## About Heavy Minerals Limited

Heavy Minerals Limited (ASX: HVY) is an Australian ASX listed industrial mineral exploration company.

The Company's projects are prospective for industrial minerals including but not limited to garnet, zircon, rutile and ilmenite. The Company's initial focus is the Port Gregory and Red Hill Garnet Projects in Western Australia. Port Gregory comprises a total JORC (2012) Measured, Indicated and Inferred Mineral Resource of 166 million tonnes @ 4.0% THM. This includes 5.9 million tonnes of contained garnet and 260 thousand tonnes of ilmenite<sup>4</sup>.

An Exploration Target has been defined for Red Hill using cut-off grades for reporting of 3% THM and 1% THM and ranging from 90 to 150 Mt of material @ 5.4% to 4.1% THM. The Exploration Target also contains between 5 and 6 Mt of THM and 3.8 and 4.5 Mt of garnet<sup>5</sup>. The potential quality and grade of the Exploration Target is conceptual in nature and there has been insufficient exploration activity to determine a Mineral Resource estimate and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

The Company's other project is the Inhambane Heavy Mineral Project in Mozambique which contains a ilmenite dominated JORC (2012) Inferred Mineral Resource of 90 million tonnes @ 3.0% Total Heavy Mineral<sup>6</sup>.
