1Q23 Performance update

QBE updates on recent trading performance through 1Q23.
Full year outlook has been updated to reflect
a strong start to the year for premium growth,
and the impact of catastrophe events.

Growth and pricing momentum

Growth in gross written premium remained strong in 1Q23, up 11% on the prior corresponding period, or 14% in constant currency. Group-wide renewal rate increases averaged 10.0%, supported by a re-acceleration across property classes, and higher rate increases for QBE Re.

Ex-rate growth of 9%, or 5% excluding Crop, exceeded expectations despite the impact of planned program terminations in North America, and a reduction in growth across certain Financial lines segments. Organic growth in Crop continued, and QBE currently estimates that Crop gross written premium will be ~\$4.0B in FY23, with net earned premium of ~\$1.4B.

Favourable rate and retention environment

Constant currency GWP growth of 14%

Growth ex-rate 9%

Claims performance

Catastrophes

Catastrophe activity has remained elevated through the beginning of 2023, underscored by Cyclone Gabrielle and the North Island flooding events in New Zealand, alongside a series of storms in North America and Australia. To April, the net cost of catastrophe claims is ~\$480M, which compares to QBE's catastrophe allowance for 1H23 of \$535M.

	\$M
CAT April YTD	~480
1H23 CAT allowance	535
2H23 allowance	640
FY23 CAT allowance	1,175

Prior accident year development

QBE has experienced adverse development on natural catastrophe events which primarily occurred in late 2022, including winter storm Elliot in North America and certain Australian events. Due to the timing and complexity of the events, particularly for winter storm Elliot, few claims were received and assessed prior to FY22 reporting. QBE has strengthened reserves by \$130M for these events.

Investment performance

QBE delivered a strong investment result for the quarter, underpinned by supportive interest rates. The 1Q23 exit core fixed income running yield improved to 4.2%, from the FY22 exit running yield of 4.1%. Risk asset performance was also sound, and across the broader investment portfolio there were no direct impacts from recent turmoil in the Northern Hemisphere banking sector.

The gradual reduction in risk free rates through the quarter resulted in unrealised gains on fixed interest securities of \$78M, which was offset by a negative claims liability discount impact of ~\$100M.

Total investment funds under management (FUM) was \$29.1B, up from \$28.2B at FY22. In 2Q23 FUM will be negatively impacted by ~\$1.9B from the reserve transaction announced in February. Core fixed income remains 89% of total investments.

1Q23 investment return

	1Q23 \$M	1Q23 YTD %
Core fixed income yield	262	1.0
Credit spreads (mark to market)	6	0.0
Risk assets	67	2.1

Outlook

Due to the strong start for the year for premium growth, alongside our expectation that premium rate increases will remain supportive, QBE now expects FY23 Group constant currency GWP growth of -10% (from mid-to-high single digits previously).

Based on our assessment of underwriting performance to date, including the aforementioned catastrophe prior accident year development, the FY23 plan Group combined operating ratio has been revised to -94.5%. This continues to exclude the upfront impact of the reserve transaction announced in February.

QBE will host an AASB 17 investor briefing on 30 May 2023, at which point the outlook will be restated for the new accounting standard.
