Investment Commentary

Pre-tax NTA decreased by 2.44 cents during February to \$1.4077, a return of (1.70%).

Overall, equity markets retraced some of January's strong performance as investors refocused on what continues to be a challenging and uncertain outlook for corporate earnings.

Within the Portfolio, negative contributions from core holdings Aurelia Metals, CountPlus, BCI Minerals and Janison Education outweighed gains in Service Stream, Austin Engineering and Duratec with the latter group reporting strong 1H23 results and outlook guidance. Portfolio insurance, comprising of a synthetic short ETF and an Index futures strategy, provided a net contribution of ~+0.26%.

We added to our long-term and largest core position, SRG Global on the back of an earnings upgrade and the strategic acquisition of ALS Asset Care, investing ~\$1.9m to maintain our interest as part of a capital raise. We also added to Austin Engineering and exited our holding in Duratec on valuation grounds along with a handful of smaller sales across the Portfolio.

Net of Portfolio sales for the month, ~\$1.2m was invested contributing to a decrease in cash from \$10.3m (8.52%) to \$8.8m (7.40%) – noting our ETF position was valued at \$3.02m (2.55%) at month end.
