

1. Company details

Name of entity:	RLF AgTech Ltd
ABN:	43 622 055 216
Reporting period:	For the financial year ended 30 June 2023
Previous period:	For the financial year ended 30 June 2022

2. Results for announcement to the market

	Note	30 June 2023 \$'000	30 June 2022 \$'000	% Change up/(down) from previous year
Revenues from ordinary activities		11,345	10,663	6.4%
Loss from continuing operations after tax attributable to the owners of RLF AgTech Ltd		(3,435)	(3,000)	(14.5%)
Loss for the year attributable to the owners of RLF AgTech Ltd		(3,962)	(3,539)	(11.9%)
Earnings before interest, tax and depreciation and amortisation (EBITDA)		(2,994)	(2,459)	(21.7%)

Note:

- During the financial year ended 30 June 2023, RLF AgTech Ltd's and its wholly owned subsidiaries ("the Group") Loss from continuing operations after tax attributable to the owners of RLF AgTech Ltd and the Group's loss for the year attributable to the owners of RLF AgTech Ltd contained additional expenditure relating to expansion, operational non-cash and one-off costs of \$2,021,000. The breakdown of the expenditure, operational non-cash and one-off costs incurred was:
 - Expansion costs related to development opportunities in other markets, research and development, and capital costs that are not able to be capitalised as an asset, and will contribute toward the development of potential future revenues (\$1,411,000);
 - Operational non-cash expenditure related to an impairment expense for historical costs associated with a minority shareholding in RLF Thailand, share based payments and a minor stock write off (\$389,000); and
 - One-off personal withholding tax for director Dr Mike (Lu) Sen and penalties (\$221,000).
- The loss for the year attributable to the owners of RLF AgTech Ltd includes the foreign currency translation reserve movement which was a loss of \$527,000 for 30 June 2023 (FY22: \$539,000).

3 to 6. Please refer to the financial statements on pages 3 to 19 prepared in accordance with ASX Listing Rule 4.3A and the disclosure requirements of ASX Appendix 4E.

7. Dividend payment

No dividends have been declared, provided for or paid in respect of the financial year ended 30 June 2023.

8. Dividend reinvestment plan

There are no dividend or distribution reinvestment plans in operation.

9. Net Tangible asset per share

The net tangible asset per share is 1.04 cents (30 June 2022: 3.33 cents)

10. Gain or loss of control over entities

There were no gain or loss of control over entities during the financial year ended 30 June 2023.

12. Foreign entities

The Group has applied the International Financial Reporting Standards to its wholly owned foreign entities.

13. Compliance statement

- 1 This report has been prepared in accordance with AASB Standards, other AASB authoritative pronouncements and Urgent Issues Group Consensus Views or other standards acceptable to ASX.
- 2 This report, and the +accounts upon which the report is based (if separate), use the same accounting policies.
- 3 This report does give a true and fair view of the matters disclosed.
- 4 This report is based on +accounts to which one of the following applies.
 - ☒ The +accounts are in the process of being audited or subject to review.

Print name: Kenneth Hancock

The Company has presented the Review of Operations for the financial year ended 30 June 2023 and section 3 to 6 of the Appendix 4E as follows.

REVIEW OF OPERATIONS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2023

Operating Result

The loss from continuing operations for the financial year ended 30 June 2023 after providing for income tax amounted to \$3,435,000 (FY22: Loss \$3,000,000).

Operational Highlights

- Record cash receipts of \$12.5 million, being an increase of 22% on FY22 cash receipts.
- Record revenues of \$11.3 million for the financial year, being an increase of 6% on FY22 revenues.
- Strengthened gross profit margin to 53% (FY22: 51%).
- Continued increased investment in the China operations with a rise in customer-facing staff of 35% reflecting commitment towards training and marketing of products and distribution.
- Navigated the unparalleled COVID restrictions in China that significantly impacted the related agricultural markets. Restrictions ended in the January 2023, enabling a refocus back to operational expansion in this large and highly valuable market.
- Established the Vietnam Representative Office as part of the South-East Asian distribution expansion strategy.
- Expanded distribution in South-East Asian region securing a 5-year \$8.8 million sales and purchase target agreement with Jardine Distribution Inc. ("Jardine") in the Philippines and 5-year \$3.3 million target sales and purchase target agreement with Cong Ty TNHH Kona Crop Science ("Kona") in Vietnam.
- Successfully developed Veridium's product formulation with the patent and trademark filing of the next generation of Seed Priming Technology. Continued investment in research and development of key Plant Proton Delivery Technology (PPD Tech) foliar products with the aim of further patent and trademark filings.

Carbon Highlights

- Launched the RLF Carbon business with the development of the Accumulating Carbon in Soil System (ACSS, pronounced ACCESS) methodology which is being used to commercialise farm based Australian Carbon Credit Unit (ACCU) generation at scale in the 23 million ha Australian grain market.
- Received approval from the Clean Energy Regulator (CER) for the first soil-based carbon project using the ACSS methodology (post balance date).
- Commenced a 5,000ha pilot program in the commercial farming grain market using ACSS methodology.
- Appointed industry specialists, Carbon West, to manage CER soil carbon registration and compliance processes.
- Negotiated a Strategic Carbon Alliance with the Commonwealth Bank of Australia where RLF AgTech receives prepayment for ACCUs for projects utilising the ACSS methodology. Refer to the ASX announcement dated 27 July 2023.

REVIEW OF OPERATIONS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2023 (CONTINUED)

OPERATIONAL HIGHLIGHTS

Continued demand for RLF products with increased sales and cash receipts

For the financial year ended 30 June 2023, the Group achieved record sales revenues (up 6%) and its highest increase in cash receipts (up 22%) respectively from the financial year ended 30 June 2022.

These positive results occurred despite the challenging and ever-changing international agricultural markets created by a convergence of unusual events, including conflict and ongoing pandemic impacts.

In the first half of the year, China our largest market by revenue was heavily impacted by COVID-19 where travel restrictions and lockdowns reduced overall economic activity and impacted the rate at which we were able to expand our sales and distribution base. This was followed by a rapid re-opening of the entire country that led to further market disruptions caused by high infection rates of the virus from October 2022 to January 2023. Difficult conditions were made worse for our distributor customers with rapidly falling commodity fertiliser and agri-chemical prices that compounded difficulties in already weak market conditions. Also our sales team hiring strategy for customer facing staff was negatively impacted by the COVID-19 travel restrictions and market conditions.

In evidence of the downturn in the agri-chemical market, several major players within the sector had seen revenues fall by \$0.7 billion to \$14.6 billion¹ in the last half of the financial year. Despite these unforeseen events, China is an essential global agricultural market, representing over 30% of the world's agricultural outputs and our commitment is steadfast on maintaining our focus on executing growth plans in China in more normalised market conditions.

REVIEW OF OPERATIONS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2023 (CONTINUED)

Figure 1 RLF's Cash receipts FY14 to FY23

This financial year also saw the sales business development team in Vietnam progress and execute on several key core business initiatives as we expanded global footprint into the nutrition markets in South East Asia. As a result, two new distribution agreements were executed with well established companies, being Jardine Distribution Inc. in the Philippines and KONA in Vietnam.

Expansion of RLF AgTech's distribution footprint in South East Asia

During the financial year, RLF AgTech received approval from the Vietnamese government for its Representative Office in Vietnam. The Company appointed Regional Manager Nhan (Frank) Lu as Authorised Representative responsible for in country operations and management of the Company's distribution network in Vietnam.

The Company signed a 5-year \$3.3M target sales and purchase distribution agreement with Cong Ty TNHH Kona Crop Science (KONA), a powerful extension of RLF's existing distribution in Vietnam. KONA joins current partner VINCO in distributing RLF products into the important Vietnam market and continues to provide support for the increasing demand for RLF products within the region.

The inauguration of the Vietnam office will enable the Company to provide the credentials to pursue emerging opportunities for growth in other South East Asian nations, including the Philippines, Cambodia, Thailand, and Malaysia.

The Company also entered into a sales and purchase target distribution agreement of \$8.8M with Taipan Brand Farms (TBFI), a wholly owned subsidiary of Jardine Distribution Inc., a significant conglomerate in the Philippines. Spanning a period of 5 years, this agreement enables TBFI to distribute RLF AgTech's crop nutrition products across the Philippines.

Cambodia sales growth has resulted in the Company expanding its support of distribution partner Total Agree where they increased in-field technical and RLF focussed sales support personnel to six people. The Company has also recently submitted seven RLF products for first-time product registration, now lodged with the Cambodia Department of Agriculture, which, once approved, will allow for new products to be sold in Country.

REVIEW OF OPERATIONS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2023 (CONTINUED)

Veridium™ – RLF's Global Seed Technology

During this period, the Company achieved the global release of Veridium™ the latest generation in seed priming technology. This new product is supported by breakthrough data showing how it significantly increases the nutrient status of the seed with only a minimal low-cost application of Veridium™, and demonstrates significant increases in yields across trials in wheat, maize, and rice.

Veridium™ represents an extension of the Company's research and development (R&D) program, and its firm commitment to develop leading technologies that can be used to reduce global fertiliser usage and increase yields and quality in the production of global food crops.

RLF is continuing to develop its technologies found in its broader suite of products.

CARBON HIGHLIGHTS

The Strategic Carbon Initiative

RLF AgTech achieved a significant milestone during the financial year with the launch of RLF Carbon, a wholly owned subsidiary of RLF AgTech, and the Strategic Carbon business framework.

RLF Carbon's business model is based on a proprietary methodology called Accumulating Carbon in Soil System (ACSS) which integrates the use of RLF product technologies in a new on-farm operating methodology, now approved by the Clean Energy Regulator.

ACSS is aimed to deliver carbon sequestration capabilities to Australian commercial grain growers, with the integration of RLF AgTech's products and the ACSS methodology into existing farmer practices to increase CO₂ captured and stored in soils with the potential to earn Australian carbon credit units (ACCUs).

ACSS uses the Company's Plant Proton Delivery Technology (PPD Tech) which means the commercial and financial benefits for participating farmers are from the potential:

- increases in crop yields of typically between 10 - 30%;
- share of the revenue from generating ACCUs; and
- reduced costs from lower use of soil applied granular fertilisers.

Following RLF Carbon's preliminary discussions with various stakeholders including Australian farmers and global banks, the Company has formulated what it considers is a risk appropriate model where it acts as the facilitator for financiers, farmers and the project developer for organisations seeking to acquire a reliable and long-term source of ACCUs such as emitters.

In this way, RLF Carbon will act as an aggregator of land, with ACSS being one of the only approved methodologies that can be used to integrate into commercial farming (food production) operations with the potential for a large-scale integrated solution to generate ACCUs.

REVIEW OF OPERATIONS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2023 (CONTINUED)

ACSS methodology for developing organic matter and the sequestration of carbon is underpinned and protected by the filed provisional patent titled 'A Methodology for Accumulating Carbon in Soil' that was submitted in May 2022.

The Company continues to investigate various prospects and opportunities within the agriculture sector and the carbon credit market at both national and international levels, acknowledging the growing worldwide demands and forecasts for soil carbon initiatives, and the necessity for carbon abatement as the world transitions to a net-zero 2050.

Launch of 5,000ha Pilot Program

The Company announced a 5,000ha pilot program with experienced existing commercial farming operators who have signed agreements for the use of RLF's ACSS methodology and the registration of these pilot projects with the Clean Energy Regulators Emission Reduction Fund.

Project registration under the Australian Clean Energy Regulator will grant RLF's ACSS methodology a strong foundation for expansion both within the substantial Australian grain growing market (~23 million hectares) and also for other global markets. The compliance and management procedures associated with Australian generated ACCUs are internationally recognised as the gold standard for earning carbon credits.

Strategic Carbon Alliance with the Commonwealth Bank of Australia (CBA)

Post 30 June 2023, the Company formalised a Strategic Carbon Alliance with CBA and received a signed agreement for the prepayment of Australian Carbon Credits (ACCUs).

This transaction represents RLF's first externally funded soil carbon project which supports the generation of carbon credits in commercial farming operations from growers in the domestic grain market.

The formation of the Strategic Carbon Alliance with CBA is an important validation of the Company's ACSS methodology and its potential to generate large numbers of carbon credits.

Under this Strategic Carbon Alliance, RLF will deliver the first 50,000 ACCUs produced from the Pilot Program to CBA, based on a pre-payment of \$1 million. CBA will also be entitled to purchase the additional ACCUs generated from the Pilot Program at a discount to spot market rate at the time.

CBA, as a provider of banking and financial services to Australian farmers, has also agreed to refer to the Company farming clients interested in potential soil carbon projects. This is pursuant to stage 2 of the strategic alliance relationship that aims to look for deployment on a much larger scale.

REVIEW OF OPERATIONS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2023 (CONTINUED)

Revenue Cycles

The Company has a revenue cycle that is shaped by seasonal demand typical of agriculture in Asia. Approximately one-third of sales occur between the months July to December, with the remaining two-thirds of sales occurring between January and June. The following table details the actual percentages for the financial year ended 30 June 2023 and comparative financial year ended 30 June 2022.

First Half	FY23	FY22
Period 1 July to 31 December	25%	31%
Second half		
Period 1 January to 30 June	75%	69%

Adjusted Net Profit and Loss and EBITDA - adjusted for Expansion, Operational Non-Cash and One-off costs

The following table outlines the costs incurred for the financial year ended 30 June 2023 that contributed to the expansion of the Group:

	\$'000s
Loss for the year after income tax	(3,435)
<u>Add:</u>	
Expansion, Operational Non-Cash and One-off costs*	2,021
Profit for the year after income tax adjusted for Expansion, Operational Non-Cash and One-off costs	(1,414)
<u>Add:</u>	
Tax, Depreciation and Interest expense	441
Adjusted EBITDA for Non-Cash and One-off costs	(973)

*The breakdown of the Expansion, Operational Non-Cash and One-off costs incurred was:

- Expansion costs related to development opportunities in other international markets, research and development, and capital costs that are not able to be capitalised as an asset, and will contribute towards the development of potential future revenues (\$1,411,000).
- Operational non-cash expenditure was related to an impairment expense for historical costs associated with a minority shareholding in RLF Thailand, share based payments and a minor stock write off (\$389,000).
- One-off personal withholding tax for director Dr Mike (Lu) Sen and penalties (\$221,000).
