

# KEY CONSTRUCTION APPROVALS AND APPOINTMENTS

## *Update on Construction Activities, Off-take and Funding*

**Minbos Resources Limited (ASX:MNB) ("Minbos" or "the Company")** is pleased to provide an update on the progress of its Cabinda Phosphate Project (the Project).

### Highlights

- Key environmental approval licences received for construction activities at the Project.
- Approvals confirm that the Project has met all environmental formalities and processes related to the installation and construction of mining and processing facilities.
- The Company is pleased to announce three key appointments to its executive team:
  - **Steve Abbott - Chief Operating Officer**  
Mr Abbott has joined full time and is a highly regarded mining executive with more than 30 years' experience in senior international and resource sector roles. He has proven technical and management experience at senior levels across exploration, mining, processing, metallurgy, maintenance, smelting, refining, infrastructure, approvals and stakeholder engagement.
  - **Rob Newbold - Chief Strategy & Marketing Officer**  
Mr Newbold has 20+ years' experience across the industrial, chemical and agribusiness sectors operating throughout Australia, Asia, NZ, and Europe. He was General Manager for Wengfu Australia Ltd, one of the leading suppliers of bulk fertilizer to Australia. Prior to that he held senior positions with Nufarm and Incitec Pivot. Rob will head up the Company's sales and marketing strategy in Angola.
  - **Asareh Mansoori - General Manager Operations**  
Ms Mansoori is a mining engineer with 15 years' experience within the Australian and International resource sector. She is the Company's senior in-country manager (Angola), responsible for the development and operation of the Cabinda Phosphate mine and processing plant. Asareh has specific experience in start up operations and Middle Africa.
- The Company is now well advanced in its offtake discussions with most of the Stage 1 production expected to be covered within current negotiations. The board anticipates making an announcement in relation to this shortly.
- Significant progress has been made on non-dilutionary funding (debt and/or prepayment) for a significant proportion of the outstanding capex for the Project, with negotiations expected to be finalised in August/September.

### Site Visit

In May 2023, the Board of Minbos travelled to Angola to inspect works at the Subantando and Cacata sites, home of the Cabinda Phosphate Project (Fig 1.).

The Board visited other important areas for the Company, including the Project office (Fig 3.), Field Trial locations (Fig 4.), and key sites for the Capanda Green Ammonia Project in Malange, including the Capanda Dam and the proposed Green Ammonia plant location (Fig 2.).

The visit coincided with the official opening of the Company offices in Luanda by the Secretary of State for Mineral Resources, Jânio Corrêa Victor.

The Minbos delegation was received by the Director of the Port of Lobito which is quickly gaining regional prominence as the linchpin for the Lobito Rail Corridor with US President Joe Biden recently supporting the development of the Lobito Corridor. Further, Mr Biden has confirmed that the US has already mobilized over \$30 billion in investments to date, with plans for further

investment in the future<sup>1</sup> citing the primary open access transportation infrastructure connecting the Democratic Republic of the Congo (DRC) and Zambia with global markets through Angola. The U.S. International Development Finance Corporation (DFC), under the rail consortium, is also currently conducting due diligence for a potential financing package of US\$250 million to finance the Lobito Atlantic Railway Corridor. This open access rail line would connect Lobito Port in Angola to the border of the DRC. Zambian Minister for Transport and Logistics Hon. Museba Frank Tayali described the move by President Biden as a “real time game changer in the region”.

The Board party also toured several Minbos Field trials and were joined by key consultants in Mr Rob Groot from the IFDC, and Mr Luis Prochnow from NPCT Brasil (Fig. 4).

In Huambo, the Minbos delegation was received by the Director of the Angolan Institute of Agronomic Investigations (IIA) which implemented all of our Field Trials and the Institute for Agricultural Development (IDA) which is responsible for delivering fertilizer to smallholder farmers in Angola.
