## Investor Presentation

May 2023

[brookside-energy.com.au](http://brookside-energy.com.au)

ASX: BRK

OTC Pink: RDFEF

# Important Notice and Disclaimer

This presentation may include forward-looking statements. Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions, which are outside the control of Brookside Energy Limited (“Brookside Energy” or “the Company”). These risks, uncertainties and assumptions include commodity prices, currency fluctuations, economic and financial market conditions in various countries and regions, environmental risks and legislative, fiscal or regulatory developments, political risks, project delay or advancement, approvals and cost estimates. Actual values, results or events may be materially different to those expressed or implied in this presentation. Given these uncertainties, readers are cautioned not to place reliance on forward-looking statements. Any forward-looking statements in this presentation speak only at the date of issue of this presentation. Subject to any continuing obligations under applicable law and the ASX Listing Rules, Brookside Energy does not undertake any obligation to update or revise any information or any of the forward-looking statements in this presentation or any changes in events, conditions or circumstances on which any such forward looking statement is based.

This presentation does not constitute investment advice. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction. Shareholders should not rely on this presentation. This presentation does not take into account any person's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments.

The information set out in this presentation does not purport to be all-inclusive or to contain all the information, which its recipients may require in order to make an informed assessment of Brookside Energy. You should conduct your own investigations and perform your own analysis in order to satisfy yourself as to the accuracy and completeness of the information, statements and opinions contained in this presentation.

To the fullest extent permitted by law, the Company does not make any representation or warranty, express or implied, as to the accuracy or completeness of any information, statements, opinions, estimates, forecasts or other representations contained in this presentation. No responsibility for any errors or omissions from this presentation arising out of negligence or otherwise is accepted.

# Brookside Energy Limited

## Increasing production in a world-class basin

- 1 Operating in a **tier one jurisdiction** within a world-class basin, with **extensive existing infrastructure** and abundant take-away capacity
- 2 **Low-cost** (1QCY23 Production Expense of US\$4.24/BOE), **cash flow producing operations**, with **four producing wells and extensive planned development wells** underpinned by a **strong balance sheet**
- 3 Local, **experienced and dedicated team** with a strong track-record of **successful global oil and gas operations**, from exploration through to large-scale production
- 4 Multiple avenues to **monetise projects**, including operating, divesting or partnering on upgraded acreage. Cashflows to be reinvested to **scale-up positions** or **returned to shareholders**
- 5 Large inventory of **low-risk**, highly prospective development wells with **compelling economics** creating a strong pipeline of **future growth opportunities**
- 6 **11.9 million BOE 2P Reserve<sup>1</sup>** (excluding 20% attributable to acreage acquired in future pooling) delivers **US\$170.5 million NPV<sub>10</sub>**, **catalyst for on-market share buy-back**

1. Brookside confirms that it is not aware of any new information or data that materially affects the information included in the market announcement dated 26 April 2023 "SWISH AOI Independent Reserves Certification" and that all the material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Cash	A\$17.7m <sup>2</sup>
Debt	Nil
Enterprise Value	A\$57.5m
Land Holdings	4,300 acres
2P Reserves	11.9 million BOE <sup>3</sup>

## Top Shareholders

1. As at 12 May 2023.  
2. As at March 31, 2023.  
3. Reserves Cautionary Statement, Oil and gas reserves and resource estimates are expressions of judgment based on knowledge, experience, and industry practice. Estimates that were valid when originally calculated may alter significantly when new information or techniques become available. Additionally, by their very nature, reserve and resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional drilling and analysis, the estimates are likely to change. This may result in alterations to development and production plans which may, in turn, adversely impact the Company's operations. Reserves estimates and estimates of future net revenues are, by nature, forward looking statements and subject to the same risks as other forward looking statements. Brookside confirms that it is not aware of any new information or data that materially affects the information included in the market announcement dated 26 April 2023 "SWISH AOI Independent Reserves Certification" and that all the material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

# Our Team

## Brookside Energy

### Corporate, Commercial & Governance

**Michael Fry**  
*Chairman*  
Extensive corporate, financial and capital markets experience

**David Prentice**  
*Managing Director*  
18-years on-shore US corporate commercial E&P experience

**Dr Gracjan Lambert**  
*EGM Commercial*  
25-years global technical and commercial experience

**Richard Homsany**  
*Non-Executive Director*  
Corporate lawyer and CPA, significant experience in resources and energy

**Katherine Garvey**  
*Company Secretary*  
Corporate lawyer, significant resource sector governance and company secretarial experience

## Black Mesa Energy

### Veteran Oil & Gas Prospectors

Black Mesa is Brookside Energy’s US controlled subsidiary and manager of operations and is an experienced operator focused on profitable development of mid-continent oil and gas properties

**Chris Girouard**  
*President & COO*  
35-plus years in the oil & gas industry, expert in all aspects of petroleum land management.

**John Schumer**  
*VP Reservoir Engineering*  
20-plus years in oil and gas exploration and development. Reservoir engineer with experience in development strategy, A&D, reserves, type curves, and prospect generation.

**Lee Francis**  
*VP Operations*  
40-plus years engineering and management experience in upstream and midstream operations. Responsible for all drilling, production and infrastructure projects.

### Service Companies

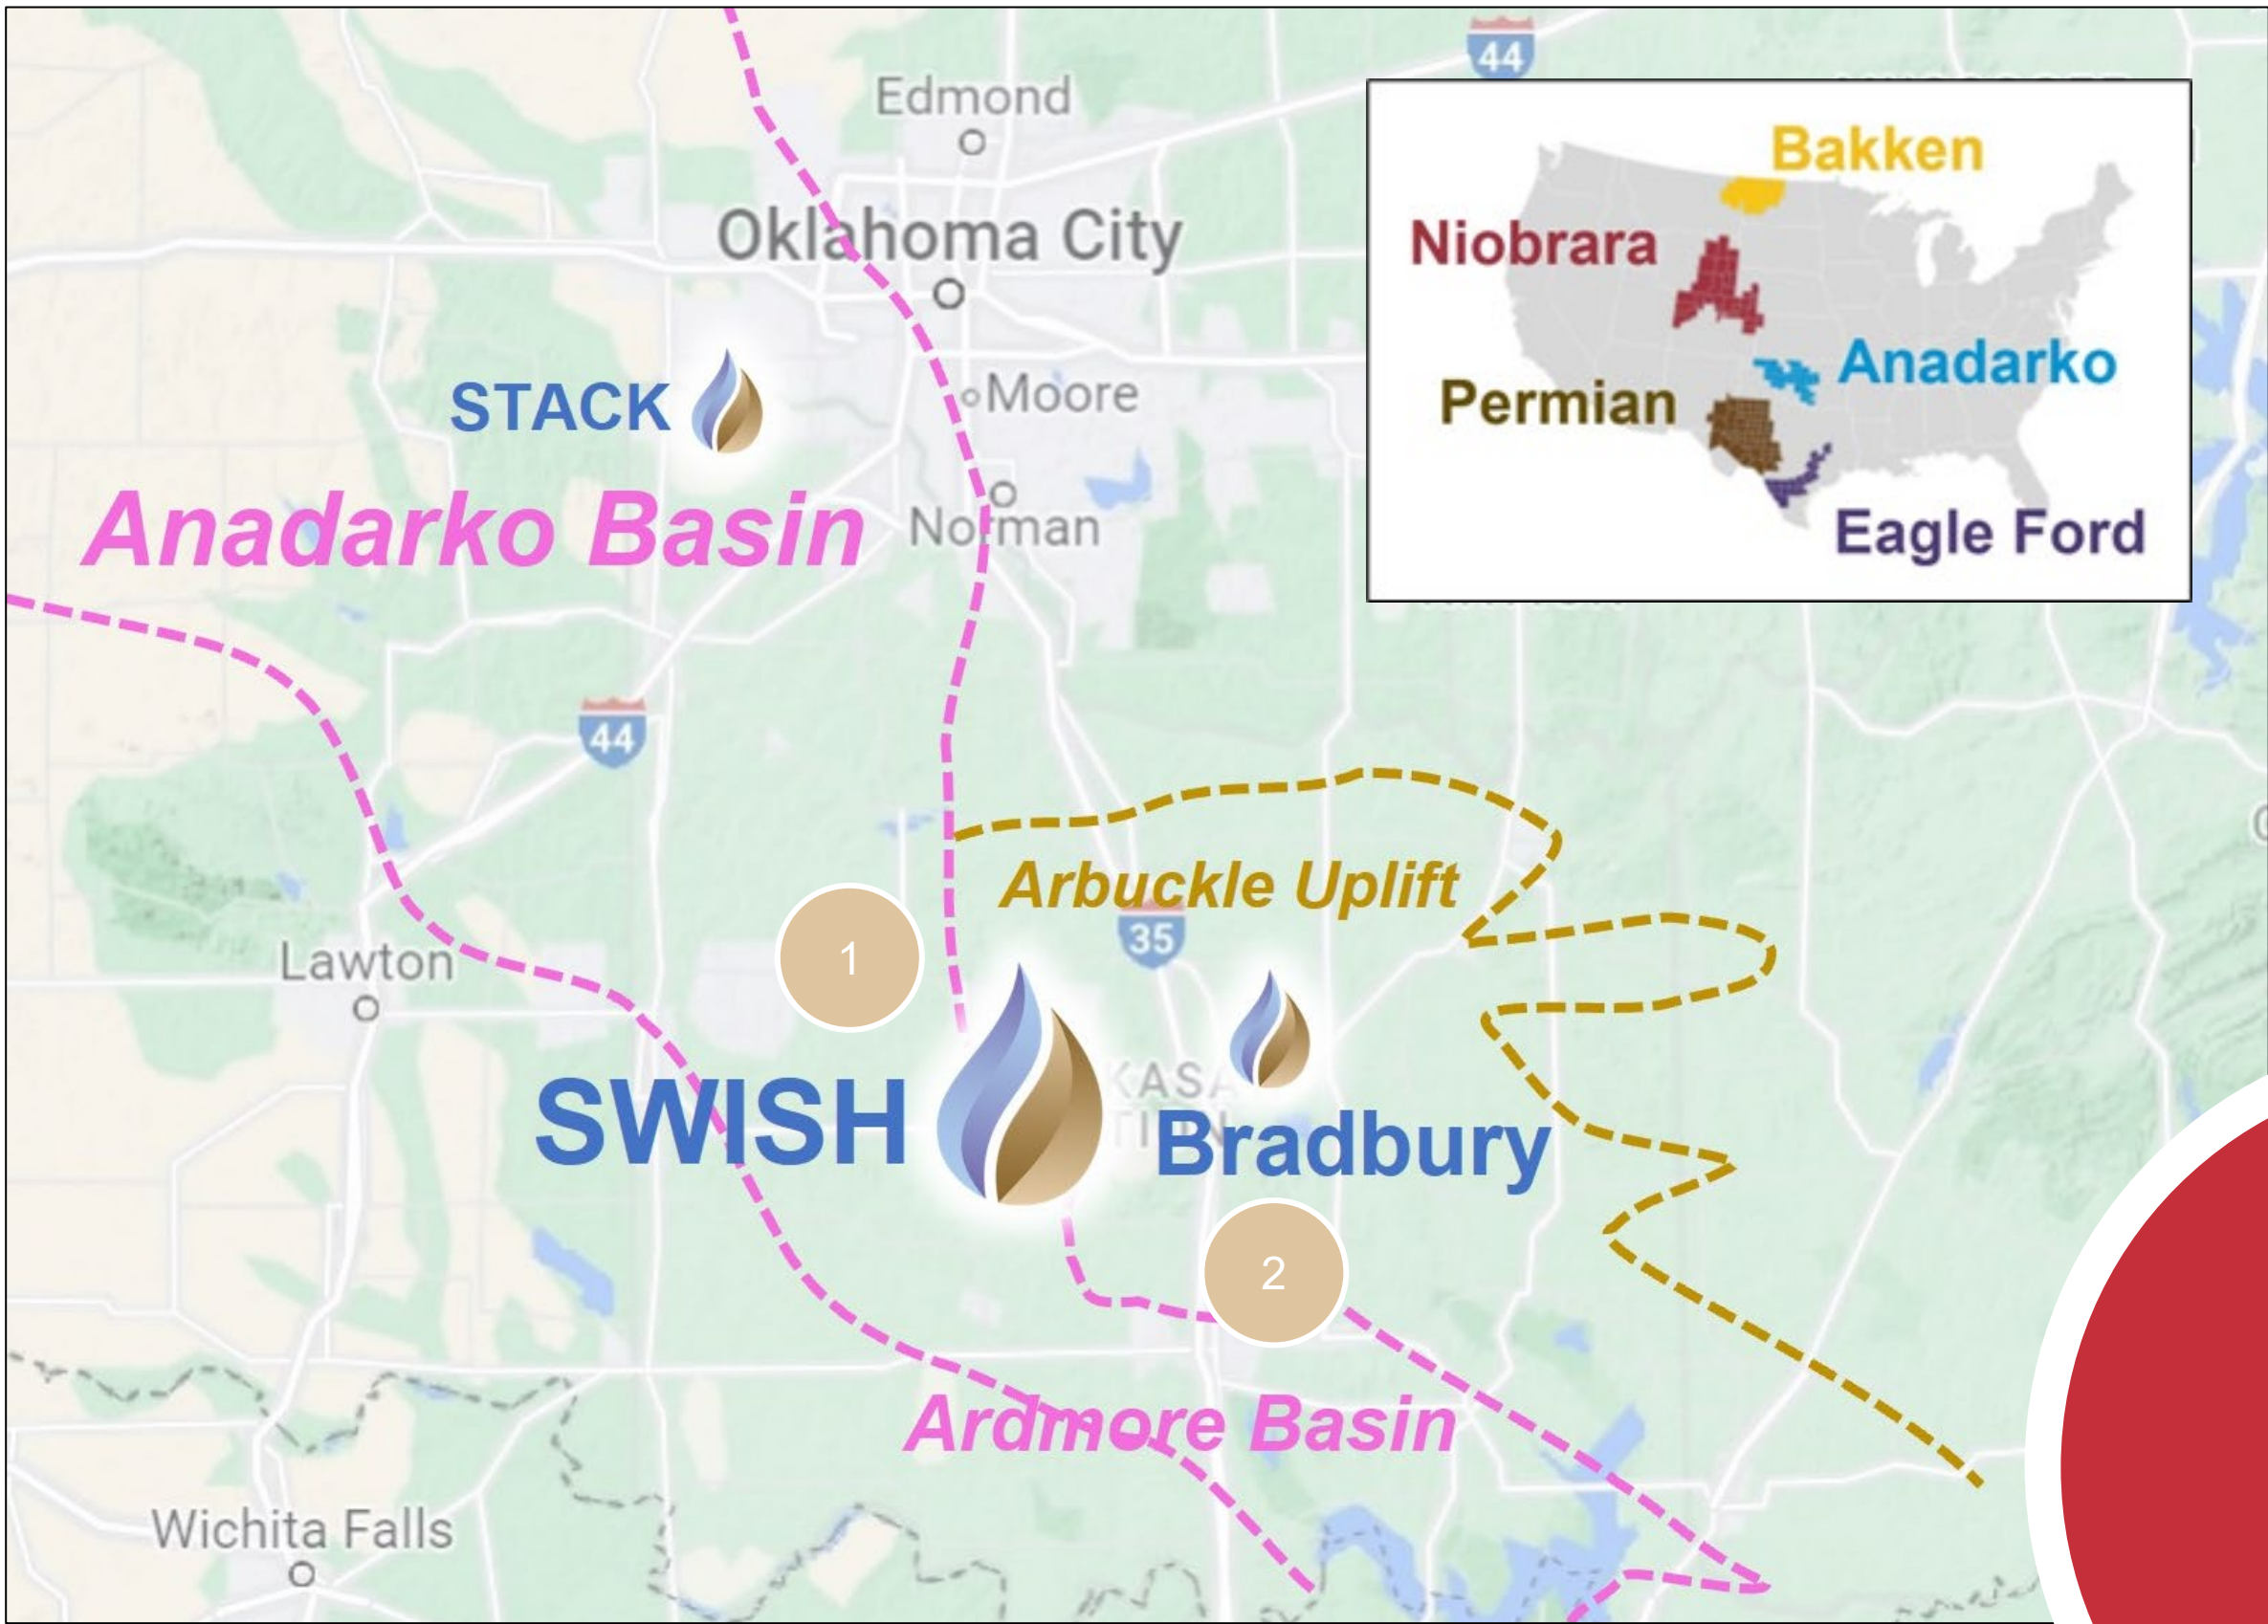

# Oklahoma E&P Activity

## World-class basins surrounded by oil and gas majors

- Proven productive basin in a **world-class** location
  - Basin production ~970,000 barrels of oil equivalent per day
  - Fraser Institute #2 ranked most attractive jurisdiction for oil and gas investment
- The Anadarko Basin has attracted **several majors** and is the location of the **5<sup>th</sup> largest source of natural gas** and the **6<sup>th</sup> largest oil producer in the United States**
- Basin hosts numerous notable oil and gas fields including **six fields that have produced in excess of 100 million barrels of oil**, including the Sho-Vel-Tum field which has produced in excess of 740 million barrels to date
- Rates of return on the wells are competitive with the **very best basins in the US**

ExxonMobil US\$411bn

# Summary of Operations

Since end of 2021, Brookside has successfully drilled 4 wells at the SWISH AOI with an average IP30 of 1,468 BOE

Area of Interest →		1 SWISH				2 BRADBURY	
Category	Unit	Flames	Jewell	Rangers	Wolf Pack	Juanita	Thelma
Operating Status

NGL production	Bbls	32,000	123,000	45,000	8,000	-	0
Total Production	BOE	163,167	475,533	234,000	71,333	-	5,475
Oil and NGL % of Production		70%	63%	81%	90%	-	100%

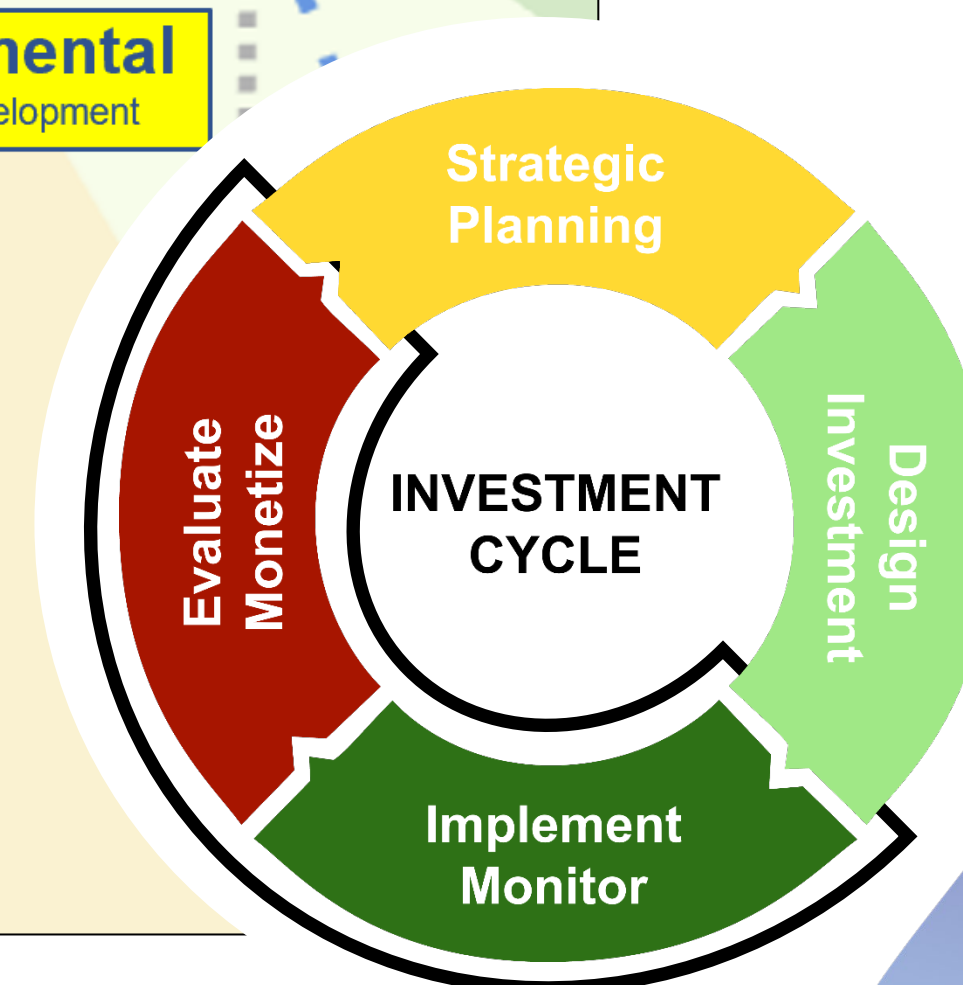

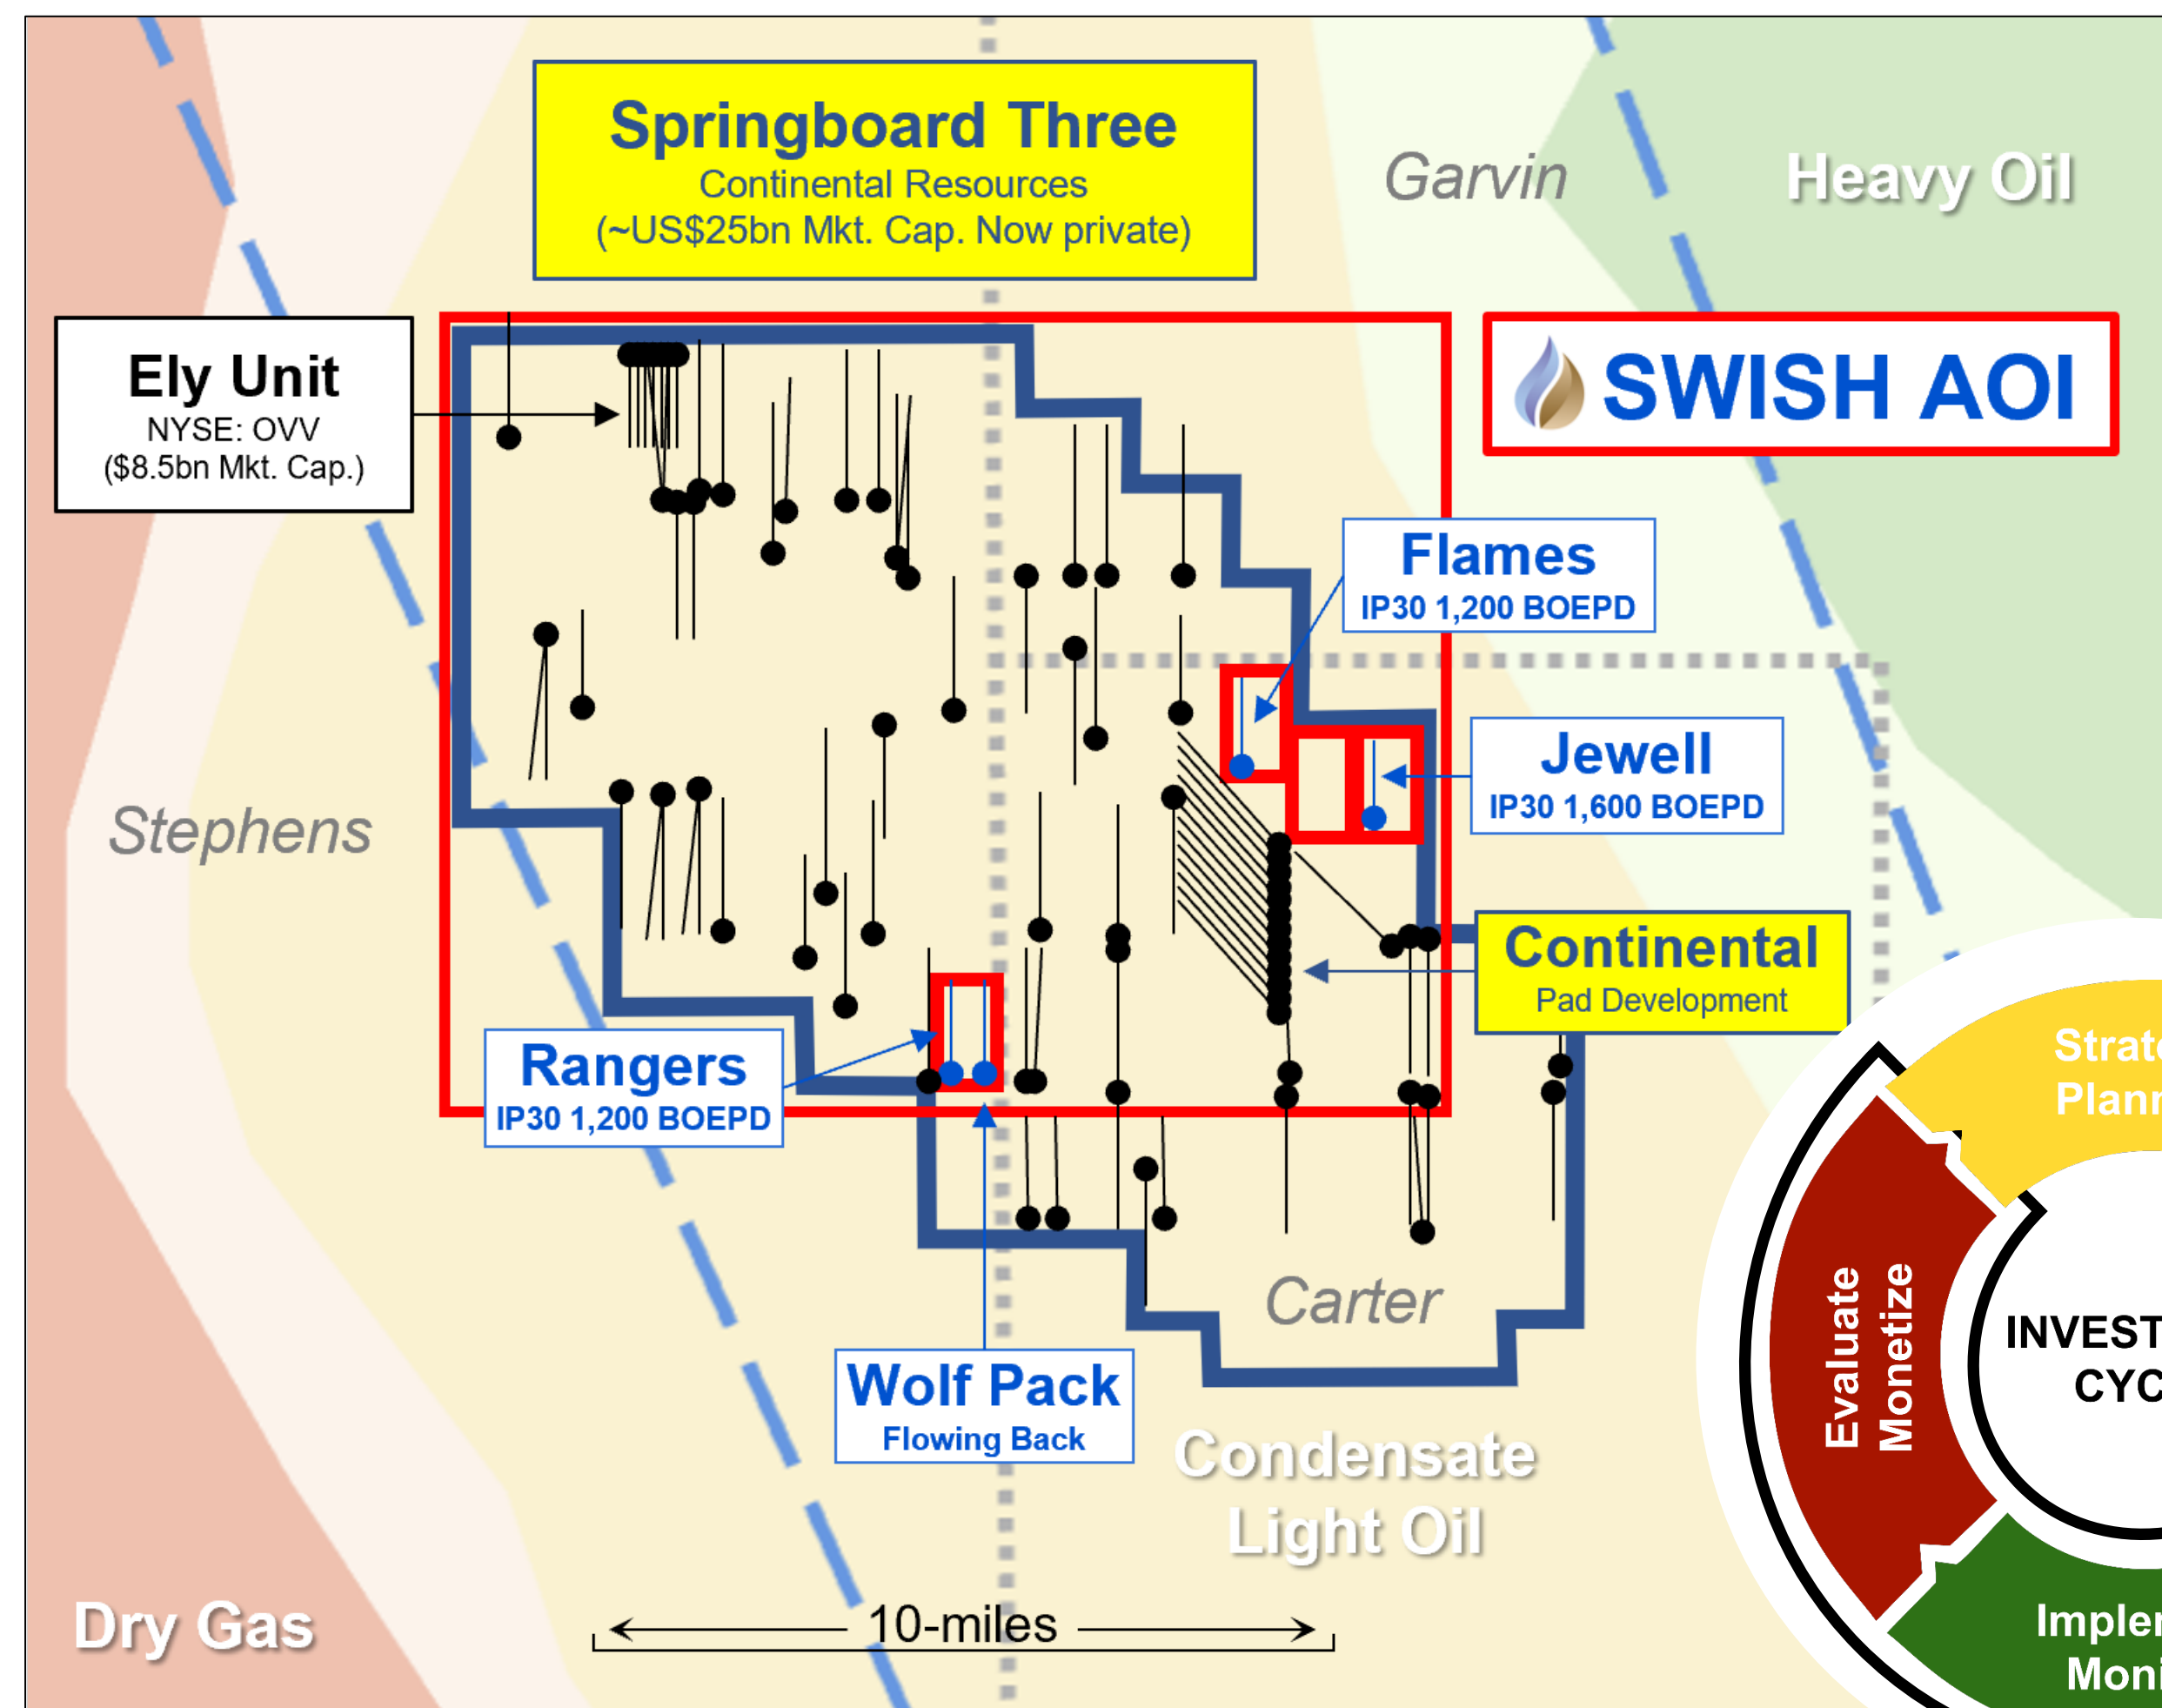

# 1 SWISH AOI – Anadarko Basin

## Core position in the highly sought-after Sycamore Woodford Trend

- SWISH Held by Production (**HBP**) program in the Anadarko Basin completed
- **Continental Resources** have completed a multi-well pad development directly adjacent to the Flames and Jewell Wells on the SWISH AOI. Forthcoming data from the program has the potential for strongly positive implications in terms of capex and production rates for future Brookside wells
- 4 wells of ~24+ well inventory drilled and producing
- **Outstanding well productivity** and product mix (light sweet crude, NGL's and gas) combined with high initial and sustained **production rates delivering rapid payouts** and high proved undeveloped reserves (**PUD**) value
- Successful HBP program proves up a **large inventory of extremely high quality very low risk development wells**
- Fourth operated Drilling Spacing Unit (**DSU**) (Bruins) incorporated, increasing SWISH AOI holdings by ~34%

# 1 SWISH AOI – Anadarko Basin

## Excellent productivity and sustained production, supporting full field development

- Brookside wells sit well amongst the top performers in the area, **with average production rate over the first 30 days at approximately 1,468 BOE per day**
- The 4 producing wells in the SWISH AOI produced a total of 1,822 BOE per day (gross) in 1QCY23
- The Wolf Pack Well reached a peak rate (IP24) of **2,034 BOE per day (88% liquids, 12% gas), resulting in Brookside's highest IP24 rate to date<sup>1</sup>**
- Sycamore wells delivering average cumulative production in **excess of 400,000 BOE in first 12-months**
- Woodford wells early results point to averages **above 300,000 BOE in the first 12-months**
- Well productivity supports move to **full field development** and PAD drilling to **develop Sycamore and Woodford**

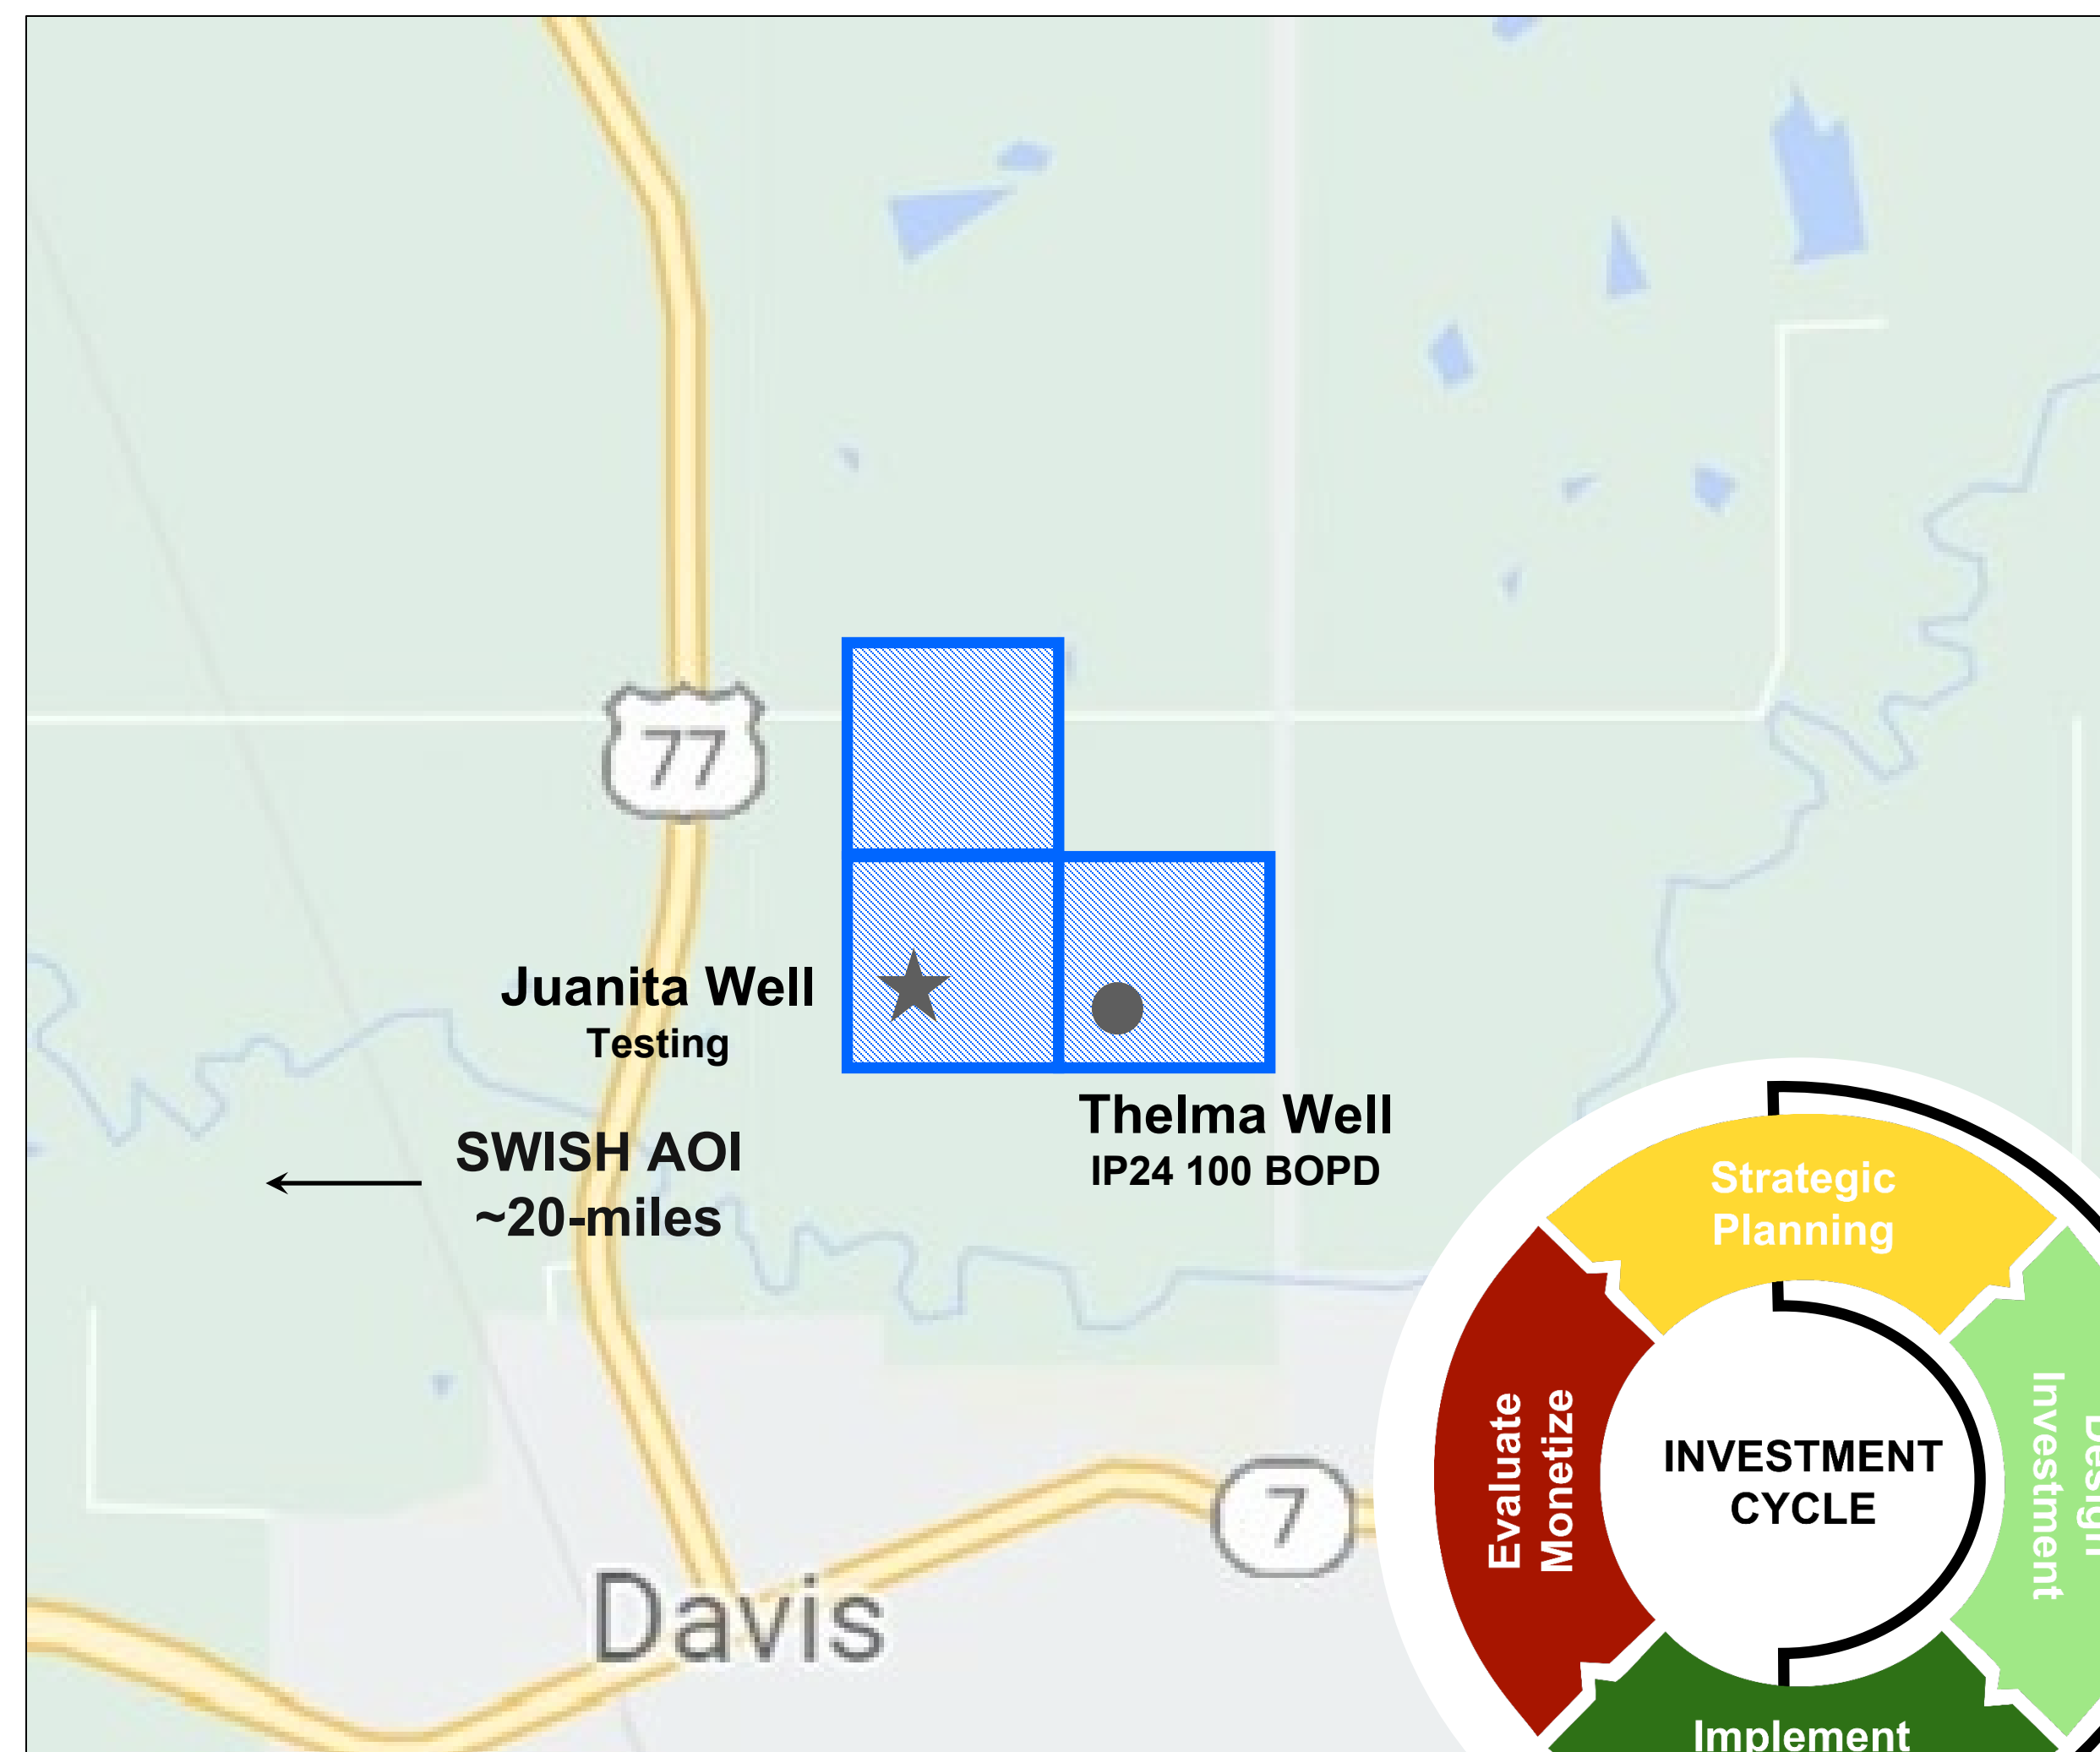

## 2 Bradbury AOI – Ardmore Basin / Arbuckle Uplift

### Prospecting and proving-up

- Newly established area of interest (**AOI**) in Murray County, located 20 miles east-northeast of SWISH AOI
  - Three DSU controlled (~80% working interest in each 40-acre unit)
- Opportunity to exploit by-passed or overlooked pay with **low-cost vertical wells**
- Juanita Well has been drilled with **389 feet of net pay discovered across multiple primary, secondary and tertiary reservoirs**. Surface facilities now under construction in preparation for production testing program
- Mean cumulative production from vertical wells in the AOI is **~130,000 barrels per well, including a 744,000-barrel producer less than a mile east of Juanita Well**
- Second well location identified with operations to be fast-tracked pending results from Juanita Well

# 2-Year Annotated Energy Prices

# 2022 Full Year Financial Results

## Transformational year for Brookside

- **Gross production for FY22 of 613.5k BOE**, increasing from 131.9k BOE in FY21, representing **+365% y/y growth**
- **Strong revenue growth**, increasing from A\$12.6m in FY21 to A\$53.0 in FY22, representing **+321% y/y growth**
- **Record net profit of A\$15.1m in FY22**, compared to net loss in FY21 of (A\$2.6m)
- **Grew acreage position by 41% year on year to ~4,615 Working Interest leasehold acres**
- Completed Held-By-Production (HBP) program in the ① SWISH AOI
- Kicked off Phase Two Development Program by drilling the Wolf Pack Well in the **Rangers DSU**
- **Recently drilled Wolf Pack Well has produced in excess of 140,000 BOE in less than three months, generating in excess of US\$7.9 million in gross revenue at current prices**
- Spudded the Juanita Well, first well in the newly formed Bradbury AOI with very **encouraging early results**, including oil shows and elevated gas readings in logs. **Production testing currently underway**

	Unit	y/y (%)	FY22 <sup>1</sup>	FY21
<b>Gross production</b>	BOE ('000)	<b>+365%</b>	613.5	131.9

# Certified Reserves Report

## Strong Maiden Reserve Report with ~11.9 MMBOE (2P)

### Net Reserves at 31 December 2022

- ~11.9 million barrels of oil equivalent, classified as **Proved and Probable Reserves (2P)**
- These 2P Reserves are Net Reserves (net of royalties), in relation to Brookside's Working Interest in <sup>1</sup> SWISH AOI
- **Net Reserves exclude the volumes attributable to acreage acquired in future pooling, equal to ~20% of the current Net Reserves**, or from results from ongoing production testing in the Bradbury AOI

	Oil (Barrels)	NGL (Barrels)	Gas (Mcf)	BOE
<b>Proved Producing</b>	348,815	292,757	2,553,440	1,067,145
<b>Proved Non-Producing</b>	227,807	121,571	846,616	490,481
<b>Proved Undeveloped</b>	757,726	601,878	4,679,501	2,139,521
<b>Total Proved (1P)</b>	1,334,348	1,016,206	8,079,557	3,697,147
<b>Probable</b>	2,267,134	2,689,086	19,281,826	8,169,858
<b>Total Proved Plus Probable (2P)</b>	3,601,482	3,705,292	27,361,383	11,867,005

**Oil and NGL represent ~68% of total Reserves across the first 5 years**

Reserves Cautionary Statement, Oil and gas reserves and resource estimates are expressions of judgment based on knowledge, experience, and industry practice. Estimates that were valid when originally calculated may alter significantly when new information or techniques become available. Additionally, by their very nature, reserve and resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional drilling and analysis, the estimates are likely to change. This may result in alterations to development and production plans which may, in turn, adversely impact the Company's operations. Reserves estimates and estimates of future net revenues are, by nature, forward looking statements and subject to the same risks as other forward looking statements. Brookside confirms that it is not aware of any new information or data that materially affects the information included in the market announcement dated 26 April 2023 "SWISH AOI Independent Reserves Certification" and that all the material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

#### Notes :

1. Net Reserves economics were estimated using a flat oil price of US\$93.67/BBL and flat natural gas price of \$6.36/MMBTU. Prices used are as per the United States Securities and Exchange Commission (SEC) stated rule for the purpose of determining reserves and estimated future net income. The price used is the average price on the NYMEX WTI for oil and NYMEX Henry Hub for natural gas during the 12-month period up to 31 December 2022 determined as an unweighted arithmetic average of the first day-of-the-month price for each month within such period for that oil and gas.
2. 1 AUD = 0.67 USD.

# Project Economics and Key Sensitivities

# APPENDIX

**Completion Operations Underway**  
Jewell Well, Carter County, Oklahoma  
August 2021

# Glossary

APO WI	After pay-out working interest
AFIT	After Federal Income Tax
AOI	Area of Interest
BBL	Barrel
BFIT	Before Federal Income Tax
BOE	Barrels of Oil Equivalent
BOEPD	Barrels of Oil Equivalent Per Day
BOPD	Barrels of Oil Per Day
BPD	Barrels Per Day
COPAS	Council of Petroleum Accountants Societies
Development Unit or DSU	Development Unit or drilling spacing unit is the geographical area in which an initial oil and/or gas well is drilled and produced from the geological formation listed in a spacing order. The spacing unit communitizes all interest owners for the purpose of sharing in production from oil and/or gas wells in the unit. A spacing order establishes the size of the unit; names the formations included in the unit; divides the ownership of the unit for the formations into the “royalty interest” and the “working interest;” Only one well can be drilled and completed in each common source of supply. Additional wells may be drilled in a Development Unit, but only after an Increased Density Order is issued by the Oklahoma Corporation Commission.
EUR	Expected Ultimate Recovery
Force Pooled	The Oklahoma Corporation Commission is authorized to establish well spacing and drilling units covering any common source of supply of hydrocarbons, or any prospective common source of supply. Once the unit is established, the Commission can force pool the interests of all the owners who own interests in that unit and who have not voluntarily joined in the development of that unit.
HBP	Held By Production
IP 24, 30, 90	Initial Production 24 hours, 30 days, 90 days
IRR	Internal Rate of Return
LOE	Lease Operating Expense
MBOE	1,000 barrels of oil equivalent
Mcf	1,000 cubic feet
MMBOE	1,000,000 barrels of oil equivalent
MMbtu	1,000,000 British Thermal Units
NPV <sub>10</sub>	The net present value of future net revenue before income taxes and using a discount rate of 10%.
NRI	Net Revenue Interest
Pay-out	The point after start of production at which all costs of drilling and completing a well have been recovered from production from that well.
PDP	Proved Developed Producing Reserves
Pooling Agreements	The pooling agreements facilitate the development of oil and gas wells and drilling units. These binding pooling agreements are between the Company and the operators
Prospective Resource	Prospective Resources are those quantities of petroleum which are estimated, on a given date, to be potentially recoverable from undiscovered accumulations.
PUD	Proved Undeveloped Reserves
Reserve Categories	<p>These reserve categories are totalled up by the measures 1P, 2P, and 3P, which are inclusive of all reserve types:</p> <ul style="list-style-type: none"><li>• "1P reserves" = proven reserves (both proved developed reserves + proved undeveloped reserves).</li><li>• "2P reserves" = 1P (proven reserves) + probable reserves, hence "proved AND probable."</li><li>• "3P reserves" = the sum of 2P (proven reserves + probable reserves) + possible reserves, all 3Ps "proven AND probable AND possible."</li></ul>
STACK	Sooner Trend Anadarko Basin Canadian and Kingfisher Counties – oil and gas play in the Anadarko Basin Oklahoma
SCOOP	South Central Oklahoma Oil Province - oil and gas play in the Anadarko Basin Oklahoma
SWISH AOI	Description of Brookside’s Area of Interest in the SCOOP Play
Working Interest	Percentage of ownership in a lease granting its owner the right to explore, drill and produce oil and gas from a tract of property. Working interest owners are obligated to pay a corresponding percentage of the cost of leasing, drilling, producing, and operating a well or unit
WTI	West Texas Intermediate (WTI) crude oil
Working Interest	Percentage of ownership in a lease granting its owner the right to explore, drill and produce oil and gas from a tract of property. Working interest owners are obligated to pay a corresponding percentage of the cost of leasing, drilling, producing, and operating a well or unit
