Wolf Pack Well in Production Three Months from Spud to First Sales

HIGHLIGHTS

- Commercial production and sales have been established during the early part of flow-back operations on the Wolf Pack Well.
- Early rates are very encouraging with the well producing into the permanent production facilities which are now fully operational.
- Material volumes of oil and gas have already been sold, with the Company achieving a record three months from spud to first sales.
- Oil and gas sales will continue as flow-back operations continue, and the Company will report an IP24 (peak rate), IP30 and IP90 rates as these are achieved.

Perth, Western Australia – Brookside Energy Limited (ASX: BRK) (OTC Pink: RDFEF) (Brookside or the Company) is pleased to provide shareholders and investors with an update on operations from Brookside's Phase Two development drilling in the SWISH Area of Interest (SWISH AOI) in the world-class Anadarko Basin, the high-impact Wolf Pack 36-25-1S-4W SXH 2 Well (Wolf Pack Well) (Figure 1).

The Company is pleased to report that commercial production and sales have been established from the Wolf Pack Well during the flow-back operations, with early indications pointing to a very successful outcome from this well. The Wolf Pack Well is producing into the Company's permanent production facilities which are now fully operational, with material volumes of oil and gas having already been sold. Oil is being trucked to a nearby pipeline terminal and gas is being transported via pipeline to an Enerfin gas processing facility.

Sales were established from this well in a record three months from the spud date.

Oil and gas sales will continue as flow-back operations continue, and the Company will report an IP24 (peak rate), IP30 and IP90 rates as these are achieved.

Commenting on this announcement, Managing Director, David Prentice said:

"I am delighted to be able to report on yet another wonderful operational outcome from our SWISH AOI, with production and first sales established in our first well in our Phase Two development drilling program.

"Once again I would like to thank the Black Mesa team as well as our team of contractors and service companies, without their care and diligence we would not be able to achieve these significant milestones.

"Three months from spud to first sales is a tremendous result and we look forward to bringing further news from the Wolf Pack as it continues to clean-up and production increases."

Note

- 1) The volumes stated in Figure 1 above for wells operated by companies other than Brookside are actual volumes produced, drawn from publicly available information reported by each of those entities.
- 2) In respect of the wells operated by Brookside (Jewell, Rangers, and Flames), please refer to the Company's relevant ASX releases for further information in respect of the flow rates. The Company confirms that it is not aware of any new information or data that materially affects the information included in that release and that all the material assumptions and technical parameters underpinning the estimates in that release continue to apply and have not materially changed.

About the Wolf Pack Well

The Wolf Pack Well is a Black Mesa Energy, LLC (a controlled subsidiary of Brookside) operated well that was drilled by Latshaw Rig 12 in Stephens County, Oklahoma. The well was drilled as a mid-length horizontal well targeting the Sycamore Formation at an average depth of ~9,750 feet. The well was drilled to a total measured depth of ~17,260 feet, with ~7,500 feet of lateral section drilled in the Sycamore that was cased with production tubing to be perforated and treated to allow production of oil and rich gas.

ABOUT BROOKSIDE ENERGY LIMITED

Brookside is an Australian public company listed on the Australian (ASX: BRK), Frankfurt (8F3: FSE) and USA (OTC Pink: RDFEF) stock exchanges. The Company was founded in 2015, to focus on the mid-continent region of the US, where our deep and valued relationships enable us to work with local communities to ensure sustainable growth and value creation through the safe and efficient development of energy assets. Focused on exploitation not exploration, the Company generates shareholder value through a disciplined portfolio approach to the acquisition and development of oil and gas assets and the leasing and development of acreage opportunities. The Company's US subsidiary and manager of operations, Black Mesa, is an experienced mid-continent operator, which identifies opportunities and executes development for Brookside. Our business model effectively assigns risk and provides commercial incentives to maximize value for both parties.

ABOUT BLACK MESA ENERGY, LLC

Black Mesa Energy, a Brookside Energy controlled subsidiary, is a Tulsa-based oil & gas exploration and production company focused on profitable development of petroleum properties located in the Mid-Continent oil province of the United States. Our lean and highly specialized technical and operations team is committed to providing attractive returns for our investors and shareholders by generating and drilling high quality oil and gas prospects. The founders of Black Mesa have worked together for over 30 years at companies they previously founded, including Medallion Petroleum, InterCoast Energy and Brighton Energy. Over the course of their careers, the Black Mesa team has drilled hundreds of horizontal wells and thousands of vertical wells in numerous mid-continent oil and gas basins. In addition to the financial backing from the Black Mesa shareholders, Black Mesa partners with outside investors on larger-scale projects by offering non-operated direct working interest participation.

GLOSSARY

	APO WI	After pay-out working interest
T	AFIT	After Federal Income Tax
	AOI	Area of Interest
	BBL	Barrel
-	BFIT	Before Federal Income Tax
1	BOE	Barrels of Oil Equivalent
ı	BOEPD	Barrels of Oil Equivalent Per Day
1	BOPD	Barrels of Oil Per Day
Ī	BPD	Barrels Per Day
1	COPAS	Council of Petroleum Accountants Societies
	Development Unit or DSU	Development Unit or drilling spacing unit is the geographical area in which an initial oil and/or of well is drilled and produced from the geological formation listed in a spacing order. The spacing communitizes all interest owners for the purpose of sharing in production from oil and/or gas wells the unit. A spacing order establishes the size of the unit; names the formations included in the unit divides the ownership of the unit for the formations into the "royalty interest" and the "working intere Only one well can be drilled and completed in each common source of supply. Additional wells in be drilled in a Development Unit, but only after an Increased Density Order is issued by the Oklaho
	Force Pooled	Corporation Commission. The Oklahoma Corporation Commission is authorized to establish well spacing and drilling us covering any common source of supply of hydrocarbons, or any prospective common source supply. Once the unit is established, the Commission can force pool the interests of all the own
1		who own interests in that unit and who have not voluntarily joined in the development of that unit.
	-IP	Initial Production
1	MBOE	1,000 barrels of oil equivalent
1	Mcf	1,000 cubic feet
	MMBOE	1,000,000 barrels of oil equivalent
L	NPV ₁₀	The net present value of future net revenue before income taxes and using a discount rate of 10%
	NRI	Net Revenue Interest
	PDP	Proved Developed Producing Reserves
	Pooling Agreements	The pooling agreements facilitate the development of oil and gas wells and drilling units. The binding pooling agreements are between the Company and the operators
1	Prospective	Prospective Resources are those quantities of petroleum which are estimated, on a given date, to
1	Resource	potentially recoverable from undiscovered accumulations.
/	PUD	Proved Undeveloped Reserves
4	Reserve	These reserve categories are totalled up by the measures 1P, 2P, and 3P, which are inclusive of
4	Categories	reserve types:
1	5	 "1P reserves" = proven reserves (both proved developed reserves + proved undeveloped reserves).
1		 "2P reserves" = 1P (proven reserves) + probable reserves, hence "proved AND probable.
		 "3P reserves" = the sum of 2P (proven reserves + probable reserves) + possible reserves 3Ps "proven AND probable AND possible.
1	STACK	Sooner Trend Anadarko Basin Canadian and Kingfisher Counties – oil and gas play in the Anada Basin Oklahoma
	SCOOP	South Central Oklahoma Oil Province - oil and gas play in the Anadarko Basin Oklahoma
	SWISH AOI	Description of Brookside's Area of Interest in the SCOOP Play
ſ	Working Interest	Percentage of ownership in a lease granting its owner the right to explore, drill and produce oil a gas from a tract of property. Working interest owners are obligated to pay a corresponding percental of the cost of leasing, drilling, producing, and operating a well or unit
