It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

Overseas shareholders

This Entitlement Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Entitlement Offer is not being extended and Shares will not be issued to Shareholders with a registered address which is outside Australia New Zealand, Germany, Malaysia, Singapore or Switzerland.

For further information on overseas Shareholders please refer to Section 2.10.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Shares.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.2 for further details.

Company Website

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Shares issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale

and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Photographs used in this Prospectus which do not have descriptions are for illustration only and should not be interpreted to mean that any person shown endorses the Prospectus or its contents or that the assets shown in them are owned by the Company. 2. Refer to Section 4 for the terms of the Shares.

1.3 Key Risk Factors

Prospective investors should be aware that subscribing for Shares involves a number of risks and an investment in the Company should be considered as highly speculative. The future performance of the Company and the value of the Shares may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are set out in Section 5.

1.4 Directors' Interests in Shares

The relevant interest of each of the Directors in the securities of the Company as at the date of this Prospectus, together with their respective Entitlement, is set out in the table below:

Director	Shares	Performance Rights	Entitlement	\$
Mr Luke Atkins	10,857,438	4,000,000	1,357,179	\$95,002
Mr Ignatius Tan	7,940,000	30,000,000	992,500	\$69,475
Mr Daniel Tenardi	5,594,915	4,000,000	699,364	\$48,955
Mr Peter Bailey	3,774,710	3,000,000	471,838	\$33,028
Mr Tunku Yaacob	92,655,251	3,000,000	11,581,903	\$810,733
Mr Uwe Ahrens	1,000,000	13,000,000	125,000	\$8,750
Mr Hansjoerg Plaggemars	-	4,000,000	-	-

The Board recommends all Shareholders take up their Entitlements. The Directors reserve the right to take up their respective Entitlement in whole or in part at their discretion.

1.5 Details of Substantial Holders

Based on publicly available information as at the date of this Prospectus, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue as at the date of this Prospectus are set out below:

Shareholder	Shares	%
Deutsche Balaton Aktiengesellschaft/ Delphi Unternehmensberatung Aktiengesellschaft	233,933,950	16.40%
Melewar Equities (BVI) Limited & MAA Group Berhad	105,663,348	7.41%

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Entitlement Offer.

If all Eligible Shareholders take up their Entitlements, the issue of Shares under the Offer will have no effect on the control of the Company and all Shareholders will hold the same percentage interest in the Company, subject only to changes resulting from Ineligible Shareholders being unable to participate in the Offer.

However, if not all Shareholders take up their Entitlements then changes to the ownership interests of the Company could occur as a result of Eligible Shareholders applying for any Shortfall or the Underwriter being required to subscribe for that Shortfall Shares. Refer to Sections 1.7 and 1.8 for further details.

1.6 Underwriting

The Entitlement Offer is partially underwritten by the Company's major shareholders, Deutsche Balaton Aktiengesellschaft and Delphi Unternehmensberatung Aktiengesellschaft (companies incorporated under the laws of Germany who are associates of one another for the purposes of section 606 of the Corporations Act) (together, the **Underwriters** or **DB&D**), up to \$6,700,000 (which includes taking up their Entitlement under the Entitlement Offer).

Refer to Section 6.4.1 for details of the terms of the underwriting.

1.7 Effect on Control

DB&D are presently the Company's major shareholder and are not a related party of the Company for the purposes of the Corporations Act. However, as DB&D's current voting power exceeds 10% and they have nominated a Director to the Board (Mr Hansjoerg Plaggemars), they fall under Listing Rule 10.11.3. As a result, the Company cannot ordinarily issue securities to DB&D without Shareholder approval. In this instance, there are exceptions available under ASX Listing Rule 10.12 that permit DB&D to take up of its Entitlement (Exception 1 of ASX Listing Rule 10.12) and subscribe for Shortfall Shares pursuant to its underwriting commitment (Exception 2 of ASX Listing Rule 10.12).

The table below sets out the DB&B's voting power in the Company as at the Record Date and the potential increase to its voting power under several scenarios relating to the percentage acceptance of Entitlements under the Entitlement Offer.

Event	Number of Shares held by the Underwriter and its associates ¹	Voting power of the Underwriter
As at the Record Date	233,933,950	15.92%
100% take up	263,175,694	15.92%
75% take up (including the Underwriters taking up their full Entitlement)	309,101,413	18.70%
50% take up (including the Underwriters taking up their full Entitlement)	329,648,236	20.25%
25% take up (including the Underwriters taking up their full Entitlement)	329,648,236	20.84%
15.92% take up from Eligible Shareholders (being the Underwriters Entitlement)	329,648,236	21.06%

The underwriting obligation and therefore voting power of the DB&D will reduce for the amount of Entitlements accepted under the Entitlement Offer and Shortfall Shares allocated to parties other than the DB&D. As set out in this Prospectus, Eligible Shareholders are invited to apply for any Shortfall. It is therefore not expected that DB&D would achieve the maximum voting power described above.

Despite having a representative on the Company's Board, there is no scenario by which DB&D would be able to exercise effective control over the Company as a result of underwriting the Offer.

The Company, in consultation with the Underwriters, will ensure that the Entitlement Offer (including the equitable dispersion of any Shortfall Shares) complies with the provisions of Chapter 6 of the *Corporations Act 2001* (Cth) and is otherwise consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

To the extent that the Underwriters' voting power would increase beyond 20% as a result of its partial underwriting of the Offer, such Shares will be issued pursuant to the "underwriting exception" in item 13 section 611 of the Corporations Act.

1.8 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.7, Shareholders should note that if they do not participate in the Entitlement Offer, their holdings are likely to be diluted by approximately 11.11% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Entitlement Offer	Holdings if Entitlement Offer not taken Up	% post Entitlement Offer
--------	---------------------------	------------------	--	--	--------------------------

Shareholder 1	10,000,000	0.67%	1,250,000	10,000,000	0.60%
Shareholder 2	5,000,000	0.33%	500,000	5,000,000	0.30%
Shareholder 3	1,500,000	0.10%	150,000	1,500,000	0.09%
Shareholder 4	400,000	0.03%	40,000	400,000	0.02%
Shareholder 5	50,000	0.003%	5,000	50,000	0.003%

Notes:

1. This is based on 1,426,765,869 Shares currently on issue plus 42,857,143 Shares issued under the Placement prior to the Record Date and assumes no other Shares are issued.
2. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Entitlement Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

The Company shall not be responsible for any delay in the receipt of the EFT payment.**

Guidance where you have more than one Payment Reference (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the Payment Reference specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same Payment Reference for more than one of your Shareholdings.** This can result in your Application monies being applied to only one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(c) By Cheque

Payment by cheque or cash will not be accepted.

2.5 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any Application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

2.6 Minimum subscription

The minimum subscription in respect of the Entitlement Offer is \$6,700,000, being the partially underwritten amount of the Entitlement Offer.

No Shares will be issued until the minimum subscription has been received. If the minimum subscription is not achieved within 4 months after the date of issue of this Prospectus, the Company will either repay the Application monies to the Applicants or issue a supplementary prospectus or replacement prospectus and allow Applicants one month to withdraw their Application and be repaid their Application monies.

2.7 Shortfall Offer

Any Entitlement not taken up pursuant to the Entitlement Offer will form the Shortfall Offer. (**Shortfall Shares**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.07 being the price at which Shares have been offered under the Entitlement Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Entitlement Offer.

Eligible Shareholders who wish to subscribe for Shares above their Entitlement are invited to apply for Shortfall Shares under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Shares in accordance with Section 2.4.

Allocation of the Shortfall Shares will be at the discretion of the Board in conjunction with the Underwriters and will otherwise be subject to the terms of the Underwriting Agreement, details of which are set out in Section 6.4.1. If the Offer is oversubscribed (by take up of Entitlements and applications for Shortfall Shares by Eligible Shareholders), scale back will be applied to applications under the Shortfall Offer on a pro-rata basis to the respective shareholdings of Eligible Shareholders (having regard to the amount of Entitlement subscribed for by each Eligible Shareholder). There is no guarantee that Eligible Shareholders will receive Shares applied for under the Shortfall Offer.

No Securities will be issued to an applicant (including to the Underwriters) under this Prospectus or via the Shortfall Offer if the issue of Securities would contravene the takeover prohibition in section 606 of the Corporations Act (unless an applicable exception applies). Similarly, no Securities will be issued via the Shortfall Offer to any related parties of the Company. To the extent that the Underwriters' voting power would increase beyond 20% as a result of its partial underwriting of the Offer, such Shares will be issued pursuant to the "underwriting exception" in item 13 section 611 of the Corporations Act.

2.8 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the

For personal use only

expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

2.9 Issue of Shares

Shares issued pursuant to the Entitlement Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Shares issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Shares issued is less than the number applied for, or where no issue is made surplus Application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Shares or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Shares issued under the Entitlement Offer will be mailed as soon as practicable after the issue of Shares and for Shortfall Shares issued under the Shortfall Offer as soon as practicable after their issue.

3. PURPOSE AND EFFECT OF THE OFFER

3.1 Purpose of the Entitlement Offer

On completion of the Entitlement Offer, the Board believes the Company will have sufficient working capital to achieve its stated objectives. In the event the Entitlement Offer is not fully subscribed, operational objectives are likely to be modified, which may result in delay or substantial changes to the Company's future plans.

The above table is a statement of current intentions as of the date of this Prospectus. As with any budget, intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

1. A portion of the carrying value shown for 'Property, plant and equipment' as well as 'Right-of-use assets', and the entire carrying value shown for 'Development Expenditure', relates to the Group's Malaysian HPA Plant that is part way constructed, and currently on care and maintenance. The Company requires further capital in order to complete the plant. Should the Company not be successful in raising sufficient additional capital, the plant will not be constructed in full. Should this occur, the carrying value shown will not be realised.
2. A portion of the carrying value shown for 'Property, plant and equipment' as well as 'Right-of-use assets', and the entire carrying value shown for 'Development Expenditure', relates to the Group's Malaysian HPA Plant. The Board of Directors, as part of the Group's audited financial report for the year ended 30 June 2023, is required to assess these assets for impairment. As part of this process, the Group has undertaken a professional independent valuation of the land and buildings that comprise the Malaysian HPA Plant, and the valuation provided is materially less than the carrying value shown. The Board will consider the independent valuation as part of its assessment for impairment. Should the Board determine that the assets in relation to the Malaysian HPA Plant are impaired for the purposes of the audited financial report for the year ended 30 June 2023, a provision for impairment or permanent writedown in the carrying value of the assets will be required. Should this occur, the carrying value shown will not be realised.

4. RIGHTS AND LIABILITIES ATTACHING TO SHARES

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

Access to capital risk	<p>The Company' business and, in particular, its development of a large-scale project, relies on access to debt and equity financing. There is a risk that the Company may not be able to access capital from these markets, which would impact the ability to develop its projects and achieve its business objectives.</p> <p>Further, the Company, in the ordinary course of its operations and developments, is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.</p> <p>Loan agreements and other financing rearrangements such as debt facilities, convertible note issue and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by the Company or default under a finance lease could also result in the loss of assets.</p>

Risk Category	Risk
	<p>The Company is exposed to risks associated with its financial instruments (consisting of cash, receivables, accounts payable and accrued liabilities due to third parties from time to time). This includes the risk that a third party to a financial instrument fails to meet its contractual obligations; the risk that the Company will not be able to meet its financial obligations as they fall due; and the risk that market prices may vary which will affect the Company's income.</p>
<p>General regulatory risks</p>	<p>The Company' business is subject to, in each of the countries in which the Company operates, or may operate, various national and local laws and regulations relating to the mining, production, marketing, pricing, transportation and storage of the Company's products and/or residues. Permits from a variety of regulatory authorities may be required for aspects of the Company's operations. Many of those permits may be subject to conditions, and a change in the conditions attaching to those permits, or the imposition of new conditions, that could have a material adverse effect on the Company's proposed business and financial condition. A change in the laws which apply to the Company's business or the way in which it is regulated could also have a material adverse effect on the Company's business and financial condition. Other changes in the regulatory environment (including applicable accounting standards) may have a material adverse effect on the carrying value of material assets or otherwise have a material adverse effect on the Company's business and/or financial condition.</p>
<p>Environmental risks</p>	<p>The Company's possible future mine development and processing program will, in general, be subject to approval by governmental authorities. Development of any of the Company's properties will be dependent on the Project meeting environmental guidelines and, where required, being approved by governmental authorities and the possible future activities of the Company may be subject to extensive laws and regulations controlling not only the mining of, exploration for and processing of mineral properties, but also the possible effects of such activities upon the environment and interests of local communities. In the context of obtaining environmental permits, including the approval of reclamation plans, the Company must comply with known standards, existing laws and regulations which may entail greater or lesser costs and delays depending on the nature of the activity to be permitted and how stringently the regulations are implemented by the permitting authority. With increasingly heightened government and public sensitivity to environmental sustainability, environmental regulation is becoming more stringent, and the Company could be subject to increasing environmental responsibility and liability, including laws and regulations dealing with air quality, water and noise pollution or other discharges of materials into the environment, plant and wildlife protection, the reclamation and restoration of certain of its properties, greenhouse gas emissions, the storage, treatment and disposal of wastes or the effects of its business on the water table and groundwater quality.</p> <p>Sanctions for non-compliance with these laws and regulations may include administrative, civil and criminal penalties, revocation of permits and corrective action orders. These laws sometimes apply retroactively. In addition, a party can be liable for environmental damage without regard to that party's negligence or fault.</p>

Risk Category	Risk
Economic risks	Economic factors beyond the control of the Company, such as changes in commodity prices, interest rates, inflation, exchange rates and taxation, may negatively impact on the revenue and profitability of the Company.
Additional requirements for capital	The Company's capital requirements depend on numerous factors. The Company will require further financing in addition to amounts raised under this Entitlement Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its planned construction and development programs as the case may be.
Political (Malaysia) risk	<p>The Company's HPA plant operates in Malaysia.</p> <p>The fragility of the incumbent Malaysian federal coalition government has not, as yet, transpired into radical policy or regulation change, however risks remain that a change in political leadership could bring about policy and regulatory changes in the future, that may affect the Company and its planned HPA plant. Hence, there is no assurance that any unfavourable developments or change in the political and economic situation in Malaysia would not adversely affect the Company's ability to conduct business in the country.</p>
Climate risk	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <ul style="list-style-type: none"> (a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and (b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

5.3 Industry specific

Risk Category	Risk
Customer and market acceptance	Many customers have long term supply agreements in place with their battery supplier. It is probable that a potential customer would require time to test new batteries in their end-user products, negotiate new agreements, machine up to manufacture new batteries, potentially adapt their products to work with the new battery and utilise their current battery stock. As a result, despite the Company's battery design being successful there may be a considerable period of time before the Company generates revenues and cash inflows.
Specific design risk	The Company is researching and developing the use of HPA as a protective layer for lithium batteries, along with its Sodium Chloride Solid State battery (R&D Products). The use of the R&D products are not yet comprehensively tested and verified and the Company may not be able to develop a commercial lithium-sulphur battery that is more competitive to other existing batteries in use.
Competitors	Many potential competitors operate their own manufacturing facilities, have a long history of operations, presence in key markets, large customer bases, brand recognition, significant resources dedicated to research and technology and product development and access to financial resources. These customers may be able to adapt more quickly to new or emerging technologies, changes in customer requirements and may have greater resources committed to the research sales and marketing of their technologies and products. They may have or may establish financial or strategic relationships with existing customers, resellers or other third parties. As a result, competitors may develop new technologies or better position themselves to compete resulting in pricing pressures, decreased gross margins and loss of market share which could materially adversely affect the Company's business, financial condition and the results of its operations.
Patent applications	<p>The Company holds a combination of granted patents as well as pending applications and acknowledges that its prospect of obtaining patent protection for products and the technology such as those proposed under the patent applications is uncertain and involves complex and continually evolving factual and legal questions with such questions potentially impacted by legislative and judicial changes, or changes to examination guidelines in relevant jurisdictions.</p> <p>There is a risk provisional patent applications may not proceed to granted patents or may not afford the Company adequate protection from competing products. Even if the Company succeeds in obtaining patent protection for its products, its patents could be wholly or partially invalidated following challenges by third parties.</p>
Operating and development risks	<p>The Company's ability to achieve production, development, operating cost and capital expenditure estimates on a timely basis cannot be assured.</p> <p>The Company's business involves many risks and may be impacted by factors including the overall availability of free cash to fund continuing development activities, labour force disruptions, cost overruns, changes in the regulatory environment and other unforeseen contingencies. Such occurrences could result in damage to, or destruction of, production facilities,</p>

Risk Category	Risk
	<p>personal injury or death, environmental damage, delays in production, increased production costs and other monetary losses and possible legal liability to the owner or operator of the project.</p> <p>In addition, the Company's profitability could be adversely affected if for any reason its production and processing of or project development is unexpectedly interrupted or slowed. Examples of events which could have such an impact include unscheduled plant shutdowns or other processing problems, mechanical failures, the unavailability of materials and equipment, unusual or unexpected rock formations, poor or unexpected geological or metallurgical conditions, poor water condition, interruptions to electricity supplies, human error and adverse weather conditions.</p>
Extraterritorial risks	<p>The Company has interests in assets overseas, namely Germany and Malaysia, and in that respect such assets are subject to risks particular to their extraterritoriality such as changes in laws, practices and policies in the relevant jurisdictions, including laws that deal with overseas investors. In particular, logistical difficulties may arise due to the assets being located overseas including the incurring of additional costs with respect to overseeing and managing the projects, including costs associated with taking advice in relation to the application of local laws as well as the cost of establishing a local presence in Germany and Malaysia.</p> <p>Changes to Germany or Malaysia's mining or investment policies and legislation or a shift in political attitude may adversely affect the Company's operations and profitability. It is not possible for the Company to accurately predict any developments or changes in laws or policy or to what extent any such developments or changes may have a material adverse effect on the Company's operations.</p>
Project development	<p>Possible future development of the Company's projects are dependent on a number of factors including but not limited to, receiving the necessary approvals from all relevant authorities and parties, unanticipated technical and operational difficulties, mechanical failure of equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.</p>
Fluctuation in commodity prices	<p>International factors such as inflation, exchange rates, supply and demand and political and economic events, amongst other things, impact on lithium prices, particularly in the current global economic market. As the Company is currently not in production, future revenue that may come from the sale of these mineral products and the Company's future profits are related to and influenced by the market price of lithium products.</p> <p>If the price of Sodium Chloride Solid State batteries or HPA seriously declines in the future, this will materially impact on the Company's ability to continue with its projects and the Company may be forced to discontinue some or all of its operations.</p> <p>The Company gives no assurance that the fluctuations in the commodity prices will not affect timing and viability of the projects</p>

Risk Category	Risk
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration and mining stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p> <p>In addition, the extent of the effects of COVID-19 is at this stage uncertain and continuing to evolve. The COVID-19 pandemic is having, and is expected to continue to have, a significant influence on the volatility of equity markets generally and may continue to impact and influence the value of the Company's quoted securities.</p>
Liquidity risk	<p>There can be no guarantee that there will always be an active market for the Company's shares or that the price of Shares will be maintained or increase. There may be relatively few buyers or sellers of shares on the ASX at any given time and the demand for the Company shares specifically is subject to various factors, many of which are beyond the Company's control. This may affect the volatility of the market price of Shares. It may also affect the prevailing market price at which the Company shareholders are able to sell their Shares. This may result in the Company's shareholders receiving a market price for their Shares that is less or more than the price paid pursuant to the Entitlement Offer (as applicable).</p>
Funding	<p>The Company's ability to effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds. The Company may seek to raise further funds through equity or debt financing, joint ventures, production sharing arrangements or other means.</p> <p>Further, the Company, in the ordinary course of its operations and developments, is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.</p> <p>Loan agreements and other financing rearrangements such as debt facilities, convertible note issue and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and</p>

Risk Category	Risk
	<p>other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by the Company or default under a finance lease could also result in the loss of assets.</p> <p>The Company is exposed to risks associated with its financial instruments (consisting of cash, receivables, accounts payable and accrued liabilities due to third parties from time to time). This includes the risk that a third party to a financial instrument fails to meet its contractual obligations; the risk that the Company will not be able to meet its financial obligations as they fall due; and the risk that market prices may vary which will affect the Company's income.</p>
Litigation risks	<p>The Company may be exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.</p>
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.</p>
Reliance on key personnel	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.</p>

5.5 Speculative investment

The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares.

Prospective investors should consider that an investment in the Company is highly speculative.

There is no guarantee that the Shares offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Shares.

Remuneration

The remuneration of an executive Director is decided by the Board, without the affected executive Director participating in that decision-making process. The total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director. The current amount has been set at an amount not to exceed \$500,000 per annum.
