

# **ASX Announcement**

# **September 2023 Quarterly Activities Report**

### Highlights

- U.S. patent granted for key novel ovarian cancer biomarker supporting CLEO's commercialisation pathway into its primary U.S. target market
- Early progress delivered against development program with the selection of biomarkers panel for Cleo's ovarian cancer test-kit finalised
- Antibody development advanced increasing confidence for commercial assay development and upscaling for commercial manufacturing
- Evaluation of four commercial antibody manufacturing partners progressed in late stage as part of a robust tender process
- Board capacity enhanced with Chief Scientific Officer and Executive Director, Dr Andrew
   Stephens, expanding responsibilities to full-time
- A\$10.73M cash at bank at 30 September 2023

MELBOURNE, AUSTRALIA, 30 October, 2023: Ovarian cancer diagnostics company, Cleo Diagnostics Limited (ASX:COV) (CLEO, or the Company) is pleased to provide the market with an update on activities in the September 2023 quarter as it develops its simple and accurate blood test for the early detection of ovarian cancer.

#### U.S. PATENT

The granted Patent (U.S. Patent No: US 11,725,048, "CXCL10 Binding Proteins and Compositions Thereof") covers CLEO proprietary biomarkers and antibody formulations, which comprise the core technology of the Company's ovarian cancer diagnostic blood test. This Patent family is directed towards C-X-C motif chemokine ligand 10 (CXCL10) binding proteins and methods of diagnosing a condition, such as a malignancy, comprising determining a level of CXCL10 in a subject. Determination of the level of CXCL10 may also be utilised to monitor tumour burden, malignancy progression or likelihood of tumour recurrence in a subject.

The U.S. Patent expands the Company's Intellectual Property (IP) portfolio, adding to the patent granted in Australia earlier this year (patent number 2020404453). Additional patent applications are currently pending in Europe, China, India, Japan, Korea, Israel, New Zealand and Singapore.

Non-Executive Director Lucinda Nolan

#### **U.S. MARKET OPPORTUNITY**

The U.S. is the largest diagnostic market in the world, and represents the Company's primary target market for its potentially lifesaving simple diagnostic blood test. Ovarian cancer survival rates are much lower than other cancers that affect women, largely due to the fact that existing testing is insufficient to identify early stage cancers or differentiate from benign disease. Diagnosis is only made following radical surgery to remove the ovaries. The 5 year survival rate for ovarian cancer is 49%, compared to 92% for breast cancer<sup>1</sup> where early detection screening exists.

A significant unmet clinical need exists and CLEO plans to bring to market a suite of ovarian cancer diagnostic blood tests based on the novel patented CXCL10 biomarker, which is expressed early and at high levels by ovarian cancers, but not in non-malignant disease. The tests aim to distinguish benign from malignant growths in a standard format that will be readily compatible with existing equipment used by pathology laboratories worldwide.

The U.S. Patent complements CLEO's regulatory approval strategy designed to access target markets and secure a path to reimbursement approvals in the future. The Company is also currently preparing for the submission of a 510(k) U.S. Food and Drug Administration (FDA) application.

CLEO is initially targeting the delivery of its blood test for the surgical triage market, however has a staged execution strategy that de-risks a pathway to all ovarian cancer diagnostic markets:

- Surgical Triage Distinguishes benign from malignant disease to allow appropriate design of treatment before surgical intervention is considered;
- Recurrence Identifies relapse for earlier intervention to control/manage disease progression
- High Risk Screening Testing women with known BRCA status or extensive family history; and
- Early Stage Screening Systematic national screening to identify early stage ovarian cancers in patients without symptoms, to allow medical intervention before cancer spreads.

Early detection is vital. When ovarian cancers are diagnosed at stage 1, patients have over a 90% 5 year survival rate. However, this rate reduces rapidly to <40% if diagnosed once the cancer has spread beyond the ovaries.

#### **TEST-KIT BIOMARKERS PANEL FINALISED**

Cleo has finalised the selection of biomarkers to be used in its ovarian cancer test-kit, along with completing the development for a prototype of the proprietary scoring algorithm. The performance metrics of the test were evaluated in a clinical study of 334 patients, the results of which are being prepared for publication in a peer-reviewed medical journal. The Company expects the publication outcome to be reported to the market by the end of CY2023. The data cannot be released prior to publication due to the nature of the peer-review process. Concurrently, Cleo is also preparing a further patent application based on the findings.

<sup>&</sup>lt;sup>1</sup> World Health Organisation, Australian Institute of Health and Welfare supplemented by American Cancer Society, and World Ovarian Coalition.

#### **ANTIBODY DEVELOPMENT**

A key objective for the Company is to develop its own antibodies and target proteins which will allow control of supply, quality, cost and high-performance of key reagents that will underpin the consistent and reliable manufacture of test-kits. Cleo can confirm that Surface Plasmon Resonance Analysis has shown that the core antibodies of the CXCL10 active ratio test are binding to their respective targets with high affinity and are suitable for commercial assay development and upscaling in commercial manufacturing. Hybridomas to produce the supporting biomarker antibodies are also well progressed, with expected completion of the full test-kit panel in Q2 CY2024.

#### SELECTION PROCESS FOR ANTIBODY MANUFACTURING PARTNER

Cleo is in the late stages of evaluating four commercial antibody manufacturing partners as part of a robust tender process. The evaluation process considers a competitive review of the capabilities of each potential partner to ensure that the partner ultimately selected can deliver commercial product to the standard required by Cleo, which is largely set by regulatory bodies such as the Food and Drug Administration (FDA) and potential customer groups.

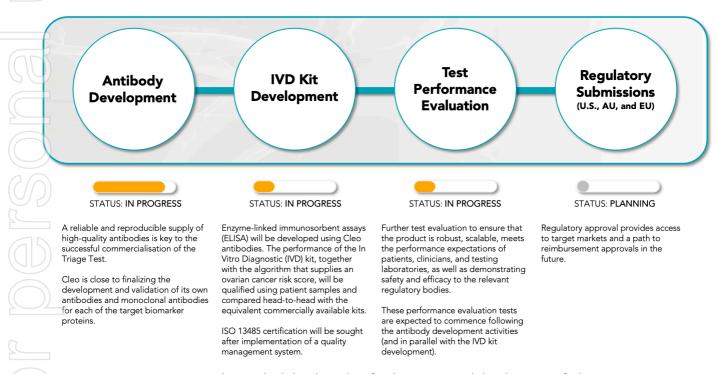

Figure 1: Indicative high-level timeline for the commercial development of Cleo's ovarian cancer test-kit for the initial Surgical Triage Test market.

#### **CORPORATE**

The Company had cash reserves of A\$10.73M as at 30 September 2023.

#### **ASX Listing**

Cleo Diagnostics successfully completed its listing of shares on the Australian Securities Exchange (ASX) on 22 August 2023, after an Initial Public Offering (IPO) raising a total of A\$12 million (before costs) in capital by issuing 60,000,000 shares at \$0.20 per share. The lead manager of the IPO was Taylor Collison.

Ovarian cancer is an insidious disease defined by the highest mortality rate of all female cancers with a 5-year survival of only 49%. Present diagnostic methodologies, like transvaginal ultrasound and serum CA-125 measurements, lack the specificity needed for accurate and early detection. Consequently, the majority of cases are identified at an advanced stage, leading to poor prognoses for most patients. There is currently no accurate, pre-surgical method to diagnose ovarian cancer, or to accurately differentiate between cancerous versus much more common non-cancerous (benign) disease. Yet, the numbers speak clearly; if detected early, 94% of patients could live longer than five years post-diagnosis<sup>2</sup>.

Cleo is committed to addressing this urgent, unmet need. The successful listing of Cleo Diagnostics on the ASX is a watershed moment for all stakeholders, effectively setting our course toward positively transforming the health outcomes for women worldwide. We can all feel confident about the Company's prospects to advance the commercialisation of our cancer diagnostics platform. The proposition is simple:

- Cleo has a simple blood test developed for accurate and early detection of ovarian cancer;
- There is a clear and significant global addressable cancer diagnostics market;
- The technology is underpinned by a novel and patented biomarker with over 10 years Research and Development at the Hudson Institute of Medical Research (largely funded by the Ovarian Cancer Research Foundation), two clinical studies completed and IP protection in place;
- We have a de-risked and staged execution strategy focused on an achievable pathway to target markets; and
- An experienced leadership team in place with the credentials to execute on our plan.

The Company's product portfolio under development aims to transform ovarian cancer diagnosis and is focused on three key markets across pre-surgical triage testing, recurrence detection, and broader screening programs. Cleo has a defined pathway to deliver a significant advancement in ovarian cancer detection.

<sup>&</sup>lt;sup>2</sup> World Health Organisation, Australian Institute of Health and Welfare supplemented by American Cancer Society, and World Ovarian Coalition.

#### **Board Enhancement**

The Company confirmed current Chief Scientific Officer and Executive Director, Dr Andrew Stephens, role would move to full-time effective 1 October, 2023. Following the Company's successful listing on the ASX in August, Dr Andrew Stephens agreed to expand his commitment to the Company by moving his Chief Scientific Officer and Executive Director responsibilities to full-time, up from three days per week part-time. All remaining terms and conditions of Dr Stephens employment agreement are unchanged.

The enhancement to Cleo's Board capacity was designed to direct clear executive focus on the Company's phased development strategy to deliver a simple and accurate blood test capable of detecting ovarian cancer at every stage.

#### **Use of Funds**

A comparison of the use of funds since the date of admission, to the use of funds statement contained within the Company's Prospectus, as required by ASX Listing Rule 4.7C.2 is as follows:

Allocation of funds*	Expenditure described in Use of Funds in Prospectus (\$'000)	Actual use of funds - quarter end 30 June 2023 (\$'000)
Year One		
Triage Test	\$1,486	\$170
Screening Test and Recurrence Test	\$200	-
Antibody manufacturing and other business development	\$2,125	\$22
General administration and working capital^	\$1,045	\$325
Costs of the Offer#	\$1,082	\$966
Infrastructure, equipment, lab space	\$240	\$35
TOTAL	\$6,178	\$1,517
Year Two	·	
Triage Test	\$2,410	-
Screening Test and Recurrence Test	\$2,154	-
Antibody manufacturing and other business development	\$200	-
General administration and working capital^	\$1,186	-
Costs of the Offer#	-	-
Infrastructure, equipment, lab space	\$240	-
TOTAL	\$6,190	·

<sup>\*</sup> Refer to the Cleo Replacement Prospectus of 18 August 2023 for full details.

<sup>#</sup>The expenses paid or payable by the Company in relation to the Offers are summarised in Section 8.8 of the Prospectus.

<sup>^</sup> Working capital expenditure is to be applied towards funds required to expand the business and towards administration costs associated with the Company. These costs include costs for wages and salaries, occupancy costs, professional consultants' fees, compliance and reporting costs associated with running an ASX listed company, as well as other typical administration costs. Working capital also includes surplus funds and funds that may be applied to future acquisitions.

#### **PAYMENTS TO RELATED PARTIES**

As outlined in section 6 of the attached Appendix 4C, payments to related parties of the entity and their associates, totals A\$94k, relate to fees and salaries paid to executive and non-executive Directors during the quarter.

Forward Looking Statements: This release may contain certain forward-looking statements with respect to matters including but not limited to the financial condition, results of operations and business of Cleo and certain of the plans and objectives of Cleo with respect to these items. These forward-looking statements are not historical facts but rather are based on Cleo's current expectations, estimates and projections about the industry in which Cleo operates, and its beliefs and assumptions. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates", "guidance" and similar expressions are intended to identify forward looking statements and should be considered an at-risk statement. Such statements are subject to certain risks and uncertainties, particularly those risks or uncertainties inherent in the process of developing technology and in the endeavour of building a business around such products and services. These statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and other factors, some of which are beyond the control of Cleo, are difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward looking statements. Cleo cautions shareholders and prospective shareholders not to place undue reliance on these forward-looking statements, which reflect the view of Cleo only as of the date of this release. The forward-looking statements made in this announcement relate only to events as of the date on which the statements are made. Cleo will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this announcement except as required by law or by any appropriate regulatory authority.

#### **About Cleo Diagnostics Ltd** ASX:COV

CleoDX aims to bring to market a simple blood test for the accurate and early diagnosis of ovarian cancer based on the novel patented CXCL10 biomarker, which is produced early and at high levels by ovarian cancers but is largely absent in non-malignant disease. The test aims to distinguish benign from malignant growths in a standard format that will be readily compatible with existing equipment used by diagnostic laboratories worldwide.

The platform is backed by over 10 years of scientific Research & Development at the Hudson Institute of Medical Research, with two clinical studies conducted with over 500 patients. Pursuant to a licence agreement with the Hudson Institute of Medical Research, Cleo has a worldwide exclusive licence to commercialise the intellectual property which underpins its operations and the ovarian cancer tests.

The clinical unmet worldwide need is urgent. An accurate and early detection blood test could shift survivability for ovarian cancer significantly as seen with other cancers. Cleo is advancing the availability of its simple blood test, under a modular execution strategy which is designed to eventually address all ovarian cancer detection markets with specific tests including surgical triage, recurrence, high risk, and early-stage screening.

#### Notes

33 55. 59. 10. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.

Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
