

Strongly Supported \$8m Placement – Launches \$3m Entitlement Offer to Shareholders

Highlights:

- A\$8 million commitments received in a strongly supported placement to new and existing institutional and sophisticated investors
- A\$3 million Entitlement Offer at the same offer price as the placement
- Directors intend to take-up entitlements in part or in full in the Entitlement Offer
- Global fund to become 'Substantial Shareholder' (>5% ownership) on completion of the placement
- Funds to deliver multiple Phase I/II clinical trials & international expansion

SYDNEY Australia, 11 September 2023: Recce Pharmaceuticals Ltd (**ASX:RCE, FSE:R9Q**) (the **Company** or **Recce**), the Company developing a new class of Synthetic Anti-infectives, is pleased to announce a capital raising of up to approximately A\$11 million (before costs) (**Capital Raising**) consisting of:

- Placement of approximately 18.2 million new fully paid ordinary shares in the Company (**New Shares**) at A\$0.44 per New Share (**Offer Price**), with commitments received totalling A\$8.0 million from institutional, sophisticated and professional investors (**Placement**); and
- a pro-rata non-renounceable entitlement offer of one (1) New Share for every twenty six (26) existing fully paid ordinary shares in the Company (**Shares**) held by eligible shareholders at the same Offer Price as the Placement to raise up to a further A\$3 million (**Entitlement Offer**).

Use of Funds

Funds raised under the Capital Raising will be used for the following activities:

- A\$6.0m – Clinical Trials (significant, unmet medical needs):
 - Phase I/II (I.V.) - UTI/Urosepsis infections
 - Phase II (topical) - Burn wound infections
 - Phase II (topical) - Diabetic Foot infections
- A\$2.0m – Build out of advanced pre-clinical portfolio (in vitro, in vivo and ex vivo studies);
- A\$1.0m – Manufacturing boost including geographical expansion (USA)
- A\$2.0 million – General working capital (operational costs delivering above)

Commenting on the Offer, Chief Executive Officer, James Graham said: "We are thrilled to receive such strong financial interest, particularly among global investment funds. It was important to the

Recce team that our shareholders be offered the same opportunity and are pleased to make this available to them. As the world's most clinically advanced New Class of Anti-Infectives at this time it is clear the commercial potential is recognised. With a strengthened balance sheet and multiple clinical trials current, we are now well positioned for the time ahead"

Details of the Placement

The Company has received binding commitments from institutional, sophisticated and professional investors to subscribe for 18,181,819 New Shares in the Company at the Offer Price to raise approximately \$8.0 million (before costs).

The issue price of A\$0.44 per New Share under the Capital Raising represents:

- a 32.3% discount to the last closing price of A\$0.650 on 7 September 2023;
- a 35.0% discount to the 5-day Volume Weighted Average Price (**VWAP**) of A\$0.677; and
- a 36.6% discount to the 15-day VWAP of A\$0.694.

All New Shares issued under the Capital Raising will rank equally with existing Shares of the Company from their issue date. The Placement is not subject to shareholder approval and will fall within the Company's placement capacity under ASX Listing Rule 7.1.

The Placement is anticipated to settle on Friday, 15 September 2023, which is after the Record Date for the Entitlement Offer (being Thursday, 14 September 2023), such that participants in the Placement will not be entitled to participate in the Entitlement Offer in respect of any New Shares issued to them under the Placement.

The Placement is not underwritten and Canaccord Genuity (Australia) Limited acted as Lead Manager to the Placement and Ord Minnett Limited acted as Co-manager to the Placement.

Details of the Entitlement Offer to Shareholders

Participation in the Entitlement Offer will be open to Recce shareholders who are registered holders of Shares at 7.00 pm (Sydney time) on Thursday, 14 September 2023 (**Record Date**) and who have a registered address in Australia or New Zealand (**Eligible Shareholders**).

Each of the Directors of the Company intend to subscribe for their respective entitlement partially or in full under the Entitlement Offer.

The Entitlement Offer will allow Eligible Shareholders to receive one (1) New Share for every twenty six (26) existing Shares held by Eligible Shareholders on the Record Date, at an issue price of A\$0.44

About Recce Pharmaceuticals Ltd

Recce Pharmaceuticals Ltd (ASX: **RCE**, FSE: **R9Q**) is developing a new class of Synthetic Anti-Infectives designed to address the urgent global health problems of antibiotic-resistant superbugs and emerging viral pathogens.

Recce's anti-infective pipeline includes three patented, broad-spectrum, synthetic polymer anti-infectives: RECCE® 327 as an intravenous and topical therapy that is being developed for the treatment of serious and potentially life-threatening infections due to Gram-positive and Gram-negative bacteria including their superbug forms; RECCE® 435 as an orally administered therapy for bacterial infections; and RECCE® 529 for viral infections. Through their multi-layered mechanisms of action, Recce's anti-infectives have the potential to overcome the hypercellular mutation of bacteria and viruses – the challenge of all existing antibiotics to date.

The FDA has awarded RECCE® 327 Qualified Infectious Disease Product designation under the Generating Antibiotic Initiatives Now (GAIN) Act – labelling it for Fast Track Designation, plus 10 years of market exclusivity post approval. Further to this designation, RECCE® 327 has been included on The Pew Charitable Trusts Global New Antibiotics in Development Pipeline as the world's only synthetic polymer and sepsis drug candidate in development. RECCE® 327 is not yet market approved for use in humans with further clinical testing required to fully evaluate safety and efficacy.

Recce wholly owns its automated manufacturing, which is supporting present clinical trials. Recce's anti-infective pipeline seeks to exploit the unique capabilities of its technologies targeting synergistic, unmet medical needs.
