KKR CREDIT INCOME FUND (ASX:KKC)
Distribution Guidance for FY2024 and Cessation of Buy-Back

KKR Australian Investment Management Pty Ltd (the “Manager”) and The Trust Company (RE Services) Limited (the “Responsible Entity”) as responsible entity of the KKR Credit Income Fund (the “Trust” or “KKC”) wish to provide an update to investors in respect of the KKC on-market buy-back and provide distribution guidance for the financial year ending 30 June 2023 (“FY2024”).

Distribution Guidance FY2024

The Manager and Responsible Entity are pleased to provide guidance on the targeted distribution for the KKR Credit Income Fund for the financial year ending FY2024.

The targeted distribution is 1.67 cents per unit per month, or 20.0 cents per annum for FY2024. This represents an increase of 52% from the current 1.10 cents per unit per month, or 13.2 cents per annum.

This represents an annualised distribution yield of:

- 8.6% based on the NTA per unit of \$2.3308 as at 31 May 2023
- 10.8% based on the unit price of \$1.86 as at 31 May 2023.

The Manager expects KKC to benefit from increased yields and credit spreads in global credit markets, reflected in the higher income target for FY2024. The current yield on the underlying assets in the KKC portfolio as at 31 May 2023 is 10.2% p.a.

The targeted distribution assumes income levels based on current and future cash flow from the portfolio of assets and fees and costs related to managing KKC. The income forecasts have been derived using the Manager’s expectations of future market conditions, including interest rates, spreads, and currency hedging costs.

Buy-Back Update

The Responsible Entity advises that the buy-back has now ceased. The attached Appendix 3C – Notification of buy-back has been issued as a final notification of the KKC on-market buy-back and provides details in respect of the completed buy-back.

The Responsible Entity bought back \$100,402,836.05 of KKC units under the buy-back at a discount to the prevailing net tangible assets (NTA) of the Trust. Both the Manager and Responsible entity remain of the view that the KKC ASX traded unit price does not reflect the

For personal use only

fair value of the underlying assets held by the Trust and the current ASX traded unit price continues to reflect a trading discount to the NTA of the Trust.

The Manager believes that distributing income received from the Trust's investments and increasing the distribution yield is a more sustainable use of income going forward in place of buying back KKC units. The Manager will continue to investigate other alternatives with a view towards reducing the KKC trading discount.

The Manager is confident that KKC is well positioned to benefit from current market volatility. The underlying concentrated credit investment strategy (GCOF), which represents approximately 57% of the portfolio, has historically outperformed following credit market dislocations, while the European direct lending strategy (EDL), which accounts for the remaining 43% of the portfolio, is expected to have lower volatility and contribute to KKC's income.
