FY23 RESULTS

IMPORTANT NOTICE

This document may contain forward looking statements including plans and objectives. Do not place undue reliance on them as actual results may differ, and may do so materially. They reflect Catapult's views as at the time made, are not guarantees of future performance and are subject to uncertainties and risks, such as those described in Catapult's most recent financial report. Subject to law, Catapult assumes no obligation to update, review or revise any information in this document.

Catapult changed its financial year end from June 30 to March 31, with a nine-month transitional FY21 consisting of an interim period ended December 31, 2020 and a final period ended March 31, 2021. Catapult also changed its presentation currency from A\$ to US\$, which commenced with reporting in US\$ for the six-month period ended December 31, 2020. Catapult also acquired SBG on July 1, 2021. This document sets out pro forma information solely for the purpose of illustrating the effects of the acquisitions (including SBG) and these changes on certain historical financial results.

The financial information denoted as "Pro forma including acquisitions" in this document is pro forma and does not form part of Catapult's FY23 financial results. The pro forma financial information which is "Pro forma including acquisitions" is, as applicable, either a 6-month period ended September 30, or a 12-month period ended March 31, on the basis that the Company acquired all relevant acquired entities on April 1, 2018. All pro forma financial information has been compiled from management accounts. Because of its hypothetical nature, the pro forma information may not give a true picture of a relevant comparison. Subject to law, Catapult assumes no obligation to update, review or revise the pro forma information.

The financial information denoted as "Pro forma including acquisitions" has not been independently audited or reviewed. Financial information denoted as, or in columns headed, "Mar 21", "Mar 22", "Mar 23", "Sep 20", "Sep 21", "Sep 22" is, for each respective month and unless otherwise specified, point in time information which is calculated as at the last day of that month. Such point in time financial information, except for the "Mar 21", "Mar 22", "Sep 21", "Sep 22", and "Mar 23" balance sheets, has not been independently audited or reviewed.

ACV is calculated using an average exchange rate to US\$ over a 1-month period ending on the effective calculation date. ACV calculated on a "constant currency" or "(CC)" basis is calculated using an average exchange rate to US\$ over a 1-month period ending on March 31, 2022. A reference to ACV growth and ACV (YoY) growth (including on a constant currency basis) for a relevant year is, unless otherwise specified, a reference to, respectively: (i) ACV calculated as at September 30 or March 31 of that year, or any other specified date; and (ii) the quotient of (x) the ACV calculated as at the relevant date for that year; divided by (y) the ACV calculated as at the date which is 12-months earlier than the date in (x), expressed as a percentage.

While Catapult's results are reported under IFRS, this document also includes non-IFRS information such as the pro forma information referred to above, EBITDA, underlying EBITDA, Gross Margin, Contribution Margin, free cash flow, Annualized Contract Value (ACV), ACV Churn, Lifetime Duration (LTD), and Future Revenue Under Contract (FRUC). These measures are provided to assist in understanding Catapult's financial performance. They have not been independently audited or reviewed, and should not be considered an indication of, or an alternative to, IFRS measures. Financial information attributed to a segment in the Appendix 4E dated the date of this document may be presented in a different classification, or split between one or more classifications, in this document.

The information in this document is for general information purposes only, and does not purport to be complete. It should be read in conjunction with Catapult's other market announcements. Readers should make their own assessment and take professional independent advice prior to taking any action based on the information.

Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided and percentages may not precisely reflect the presented figures.

All financials are in US\$ unless otherwise indicated.

FY23 RESULTS

VARIABLE COSTS IMPROVED BY US\$8.3M AND IS NOW 56% OF REVENUE

- S&M costs expected to improve with go-to-market efficiencies
- Delivery costs expected to rise slower than revenue as product improves
- COGS should decrease with product sales mix

Percentages do not include Non-Cash Employment Costs. Delivery is externally recorded roughly 1:2 between S&M (customer success) and G&A (support; supply chain). Rev Ops is externally recorded in G&A not S&M.

FY23 RESULTS

FIXED COSTS IMPROVED BY US\$3.6M AND IS NOW 47% OF REVENUE

- The absolute cost of G&A can now support the business at scale and is expected to rise modestly
- The absolute cost of R&D can deliver our organic growth plan and is expected to rise modestly

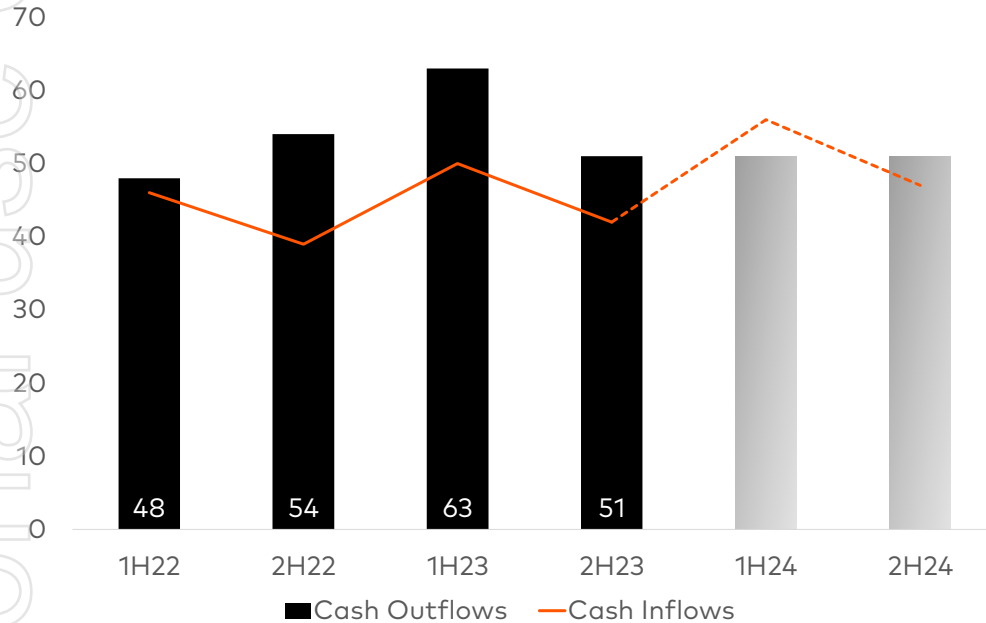

Percentages do not include Non-Cash Employment Costs. Delivery is externally recorded roughly 1:2 between S&M (customer success) and G&A (support; supply chain). Rev Ops is externally recorded in G&A not S&M. R&D includes non-capitalized component (externally in G&A).

FY23 RESULTS

ON PLAN TO DELIVER POSITIVE FREE CASH FLOW IN FY24

Free Cash Flow* Elements (US\$M)

- H2 cash outflows dropped by US\$12M and are well contained
- 1H23 would have been borderline FCF+ on 2H23 cash outflows
- Despite seasonality, H2 had multiple positive FCF months
- Cash inflows have grown inline with SaaS growth
- We expect to be FCF+ in FY24 based on these dynamics
- Total FY24 operating and investing cash inflows would need to grow by 9.8% to breakeven based on 2H23 cash cost run rate

*Excluding Acquisitions

Important notice: The financial information in this slide is provided solely to illustrate the necessary percentage operating and investing cash inflow growth required to achieve free cash flow neutrality on the same cost base as 2H23. The information is not, and must not be relied upon as, a statement or estimate of Catapult's current financial performance; a forecast of or guidance as to Catapult's future financial performance, condition or prospects; or an indication of Catapult's views regarding any of the foregoing.

FY23 RESULTS

WE ARE AT AN INFLECTION POINT

Exiting our growth investment phase we anticipate that every additional \$1 of revenue generates ~30%+ of profit margin

	FY23 H2 Annualized	Increment Example	Hypothetical Case
Revenue (US\$M)	86	14	100
Variable Costs (COGS, S&M, Delivery)	48	8	56
Variable Costs %	56%		56%
Fixed Cost	40	2	42
Fixed Costs %	47%		43%
Operating Margin	-3%		+1%
Incremental Profit		4	
Incremental Profit Margin		~30%	

Further leverage exists as variable costs improve towards long term targets

Fixed costs base is now established to support scale & expected to grow ~5% per year from here

Important notice: The financial information in this slide is provided solely to provide an example of how incremental revenue drives incremental profit under assumptions. The information is not, and must not be relied upon as, a statement or estimate of Catapult's current financial performance; a forecast of or guidance as to Catapult's future financial performance, condition or prospects; or an indication of Catapult's views regarding any of the foregoing.

FY23 RESULTS

COGS CAPITALIZATION UPDATE

- Following the move from Capital to Subscription sales (January 2021), "COGS" costs from wearable hardware sales has been recorded in depreciation
- A small portion (approx. 1% of gross margin) remained in COGS relating to "hotswap units" (used mainly for servicing/replacement obligations for legacy Capital deals) and expensed in full
- With the legacy of Capital largely behind us, most hotswap costs are now associated with Subscriptions, and hence these hotswap "COGS" costs are now recorded in depreciation
- The impact on 2H23 gross margin is positive 2.7% or \$1.2M
- The analysis in this presentation has included this benefit

- On a CC basis, Revenue increased 14% driven by growth in SaaS revenue of 21.8%, capital revenue was down 20% (as the Company fully transitioned to SaaS), and Media & Other revenue staying relatively flat.
- Gross margins improved due to cost normalization in the second half and product mix.
- Variable costs for FY23 were 11% higher than FY22 due to accelerated investment program in 1H23 before restructure in September.
- The gross margin improvement outweighed the negative variable cost variance resulting in a contribution margin improvement YoY.
- Fixed costs were relatively flat YoY.
- The D&A increase reflects our subscription model switch from capital sales, as well as 3 months more of SBG-related amortization (purchased July 2021).

- Revenue was 3.0% higher in 2H, with capital revenue down 56% and SaaS Subscription revenue up 9% (\$2.9M) as a result of increasing ACV.
- Gross margin improved due to product mix (high volume of low margin capital deals in 1H), and a COGS capitalization benefit of \$1.2M in 2H.
- Variable costs were 24% lower in 2H after the restructure at the end of 1H.
- Consequently, contribution margin improved by 55.0%.
- Fixed costs also saw a dramatic improvement, being 18% down in 2H following the restructure. (Including the move in SBG purchase consideration fixed costs improved 26%).
- EBITDA improved \$15.4M, to be positive in 2H (for the first time in 2 years as accelerated investment program ended).
- D&A was slightly higher due to the capitalization and subsequent depreciating of hotswap wearable units.

FY23 RESULTS

OUTLOOK

Our objective is to deliver on our strategic priorities with a focus on cash generation while preserving growth opportunities in the medium/long term. In FY24, we expect:

- ACV growth to remain strong with low churn
- Continued improvement in cost margins towards our long-term targets
- To be Free Cash Flow positive in FY24 without the need to raise equity capital

Important Note: ACV (and growth calculations relating to the same) in this slide (i) has been calculated as at March 31 or September 30 (as applicable) of the relevant year and using the methodology further described in slide 2; and (ii) is pro forma and calculated on the basis that the Company acquired all relevant acquired entities on April 1, 2018. Subscription revenue growth rates have been calculated on a constant currency basis using revenue recognized in each month of that period translated to US\$ using a 1-month average exchange rate ending on the date which is 12-months prior to the end of that month. ACV growth rates and subscription revenue growth rates are calculated on a constant currency basis and translated to US\$ using a 1-month average exchange rate ending on March 31, 2022. Revenue for FY20 and FY21 (and growth calculations relating to the same) is pro forma solely to enable a comparison between the 12-month FY22 and FY23 and the combined audited financial statements for the nine-month period ended March 31, 2021 and the unaudited management accounts for the three-month period ending June 30, 2020. ACV (and growth calculations relating to the same), subscription revenue growth, and financial information relating to FY20 and FY21 in this slide have not been independently audited or reviewed, and do not form part of Catapult's FY23 financial results.
