Giro Gold Project

About Giro Gold Project

The Giro Gold Project comprises of two exploration permits covering a surface area of 497km² and lies within the Kilo-Moto Belt of the DRC, a significantly under-explored greenstone belt which hosts the Barrick Gold 17 million-ounce Kibali group of deposits located within 35km of Giro. The nearby Kibali Gold Project produces more than 600,000oz gold per annum.

The Giro Gold Project area is underlain by highly prospective volcano-sedimentary lithologies in a similar structural and lithological setting as the Kibali gold deposits. Both primary and alluvial gold was mined from two main areas, the Giro and Tora areas, during Belgian rule and today. The Giro Gold Project global resource for Kibigada and Douze Match deposits exceeds 4.4Moz contained gold; with a total Indicated and Inferred Mineral Resource Estimate of 132Mt @ 1.04g/t Au, for 4.4Moz gold (0.5g/t Au cut-off grade).

The Kibigada resource followed diamond core drilling results which successfully targeted deeper high-grade sulphide associated gold mineralisation within the central core of the Kibigada deposit. Drillholes GRDD034 and GRDD035 are 240m apart and both outlined high-grade gold mineralisation deeper than previously intersected at the Kibigada deposit. These gold assay results and the current Kibigada MRE indicate the potential for the Kibigada deposit to substantially grow via targeted deeper drilling along the entire strike of the orebody.

Amani Gold undertook a 3,500m diamond drill campaign at the Kibigada deposit. The company completed diamond drilling at the deposit in October 2022. Drilling was intended to target high grade gold mineralization within the existing resource area and depth extensions of the Kibigada central and eastern ore bodies.

Results from the drill program were very encouraging with broad zones of mineralisation confirmed within the resources as well as shallow high grade mineralization.

Preparation were also made for RC drilling at high grade regional prospects within the Giro Project area. RC drilling commenced on September 2022 (see ASX Announcement titled "RC Drilling Commences at Kebigada South-East dated 5 September 2022).

Diamond Drill Program

The Company commenced its diamond drill program on 16 December 2021. The program is testing the continuity of identified mineralization along strike of the COB confirmed in previously drilled diamond holes. Drilling is also testing depth extensions of broad mineralized zones within the EOB that were outlined in previous RC drilling completed in 2017.

Drilling was completed in September 2022.

Assay results confirm broad mineralization zones within the existing ore body, mineralized areas intersected below the existing resource area, as well as a shallow high-grade zone of mineralization.

A resource review of the deposit at Giro is currently being completed and scheduled for release March 2023.

RC Drill Program

In 20 December 2021 the Company announced plans for a 5,860m RC drilling campaign at Giro Project Satellite deposits Congo Ya Sika and Kebigada South-East (See ASX Announcement "Project and Operations Update" dated 20 December 2021).

The goal of the program was to define high grade satellite prospects within the Giro Project region with the possibility to increase the grade and size of the current Giro Project gold resource. Drilling commenced in September 2023 with Kebigada South-East drilling completed in December 2023 with a total of 18 RC drillholes completed for a total depth of 1,988 metres. Assays were released subsequent to year end (see ASX Announcement "RC Drilling Intersects Extension Zone of Kebigada Deposit" dated 27 February 2023)

The RC drilling at Kebigada SE has targeted the interpreted south-east extensions of the high grade veins and adjacent mineralised host rocks from the Giro vein, Gbaramuta, Bowule, Filon III, V and VI areas through the Giro/Kebigada deposit, towards an untested geophysical and geochemical anomaly.

Drillhole logging, data analysis and preliminary interpretation of the assay results suggest the mineralisation at Kebigada SE is related to either narrow, sub vertical slightly NE dipping NS structures or shallow SW dipping NW-SE structures.

Corporate

Capital Raise

In December 2022 the Company undertook a private placement to raise \$1,000,000 before costs from sophisticated and professional investors through the issue of 1,000,000,000 shares at an issue price of \$0.001 per share. Each participant in the Placement was offered 1 free attaching listed option (ANLOA) (Option) for every 2 ordinary shares subscribed, each exercisable at \$0.0015 and expiring on 15 January 2024.

Funds raised from the Placement will be allocated to development and commercialisation of the Company's Giro Gold Project, providing working capital and to pay for the costs of the Placement (a 4% capital raising fee on gross proceeds raised will be paid to multiple brokers of the Placement).

Sale of Amani Consulting to Mabanga Mining

Subsequent to the reporting period Amani Gold executed a binding term sheet ("**Term Sheet**") with Mabanga Mining SARL (the "**Purchaser**") for the sale of Amani Gold's shareholding in Amani Consulting SARL, the DRC based entity that holds the Giro Gold Project for the cash payment of USD\$30M (approximately AUD\$43.5M) (the "**Transaction**").

Pursuant to the Term Sheet, the Purchaser has agreed to acquire the Company's 850 shares ("**Sale Shares**") representing 85% of the total issued share capital in Amani Consulting, the entity that holds a 65% interest in Giro Goldfields SARL, a DRC registered company and holder of the two exploitation permits comprising the Giro Gold Project. Société Minière De Kilo Moto SA ("**SOKIMO**"), a company wholly owned by the DRC Government holds the remaining 35% interest.

As the Transaction constitutes a disposal of the Company's main undertaking, the Company will be seeking shareholder approval for the Transaction pursuant to ASX Listing Rule 11.2. The Company will prepare a notice of general meeting for this purpose, which will contain further details about the Transaction.

Rationale for entering into the Transaction

- The USD\$30M (approximately AUD\$43.5M) transaction value represents a value increase of approximately 75% above Amani Gold's current market capitalization. This cash consideration provides the opportunity to pursue new assets.
- Geopolitical circumstances in the region could worsen in the future resulting in large-scale gold projects such as Giro becoming less attractive to potential acquirers or investors. General elections are scheduled to be held in the DRC in December 2023.
- Further development of the Giro Gold Project requires substantial funds that will most likely be raised through the issue of equity, diluting existing shareholders.

Summary of Term Sheet

The material terms of the Term Sheet are as follows:

1. The Purchaser shall pay the Company a total of USD\$30M pre-tax consisting of the following tranches:
 - **First Tranche** – US\$5,000,000 payable to the Company upon execution of the Term Sheet;
 - **Second Tranche** - US\$8,000,000 payable to the Company within one (1) year of the payment of the First Tranche;
 - **Third Tranche** - US\$8,000,000 payable to the Company within one (1) year of the payment of the Second Tranche; and
 - **Fourth Tranche** - US\$9,000,000 payable to the Company within one (1) year of the payment of the Third Tranche to the Seller.
2. First Tranche Completion (being the completion of the First Tranche payment to the Company) is conditional upon the following ("**Conditions Precedent**"):

- the Company obtaining the required shareholder approvals (including shareholder approval pursuant to Listing Rule 11.2 and 10.1); and
 - all necessary regulatory and third-party approvals being obtained in the DRC.
3. If the Company receives a superior offer (i.e. an offer on more favourable terms for the Company as currently provided under the Term Sheet) prior to First Tranche Completion (see above), the Company is able to terminate the Term Sheet.
 4. Following First Tranche completion, risk in the Sale Shares will pass to and vest in the Purchaser and the Purchaser will become the operator and manager of the Giro Gold Project, accepting all risk, liabilities and costs associated with operation of the Giro Gold Project.
 5. The Sale Shares will remain in escrow until the final Fourth Tranche payment has been made to the Company, at which point the Sale Shares will be transferred to the Purchaser. The rationale for keeping the Sale Shares in escrow is such that if the Purchaser defaults on its obligations under the Term Sheet prior to completion of the final Fourth Tranche Payment, the Company is able to hold the Sale Shares in escrow as security and will maintain its ownership in the Sale Shares and the Giro Gold Project.
 6. The Term Sheet is otherwise on terms and conditions considered standard for agreements of this nature.

Board Changes

Subsequent to the period end the Company received the resignation of Klaus Eckhof as chairman of Amani Gold. The Company has appointed Mr Peter Huljich as non-executive chairman and Chief Executive Officer Conrad Karageorge has also appointed to the Amani board as managing director (see ASX Announcement “Board Changes” dated 10 March 2023).

Significant Change in the State of Affairs

There were no other significant changes in the state of affairs of the Group other than as referred to elsewhere in this consolidated half-year report and in the accounts and notes attached thereto.

Events Subsequent to Balance Date

Since the end of the half year and to the date of this report no matter or circumstance has arisen which has significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations or the state of affairs of the consolidated entity in subsequent financial years other than the matters referred to below.

The Company signed a binding term sheet executed for sale of the Company's shareholding in Amani Consulting, the DRC based entity that holds the Giro Project, to Mabanga Mining SARL. Pursuant to the Term Sheet, the Purchaser has agreed to acquire the Company's 850 shares (“Sale Shares”) representing 85% of the total issued share capital in Amani Consulting, the entity that holds a 65% interest in Giro Goldfields SARL, a DRC registered company and holder of the two exploitation permits comprising the Giro Gold Project. Société Minière De Kilo Moto SA (“SOKIMO”), a company wholly owned by the DRC Government holds the remaining 35% interest. The value of the consideration is a cash payment of USD\$30M, which is split into the following tranches:

- First Tranche – US\$5,000,000 payable to the Company upon execution of the Term Sheet;
- Second Tranche - US\$8,000,000 payable to the Company within one (1) year of the payment of the First Tranche;
- Third Tranche - US\$8,000,000 payable to the Company within one (1) year of the payment of the Second Tranche; and
- Fourth Tranche - US\$9,000,000 payable to the Company within one (1) year of the payment of the Third Tranche to the Seller.

As of the date of this report the sale agreement has not been completed due to the conditions precedents not being met yet.

On 15 January 2023 1,066,999,998 performance rights and 156,000,000 options had expired and were cancelled.

On 10 March 2023 Klaus Eckof has resigned from the board with Conrad Karageorge appointed as managing director and Peter Huljich appointed as non-executive chairman.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS FOR THE HALF YEAR ENDED 31 DECEMBER 2022

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

These general purpose interim financial statements for half-year reporting period ended 31 December 2022 have been prepared in accordance with requirements of the Corporations Act 2001 and Australian Accounting Standard AASB 134: Interim Financial Reporting. The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

This interim financial report is intended to provide users with an update on the latest annual financial statements of Amani Gold Limited. As such, it does not contain information that represents relatively insignificant changes occurring during the half-year within the Group. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Group for the year ended 30 June 2022, together with any public announcements made during the following half-year.

Significant accounting judgments and key estimates

The preparation of the interim financial report requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim financial report, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial report for the year ended 30 June 2022.

(a) Accounting Policies

The accounting policies are consistent with those applied in the previous financial year and those of the corresponding interim reporting period.

(b) Adoption of new and revised accounting standards

The AASB has issued a number of standards and amendments to standards that are mandatory for the first time in the reporting period commenced 1 July 2022. The consolidated entity has assessed and determined that there are no new or amended standards applicable for the first time for the December 2022 half-year report that materially affect the Group's accounting policies or any of the amounts recognised in the financial statements.

Going Concern Basis

The financial report has been prepared on the basis of accounting principles applicable to a "going concern" which assumes the Group will continue in operation for the foreseeable future and will be able to realise its assets and discharge its liabilities in the normal course of operations.

The Group has incurred net cash outflows from operating activities for the period ended 31 December 2022 of \$879,816 (2021: \$988,481). At 31 December 2022, the Group had cash balances of \$2,337,444 (30 June 2022: \$3,804,534). The loss for the 31 December 2022 period was \$1,155,898 (2021: \$2,089,415)

The directors have prepared cash flow projections that support the ability of the Group to continue as a going concern. These cash flow projections assume the Group obtains sufficient additional funding from shareholders or other parties. If such funding is not achieved, the Group plans to reduce expenditure significantly, which may result in an impairment loss on the book value of exploration and evaluation expenditure recorded at reporting date.

These conditions give rise to a material uncertainty that may cast doubt upon the Group's ability to continue as a going concern. The ongoing operation of the Group is dependent upon:

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS FOR THE HALF YEAR ENDED 31 DECEMBER 2022

- The Group raising additional funding from shareholders or other parties; and/or
- The Group reducing expenditure in line with available funding.
- The Group completing the sale of Amani Consulting (Giro Project disposal)

Should the Group not be able to continue as a going concern, it may be required to realise its assets and discharge its liabilities other than in the ordinary course of business, and at amounts that differ from those stated in the financial statements and that the financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts or liabilities that might be necessary should the group not continue as a going concern.

These rights have been vesting either from the previous period issue of rights or issued during the current period (refer Note 5).

NOTE 3: ASSET HELD FOR SALE

Amani Gold Limited has executed a binding term sheet ("Term Sheet") with Mabanga Mining SARL (the "Purchaser") for the sale of Amani Gold's shareholding in Amani Consulting SARL, the DRC based entity that holds the Giro Gold Project for the cash payment of USD\$30M.

Pursuant to the Term Sheet, the Purchaser has agreed to acquire the Company's 850 shares ("Sale Shares") representing 85% of the total issued share capital in Amani Consulting, the entity that holds a 65% interest in Giro Goldfields SARL, a DRC registered company and holder of the two exploitation permits comprising the Giro Gold Project. Société Minière De Kilo Moto SA ("SOKIMO"), a company wholly owned by the DRC Government holds the remaining 35% interest.

As a result of the sale agreement, Giro Project has been classified as 'held for sale'. The sale is subject to shareholder approval.

INDEPENDENT AUDITOR'S REVIEW REPORT TO THE MEMBERS OF AMANI GOLD LIMITED

Conclusion

We have reviewed the accompanying half-year financial report of Amani Gold Limited ("the Company") and Controlled Entities ("the Consolidated Entity") which comprises the condensed consolidated statement of financial position as at 31 December 2022, the condensed consolidated statement of profit or loss and other comprehensive income, condensed consolidated statement of changes in equity and condensed consolidated statement of cash flows for the half-year ended on that date, a summary of significant accounting policies and other selected explanatory notes, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Amani Gold Limited and Controlled Entities does not comply with the *Corporations Act 2001* including:

- a. Giving a true and fair view of the Consolidated Entity's financial position as at 31 December 2022 and of its performance for the half-year ended on that date; and
- b. Complying with Accounting Standard AASB 134: *Interim Financial Reporting* and *Corporations Regulations 2001*.

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001* which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's review report.

Material Uncertainty Related to Going Concern

We draw attention to Note 1 in the financial report, which indicates that the Consolidated Entity incurred a net loss of \$1,155,898 during the half year ended 31 December 2022. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Consolidated Entity's ability to continue as a going concern. Our conclusion is not modified in respect of this matter.

Responsibility of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility for the Review of the Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Consolidated Entity's financial position as at 31 December 2022 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
