining companies. Philip has progressed numerous projects from greenfields to feasibility and into production. Philip was responsible for progressing the projects that are the subject of the acquisitions by Arcadia from a technical point of view. Philip is member of the Geological Society of South Africa and registered member of Pri. Sci. Nat. (SACNASP) and holds an Honours Degree in Geology from the University of Stellenbosch.</p>	<p>Daniël is a practising Professional Accountant in Cape Town, South Africa and has 24 years' experience in the accounting industry. During the last nine years Daniël acted as accountant for a number of publicly listed companies, including AIM listed GoldStone Resources Ltd and ASX listed Vanadium Resources Ltd (ASX:VR8). Daniël holds B Acc and B Compt (Hons) degrees.</p>	<p>Lisias is an entrepreneur and businessman. He is a founding shareholder of ORP, Karibib and BME and is a Namibian resident. Lisias has business interests in farming and minerals exploration while. Lisias holds a B.Comp.Sc (Hons) Digital Forensics and B.Comp.Sc Degree in Systems Administration & Networks.</p>	<p>Ismael holds a Ph.D degree in Environmental Geochemistry from the University of Stellenbosch, having completed his Masters in Geology and B. Sc. (Hons) from the same institution. He completed his undergraduate degree from the University of Namibia, majoring in geology and environmental biology. He has vast experience in the management of base metal exploration and environmental geochemistry projects in Namibia and South Africa. Ismael is in the process of registering as a member of the Geological Society of Namibia and as a Pri. Sci. Nat. (SACNASP) geologist.</p>

resources

Non-Executive Board

Michael Davy

Independent
Based in Australia

Michael is an Australian Executive and Accountant with over 18 years' experience across a range of industries. Michael is currently a director and owner of numerous successful private businesses. During the past five years Michael has held directorships in several ASX listed companies and is currently the Non-Executive Chairman of Raiden Resources Limited (ASX: RDN), Non-Executive Chairman of Haranga Resources Limited (ASX: HAR) and a Non-Executive Director of Vanadium Resources Limited (ASX:VR8).

Andrew Law

Independent
Based in Australia

Andrew is a Mining Engineer with over 35 years' experience. He has extensive technical and management experience ranging from deep level underground mining environments to large open pit environments. Andrew fulfilled executive roles at Anglo American, Plutonic Resources, Downer Group, Placer Dome, Mundo Minerals and Optiro Limited. Until recently, Andrew was the Executive Director – Projects at Relentless Resources Limited.

Johan le Roux

Non-Independent
Based in South Africa

Johan is a business development executive with an accounting background. For the past 12 years, he has been the Business Development Manager of SPH Kundalila (Pty) Ltd, a leading mining services provider that is a wholly owned subsidiary of JSE-listed Raubex Group Limited. Johan holds a Bachelor of Commerce degree from Stellenbosch University and a Master of Business Administration from the University of Stellenbosch Business School.

Bitterwasser

Madube / Eden Pans Stratigraphy compared

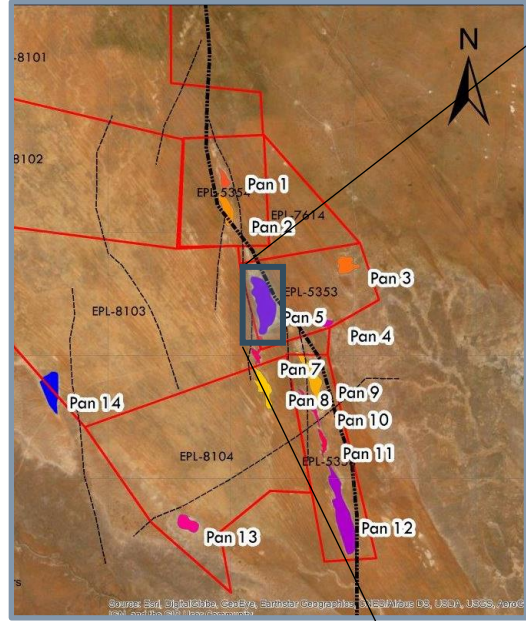

GROWING Li-Clay MINERAL RESOURCE

Madube Pan: Drilling nearing completion

Madube Pan: Lithology deeper and wider

Further Drilling to Occur at Other Pans to possibly increase Li-Clay MR

Eden Pan: Existing Resource of 287 kt of LCE over Eden Pan, this pan covers 19% of all Exposed Pans in the Pan District

Eden Pan: Mineralisation from Surface to c.12m with Middle Green Clay Unit (MU) as Dominant Lithological Unit

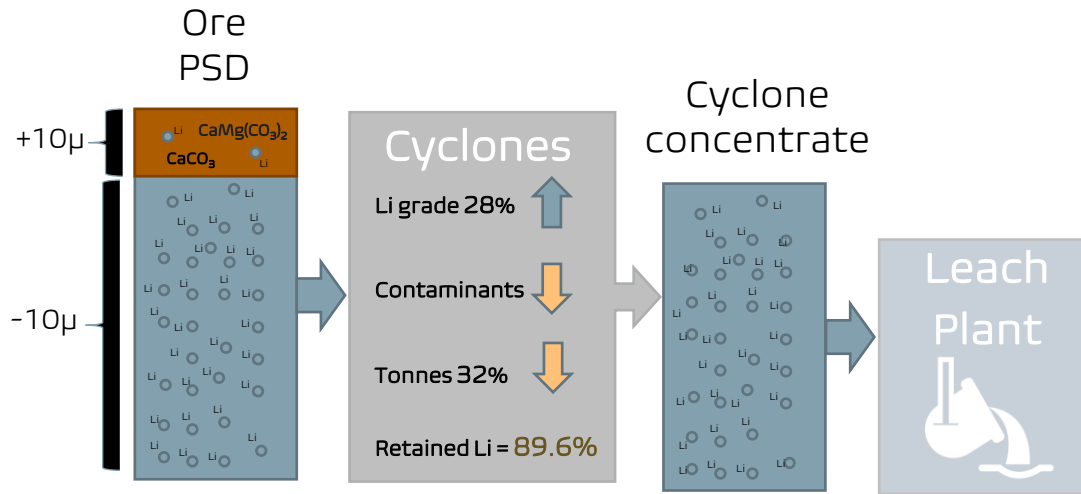

Madube Pan: Mineralisation from Surface to c.18m with Middle Green Clay Unit (MU) as Dominant Lithological Unit

Eden Pan: 68 Auger Holes from MU yielded JORC Inferred Mineral Resource of 85.3 million tons @ 633 ppm Li and 1.66% K (at a cut-off grade of 500ppm Li)

Source: Asx Announcement 7 March 2022 "Positive Lithium Mineralogical Test Results Received", Asx Announcement 24 March 2022 "Elevated Lithium Recoveries from Organic Acid Leaching Compounds" and Asx Announcement 2 May 2022 "Final Lithium Drilling Assay Results Received at Bitterwasser", Announcement 24 August 2022 "500% increase in JORC mineral resources at Lithium Project" and 10 October 2022 "Drilling indicates potential to grow Lithium resource".

METALLURGY & PROCESSING

Conductive Clays for Extraction (Montmorillonite)

+80% Recoveries Using Organic Acid & using Sulphuric Acid

+85 % Li < 10µ particles, 78 % ore < 10µ
Result: grade 28% ↑ @ 89.6% recovery

Bench Scale Test-Work up to Battery-Grade Lithium Product in Progress

HIGHLIGHTS

- +200 pegmatites mapped on 3 EPL's owned by Arcadia
- Mining License, ECC, Land Use, Water Supply and Electricity Secured
- Letter of Intent from HeBei Xinjian Construction (acquired Kazera ML77 for US\$13M + 2,5% Royalty)
- Swanson Pegmatites Gently Dipping (Opencast Potential)
- Only 15 of +200 Pegmatites Explored
- 10 Pegmatites Drilled (at Swanson) for Mineral Resource of 2,582Mt @ 486ppm
- Metallurgical Test-Work and Commercial Scale Bulk Sample Underway
- Feasibility Underway (expected Q3/2022)
- Tantalite: Semi-conductors, Capacitors, Turbine Blades, Medical Prostheses
- Ta₂O₅ Price: USD233/Kg
(Source: Fastmarkets, 25-08-2022)

Swanson Long Section

METALLURGY & PROCESSING

Gravity Processing (Spirals and MGS)
Bulk Test Work with Commercial Equipment

Product: 25% Ta₂O₅ Concentrate
In-Situ Ta₂O₅ content 1.2 m kg Ta₂O₅

Expected to be Low Capex

MINERAL RESOURCE

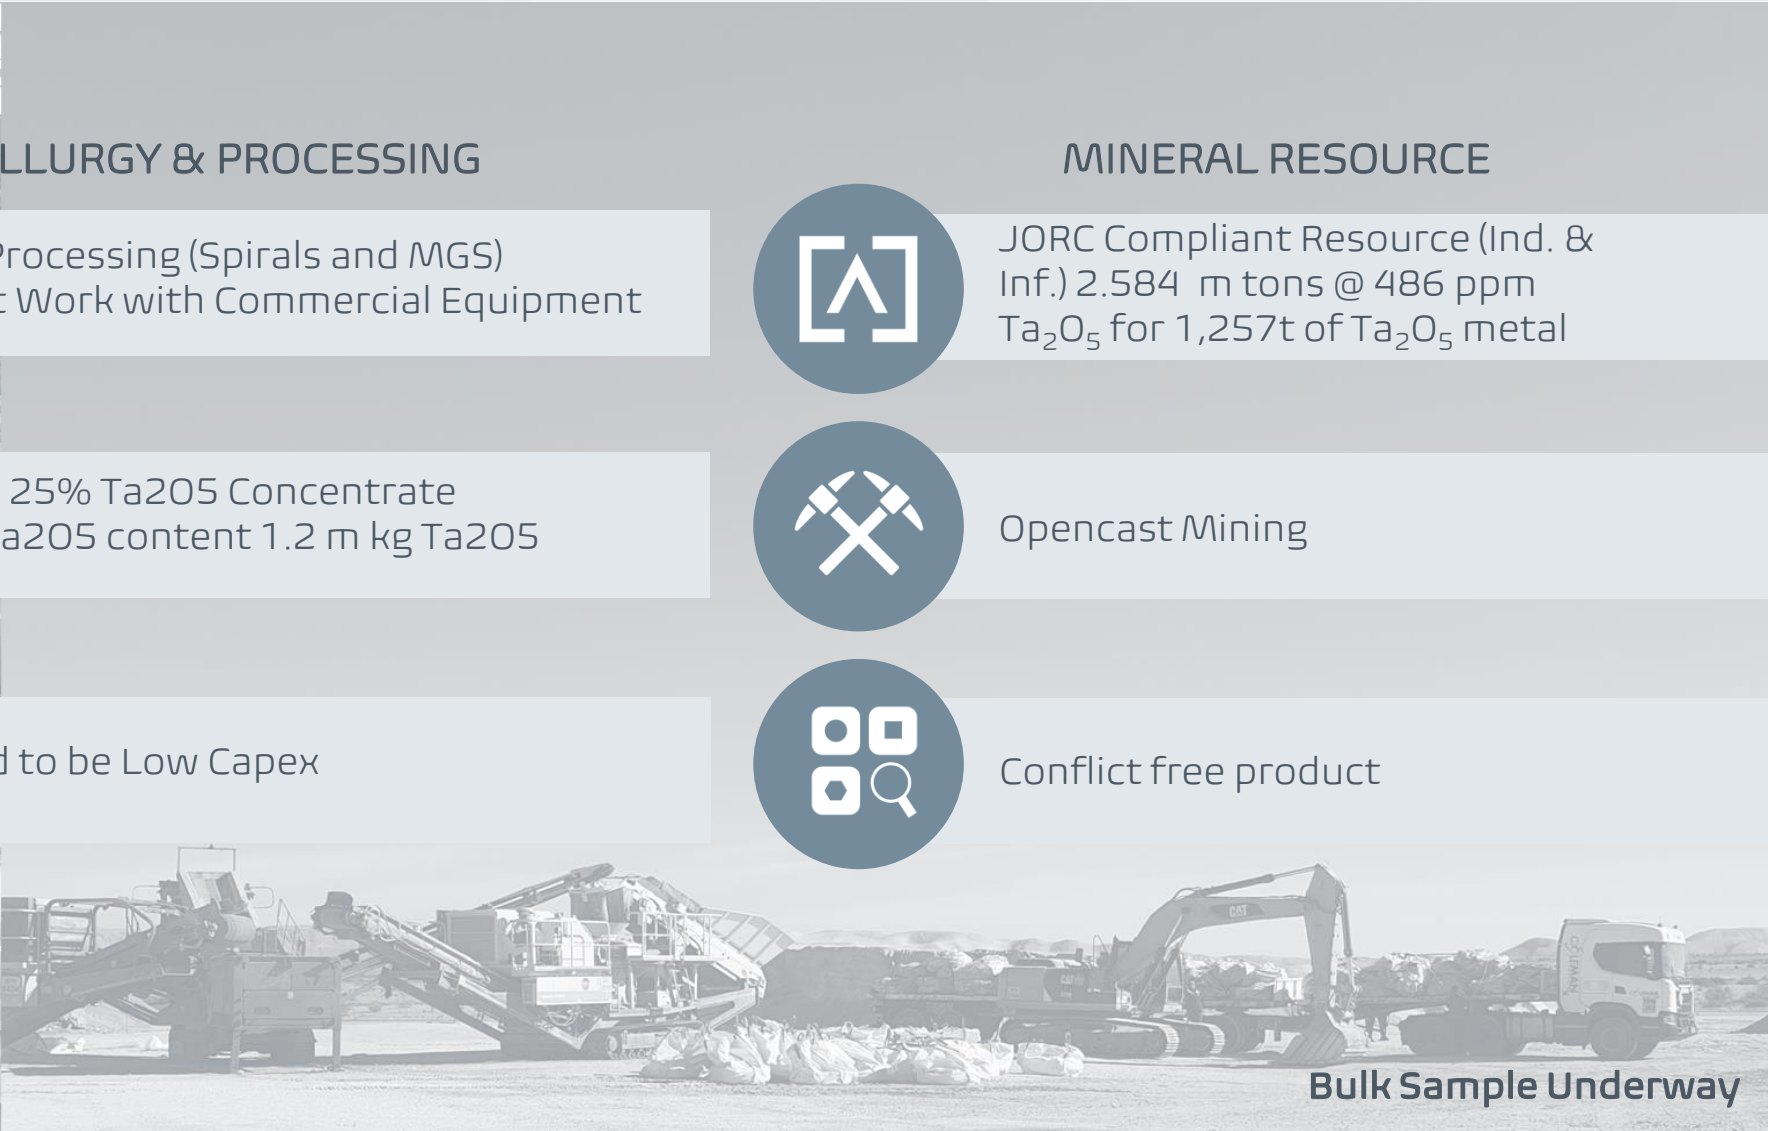

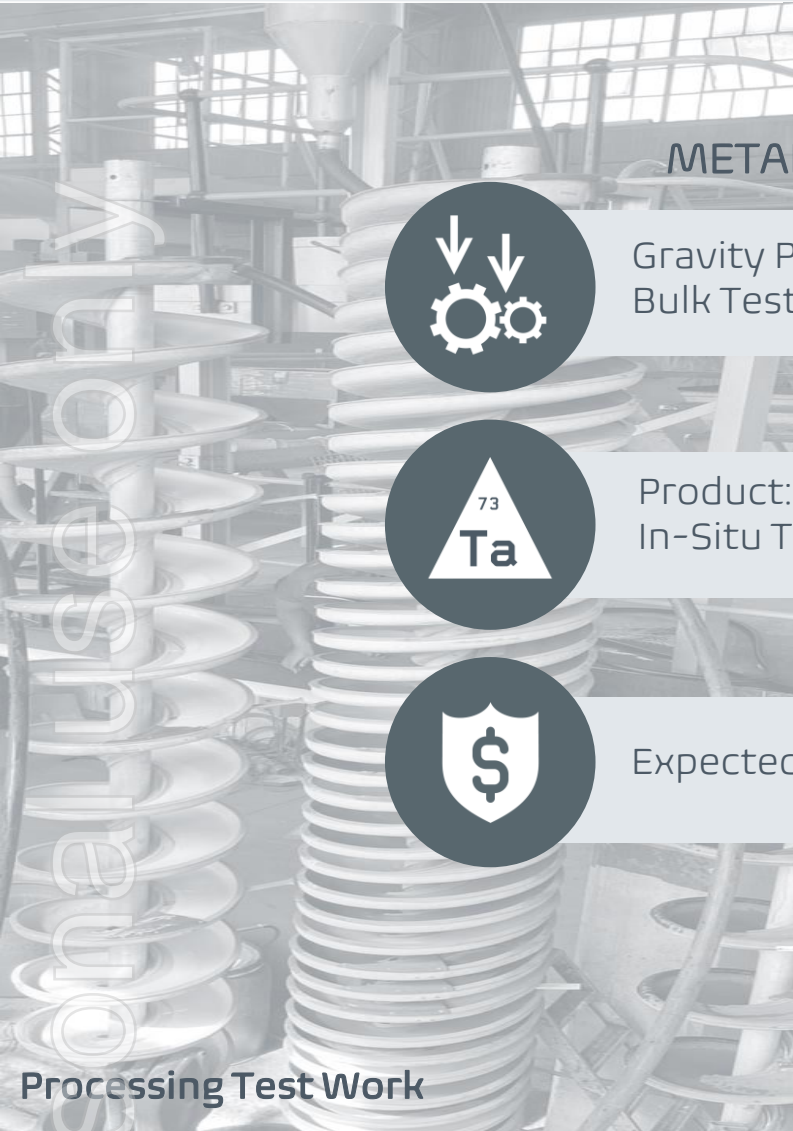

JORC Compliant Resource (Ind. & Inf.) 2.584 m tons @ 486 ppm
Ta₂O₅ for 1,257t of Ta₂O₅ metal

Opencast Mining

Conflict free product

Processing Test Work

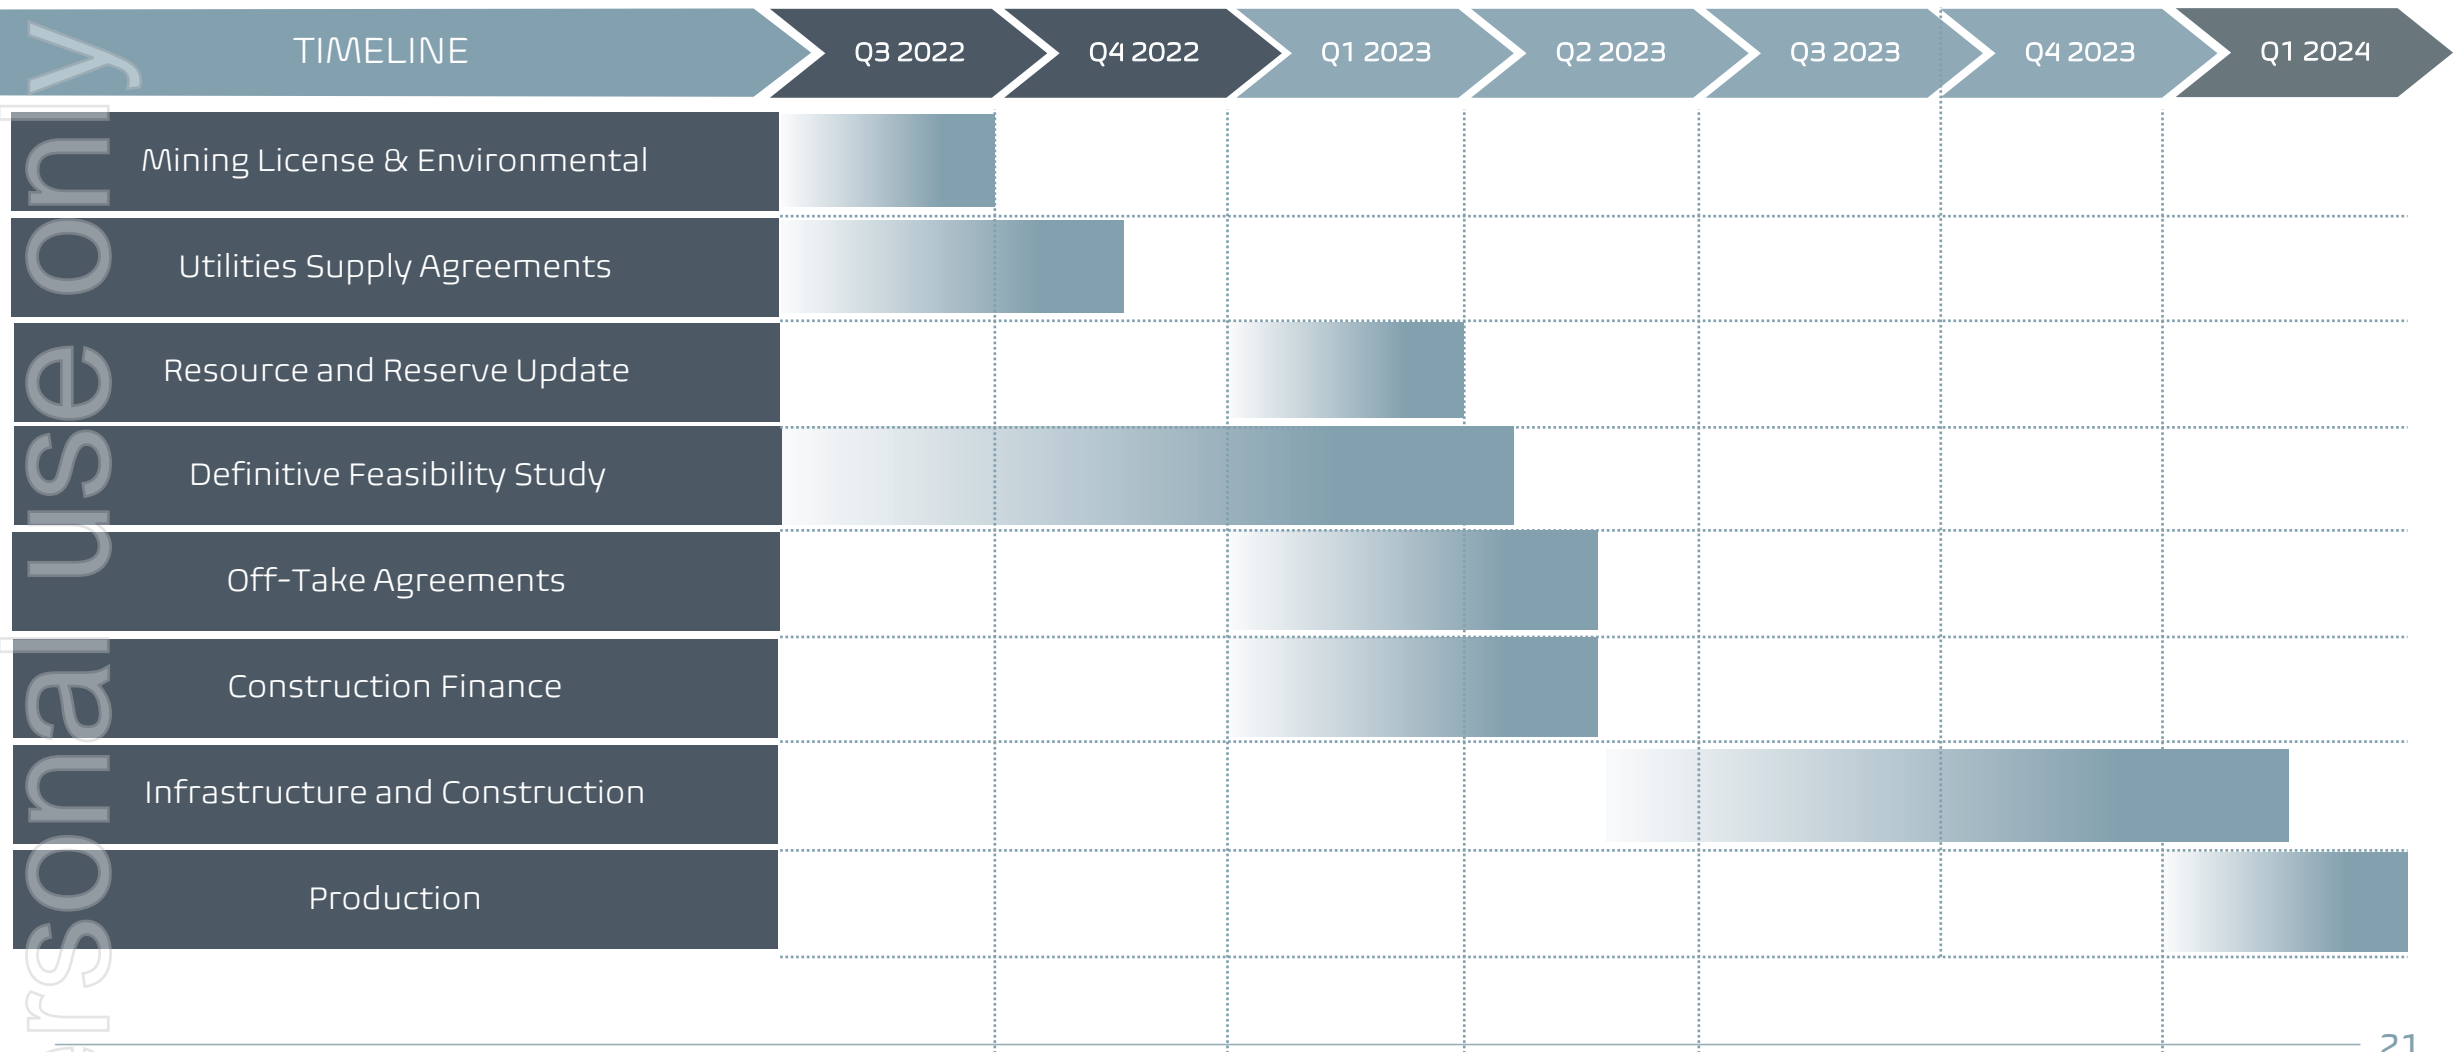

Bulk Sample Underway

Sources and cautionary note: The above chart compares global Tantalum Mineral Resources and in situ grades reported in different Mineral Resource categories under differing codes, and references projects at varying stages of development, some of which are in production and/or don't primarily focus on Tantalum production but as a by-product of commercial value at varying quality and product grades. Information of Mineral Resources with a quoted Tantalum in situ grade derived from public information have been used and all relevant information to enable an informed and balanced view is referenced in the annexure titled "Ta₂O₅ Peer Comparison Table".

Planned Milestones and Expected Material Events

 Two under-explored layered mafic complexes has been identified by the mineral systems investigation

 Best historical (1972-'76) intersections
 16m @ 0.65% Ni & 0.16% Cu
 6m @ 0.61% Ni & 0.3% Cu

 Historical results untested for PGE's
 Sample analysis confirms PGE presence.
 Likely a Polymetallic Deposit (Ni, Cu, Au and PGE's)

 Analyses of Historical Core
 Best results:
 0.28% Cu, 0.71% Ni, 0.84 g/t Pd, 0.4 g/t Pt
 0.3% Cu, 0.58% Ni, 0.69 g/t Pd, 0.31 g/t Pt. 0.26 g/t Au.

"The presence of primary magmatic sulphides within the mineralised pyroxenite emphasises that sulphide immiscibility has occurred somewhere within the stratigraphy of the TVC and that a stratiform Ni-Cu-PGE disseminated sulphide 'reef' horizon could exist somewhere in the TVC." Geological Overview and Sulphide

Mineralisation Potential of the Tantalite Valley Complex. Report by Martin Klausen, Bjorn von der Heyden, Daniel Ferreira of the University of Stellenbosch

Known Deposits in the Karibib Gold Field

Navachab Mine – 8 Moz Au

Twin Hills Project- +2 Moz Au

Prospectivity

Similar geology to Navachab and Twin Hills

Historical small-scale mines at extremities of 20km Geophysical Feature

Two types of Mineralization

Skarn-type mineralization (44 grab samples over 20km)

Av. 4.32 % Cu (highest 28.40% Cu), Av. 1.49 g/t Au (highest 7.65 g/t Au)

Vein-type mineralization (13 grab samples over 20km)

Av. 1.94% Cu (highest 5.69% Cu), Av.2.06 g/t Au (highest 26.30 g/t Au)

Initial drilling program completed and awaiting results
