Investee Cortical Dynamics Update

Philips Electronics North America Corp. has confirmed that BPH limited investee company Cortical Dynamics Limited (Cortical) has with successful testing and provision of documentation met the necessary prerequisites of the Philips License and Cooperation Agreement to claim the BARM-PEC as a compatible and “supported device“ for Philips Patient Monitoring Systems IntelliVue MP40-90 and MX400-850 using the Philips IntelliBridge EC10 Interface Module or IntelliBridge EC10 integral Interface Board, as well as Philips IntelliBridge System Release C.0 and Patient Information Center iX using the EC40/80 Hub with Open Interface driver (ED/BD101) and EC5 ID Module #106.

Philips confirms that Cortical may now claim compatibility of the BARM-PEC with the above-mentioned Philips IntelliVue Patient Monitoring Systems.

Philips will include Cortical’s BARM-PEC in the list of Open Interface supported medical devices that is communicated to the Philips sales force and published on related Philips webpages.

Neurotechnology Company Cortical Dynamics has developed BARM™ (Brain Anaesthesia Response Monitor) a next generation certified class II personalised Depth of Anaesthesia Monitoring Device for use in the operating room and ICU , complemented by CORDYAN™ (Cortical Dynamics Analytics) a proprietary deep learning system/App focusing on anaesthesiology.
