

Skyfii extends partnership with London Heathrow Airport

SYDNEY, AUSTRALIA, 28 April 2023 - Skyfii Limited (ASX: SKF) (Skyfii or the Company), an omnidata intelligence company, is pleased to announce that it has signed an agreement with London Heathrow Airport.

Highlights

- **Contract secured for the upgrade and expansion of Skyfii's industry-leading LiDAR technology at London Heathrow Airport on a multi-year contract**
- **The deployment will cover three key precincts across check-in and immigration as the airport looks to improve passenger flow and queue management to help improve the performance of passenger throughput**
- **The total contract value in excess of A\$1.8m presents an expansion to existing services provided across London Heathrow Airport**
- **London Heathrow is ranked number one in Europe by number of passenger journeys**
- **Skyfii continues to see strong demand for the Company's queue management solution for ticketing and LiDAR-based security checkpoint solutions across the airport and mass transit hub verticals**

The contract with London Heathrow Airport will see the deployment of bleeding edge LiDAR sensor technology across T2 Check-In, T4 Check-In and T5 Immigration. Skyfii's technology will allow London Heathrow to leverage advanced capabilities including ultra-live people flow mapping, auto queue detection and integration with multiple third-party data sets, including Heathrow's own flight database. The contract expands Skyfii's relationship with Heathrow inline the airport's strategy to deploy future-proof technologies to enable future cloud-based applications.

The Company's queue management and passenger flow solutions allow airports to gain a complete view of passenger movement through their venue from the curbside all the way to the gate, delivering insights that enhance the passenger experience and create efficiency in the airport operations improving throughput.

ASX: SKF | 28 April 2023

Skyfii's technology is now deployed across many of the busiest airports in the USA including JFK, Austin and Charlotte and several of the world's largest airports outside of the USA, including Sydney International, Muscat and Istanbul. In addition to new client conversion, the Company remains equally focussed on growing within the existing airport portfolio as Skyfii's technology deployments have to date been limited to one or a select number of terminals, check-in halls or security checkpoints. The addressable market within the existing customer base is highly material as airports look to improve passenger flow analytics to measure and manage the entire passenger 'curb to gate' experience.

John Rankin, Chief Operating Officer, Skyfii, commented: *"We are extremely pleased to extend our association with London Heathrow Airport. Our industry-leading LiDAR technology and associated solutions deliver a real-time view of passenger movement through mass-transit hubs delivering data insights and operational efficiencies to venues".*

About Skyfii

Skyfii helps organisations activate the power of their data through technology & human ingenuity, to find new ways to optimise the spaces where we live, work, shop, travel & play.

Skyfii's IO platform unifies your data points on one proprietary platform to give you the insights needed to solve the complex challenges of your present and future.

We ingest data from a diverse range of technologies including WiFi, Camera, People counting, LiDAR, CCTV and IoT devices. We combine these datasets with contextual data like weather, retail sales and sociodemographic to improve operational performance for retailers, airports, stadiums, smart cities and other public and commercial venues.

Skyfii further augments insights generated by the IO Platform with its Data & Marketing Services offering: A team of data science and digital marketing consultants who help our clients harness more value from their data.

This announcement has been approved by Skyfii Limited's CEO.
