

ASX ANNOUNCEMENT

10 February 2023

Tara Berrie appointed to ChemX Board

Former Tesla, Orocobre and Rio Tinto team member boosts battery metals global network

- **Tara Berrie appointed as Non-Executive Director**
- **Brings Global Battery Metals experience and network**

ChemX Materials Ltd (ASX:CMX) (ChemX or the Company), a materials technology company focused on providing the critical materials required for electrification and decarbonisation, is pleased to advise that it has appointed US-based Tara Berrie as Non-Executive Director commencing 10 February 2023.

Tara has more than 13 years experience in the global mining and chemicals industry, including the past seven years working in the battery materials sector.

She is currently Senior Group Manager (Battery Metals) at Rivian Automotive, Inc. an American electric vehicle manufacturer and automotive technology company founded in 2009.

Tara was previously Global Supply Manager, Battery Metals at leading electric vehicle company Tesla.

ChemX Chair Warrick Hazeldine welcomed Tara, who brings global experience in battery metals and battery supply chains which would be invaluable to ChemX.

"Through her experience in various market-facing commercial roles, Tara has developed a broad global network in the battery materials space and across the battery supply chain," Warrick said.

"Her experience at Tesla and currently Rivian offers ChemX an in-depth understanding of how best to position the company and she brings a global network within the battery metals sector as ChemX progresses its High Purity Alumina manufacturing technology, rare earths and its battery-grade Manganese project."

"Tara is passionate about supporting Australian companies to navigate the global battery landscape to find their unique value proposition and we look forward to her contributions to ChemX."

Tara has been issued 1,500,000 Performance Rights on the same terms as those granted to fellow Non-Executive Directors Warrick Hazeldine and Alwyn Vorster. The Performance Rights have been issued to Ms Berrie using the Company's available 15% capacity under ASX Listing Rule 7.1 and in reliance on exception 12 of Listing Rule 10.12.

This Announcement has been authorised for release by the Board.

About ChemX Materials (ASX: CMX)

ChemX is a materials technology company focused on providing critical materials required for electrification and decarbonisation. The Company's vision is to support the energy transition with materials and technology that provide real solutions to lowering carbon emissions.

Developed in-house, ChemX's HiPurA® Process is a unique technology that is capable of producing high purity alumina (**HPA**) and high purity aluminium cathode precursor salts for lithium-ion batteries. Initial testwork has indicated that the process is low cost and low in energy consumption, compared to alternative technologies. A key competitive advantage is that the HiPurA® process is not tied to mine production, with the feedstock being a widely available chemical.

The Company has projects in South Australia and Western Australia. The South Australian Eyre Peninsula projects include the Kimba Kaolin-REE Project and the Jamieson Tank Manganese Project. The ChemX HiPurA® Project is located in Western Australia.
