Investor Presentation

September 2023

CHARGING THE CHANGE

ersonal use only

IMPORTANT & CAUTIONARY STATEMENT

IMPORTANT NOTICE

These presentation slides (the “Slides”) have been prepared by Atlantic Lithium Limited (the “Company”) and provides a general overview of the Company and its strategy. These Slides do not comprise an admission document, listing particulars or a prospectus relating to the Company, do not constitute an offer or invitation to purchase or subscribe for any securities of the Company and should not be relied on in connection with a decision to purchase or subscribe for any such securities. The Slides and the accompanying verbal presentation do not constitute a recommendation regarding any decision to sell or purchase securities in the Company.

No reliance may be placed for any purpose whatsoever on the information contained in the Slides and the accompanying verbal presentation or the completeness or accuracy of such information. No representation or warranty, express or implied, is given by or on behalf of the Company, directors, officers, employees, agents or advisors or any other person as to the accuracy or completeness of the information or opinions contained in the Slides and the accompanying verbal presentation, and no liability is accepted by such persons for any such information or opinions or otherwise arising in connection therewith (including in the case of negligence, but excluding any liability for fraud).

The Ewoyaa Lithium Project as described in the Slides is at the exploration and development stage, and potential investors should understand that mineral exploration, development and mining are high-risk undertakings.

The Slides contain statements which may be in the nature of forward-looking statements.

CAUTIONARY STATEMENTS

The information in the Slides that relates to Ore Reserves, Mineral Resources and Production Targets for the Ewoyaa Lithium Project was reported by the Company in the Definitive Feasibility Study announcement on 29 June 2023 and the updated Mineral Resource Estimate announcement on 1 February 2023.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the announcements and that all material assumptions and technical parameters underpinning the Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information in the announcements continue to apply and have not materially changed.

FORWARD-LOOKING STATEMENTS

The Slides contain certain statements and expressions of belief, expectation or opinion which contain ‘forward-looking information’, and which relate, inter alia, to feasibility studies, the Company’s proposed strategy, plans, objectives, performance, outlook, cash flow, projections, targets, and Mineral Resources and Ore Reserves or to the expectations or intentions of the Company’s directors.

Generally, this forward-looking information can be identified by the use of forward-looking information can be identified by the use of forward-looking terminology such as ‘outlook’, ‘anticipate’, ‘project’, ‘target’, ‘likely’, ‘believe’, ‘estimate’, ‘expect’, ‘intend’, ‘may’, ‘would’, ‘could’, ‘should’, ‘scheduled’, ‘will’, ‘plan’, ‘forecast’, ‘evolve’, and similar expressions. Persons reading the Slides are cautioned that such statements are only predictions, and that the Company’s actual future results or performance may be materially different.

Forward-looking information is developed based on assumptions about such risks, uncertainties and other factors set out herein, including but not limited to general business, economic, competitive, political and social uncertainties; the actual results of current exploration and development activities; conclusions of economic, competitive, political and social uncertainties; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of lithium; possible variations of ore grade or recovery rates; failure of equipment or processes to operate as anticipated; accident; labour disputes and other risks of the mining and exploration industry; and delays in obtaining government approvals or financing or in the completion of development activities.

This list is not exhaustive of the factors that may affect forward-looking information. These and other factors should be considered carefully, and readers should not place undue reliance on such forward-looking information.

Accordingly, you should not rely on any forward-looking statements and neither the Company nor SP Angel accept any obligation to disseminate any updates or revisions to such forward-looking statements. Any statement as to the past activities of the Company’s directors should not be relied upon as being an indication of their future performance. Statements regarding plans with respect to the Company’s mineral properties may contain forward-looking statements in relation to future matters that can be only made where the Company has a reasonable basis for making those statements.

BUILDING GHANA'S FIRST LITHIUM MINE

Established pro-mining region

- Stable government and robust mining framework
- Long-term gold producer

Ewoyaa Mineral Resource Estimate*

- 35.3Mt at 1.25% Li₂O
- 79% Measured & Indicated
- 25.6Mt at 1.22% Li₂O Ore Reserve**

Excellent Project Economics

- June 2023 DFS** significantly de-risks Project and delivers exceptional financial outcomes
- Early Modular DMS revenue
- Significant upside potential

Strong Project Credentials

- Access to infrastructure
- Minimal footprint
- A project for Ghana and Ghanaians

On Track to Deliver

- Funding partner and 50% offtake secured
- Mining Lease ("ML") process underway

* Refer to important and cautionary statement on Page 2 and MRE release dated 1 February 2023

** Based on DFS announcement; refer to important and cautionary statement on Page 2 and DFS release dated 29 June 2023

OUR VISION

A responsible lithium supply with positive social impact to support the global transition to a **carbon neutral** future.

GLOBALLY SIGNIFICANT ASSET

Targeted spodumene concentrate production capacity (ktpa, 100% basis)*

Anticipated steady state production of **365ktpa**

3rd
Largest anticipated production capacity in Africa

5th
Largest developer by anticipated production capacity

10th
Largest anticipated production capacity globally

* Select hard rock spodumene projects which have conducted at least a Preliminary Economic Assessment / Scoping Study. Excludes projects where no formal study was released, or where no definitive spodumene production capacity figure was quoted in the study. Capacity refers to current installed production capacity, and where not available, average annual production. Where an existing producer or developer has planned expansions and a Final Investment Decision has been approved to proceed with the planned expansion, the expanded production capacity is used.

+ Developers include companies who have released a study to a level beyond Pre-Feasibility.

Note: Based on DFS announcement; refer to important and cautionary statement on Page 2 and DFS release dated 29 June 2023; Source information in Appendix

STRONG PROJECT FUNDAMENTALS

Adjacent grid power
and highway

Highly skilled
Ghanaian workforce

110km to existing
deep sea port

Proximity to offtake

DMS only

Low water and
energy intensity

Minimal footprint

Strong local partners

METALLURGY DELIVERS PREMIUM PRODUCT

Two clearly defined geometallurgical domains:

P1

Coarse grained
spodumene material
(>20mm)

Coarse Grained P1 & fine P2 pegmatites

P2

P2: Medium to fine grained
spodumene material
(<20mm)

ORE TYPE	TONNAGE	GRADE	CONT. LITHIUM	CONT. LITHIUM
	Mt	% Li ₂ O	kt	%
P1	31.3	1.27	398	90
P2	4	1.06	42	10
Total	35.3	1.25	440	100

- Simple gravity process flow sheet
- Conventional DMS processing
- Low contaminants; <1% Fe₂O₃, <3% combined Na₂O & K₂O
- Battery-grade Li carbonate and Li hydroxide conversion successfully completed at ANSTO

EWOYAA PROCESSING PLANT

2.7Mt

Processing Facility

Crushing to 3 sizes

with a max. 10mm size to maximise recovery

Additional opportunities

through potential feldspar and flotation circuit

DFS KEY METRICS*

DFS reaffirms Ewoyaa as industry-leading asset

DFS INDICATES LOW CAPITAL INTENSITY

US\$63.7/t - among the industry's lowest

ersonal use only

Piedmont funding c. 70% of capex

Piedmont sole funding through to July 2024

- 50% available offtake to fund remaining capex
- Early modular DMS revenue to reduce peak capex

REVENUE GENERATING PRE-PRODUCTION

Modular DMS Unit

Limits peak funding requirement

Opportunity to train staff ahead of full operations

De-risking from DSO market

US\$15m Investment

Product	Spodumene Concentrate	Secondary Product (low-grade Li ₂ O)
Year 1 production	38kt	171kt
Year 1 revenue	US\$107m	US\$64m

INDUSTRY LEADING OPEX

ore processed
considered as reserves

ore processed
considered as reserves

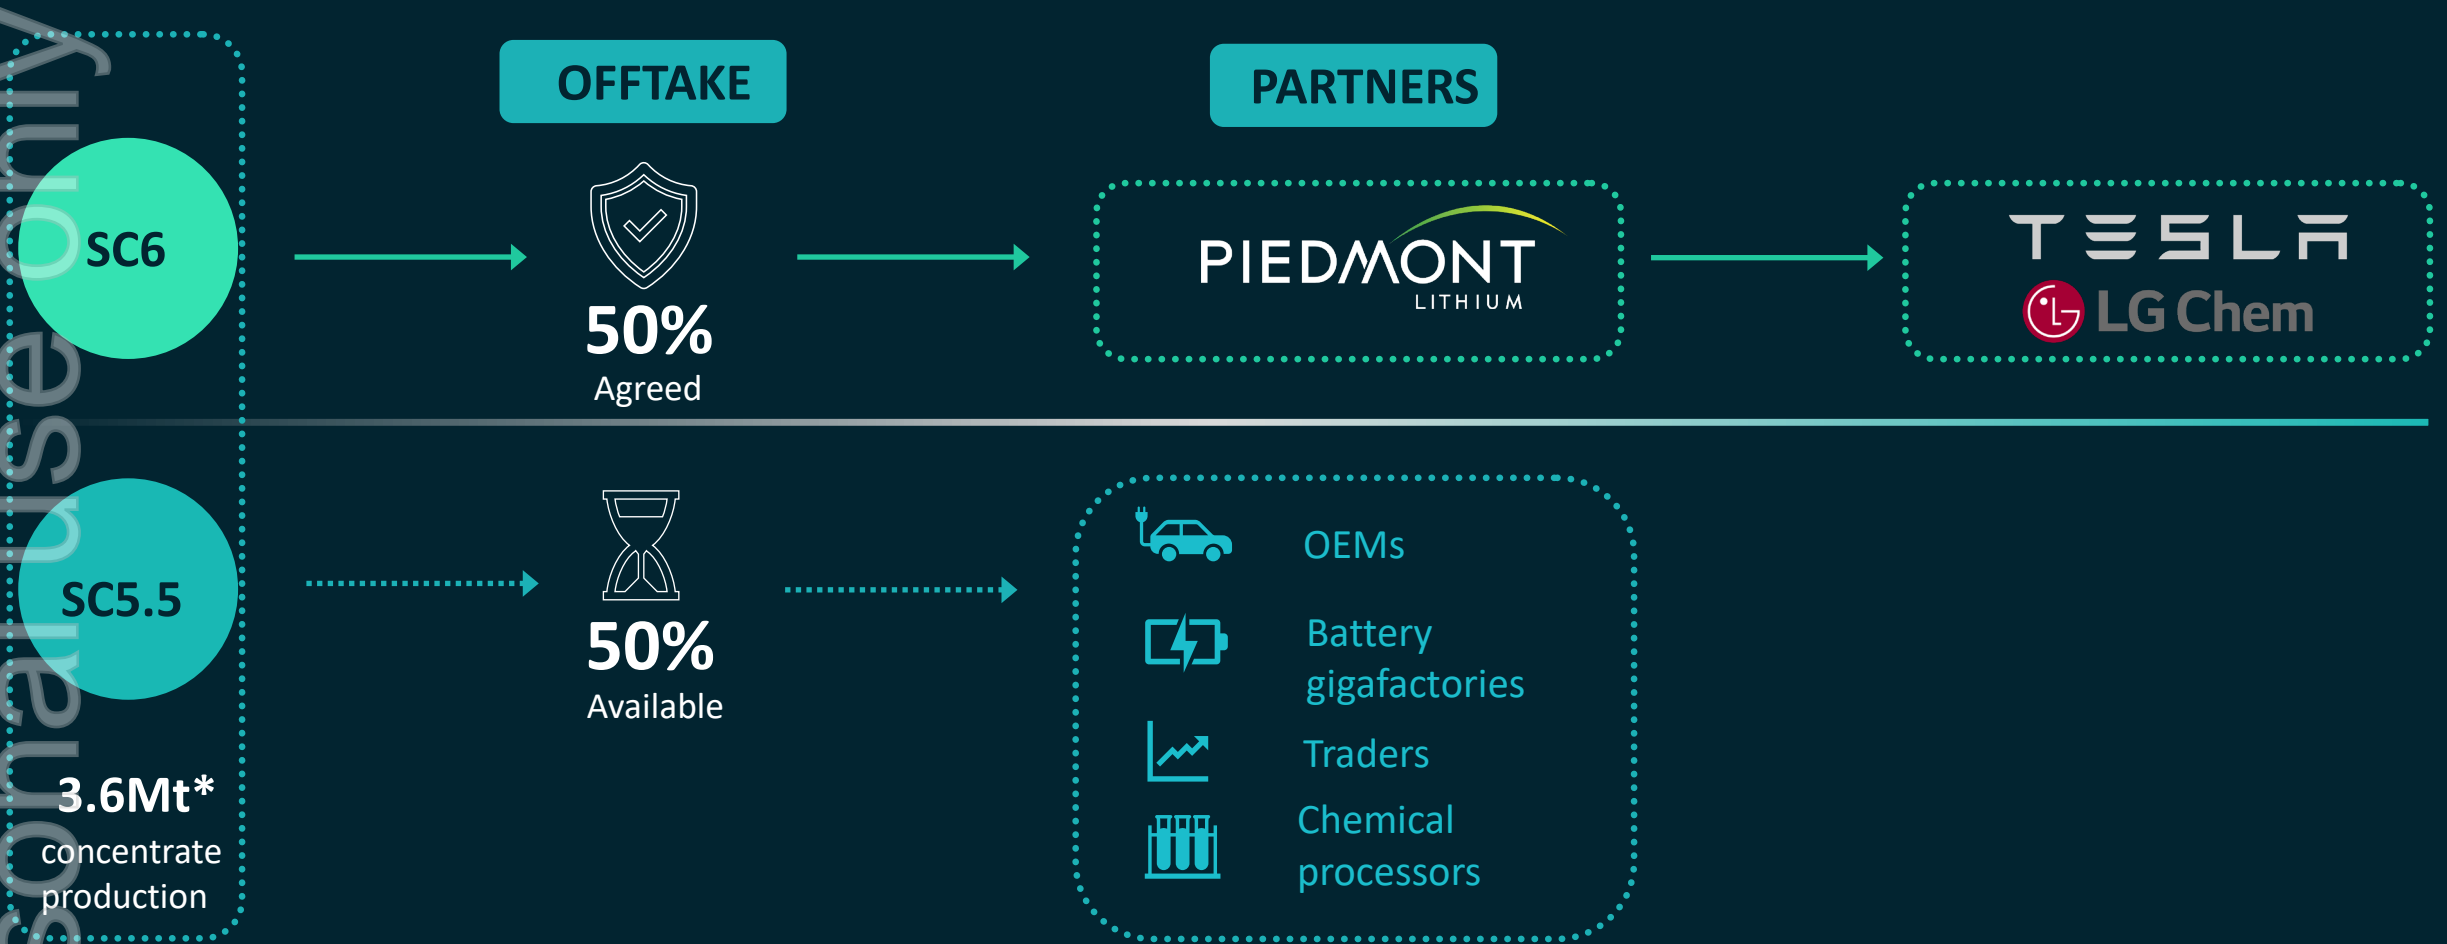

C1 cash cost US\$377/dmt

AISC US\$610/dmt

Circa US\$1,000/dmt long-term margin

NEAR-TERM OFFTAKE AVAILABLE

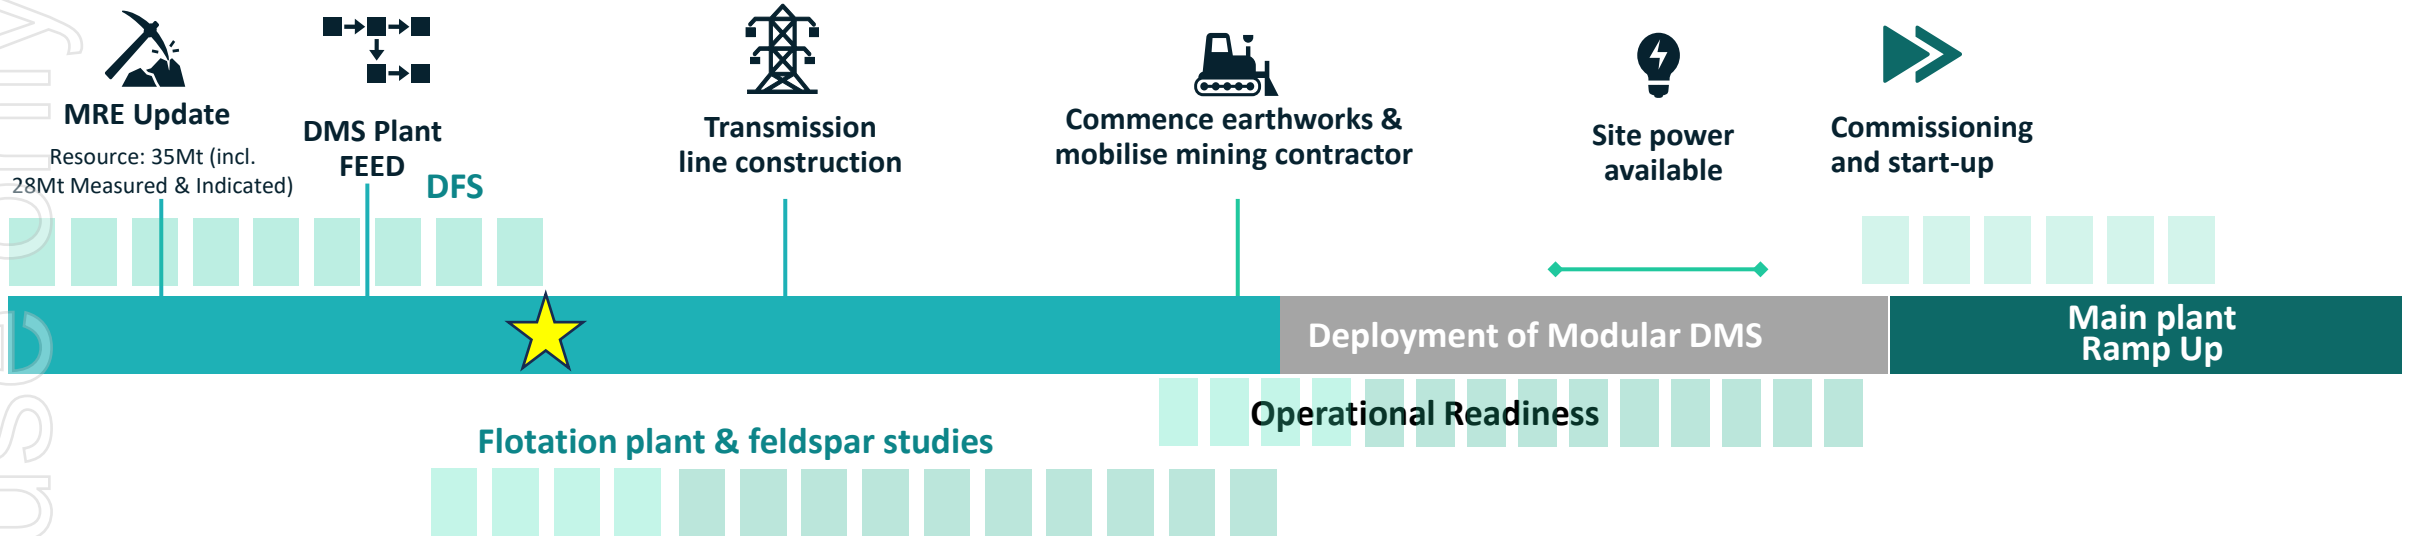

Serving the growing North American and European EV market from West Africa

*Based on DFS announcement; refer to important and cautionary statement on Page 2 and DFS release dated 29 June 2023

PATHWAY TO PRODUCTION

Targeting first concentrate 2025

ML Grant
(MINCOM)

Permitting Process

EPA
Environmental Permit approval

ML
parliamentary ratification

Mining operating
permit grant

Processing Milestone

450,000t
early production processing

2.0Mtpa
ramp up

2.7Mtpa
steady state plant feed

ROUTE TO MARKET

Sealed road within 1km of deposit footprint

110km from Project footprint to operating deep-sea port of Takoradi:

- Currently exports 3Mt of Mn and approx. 1Mt Bx per year from existing facilities
- Available capacity

Tema port 140km east of the Project

Grid power adjacent to deposit footprint

- Fed by 56% hydro power, 44% thermal plants and <0.1% solar

Required fleet of fifty 35t tipper trucks and two front end loaders

ersonal use only

ACTING IN THE INTERESTS OF LOCAL COMMUNITIES

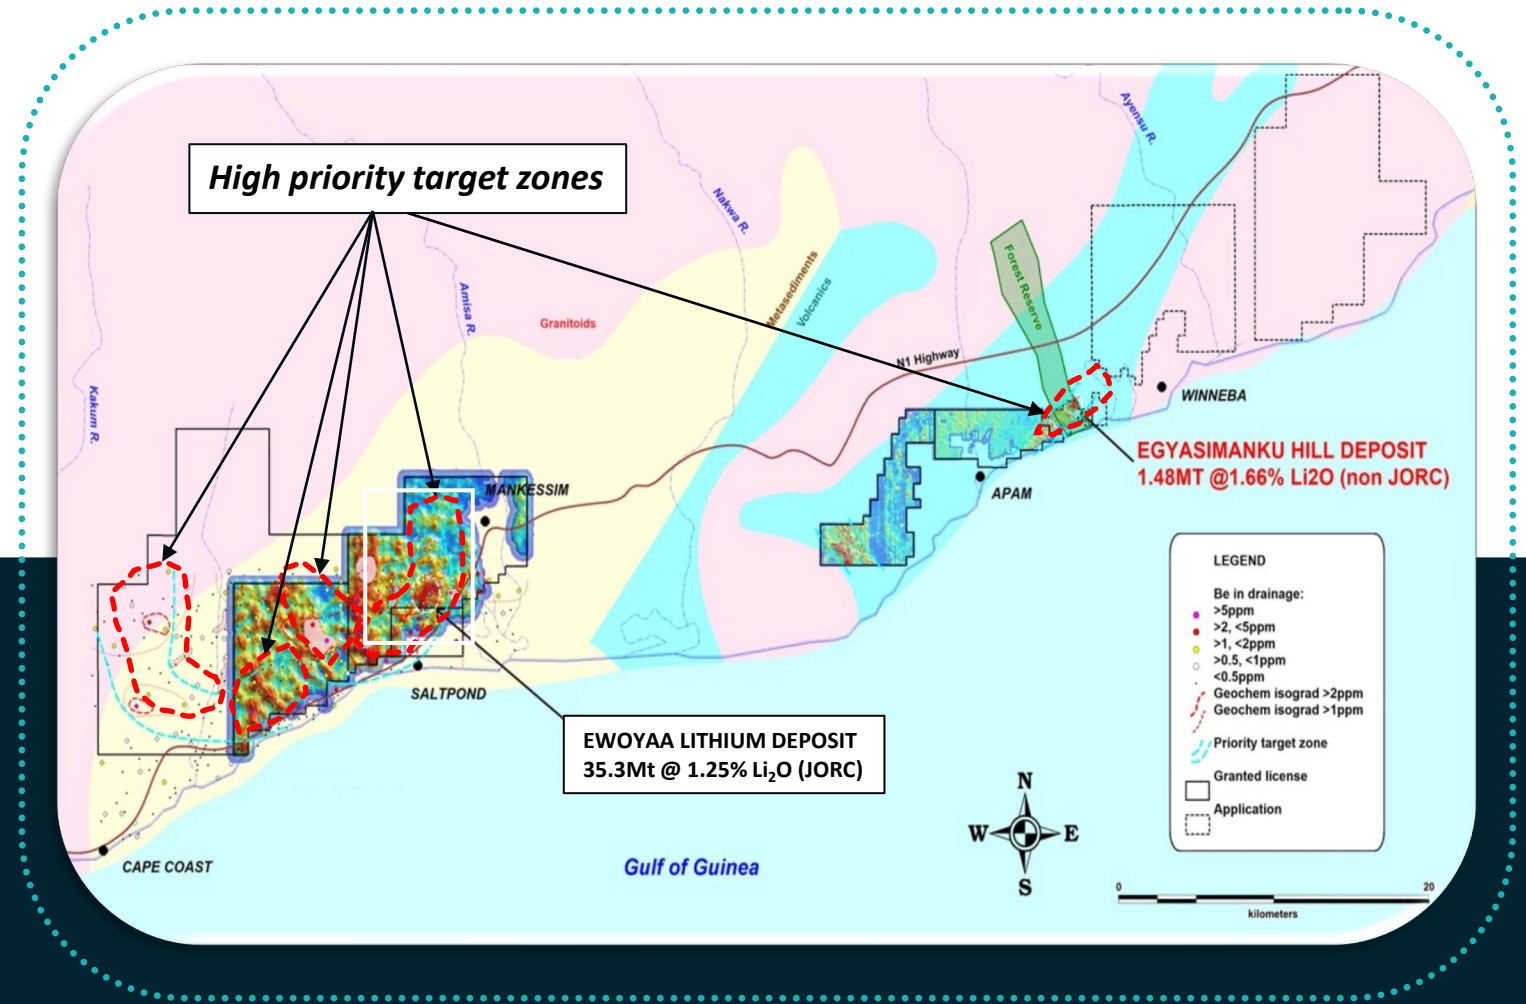

- Event sponsorship
- Regeneration nurseries and revegetation
- Work and education programmes
- Medical donations
- Community consultations
- Ongoing environmental monitoring
- Equipment provision

EXPLORATION UPSIDE

Multiple targets defined

- Only 15km² of 560km² (~3%) tenure portfolio drilled to date
- Regional target definition; multiple untested targets
- Helicopter geophysics and grid soils completed over Cape Coast license
- Historical Egyasimanku Hill lithium occurrence

ATLANTIC LITHIUM AT A GLANCE

Flagship Project

Ewoyaa, Ghana - 35.3Mt @ 1.25% Li₂O*
25.6Mt at 1.22% Li₂O Ore Reserve**

Definitive Feasibility Study**

- ▲ 3.6Mt concentrate production over 12-yr LOM
- ▲ Post-Tax NPV US\$1.5bn / IRR 105%
- ▲ US\$2.4bn free cashflow / US\$6.6bn LOM revenues
- ▲ 19-month payback

Excellent Local Infrastructure

Sealed road network / Operational port
and power / pro-mining jurisdiction

Piedmont Partnership

Sole funding US\$70m of capex
Shared capex 50:50 thereafter

Proven leadership team

Lithium mine build and operating experience
Exploration and discovery expertise
Experienced in-country team

Strong Cash Position

c. US\$10m for future growth

Proven Premium Product

High-grade concentrate with low
contaminants / Successful battery grade
conversion by ANSTO

Strong Project Fundamentals

>98% Ghanaian and Ivoirian employment
/ Minimal footprint

Significant Exploration Upside

Only 15km² drilled of 1,334km² tenure package in
Ghana and Côte d'Ivoire
