ANNUALISED CONTRACT VALUE (ACV)

1H23 ACV

\$170.2m as at 31/12/22

- > Total ACV up 3.4% on pcp, up 1.7% in constant currency¹
- > ACV up 5.0% from FY22 result
- > Subscription ACV² up 7.0% on pcp, representing 93.0% of Total ACV
- > Subscription ACV is an indicator of recurring ACV
- > Growth driven by stronger net upsell to existing customers in keeping with near term strategy
- > Other ACV² (perpetual and services) lower in line with strategic shift away from selling new perpetual licences

Notes: 1. Refer page 36 for comments on constant currency calculation
2. Refer Glossary for definitions of Subscription ACV and Other ACV

ACV BY LICENCE TYPE

- > Growth in both module and consumption-based ACV
- > Consumption continues to grow as a proportion of overall ACV
- > Increased focus on consumption pricing
- > Further shift away from perpetual licences in line with strategy
- > Services a future growth opportunity

Notes: 1. Refer page 34 for more information on licence types

GROWTH IN CONSUMPTION ACV

1H23 Consumption ACV

\$30.3m as at 31/12/22

- > Consumption ACV up 11.6% on pcp, up 9.2% in constant currency²
- > Consumption ACV is a subset of Subscription ACV
- > Continued strong demand for Discover SaaS product
- > SaaS consumption ACV up 14.2% on pcp

Notes: 1. Refer Glossary for more information on Consumption ACV and SaaS Consumption ACV
2. Refer page 36 for comments on constant currency calculations

REGIONAL PERFORMANCE

North America and EMEA up, Asia Pacific down

North America

- > North America ACV up 4.6% on pcp, up 0.1% in constant currency¹

INCOME STATEMENT

Underlying EBITDA up 8.5%¹ on pcg, up 11.3% in constant currency

- > Stronger revenue performance driven by software revenue growth
- > Increase in cost of goods sold due to lift in reseller volumes and step up in hosting costs and capacity
- > Research and development expense higher on further investment
- > General cost containment through Fit for Growth program
- > Non-operational legal costs significantly lower than pcg
- > Net Profit After Tax \$1.3m vs -\$2.3m in pcg

Likely to see overall cost growth in 2H:

- > Strong lift in marketing costs (particularly XLR8/23) to drive lead generation and growth
- > Non-operational legal costs likely to remain elevated

Notes: 1. The calculation of 1H22 Underlying EBITDA has been refined since publication of the 1H22 Results, where Underlying EBITDA excluded *all* legal costs. The calculation has since been refined to include only *non-operational legal costs*. The proportional change in this results presentation represents a like-for-like comparison, incorporating non-operational legal costs in both periods. For reference, the published Underlying EBITDA for 1H22 was \$24.7m.

GLOSSARY

- 1) **Annualised Contract Value (ACV)** is an adjusted, non-IFRS measure and does not represent Total Revenue in accordance with AAS or Nuix's accounting policies or cash receipts from customers. ACV is used by Nuix to assess the total contract value of its software contracts on an annualised basis (removing fluctuations from Multi-Year Deal contracts in Nuix's Total Revenue which results from its revenue recognition policies). The calculation of ACV at the end of the relevant financial period adjusts Total Revenue to account for: A) Revenue generated from Subscription Licences with a term of 12 months or more, as well as Consumption Licences which exist at the end of the relevant financial period as if those contracts' revenues were generated (and recognised) in each financial year on a straight-line basis over the relevant contract period, expressed on an annualised basis B) last 12 month contribution from short term Software Licences (including Perpetual Licences) or other Software Licences with a term of less than 12 months, excluding Consumption Licences; and C) the last 12 month contribution of services and third party software sales.
- 2) **Net Dollar Retention (NDR)**, expressed as a percentage, represents the ACV from the sale of Subscription Licences (excluding short-term Software Licences, or licences with a term of less than 12 months, but including Consumption Licences) from a constant set of customers (the "NDR Constant Customer Set") across comparable periods (i.e. it excludes the impact of new customers acquired in the subsequent (i.e. more recent period), taking into account the impact of Upsell, Downsell and Churn between these two periods.
- 3) **Churn**, expressed as a percentage, reflects the lost customer ACV from Subscription Licences (excluding short-term Software Licences, or licences with a term of less than 12 months, but including Consumption Licences) in respect of a twelve-month period which are terminated or not renewed (a contract will not count towards Churn if it was renewed or recommenced within three months of the end of the given period), as a proportion of ACV from Subscription Licences (excluding short-term Software Licences, or licences with a term of less than 12 months, but including Consumption Licences) at the start of that period.
- 4) **Subscription ACV** reflects revenue generated from Subscription Licences with a term of 12 months and Consumption Licences which exists at the end of the relevant financial period as if those contracts' revenues were generated (and recognised) in each financial year on a straight-line basis over the relevant contract period, expressed on an annualised basis. Subscription ACV excludes short term Software Licences (including Perpetual Licences) or other Software Licences with a term of less than 12 months, but includes Consumption Licences.
- 5) **Other ACV** reflects the last twelve-month contribution of Perpetual Licence sales, services and third-party software and short-term Software Licences, or licences with a term of less than 12 months but excluding Consumption Licences.
- 6) **Consumption ACV** is a sub-component of Subscription ACV and reflects the monthly contribution generated relating to gigabytes processed or under management relating to SaaS Consumption ACV and Non-SaaS Consumption ACV at the end of the relevant period, expressed on an annualised basis.
- 7) **SaaS Consumption ACV** is a sub-component of Consumption ACV and reflects monthly contribution generated relating to gigabytes processed or under management hosted in Nuix's cloud environments, expressed on an annualised basis.
- 8) **Non-SaaS Consumption ACV** is a sub-component of Consumption ACV and reflects monthly contribution generated relating to gigabytes processed or under management that is not hosted in Nuix's cloud environments, expressed on an annualised basis.

CONSTANT CURRENCY

Constant Currency has been calculated using the below methodology:

1. Constant currency rates are calculated by dividing the total 1H22 consolidated AUD revenue associated with a currency by the total 1H22 transaction currency revenue of the same currency, providing a weighted average exchange rate based on statutory revenue transactions in 1H22. This is then checked against the average daily rate provided by the RBA for appropriateness.
2. This modified rate is then applied at a transaction level across 1H23 data to ensure that all metrics (region, domain, P&L department etc.) are re-weighted appropriately.
3. Where there is a cost transaction in a currency where there have been no revenue transactions, the average RBA rate for 1H22 is used.
4. Exchange rates used for constant currency calculations:
 - > USD 1.369
 - > EUR 1.685
 - > GBP 1.860
 - > CAD 1.081
 - > CHF 1.400
