Lincoln has the highest
Total Graphitic Carbon grades
on the Eyre Peninsula

Highlights

Lincoln Minerals (ASX: LML) is an independent, Australian Securities Exchange listed, mineral resources exploration and development company, focussed on the development of the Kookaburra Gully Graphite Project, located on the Eyre Peninsula in South Australia. Eyre Peninsula is Australia's foremost graphite province and home to one of Australia's largest resources of this strategically important mineral.

Map 1. Amalgamated expenditure area with KGGP area

Total Mineral Resources Kookaburra Gully Deposit

2.03Mt@15.2% TGC

Measured 0.39Mt@14.9% TGC

Indicated 1.08Mt@14.9% TGC

Inferred 0.56Mt@16.0% TGC

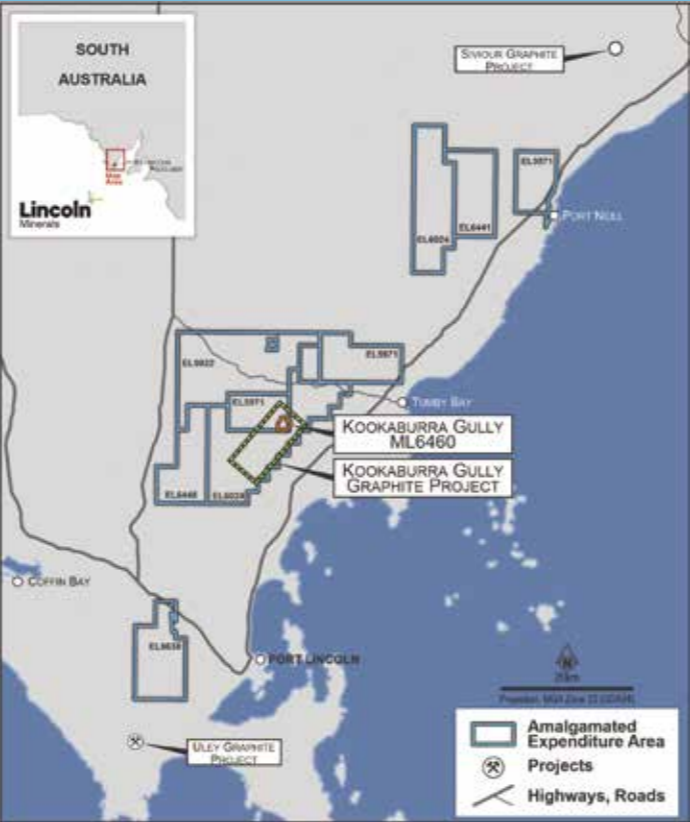

Total Mineral Resources Koppio Deposit

2.08Mt@10.5% TGC

Indicated 1.64Mt@10.7% TGC

Inferred 0.44Mt@9.59% TGC

Based upon a nominal 5% TGC cut off

April 2023

- Lincoln completes second phase of aircore drilling at Kookaburra Gully Extended Graphite Prospect on the Eyre Peninsula, South Australia
- Lincoln intersects visible graphite in drilling at Kookaburra Gully Extended Graphite Prospect

June 2023

- Lincoln's drilling program at the Koppio Graphite Resource confirms along strike continuity of the known graphite mineralisation, intersecting high-grade Total Graphitic Carbon (TGC)

July 2023

- Lincoln discovers new graphite mineralisation at Kookaburra Gully Project, South Australia
- First drill holes into the southern end of Kookaburra Gully Extended (KGE) electro magnetic (EM) anomaly intersect high-grade Total Graphitic Carbon (TGC) mineralisation
- Drilling confirms correlation between graphite mineralisation and EM anomalies over a 5km strike
- Lincoln is planning further drilling to test strike extent of mineralisation at KGE

December 2022

- High resolution TEMPEST™ airborne electromagnetic (EM) and magnetic data reprocessed and interpreted over Lincoln Minerals' Kookaburra Gully Graphite Project
- Excellent correlation with mapped surface geology and drilling results
- Six electromagnetic targets were identified for further data modelling

January 2023

- Lincoln Minerals stock reinstated for trade on the ASX on Friday, 20 January 2022
- Fully underwritten Rights Issue successfully raises \$4.6 million before costs
- Independent Geological Consultancy engaged to evaluate the Modifying Factors and update key economic parameters to identify opportunities to update the Feasibility Study

March 2023

- Drilling commences at the Koppio Graphite Project
- Lincoln Minerals completes first phase of drilling program at Koppio Graphite Deposit
- Infill air core drilling completed over the Koppio Graphite Deposit
- Drilling infilled existing database to approximately 40m spacing
- Rig commences drilling on the Kookaburra Gully Extended prospect to target several strongly conductive, previously undrilled EM anomalies

2.

Chair's Review

Dear Shareholders

I am delighted to present the 2023 Annual Report, which highlights our company's performance, achievements, and strategic goals for the future.

The 2022/2023 year has been significant progress for Lincoln Minerals. On January 20th, 2023, Lincoln Minerals came out of suspension and was re-quoted on the Australian Securities Exchange (ASX). As part of our re-quotation, Lincoln Minerals successfully placed a rights issue, which raised \$4.6 million to drive our drilling program and grow our resource base. On our path to re-quotation, the Board, Management and Shareholders defended two off-market takeover attempts, which included two trips to the Takeovers Panel. Whilst this process took significant resources and effort, it helped further align Lincoln Minerals' strategy with its shareholders to maximise long-term shareholder value.

Immediately following our re-quotation, Lincoln Minerals began a drilling program at our Kookaburra Gully Graphite Project for the first time in over five years. Specifically, the drilling program focussed on our Koppio deposit and Kookaburra Gully Extended deposit.

As a result of this strategic planning and execution, shareholders have been rewarded with a resource upgrade of 500 MT for the Koppio deposit. We look forward to continuing our drilling program scheduled in Q4, which will continue to add to our resource base.

Lincoln Minerals' financial performance has been in line with expectations. As a result of the attempted takeovers of Lincoln Minerals and the re-quotation process, our administration and legal expenses were higher than we would ordinarily expect. However, we consider this an investment into the future due to being successful on both occasions and keeping the company with its existing shareholders. Moving forward, we expect at least 75% of our expenses to be directed towards exploration activities. I am pleased to inform shareholders that Lincoln Minerals fully complies with our regulatory responsibilities with South Australia's Department of Energy and Mines, which means our tenements are secure.

Lincoln Minerals continues to adjust our personnel to get the team right for the circumstances in which we operate. As our management focus moves from corporate actions backlog to driving our exploration activities and moving towards mining on our Mining Lease at our flagship Kookaburra Gully Project, we have added strength to our team.

Peter Edwards joined as our Exploration Manager and is driving our drilling program designed to grow our resource base, which will lead to production in time. Our new CEO Jonathan Trewartha, an experienced Mining Engineer, will focus on moving Lincoln Minerals from an explorer to one of Australia's first graphite mining companies.

Our long-term strategic goal remains the same. That is to deliver value to all shareholders through developing and extracting mineral resources on the Eyre Peninsula. In particular, the critical mineral space, specifically in graphite, through the development of our Kookaburra Gully Graphite Project. Lincoln Minerals also has other mineral prospectivity, which the Board and Management look forward to driving forward to further deliver value to shareholders.

On behalf of the Board and Management team of Lincoln Minerals, I extend my gratitude to our shareholders for your continued support. Our future is positive, our team is focused on delivering value to all shareholders, and I am proud to be your Chair.

张瑞宇

Sincerely,
Ruiya (Yoyo) Zhang

Directors & Management

3.

The Board of Lincoln Minerals Limited (LML: ASX) has considerable experience in Australian and financial markets and an unwavering, long-term focus on owning, developing and profitably extracting the multi-commodity mineral wealth of South Australia's richly endowed Eyre Peninsula. Graphite, iron ore and base metals are the main strategic investment targets. The current board is made up of Ms Ruiyu (Yoyo) Zhang, The Hon. Ryan Smith and Mr John Lam. Mr Andrew Metcalfe acts as Company Secretary and Chief Financial Officer (CFO). Mr Sam Barden was appointed interim CEO on 25 July 2023 until Mr Jonathon Trewartha was announced as the Company Chief Executive Officer.

Jonathan Trewartha
Chief Executive Officer
Effective 3rd November 2023

Sam Barden
Interim CEO
Effective 25 October to 3 November 2023

Andrew Metcalfe
Chief Financial Officer and
Company Secretary

Peter Edwards
Exploration Manager

Jonathon is a mining engineer and entrepreneur with extensive rounded experience in exploration, operations, technical, study and project management and regulatory approvals. Holding senior positions in Australia and overseas, from greenfield exploration to feasibility studies to approvals and operations. Jonathon is also a holder of a WA First Class Mine Manager's Certificate of Competency.

Corporate experience includes Chairman, Executive Director of an ASX listed exploration company and Managing Director or Director of several private companies.

Sam Barden is an experienced CEO and Director with over 25 years of experience in Capital Markets. He has lived and worked in the UK, Russia, the Middle East, and Australia. He is experienced in cross-border transactions, creating markets, company listings, and facilitating market entry for governments and corporations.

Mr Barden has a particular focus on Resource resilience and Energy efficiency as the world moves to a low-carbon economy.

Andrew Metcalfe is a qualified accountant (CPA) and a graduate member of AICD and Fellow of the governance institute of Australia. He has undertaken CFO and company secretarial duties for a number of listed companies over the past 25 years.

Peter Edwards is an experienced Geologist with over 20 years in both geology and geophysics incorporating exploration, resource development and senior project management. He has worked with multiple commodities across Australia and has been part of discovery through to established resources leading to company IPO.

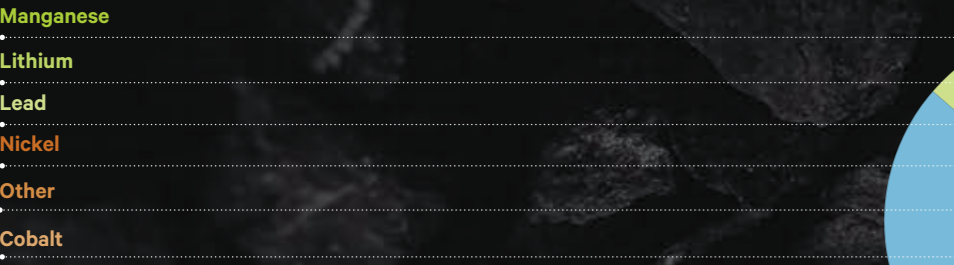

Peter has extensive knowledge in the exploration and resources industry and provides tactical insight into developing the company's exploration strategy and mineral assets.

Why Graphite

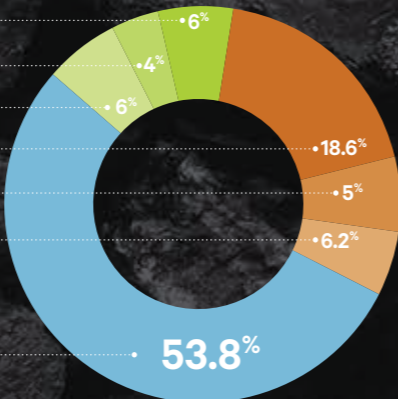

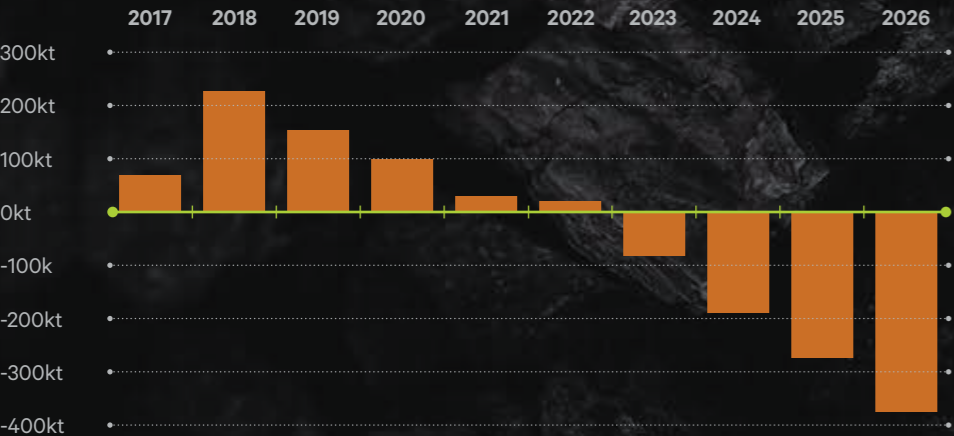

The world faces a severe graphite shortage as decarbonisation drives unprecedented demand for clean energy batteries and the graphite to make them. Lithium-ion batteries are the gold standard for electric vehicles, from ebikes, cars and buses, planes and ships to stationary energy storage systems.

GRAPHITE FORECAST TO DOMINATE BATTERY MINERAL DEMAND TO 2050

Graphite

Surplus/Deficit Estimate

The graphite market was only slightly in surplus in 2022, however it could be in a supply deficit by as early as this year.

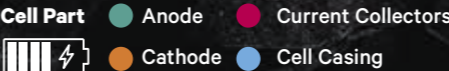

Working with Government
Our business supports the Australian Government's strategy to build a sovereign critical minerals powerhouse.

Graphite is the conductive anode (negative electrode) and the biggest commodity component by volume. It takes up to 10x more graphite than lithium to make a Li-ion battery. Lincoln is well positioned to take advantage of the forecasted supply gap for Lithium-ion battery production as well as the demand for industrial uses.

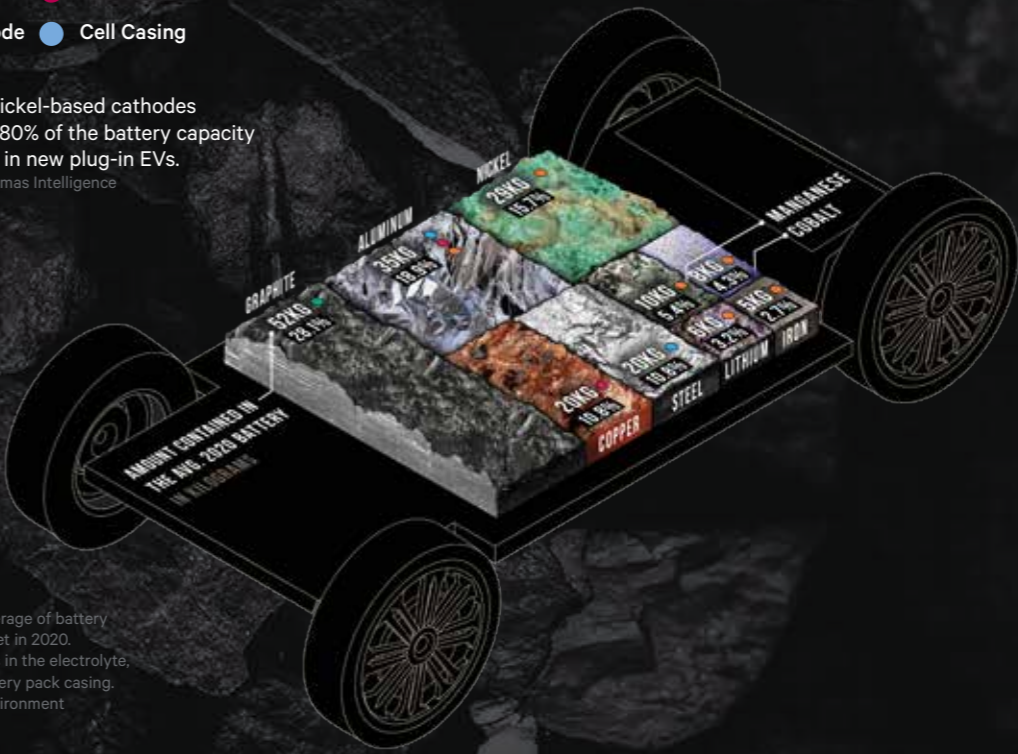

Processed graphite makes up **95%** of the **battery anode** (negative electrode) and is forecast to be in short supply for the next two decades as the electric vehicle revolution ramps up.

Analysis by Benchmark Mineral Intelligence projects that natural graphite will have the largest supply shortfalls of all battery materials by 2030 — even more than that of lithium — with demand outstripping expected supplies by about

1.2 million tonnes.

In 2021, nickel-based cathodes powered 80% of the battery capacity deployed in new plug-in EVs.
Source: Adamas Intelligence

*based on the weighted average of battery compositions on the market in 2020. Does not include materials in the electrolyte, binder, separator, and battery pack casing. Source: Transport and Environment

“ Industry analysts expect demand for graphite from the battery sector will grow by a massive

1,400%

between 2020 and 2050”

4.

Review of Operations

Lincoln Minerals is focused on the development of the Kookaburra Gully Graphite Project, located on the Eyre Peninsula in South Australia. Eyre Peninsula is Australia's foremost graphite province and home to one of Australia's largest resources of this strategically important mineral. Graphite is a key component of lithium-ion batteries that power electric vehicles and renewable energy storage systems.

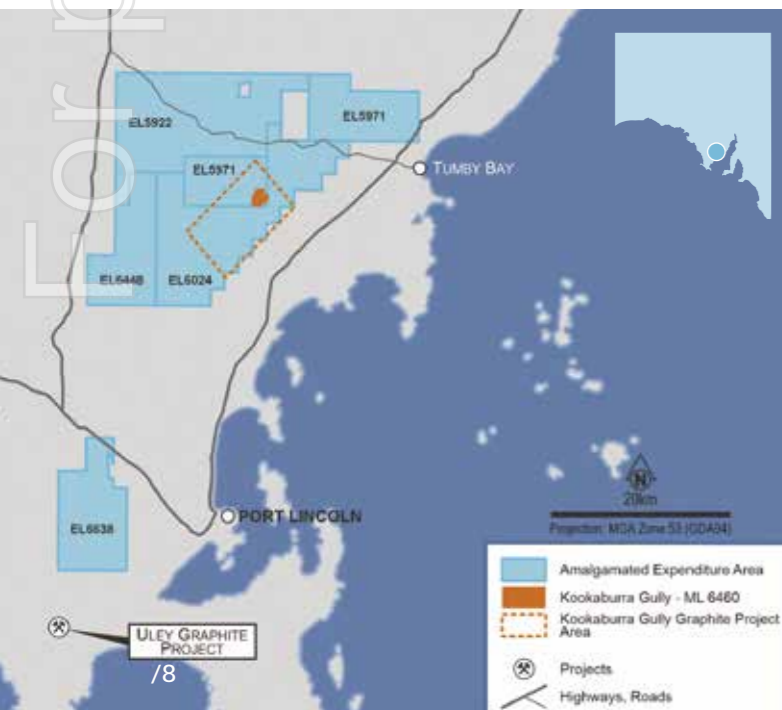

These Mineral Resources are located in close proximity to Port Lincoln which can provide all the necessary mining, transport and development infrastructure, along with port facilities, to complement the exploration and mining development process. In addition, the Company also hold tenure over several tenements which have shown indications of base metals, manganese and uranium mineralisation in a region with a history of graphite, iron ore and base metal mining.

Lincoln Minerals re-positioned itself during the year to enable it to develop a sustainable financial structure that will enable the continued exploration and future development of its flagship graphite project at its wholly owned Kookaburra Gully Graphite Project.

The Lincoln Minerals Board and management team remain focused on sustainable exploration and mining development and pursuing opportunities for organic acquisition growth.

5.

Map 2. Regional location map showing Kookaburra Gully Graphite Project, South Australia

The Ore Reserve is inclusive of total Measured, Indicated and Inferred Mineral Resources of

4.11Mt @ 12.81% TGC

at a cut-off grade of
5%

The Company's flagship asset, the Kookaburra Gully Graphite Project Area is located approximately 35km north of Port Lincoln and consists of two graphite deposits and extensive Electromagnetic (EM) anomalism along strike from these deposits. Drill testing has indicated that the conductive EM anomalies are often coincident with graphite mineralisation and the main prospective area extends along strike to the south of the Kookaburra Gully deposit, for over 5 kilometres.

Kookaburra Gully Graphite Project

This EM anomalism along strike is part of the Kookaburra Gully extended prospect which has previously returned significant graphite intersections from 70 out of the 100 wide spaced exploration aircore holes completed (see ASX Release 3 May 2017) Widespread graphite was intersected in Lincoln's maiden drilling program at Kookaburra Gully Extended on South Australia's Eyre Peninsula.

The Kookaburra Gully Graphite Project remains a key focus as the Company progresses exploration and reviews mine development planning as a high priority. Recent positive results from resource drilling at the Koppio deposit only 2 kilometres to the south, indicates potential to add significantly to the Company's graphite Mineral Resource inventory and mine development plans.

Graphite is a key component in the manufacture of battery anodes and with the transition to alternate energy sources, driven by the increase in electric vehicle production and battery storage facilities, there is an increasing demand for batteries and their component minerals. Lincoln's cornerstone Kookaburra Gully Graphite Project is well positioned to take advantage of the forecasted supply gap.

The Kookaburra Gully deposit has world class graphite grades and an approved mining lease (ML6460) but additional work is required to test extensions to the known resource, and reassessment of the mining parameters from the 2017 Feasibility Study that is underway. In the current dynamic graphite market the Company is striving to match its development of the mine while aligning its corporate strategy to maximise shareholder wealth.

Over the course of 2022/23, Lincoln continued its environmental monitoring programs at Kookaburra Gully and is positioning itself with additional resource drilling and metallurgical test work to improve graphite concentrate recovery. The Company was unable to complete the Program for Environment Protection and Rehabilitation (PEPR), which is the second stage of government approvals required before mining can commence. Given the need for additional drilling, the mining PEPR was withdrawn and an exploration or EPEPR was submitted which would enable further exploration to be done on ML6460.

The Company is confident that once the additional drilling and re-assessment of other mineable parameters has been undertaken that the mining PEPR can be updated and resubmitted in anticipation of a new mining program.

Project metrics for the Kookaburra Gully deposit, based on the 2017 Feasibility Study remain unchanged during the current reporting period and include: **The Feasibility Study showed the potential for a 10-year mine life with a pre-tax NPV of A\$81m and an Internal Rate of Return (IRR) of 33%.**

A Probable Ore Reserve of 1.34Mt at 14.6% Total Graphitic Carbon (TGC) at a cut-off grade of 8.5% TGC was defined for Kookaburra Gully. The Ore Reserve is inclusive of total Measured, Indicated and Inferred Mineral Resources of 2.03Mt at 15.2% TGC at a cut-off grade of 5% TGC see Table 1. (ASX announcement 7th October 2023). Based on mining rate of 250,000 tonnes per annum (tpa) graphite to produce up to 35,000 tonnes graphite concentrate per annum.

Capital expenditure A\$40-50 million including EPCM and 10% contingency Life-of-mine operating expenditure for mining and processing = A\$704 per tonne flake graphite concentrate based on 90% recovery.

The Feasibility Study showed the potential for a 10-year mine life with a pre-tax NPV of

A81m

and an Internal Rate of Return (IRR) of 33%.

The Koppio mineralisation has drill intersection grades up to

42.8% TGC

Within an estimate of:

2.08Mt@ 10.5%

Koppio Deposit

The Koppio Deposit is situated on Exploration Licence EL6024, south of the Kookaburra Gully Graphite Deposit, where the Company was granted a mining lease ML6460. Exploration completed during the 2022/23 year included a ground electromagnetic survey which was designed to assist in drill targeting at the Koppio Deposit.

The Koppio resource modelling was based on information compiled by Lincoln Minerals' geologists. Geochemical assay and specific gravity information from drill samples collected in 2014 and 2023 were used to define the graphite mineralisation and geological domains. Two domains were defined using: (1) a nominal 5% TGC cut-off value; and (2) a nominal 2% TGC cut-off value. Domain 1 represents the core deposit with TGC >5% ,while Domain 2 is the 2%-5% halo surrounding Domain 1.

Based on these domains, estimation parameters were defined, reviewed, and enhanced to estimate graphite Mineral Resources and contained graphite.

At a nominal 5% cut-off, the Indicated and Inferred Mineral Resource is 2.08 Mt at 10.5% TGC. Total Contained Graphite for this Mineral Resource is 217,840 tonnes. At a nominal 2% cut-off, the total Inferred and Indicated Mineral Resource is 3.63Mt at an average of 7.36% TGC. Total Contained Graphite for this resource is 267,129 tonnes.

The Koppio graphite deposit occurs within Palaeoproterozoic Hutchison Group metasediments on the eastern Eyre Peninsula. High-grade metamorphism to Upper Amphibolite faies and locally to Lower Granulite faces, has produced coarse-grained flake graphite within graphitic schist units. The graphite occurs at several of steeply-dipping lenses with an aggregate thickness of about 10-30m in the central and southern parts of the deposit as interpreted from the historic mine workings, surface mapping carried out by LML, and drill hole intercepts based on OreWin's interpretation. The aggregate thickness reduces to about 10m at the northern end of the deposit (160m north of the mine workings). The interpreted dip of the graphite units is about 65°-75° to the southeast, but are complexly folded.

The Mineral Resource at Koppio has a strike length of 575m and a depth extent of at least 100m below ground level at the site of the historic mine workings. The current strike length is still open to the north and south of the current drill extents.

The historic Koppio graphite mine was intermittently mined from the early 1900's to 1944 (South Australian Department of Mines (now SA Department for State Development) Report Book 21/87, 1945) and contains high-grade lenses of coarse flake graphite up to 32% TGC. Up to 100 tonnes of graphite was mined from Koppio during the 1940s and processed in Port Lincoln. However, what concentrate was produced and/or sold is not known.

On the 7th October, the Company announced an upgraded Mineral Resource estimate for its wholly-owned Koppio Deposit in the Kookaburra Gully Graphite Project (KGGP,) adding further to its total discovered graphite resource. The increase in Mineral Resource estimate also includes an upgrade from Inferred to Indicated for the Company's second graphite deposit.

Table 2. Koppio mineral resource estimates at 2% Cut Off grade

Mineral Resource Classification	Cutoff Grade TGC (%) 2%	Tonnage (Mt)	Average Grade TGC (%)	Contained Graphite (tonnes)	Density (g/cc)
Inferred		0.79	6.72	53,116	2.70
Indicated		2.84	7.53	214,606	2.74

Map 4. Location map showing Lincoln Minerals tenements

Gum Flat Iron Ore Project Southern Eyre Peninsula

Our Gum Flat Iron Ore Project on the southern Eyre Peninsula has a Indicated and Inferred Mineral Resource of 109 million tonnes @24.8% Fe.

This includes some hematite-goethite, which is suitable for direct shipping, and a portion of magnetite, which would require processing into a high-grade concentrate for sale.

Map 3. Map showing location of drilling at the Koppio Deposit

Total	4.11	10.47	525

Strategy and Objectives

The Company’s strategy is to focus on metallogenic provinces close to established infrastructure within a stable political environment – two factors strongly evident across the Company’s extensive Eyre Peninsula tenement holdings.

Lincoln Minerals is exploring graphite, gold, copper, zinc-lead-silver, iron and manganese targets on the Eyre Peninsula. The Eyre Peninsula is part of the highly endowed, Gawler Craton mineral province that not only hosts iron ore mines of the Middleback Ranges but also the Olympic Dam and Prominent Hill iron oxide copper gold uranium (IOCGU) mines, Carapateena and Hillside copper deposits and the historic copper mines of the Moonta-Wallaroo area.

Eyre Peninsula is Australia’s foremost graphite province and home to one of the largest resources of this strategically important mineral in Australia. Graphite is a key component of lithium-ion batteries that power electric vehicles and renewable energy storage systems, a large and rapidly growing market.

Lincoln Minerals’ exploration methodology is based on application of both proven and innovative exploration techniques while ensuring a systematic approach to effective target delineation. The Company utilises modern sophisticated exploration techniques, in particular advanced geophysical, remote sensing and geochemical techniques including field based XRF element analysis and innovative vegetation and soil sampling to detect concealed mineralisation. These techniques are combined with computerised geographic information systems (GIS) and 3D modelling software to interpret data for exploration, target generation and resource definition. Results are followed up by systematic drilling along with state-of-the-art field and laboratory sample analysis to test targets and define Mineral Resources.

A key focus of all of Lincoln Minerals’ operations is sustainable environmental and workplace health and safety management. Lincoln Minerals continually seeks to improve business sustainability by valuing environmental, social, economic and ethical considerations across all of its operations and the Company is committed to achieving the highest performance in workplace health, safety and the environment.

In South Australia, the Company is focusing on areas close to existing export infrastructure that includes established highways suitable for bulk haulage, existing power and water services and established or proposed bulk handling ports.

Coordination Agreements

Under an agreement signed in April 2017, Baogang Group Investments (Australia) Pty Ltd assumed Centrex Metals Limited (CXM) obligations in relation to the Bungalow-Minbrie exploration tenement EL 5851, which was transferred and endorsed to Dragon Resource Investment Pty Ltd in January 2023. The April 2017 agreement records Lincoln’s consent to the transfer of CXM’s interest in that tenement to Baogang and provides for Baogang to be the registered holder of EL 5851 following that transfer.

Lincoln Minerals is maintaining an active role in monitoring exploration programs by Dragon for other minerals including copper, graphite and vanadium. The Minbrie copper discovery in early 2012 was the result of drilling by Centrex on EL 4884 (now EL 5851).

Australian Graphite Pty Limited

In mid-2013, Australian Graphite Pty Limited (AGL) was formed as a wholly-owned subsidiary company of Lincoln Minerals Limited to hold key graphite assets of the Company. AGL owns Mineral Lease 6460 (ML) and the graphite and graphite-associated mineral rights over a number of Lincoln Minerals’ ELs (see the Tenement schedule below).

A Coordination Agreement between AGL and Lincoln Minerals establishes AGL’s rights to graphite, Lincoln’s rights to other minerals and sets out the framework for exploration and development of resources or co-development of coincident resources as the case may be.

If any party discovers any economic deposit(s) of minerals, that party must notify the other parties of such discovery and commence negotiations to enter into a formal agreement based on a set of co-ordination principles depending on whether it is:

- An economic deposit of graphite minerals without significant other minerals or with uneconomic other minerals.
 - An economic deposit of other minerals without significant graphite mineralisation or with uneconomic graphite mineralisation;
- or
- An economic deposit of graphite minerals that co-exists with an economic deposit of other minerals.

If a party is granted a mineral lease, having complied with the provisions of the Coordination Agreement, that party will become the mine operator, but all other parties will have the right to reassess the economic value of their rights at any time provided it is at their own cost and without any unreasonable adverse effects to the mine operator’s activities.

Project Portfolio

The Company holds rights to South Australian exploration lease holdings totalling 1,177km2.

Lincoln Minerals and its wholly owned subsidiary, Australian Graphite Pty Limited, have exclusive rights to all minerals including iron ore on leases totalling 1,025km2. This includes Mineral Lease ML 6460 at Kookaburra Gully.

Lincoln Minerals are joint operators with Baogang Group Investments (Australia) Pty Ltd, on leases totalling 117km2 with exclusive rights to all minerals excluding iron ore. Centrex and one of its subsidiaries sold its iron ore rights to Mineral Lease ML 6344 and Retention Lease RL 129 to One Steel Manufacturing, while Lincoln retains its mineral rights excluding iron on these tenements.

Table 3. Lincoln Minerals Limited Tenements as of 30 June 2023

Tenement Schedule

Exploration & Development

Kookaburra Gully Graphite Project

(Australian Graphite has exclusive rights to graphite and graphite-associated minerals)

Australian Graphite (AGL) owns the Kookaburra Gully Graphite Project, located approximately 35km north of Port Lincoln and 20km west of Tumbby Bay on Eyre Peninsula in South Australia.

Mineral Lease ML 6460 was granted for a period of 21 years commencing on 3 June 2016 and the Company has been working towards completing the Program for Environment Protection and Rehabilitation (PEPR) which is the second stage of government approvals required before mining can commence.

In order to comply with the conditions of its Mining License and submit the associated PEPR, AGL, upon re-capitalisation during 2022/2023 concluded that additional resource development and reassessment of the 2017 feasibility would be required. Based upon discussions with DEM regarding the PEPR it was decided to withdraw the PEPR and apply for an alternate exploration or EPEPR which would allow additional exploration and resource drilling to be undertaken and assessed with regard to progressing future mining operations

Graphite Mineral Resource estimates are reported by OreWin Pty Ltd (OreWin) as the Competent Person in accordance with the JORC Code (2012 Edition).

The Mineral Resource estimate uses a nominal 5% TGC cut-off that has been determined as shown in the Table 1 and released by the Company on 17 May 2017.

The Ore Reserve estimation used the summation of Measured and Indicated mineral resources at a cutoff grade of 8.5% TGC and based upon Feasibility Study results for Kookaburra Gully, AMC Consultants and Lincoln estimated a Probable ore Reserve of 1.34Mt @14.6% TGC as displayed in Table 2 and as released by the Company 27 November 2017. There have been no material changes to the modifying factors during the 2023 reporting period.

Table 4.

Mineral Resources at 5% TGC cut-off grade			
Classification	Tonnes (Mt)	TCG (%)	Contained Graphite (t)
Kookaburra Gully			
Measured	0.39	14.9	58,110
Indicated	1.08	14.9	160,920
Inferred	0.56	16.0	89,600
Koppio			
Indicated	1.64	10.7	42,000
Inferred	0.44	9.59	175,000
Total Resources	4.11	12.81	489,360

Information in this report that relates to exploration activity and results, Mineral Resources and Exploration Targets was compiled by Sharron Sylvester who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Povey is Chief Geologist for Lincoln Minerals Limited and has sufficient experience relevant to the styles of mineralisation and to the activities which are being reported to qualify as a Competent Person as defined by the JORC Code, 2012. Mr Povey consents to the release of the information compiled in this report in the form and context in which it appears.

Information extracted from previously published reports identified in this report is available to view on the Company's website www.lincolnminerals.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Program for Environment Protection & Rehabilitation (PEPR)

With a Mineral Lease (ML) granted for the Kookaburra Gully Graphite Project, the second approval pathway is to complete a Program for Environment Protection and Rehabilitation (PEPR). Lincoln submitted a draft PEPR to SA's Department of Energy and Mining (DEM) and they provided feedback and requested additional information in December 2017.

Since that time Lincoln's PEPR resubmission has been on hold so that the company can position itself to secure the project's required capital and review the Feasibility Study (FS) in order to assess any additional updates that may be required. Part of this assessment is a review of the key parameters used in the FS, as well as additional resource drilling that may remove uncertainty associated with the north extension of the resource. This area was not drilled due to access issues but is now owned by AGL and has graphite outcropping at the surface with the potential for additional graphite Mineral Resources which could add to the mining inventory once defined.

On this basis and in discussion with DEM, the Company has withdrawn its mining PEPR temporarily in order to apply for an exploration or EPEPR which will allow further exploration programs on the ML. The draft EPEPR was submitted to DEM who have reviewed it and asked for some amendments before it can be approved. These amendments are awaiting the result FS review before being resubmitted. The Company is confident that additional drilling will yield significant data in terms of graphite intersections and test the EM conductivity anomalies that were highlighted by the recent ground EM survey.

Eurilla Project (EL5942) Multi-Commodity Project Northern Eyre Peninsula

Over the course of 2022/23 Lincoln conducted additional a close spaced and ultra closed spaced surface geochemical sampling program over gold in calcrete anomalism identified during a previous geochemical program and reinterpretation / compilation of surface geochemical results. The previous compilation included a dataset of some 230,000 records on near surface samples to target gold and base metal anomalism. Lincoln focussed its initial efforts on gold pathfinder elements and the dataset identified a pronounced gold anomaly, however analytical results from the new program did not repeat the previous anomalism.

Lincoln's northern tenement holdings are located in the Kimban gold mineral system and the Kararan Gawler Range Volcanic mineral system due to the presence of both banded iron formations and overprinting skarn mineralisation identified on the tenements. There is considerable potential for gold and/or base metal mineralisation associated with hydrothermal iron oxide and/or sericite alteration.

The Eurilla tenement area is along strike from the Wilcherry Hill magnetite and gold deposit, Hercules iron ore, Menninnie Dam zinc-lead-silver and Paris silver deposits to the northwest.

The tenement is prospective for iron ore, uranium, gold, manganese, silver and base metal accumulations associated with the nearby Gawler Range Volcanic units. The Company believes more field testing is required to define additional multi element drill targets including;

In situ hematite-magnetite Inferred Mineral Resource of 21.7Mt @ 33.3% Fe Manganese up to 66% MnO and epithermal-style silver, gold and base metal anomalies near Uno.

Minbrie Copper Project (EL5851) Central Eyre Peninsula

Significant historical (2013) drilling intercept of skarn style base metal mineralisation at Minbrie with an intercept of 29.5m at 0.76% copper, 7.37% lead, 1.88% zinc, 9.0 g/t silver from 131.1m in diamond drill hole BUDD192. (See ASX release 23 Jan 2012:)

Assays confirm and increase grades of new high grade base metal discovery for Lincoln at Minbrie on SA's Eyre Peninsula. No further work has been completed however Lincoln has an agreement with Dragon Resource Investment Group Pty Ltd who are also exploring for Fe Ore.

Gum Flat Iron Ore Project Southern Eyre Peninsula

No field work was completed in the reporting period apart from care and maintenance of Lincoln's core storage and sample processing facility. Previous Fe Ore definition drilling has highlighted a number of graphite intersections in this project area which is approximately 2km along strike from the Uley Graphite mine and these are yet to be followed up.

The Company is considering an Electromagnetic survey which in the past has proved to be successful in delineating conductors at and around the Uley Graphite mine. 109Mt Indicated and Inferred Mineral Resources at 24.8% Fe.

Directors' Report

For the year ended 30 June 2023

7.

The Directors present their report together with the consolidated financial report of Lincoln Minerals Limited (the Company) and its subsidiary companies (the Group) for the financial year ended 30 June 2023 together with the Auditor's report for the financial year end 30 June 2023.

Director's

The Directors of the Company at any time during or since the end of the financial year are:

Ruiyu Zhang
Non-Executive Chair
(appointed 30 July 2021 to 3 February 2023; continued as Non-Executive Director to 24 July 2023; reappointed non-Executive Chair 25 July 2023).
Ms Zhang is a qualified accountant and has an extensive business network in Australia as well as in mainland China. Ms Zhang resigned from the chair on 03 February 2023.

Hon Ryan Smith
Non-Executive Director
(appointed 25 July 2023)
Mr Smith combines 18 years working in the corporate sector managing financial risk with his 16 years' experience as a Member of the Victorian Parliament. He served as a Minister in the Coalition government, as a Shadow Minister and on a number of Parliamentary Committees. Mr Smith brings significant experience in areas of governance and risk mitigation.

John Lam
Non-Executive Director
(appointed 1 September 2023)
Mr. Lam is a highly experienced company director with substantial experience and an extensive network in the banking and investment industries. From 1991 to 2005, he held senior positions at Hong Kong Bank of Canada (HSBC Bank Canada), HSBC California, and Hang Seng Bank Limited. Mr Lam subsequently worked at Dah Sing Bank, Limited from September 2005 to February 2012, with his last position as an executive director head of retail banking. Afterward, Mr. Lam acted as the vice chairman and executive director of Nan Fung Property Holdings Limited from 2013 to 2021.
He graduated from Ryerson Polytechnical Institute (currently known as Toronto Metropolitan University) in Toronto, Canada, in June 1988, receiving his Bachelor of Business Management degree. He is a fellow of The Institute of Canadian Bankers and a fellow of the Royal Institution of Chartered Surveyors.

lincolnminerals.com.au

The Directors of the Company at any time during or since the end of the financial year were:

Catherine Norman
Non-Executive Chair
(appointed 03 February 2023; resigned 24 July 2023)
Interim CEO (23 March 2023 to 24 July 2023)

Cath has a wealth of experience and knowledge in the resources industry overseeing exploration and development, project financing, joint venture and asset transactions. Cath has held executive and board positions in Australia, Europe, Africa and the Middle East over a 35-year career and has a proven track record of leadership and strategic vision. Cath holds a BSc in Geophysics.

Director's

The Directors of the Company at any time during or since the end of the financial year were:

Sam Barden
Managing Director / CEO
(appointed 6 June 2022; resigned as CEO 23 March 2023; resigned as Director 23 June 2023)
Interim CEO (appointed 25 July 2023)
Mr Barden is skilled in transforming systems and markets by creating products, building profiles and improving transparency. He draws on 20+ years of experience in sales, trading, risk assessment and regulation of financial and commodity products in the United Kingdom, Former Soviet Union and the Middle East. During that time, Mr Barden was duly qualified and registered with the Financial Conduct Authority (FCA) in the UK and the Financial Industry Regulatory Authority (FINRA) in the USA.

Michael D Wyles KC FAICD
Deputy Chair
(appointed 29 July 2022; resigned 20 October 2022)
In addition to being one of Australia's leading commercial silks, Wyles is an experienced Chairman and company director having achieved substantial commercial experience both inside the boardroom and advising directors, CEO's and CFO's over many years.

Jason Foley
Non-Executive Director,
independent (appointed 29 July 2022)
Mr Foley draws on 20+ years of deep expertise in mining and resources with top-200 ASX companies. He is a trusted advisor to CEOs and Boards across ASX-listed, Private Equity and SMEs in Australasia.

Shalain Singh
Non-Executive Director
(appointed 29 July 2022; resigned 26 October 2022)
Mr Singh has extensive experience in transactions valuation and strategic advisory in the Healthcare and Retirement Living industry, and a broad understanding of the implications of industry, government and market conditions.

Ross Loturco
Non-Executive Director
(appointed 29 July 2022; resigned 26 October 2022)
Mr Loturco has extensive experience in Bank Relationships, Loan Implementations, Cashflows, AR/AP Management, Board Reporting, Monthly Management Reporting, Commercial/Retail Leasing, Financial Controls and especially Project Budgeting & Forecasting as core functions of his past responsibilities.

Director's Report

Johnson Zhang
Non-Executive Chairman
(appointed 30 May 2018; resigned 29 July 2022)
Mr Johnson Zhang holds a Bachelor of Business and has strong business experience in Australia in investments and property. Mr Zhang is a strategic and commercially focused professional with a proven track record for driving improvement and business growth.

Ting Ting Gao
Non-Executive Director
(appointed 22 December 2021; resigned 29 July 2022)
Ms Tingting Gao holds a Master of Professional Accounting degree from Monash University. She is a Certified CPA who also has extensive experiences in real estate and property management industries.

Cath Norman was a director of FAR Limited (ASX: FAR) in the past three years. No other director has been a director of a listed company in the past three years.

Company Secretary

Mr Andrew Metcalfe was appointed Company Secretary in June 2021 and CFO on 1 March 2023. He holds a Bachelor of Business Degree, is a CPA, a Fellow of the Governance Institute of Australia, Graduate member of AICD, and is also Company Secretary of a number of ASX listed and unlisted companies.

Operating and Financial Review

Lincoln Minerals Limited is an ASX-listed and South Australian-focused mineral exploration and development company looking to deliver a graphite mining production following the achievement of development and commercialisation milestones for its primary graphite assets on Eyre Peninsula, a proven mining jurisdiction in South Australia. The Company also owns and is advancing a pool of second tier assets across gold and iron ore mineral commodities on Eyre Peninsula. During the year the Company continued to evaluate and maintain its exploration licences in South Australia.

The Group made a loss after tax of \$3,610,043 (2022: \$2,026,538). Exploration and evaluation expenses of \$578,438 (2022: \$151,519) were expensed in the year. Interest income was \$75 (2022: \$75). Cash at 30 June 2023 was \$1,162,293 (2022: \$42,124).

The loss was primarily due to costs associated with a number of corporate actions including the holding of two AGM's, preparation and lodgement of an underwritten rights issue prospectus offer, attending to matters lodged with the Takeovers Panel by third parties, defence of the QGL takeover offer by preparing ad lodging a Targets Statement and a drilling program on the Company's Eyre Peninsular tenements.

Significant changes in entity's state of affairs during the year

1. Changes to the board

On 29 July 2022, the following changes to the board were made: Appointment of Messrs Michael Wyles KC, Jason Foley, Shalain Singh, Ross Loturco as non-executive directors and appointment of Sam Barden as Managing Director; and resignation of Johnson Zhang and Tingting Gao as directors.

On 20 October 2022, Michael Wyles KC resigned and on 26 October 2022, Shalain Singh and Ross Loturco resigned.

On 3 February 2023, Catherine Norman was appointed a director and independent chair of LML.

On 23 March 2023, Sam Barden resigned as CEO and remained on the board as a non-executive Director. Ms Cath Norman was appointed acting CEO from that date for the remainder of the reporting period.

On 23 June 2023, Sam Barden resigned as a director of the Company.

2. Takeover offer

On 10 August 2022 the Company received a takeover offer by way of a Bidders Statement from Quantum Graphite Limited to acquire all shares in the company on the basis of 1 share offered in Quantum Graphite Limited ("QGL") for 9 shares held in Lincoln Minerals Limited.

On 12 August 2022, the Company issued a statement rejecting the offer received from Quantum Graphite Limited.

On 6 September 2022, the Company received a Revised Bidder Statement from Quantum Graphite Limited to acquire all shares in the company on the basis of 1 share offered in Quantum Graphite Limited for 40 shares held in Lincoln Minerals Limited.

On 5 October 2022, the Company issued a Target Statement in response to the Revised Bidder Statement received from Quantum Graphite Limited.

On 31 October 2022, the Company issued a Supplementary Target Statement in response to the Revised Bidder Statement received from Quantum Graphite Limited and matters tabled at the Takeovers Panel resulting in the requirement to prepare a Supplementary Target Statement.

On 28 November 2022, the Company issued a Second Supplementary Target Statement in response to the Revised Bidder Statement received from Quantum Graphite Limited and additional matters tabled at the Takeovers Panel resulting in the requirement to prepare a Second Supplementary Target Statement.

On 24 January 2023, QGL extended the bid to close on 6 March 2023; and on 27 February 2023, QGL extended the bid to close on 7 April 2023; and on 8 May 2023, QGL extended the bid to close on 14 July 2023, unless extended.

3. Shareholder loan

On 23 December 2021, Lincoln Minerals Limited entered into a convertible note agreement with Australia Poly Minerals Investments Pty Ltd (the note holder), a company associated with Mr James Tenghui Zhang, the largest shareholder of Lincoln Minerals.

Notwithstanding the requirement for shareholder approval to issue the convertible notes, Australia Poly Minerals Investments Pty Ltd advanced funding to the Group to ensure it could meet its financial obligations.

On 12 September 2022, Australia Poly Minerals Investments Pty Ltd and the Group agreed that the Convertible Notes would no longer be issued and replaced with an unsecured Share holder loan facility of \$1.6 million bearing interest at 8% per annum, repayable at the earlier of the Group completing an equity raise or debt financing of not less than \$4 million or 31 December 2022.

On 21 November 2022, Australia Poly Minerals Investments Pty Ltd and the Group agreed to waive the interest on its unsecured shareholder's loan.

On 21 November 2022, Australia Poly Minerals Investments Pty Ltd agreed to become a sub-sub-underwriter to the underwrit ten rights issue prospectus and be repaid the full amount of the loan out of proceeds received under the rights offer that was to raise approximately \$4.6 million.

On 17 January 2023, the Company repaid the shareholder loan in full, from funds received under the fully underwritten non-renounceable rights issue.

4. Fully underwritten rights issue

On 24 November 2022, the Company issued its fully under written rights issue offer to Eligible Shareholders of 67 new shares for every 50 shares held at an issue price of \$0.006 (0.6 cents) per New Share to raise approximately \$4.6 million before costs. The Rights Issue was fully underwritten by Evolution Capital Pty Ltd and partially sub-underwritten by Australia Poly Minerals Investments Pty Ltd. On 20 December 2022, the Company issued its replacement prospectus to provide for various additional disclosures. Proceeds from the rights issue allow the Group to undertake exploration on its Eyre Peninsular leases and repay the unsecured shareholder loan (refer to note 3).

On 9 January 2023, the Company successfully completed its rights offer raising \$4,622,869 before costs. On 18 January 2023, the Company issued 770,478,139 new ordinary shares in LML, under a new ASX code: LMLND Part of the proceeds from the rights issue was used to repay the unsecured shareholder loan (refer to note 5).

5. Re quotation of ordinary shares on ASX

On 20 January 2023, the ASX readmitted Lincoln Minerals Limited to trading status on the ASX. Shares on issue prior to the rights issue were readmitted under the ASX code: LML. Shares issued under the prospectus offer and director shares issued (refer to note 3) were readmitted under ASX code: LMLND due to the Quantum Graphite Limited off market scrip bid for all shares in LML.

6. Exploration and evaluation assets

On 3 August 2022, the Company received a letter from the Department of Energy and Mining of South Australia (the "Department") concerning EL5922, EL5971, EL6024, EL6441, EL6448 and EL6638 (formerly 5811) referred to as "Southern Eyre Peninsula Project (AEA019-001)" (the "SEP Project"). The SEP Project is in addition to ML6460 (Kookaburra Gully) which lease runs until 2 June 2037.

In its letter, the Department stated that it supported an extension of the SEP Project for another 2-year period subject to the following:

- a. Successful relisting of Lincoln in the ASX.
- b. Receipt of a valid expenditure return for the current AEA period no later than 60 days after the AEA period end date.
- c. Future expenditure commitment to be carried forward and be added to the expenditure commitment for the new AEA, and that failure to meet the new combined expenditure may result in cancellation of the exploration licences.

6. Shares issued to directors

On 29 November 2022, shareholders approved the issue of ordinary shares to 3 directors: Sam Barden, Ruiyu Zhang and Jason Foley, subject to successful completion of the rights issue and re quotation of ordinary shares on ASX. Both events were met and 31 million shares were issued on 18 January 2023 (21 million shares to Sam Barden, 5 million shares to Ruiyu Zhang and 5 million shares to Jason Foley. A further 7 million shares were issued to Sam Barden on 1 February 2023, being the first of three tranches of 7 million shares approved to be issued. A further 7 million shares were issued to Sam Barden on 1 April and a further 7 million shares were issued to Sam Barden on 1 June 2023. On 4 April 2023, 4 million shares were issued to Ruiyu Zhang and 4 million shares were issued Jason Foley. On 9 February 2023, Cath Norman was issued 9 million shares as a result of her appointment to the board.

8. Exploration program

In March 2023, the Company commenced an air-core drilling program over highly prospective graphite mineralisation areas commencing with the Koppio Graphite Project, which was followed by exploration drilling on the prospects identified from electromagnetic surveying on the Kookaburra Gully Extension region and drilling at the Kookaburra Gully Graphite Deposit. Following completion of the 5,643 metre / 75 hole drilling program, drilling results were announced in June 2023 which revealed additional graphite mineralisation to that previously drilled.

Significant Events After Reporting Date

The following events have occurred post 30 June 2023:

Merge of stock codes

On 17 July 2023, Lincoln Minerals' ASX codes LML and LMLND merged as a result of Quantum Graphite Limited (ASX: QGL) lapsing their unsolicited takeover offer on 14 July 2023.

Changes in Directors

Ms Catherine Norman resigned from the non-executive Chair and acting CEO effective 24 July 2023. Hon Ryan Smith was appointed as non-executive director on 25 July 2023.

Mr John Lam was also appointed as a non-executive director on 1 September 2023.

Changes in Executives

Following the resignation of Ms. Cath Nortman as acting CEO, Mr Sam Barden agreed to assume the role of interim CEO on 25 July 2023 as the company searches for a permanent CEO.

Likely Developments and Expected Results

In the reporting period, the Group was principally engaged in re-establishing itself on the ASX, raising capital, and undertaking an exploration program at the Kookaburra Gully Project tenements.

Dividends

No dividends were paid, and the directors have not recommended the payment of a dividend (2022: Nil).

Environmental Regulation

The Group is subject to environmental regulation in respect of the exploration and mining tenements granted to it and the mining legislation of the states in which the mining tenements are held. The Directors are satisfied that no breaches of the environmental conditions of these licences have occurred as they are continually monitoring the Group's operations. No notices of any such breaches have been received from any authority.

Environment and Social Policy

Environment

The Group is aware of its corporate responsibility to impact as little as possible on the environment and, as necessary, to undertake exploration programs, mining operations and/or rehabilitate sites in line with detailed procedures and guidelines published by the South Australian Government.

Due to recent Board and management changes, the Group continues to develop policies to monitor performance and improve operational procedures to best environmental practice and minimise the impacts of exploration activities wherever possible.

Social

The Board and Management are committed to a working environment that provides equality to all and that respects the rights, cultural beliefs and relevant concerns of all landholders and communities that have a legitimate interest in land upon which we propose to undertake exploration and development.

This will involve ongoing communication with relevant local residents, farmers, pastoral property owners, Aboriginal groups and local authorities.

The Group has an employment strategy that aims to help improve access to employment for local Aboriginal people and where appropriate, will investigate and assist in the development and implementation of traineeships and/or training programs that will best meet the Group's and industry's future needs.

Options

There are no options outstanding as at the date of this report (2022: Nil).

Corporate Governance

The Board has adopted the ASX Corporate Governance Council’s “Corporate Governance Principles and Recommendations – 4th Edition” (ASX Recommendations). The Board continually monitors and reviews its existing and required policies, charters and procedures with a view to ensuring its compliance with the ASX Recommendations to the extent deemed appropriate for the size ofthe Company and its development status.

A summary of the Company’s ongoing corporate governance practices is set out annually in the Company’s Corporate Governance Statement and can be found on the Company’s website at: <http://www.lincolnminerals.com.au/corpgovernance.php>

Remuneration Report - Audited

Key management personnel (KMP) have authority and responsibility for planning, directing and controlling the activities of the Group. This report outlines the remuneration arrangements in place for KMP of Lincoln Minerals Limited during the reporting period.

Corporate Performance

The performance of the Company / Group for the past 5 years is:

Year	Net (loss) for the year	(Loss) per share – cents	Shareholders’ Equity	Number of issued shares – end of year	Share price – end of the year – cents
2019	(894,053)	(0.16)	8,882,888	574,983,686	0.5
2020	(861,875)	(0.15)	8,021,013	574,983,686	0.4
2021	(744,638)	(0.13)	7,276,375	574,983,686	0.8*
2022	(2,026,538)	(0.35)	5,249,837	574,983,686	0.8*
2023	(3,610,043)	(0.35)	7,035,814	1,420,711,808	1.1

No dividends have been paid, nor have there been any capital reductions or share cancellations over the above periods. ASX suspended share trading of Lincoln Minerals on 21 September 2020 and resumed trading of shares on 20 January 2023. (*last trading share price on 21 September 2020).

Remuneration Committee

The Board formed a Remuneration Committee in October 2022, which is responsible for determining and reviewing compensation arrangements for the Directors and KMP. Committee members were Jason Foley and Sam Barden. No meetings of the Remuneration Committee were held in the reporting period. The Remuneration Committee was disbanded in March 2023.

The Board of Directors with the support of the Remuneration Committee, assess the appropriateness of the nature and amount of remuneration of Directors and KMP on a periodic basis by

Key Management Personnel comprise:

Directors	
C Norman	Non-executive Chairman appointed 3 February 2023

A Metcalfe	Company Secretary/CFO
C Taylor	Exploration Manager – appointed 1 March 2023
D Povey	Chief Geologist – resigned 28 February 2023 (now acting as consultant)

Remuneration philosophy

The performance of the Group depends on the quality of its directors and executives, who are KMP of the Company. Compensation levels for KMP are competitively set to attract and retain appropriately qualified and experienced Directors and KMP. To this end, the Group embodies the following principles in its remuneration framework:

- Provide competitive rewards to attract high calibre executives. Link executive rewards to shareholder value; and
- Establish appropriate, demanding performance hurdles in relation to variable executive remuneration.

reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high-quality Board and KMP.

In the future, share options may form part of a remuneration package and the number and terms of such options will be determined in accordance with the above objectives.

The Remuneration Committee did not make any use of remuneration consultants during the period.

Remuneration Structure

In accordance with best practice corporate governance, the structure of non-executive Director and senior management remuneration is separate and distinct.

Non-executive Director Remuneration

Objective
The Board seeks to set aggregate remuneration at a level which provides the Group with the ability to attract and retain Directors of the highest calibre and with the experience and qualification appropriate to the development of the Company, whilst incurring a cost which is acceptable to shareholders.

Structure
The Constitution and the ASX Listing Rules specify that the aggregate remuneration of Non-Executive Directors shall be determined from time to time by shareholders at a General Meeting. An amount not exceeding the determined aggregate is then divided between the Directors as agreed. At a General Meeting held in November 2016 shareholders approved an aggregate remuneration of \$450,000 per year. The current fee level is \$50,000 per annum for each Non-executive Director and \$60,000 for the Chairman, all inclusive of statutory superannuation).

The Board considers fees paid to Non-executive Directors of comparable companies when undertaking the annual review process. All of the Non-executive Directors received directors’ fees in cash. Non-executive Directors’ fees are not linked to the performance of the Group. However, Directors may be issued options and performance rights from time to time to provide the necessary incentive to grow long-term shareholder value. Issues of options and rights to Directors requires approval by shareholders in general meeting.

Executive Director and Key Management Personnel Remuneration

Objective
The Group aims to reward executives with a level and mix of remuneration commensurate with their position and responsibilities within the Group and so as to:

- Reward executives for Group and individual performance. Align the interests of executives with those of shareholders. Link reward with the strategic goals and performance of the group; and
- Ensure total remuneration is competitive by market standards.

Structure
It is Board policy that employment contracts are entered into with the Managing Director and other KMP.

Remuneration consists of the following key elements:
Fixed Remuneration
Variable Remuneration

The Company currently has no formal performance related remuneration policy which governs the payment of annual cash bonuses upon meeting predetermined performance targets.

However, the Board may consider performance related remuneration in the form of cash or share options or performance rights when they consider these to be warranted. Following a review of the Group’s performance, the Board decided not to reward any variable remuneration in the current year.

The proportion of fixed remuneration and variable remuneration (potential short term and long-term incentives) is established by the Board of Directors. There was no variable remuneration issued during the year.

Fixed Remuneration

Objective
The level of fixed remuneration is set so as to provide a base level of remuneration which is both appropriate to the position and is competitive in the market.

Fixed remuneration is reviewed in accordance with contract terms by the Board of Directors and the process consists of a review of companywide and individual performance, relevant comparative remuneration in the market and internal and, where appropriate, external advice on policies and practices.

Employment Contracts

Employees are employed under terms which include annual reviews as to their personal performances and assessment as to general employment market conditions.

During the reporting period:
Ruiyu Zhang – Chair to 3 February 2023: engaged on an annual remuneration of \$60,000 per annum.

Cath Norman – Director/Chair from 4 February 2023: engaged on an annual remuneration of \$60,000 per annum plus \$60,000 in specialist consulting fees. From 23 March 2023, the Chair operated in the role of acting CEO until the end of the reporting period. Remuneration paid in the acting CEO role was \$300,000 per annum plus super. Directors’ fees were not paid to the Chair whilst in the role of acting CEO. Terms of appointment as acting CEO are that on appointment of a CEO, the Chair would revert back to a non-executive position and receive fees as Chair.

Sam Barden - Managing Director/CEO: engaged on an annual remuneration of \$300,000 per annum plus superannuation. The CEO resigned from his CEO position on 23 March 2023 and from his managing director position on 23 June 2023. His role as CEO was assumed by the chairperson until a successor is found. Terms of appointment are 3 months notice on resignation or termination.

Chris Taylor - Exploration Manager: engaged on a contract of \$1,000 per day + GST. Terms of appointment are 1 months’ notice on resignation or termination.

Andrew Metcalfe - Company Secretary: engaged under a consultancy agreement with a variable rate and may be terminated by the giving of 2 months’ notice. No termination payments were made during the period to KMP other than statutory entitlements upon leaving the Company.

Option holdings of Key Management Personnel

No options were issued during the year ended 30 June 2023.

Shareholdings of Key Management Personnel - 2023

The number of shares and performance rights in the company held during the financial year by each director and other members of key management personnel of the consolidated entity, including their personally related parties, is set out below:

	Balance at the beginning of the year	Received as part of remuneration	Additions	Disposal/ other	Balance at the end of the year
Directors					
Ruiyu Zhang	-	9,000,000	-	-	9,000,000
Cath Norman	-	9,000,000	-	-	9,000,000
Jason Foley	-	9,000,000	-	-	9,000,000
Executives					
S Barden	-	42,000,000	-	-	42,000,000
	-	69,000,000	-	-	69,000,000

Performance rights held by Key Management Personnel - 2023

Performance Rights held:

	Balance at the beginning of the year	Received as part of remuneration	Additions	Disposal/ other	Balance at the end of the year
Executives					
Andrew Metcalfe	-	5,000,000	-	-	5,000,000
	-	5,000,000	-	-	5,000,000

Other related party transactions with Key Management Personnel

A number of KMP or their related parties hold positions in other entities that result in them having control or significant influence over the financial or operating policies of those entities. During the year, the Company made payment to the following director and executive controlled entities for their services as KMP's (refer to table above):

- \$51,904 from Lionne Pty Ltd, an entity associated with Catherine Norman;
- \$55,833 from Y&M Investment Pty Ltd, an entity associated with Ruiyu Zhang;
- \$128,397 from Accosec Pty Ltd, an entity associated with Andrew Metcalfe;
- \$299,837 from SBI Markets Pty Ltd, an entity associated with Sam Barden.

Amounts stated above are exclusive of GST and were billed and payable under normal commercial terms and conditions. Balances outstanding as at the reporting date relating to these transactions were NIL.

Share based compensation

The Group established the Lincoln Minerals Limited Employee Security Ownership Plan.

A summary of the Rules of the Plan are set out below:

The maximum aggregate number of securities that may be issued under the Plan 10% of the issued capital of the Company.

The Plan provides for shares, options or other securities or interests (including performance rights) to be issued to eligible persons. The purpose of the Plan is to:

- (a) provide eligible persons with an additional incentive to work to improve the performance of the Company;
- (b) attract and retain eligible persons essential for the continued growth and development of the Company;

- (c) to promote and foster loyalty and support amongst eligible persons for the benefit of the Company; and
- (d) to enhance the relationship between the Company and eligible persons for the long-term mutual benefit of all parties.

Eligible persons are directors, officers and employees of, or consultants to, the Company or an associated body corporate and, in the case of consultants, may include bodies corporate. Participants in the Plan, the number, type and terms of any securities offered or issue, and the terms of any invitation, offer or issue are determined by the Board with the advice of the remuneration committee, if any.

Directors and related parties of the Company may only participate in the Plan if prior shareholder approval is obtained in accordance with the ASX Listing Rules.

The objective of company's reward framework is to ensure employment reward for performance is competitive and appropriate for results delivered.

The Board ensures that the reward satisfied the following key criteria:

- competitiveness and reasonableness;
- acceptability to shareholders;
- performance linkage/alignment of executive compensation;
- transparency; and
- capital management.

The remuneration framework compliments the reward strategy of the Group and aligns to the participants' interests:

- rewards capability and experience;
- reflects competitive reward for contribution to growth in share holder wealth; and
- provides recognition for contribution.

Details of shares issued to directors and other key management personnel as part of compensation during the year ended 30 June 2023 are set out below. The issue of shares to KMPs was linked to the recapitalisation and relisting of the Group on the ASX and were approved by shareholders at the 2022 AGM.

	Date of Issue	No. of shares issued	Market Value per share	Total Market Value
Sam Barden	20/1/2023	21,000,000	\$0.014	\$294,000
Sam Barden	9/2/2023	7,000,000	\$0.022	\$154,000
Sam Barden	4/4/2023	7,000,000	\$0.010	\$70,000
Sam Barden	2/6/2023	7,000,000	\$0.008	\$56,000
Catherine Norman	20/2/2023	9,000,000	\$0.019	\$171,000
Ruiyu Zhang	21/2/2023	5,000,000	\$0.014	\$70,000
Ruiyu Zhang	4/4/2023	4,000,000	\$0.010	\$40,000
Jason Foley	20/1/2023	5,000,000	\$0.014	\$70,000
Jason Foley	4/4/2023	4,000,000	\$0.010	\$40,000
Total		69,000,000		\$965,000

Details of performance rights issued to key management personnel as part of compensation during the year ended 30 June 2023 are set out below. The issue of performance rights to the KMP was linked to the recapitalisation and relisting of the Group on the ASX.

	Date of Issue	No. of shares issued	Market Value per share	Total Market Value
Andrew Metcalfe	19/06/2023	5,000,000	\$0.007	\$35,000*
		74,000,000		\$1,000,000

* Granted on 19 June 2023; vesting at date of issue; in holding lock for 12 months.

End of Remuneration Report – Audited

Auditors Independence Declaration

We have obtained the independence declaration from our auditor Grant Thornton, a copy of which is attached to and forms part of this report.

During the year Grant Thornton, the Company’s auditor, has not performed any services other than the audit and review of financial statements (2022: \$0).

No other auditors were engaged by the Group.

Proceedings on Behalf of the Company

No person has applied to the Court under section 237 of the Corporations Act 2001 (Cth) for leave to bring proceedings on behalf of the Company or intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings.

Indemnification and Insurance of Officers

During the financial year the Company entered into agreements to indemnify all current directors of the Company as at the date of this report against all liabilities (subject to certain limited exclusions) to persons (other than the Company or a related body corporate) which arise out of the performance of their normal duties as a director or executive officer unless the liability relates to conduct involving a lack of good faith. The Company has also agreed to indemnify the directors and executive officers against all costs and expenses incurred in defending an action that falls within the scope of the indemnity and any resulting payments.

During the financial year the Company paid insurance premiums in respect of directors’ liability insurance. Disclosure of the nature of the liability and the extent of the premium is prohibited by the confidentiality clause of the contract of insurance.

The directors’ and officers’ liability insurance provides cover against all costs and expenses involved in defending legal actions and any resulting payments arising from a liability to persons (other than Lincoln Minerals Limited) incurred in their position as director unless the conduct involves a wilful breach of duty or an improper use of inside information or position to gain advantage.

Indemnity and Insurance of Auditor

During the financial year the Company entered into agreements to indemnify all current directors of the Company as at the date of this report against all liabilities (subject to certain limited exclusions) to persons (other than the Company or a related body corporate) which arise out of the performance of their normal duties as a director or executive officer unless the liability relates to conduct involving a lack of good faith. The Company has also agreed to indemnify the directors and executive officers against all costs and expenses incurred in defending an action that falls within the scope of the indemnity and any resulting payments.

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor. During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

Dated at Melbourne, Victoria, this 31 August 2023 and signed in accordance with a resolution of the Directors.

Ruiya (Yoyo) Zhang
Non-executive Chairman

Auditors Independence Declaration

8.

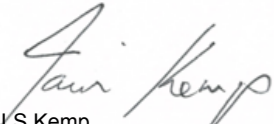

Auditor’s Independence Declaration

To the Directors of Lincoln Minerals Limited

In accordance with the requirements of section 307C of the *Corporations Act 2001*, as lead auditor for the audit of Lincoln Minerals Limited for the year ended 30 June 2023, I declare that, to the best of my knowledge and belief, there have been:

- a no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b no contraventions of any applicable code of professional conduct in relation to the audit.

Notes to and Forming Part of the Consolidated Financial Statements

1. The Reporting Entity

The consolidated financial report of Lincoln Minerals Limited (“the Company”) for the year ended 30 June 2023 comprise the Company and its subsidiaries (together referred to as the “Group”) was authorised for issue in accordance with a resolution of the directors on 31 August 2023.

The Group is a for-profit entity primarily involved in exploration and development of graphite and iron ore.

Lincoln Minerals Limited, incorporated in Australia, is a company limited by shares which are publicly traded on ASX Limited, having been listed on 9 March 2007.

2. Summary of Significant Accounting Policies

(a) Basis of accounting
The consolidated financial report is a general-purpose report which has been prepared in accordance with Australian Accounting Standards (AASBs) (including Australian Interpretations) adopted by the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The consolidated financial report of the Group complies with International Financial Reporting Standards (IFRSs) and interpretations adopted by the International Accounting Standards Board (IASB).

(b) Basis of measurement
The consolidated financial report has been prepared on an historical cost basis and is presented in Australian dollars, the Company's functional currency.

(c) New accounting standards and interpretations adopted
In the current year, there are no new and/or revised Standards and Interpretations adopted in these Financial Statements affecting presentation or disclosure and the reported result or financial position.

(d) Basis of consolidation

Subsidiaries
Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

The financial statements of the Company's subsidiaries are included in the consolidated financial statements from the date control commenced.

Financial Statements 2023

Transactions eliminated on consolidation
Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(e) Significant accounting judgments, estimates and assumptions
The carrying amounts of certain assets and liabilities are often determined based on judgments, estimates and assumptions of future events. The key judgments, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of certain assets and liabilities within the next annual reporting period are:

Recoverability of exploration and evaluation costs
The carrying amount of exploration and evaluation expenditure is dependent on the future successful outcome from exploration activity and or alternatively the sale of the respective areas of interest.

Impairment of Land and Exploration and Evaluation Assets
During the year, impairments were recognised on both the carrying value of Land and Exploration and Evaluation assets, in assessing impairment, management has estimated the fair value less disposal costs in determining the revised carrying value of each asset, estimations are inherently uncertain and actual results may be substantially different, refer to notes 10 and 11.

(f) Property, plant and equipment
Plant and equipment are stated at cost less accumulated depreciation and any impairment in value. Refer to impairment policy at note 2(i).

Depreciation is calculated on a diminishing value basis over the estimated useful life of the asset as being 5 to 15 years for the current and comparable period. Land is not depreciated.

An item of property, plant and equipment is de-recognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset.

Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of profit or loss and other comprehensive income in the period the item is de-recognised. Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

(g) Exploration and evaluation
Exploration for and evaluation of Mineral Resources is the search for Mineral Resources after the entity has obtained legal rights to explore in a specific area, as well as the determination of the technical feasibility and commercial viability of extracting the Mineral Resource. Accordingly, exploration and evaluation expenditures are those expenditures incurred by the Group in connection with the exploration for and evaluation of Mineral Resources before the technical feasibility and commercial viability of extracting a Mineral Resource are demonstrable.

Accounting for exploration and evaluation expenditures is assessed separately for each ‘area of interest’. An ‘area of interest’ is an individual geological area which is considered to constitute a favourable environment for the presence of a mineral deposit or has been proved to contain such a deposit.

Expenditure incurred on activities that precede exploration and evaluation of Mineral Resources, including all expenditure incurred prior to securing legal rights to explore an area, is expensed as incurred.

Reimbursements by joint venture partners of expenditure in respect of areas of interest are deducted from the Company's total outlays on the areas prior to carrying forward such expenditure as an asset.

Exploration and evaluation assets are tested for impairment when any of the following facts and circumstances exist:

- The term of the exploration licence in the specific area of interest has expired during the reporting period or will expire in the near future and is not expected to be renewed.
- Substantive expenditure on further exploration for and evaluation of Mineral Resources in the specific area are not budgeted or planned.
- Exploration for and evaluation of Mineral Resources in the specific area have not led to the discovery of commercially viable quantities of Mineral Resources and the decision was made to discontinue such activities in the specified area; or
- Sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered from successful development or by sale.

(h) Impairment – non-financial assets

At each reporting date, the Group assesses whether there is any indication that an asset may be impaired. Where an indicator of impairment exists, the Group makes a formal estimate of recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount the asset is considered impaired and is written down to its recoverable amount.

Recoverable amount is the greater of fair value less costs to sell and value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

(i) Cash and cash equivalents

Cash and cash equivalents in the Statement of Financial Position comprise cash at bank, cash on hand and short-term deposits with an original maturity of three months or less.

For the purposes of the Consolidated Statement of Cashflows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

(j) Receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. Cash flows relating to short term receivables are not discounted if the effect of discounting is immaterial.

(k) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

(m) Employee benefits

(i) Wages, salaries, annual and sick leave

Liabilities for wages and salaries, including non-monetary benefits, annual and accumulating sick leave expected to be settled wholly within 12 months of the reporting date are recognised in respect of employees' services up to reporting date. They are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non-accumulating sick leave are recognised when the leave is taken and are measured at the rates paid or payable.

(ii) Long service leave

Liability for long service leave is recognised and measured as the present value of the estimated future cash outflows to be made in respect of employees' services up to the reporting date. The obligation is calculated using expected future increases in wage and salary rates, experience of employee departures and periods of service. Expected future payments are discounted using the rates attached to high quality corporate bonds at the reporting date which have maturity dates approximating the terms of the Group's obligations. The obligations are presented as current liabilities in the consolidated statement of financial position if the Group does not have an unconditional right to defer settlement for at least twelve months after the reporting date, regardless of when settlement is expected to occur.

(n) Trade and other payables

These amounts represent liabilities for goods and services provided to the entity prior to the end of the financial year and which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

(o) Contributed equity

Ordinary share capital is recognised at the fair value of the consideration received by the Company. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of share proceeds received, net of any related tax benefit.

(p) Income tax

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in the statement of profit or loss and other comprehensive income except to the extent that it relates to a business combination, or items recognised in other comprehensive income or directly in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: initial recognition of goodwill, the initial recognition of assets or liabilities (in a transaction that is not a business combination) that affect neither accounting nor taxable profit, and differences relating to investments in subsidiaries to the extent that they are not expected to reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis, or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Any additional income taxes that may arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend.

(q) Earnings per share (EPS)

The Group presents basic and diluted EPS data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Parent Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares. EPS for the previous year are restated for any rights issues during the current financial year.

(r) Goods and Services Tax (GST)

Revenues, expenses and non-financial assets and liabilities are recognised net of the amount of GST except:

- where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to the taxation authority is included as part of receivables or payables in the balance sheet.

Cash flows are included in the Consolidated Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(s) Financial Instruments

Recognition, initial measurement and derecognition
Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted by transactions costs, except for those carried at fair value through profit or loss, which are measured initially at fair value. Subsequent measurement of financial assets and financial liabilities are described below.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and subsequent measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with AASB 15, all financial assets are initially measured at fair value adjusted for transaction costs (where applicable).

For the purpose of subsequent measurement, financial assets other than those designated and effective as hedging instruments are classified into the following categories upon initial recognition:

- amortised cost
- fair value through profit or loss (FVPL)
- equity instruments at fair value through other comprehensive income (FVOCI)
- debt instruments at fair value through other comprehensive income (FVOC)

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

Classification is determined based on both the business model within which such assets are held and the contractual cash flow characteristics of the financial asset unless an accounting mismatch is being avoided.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables, which is presented within other expenses.

Classification and subsequent measurement of financial assets
Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVPL):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows.
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these are measured at amortised cost using the effective interest method. Discounting is omitted where the effect of discounting is immaterial. The Group's cash and cash equivalents, trade and most other receivables fall into this category of financial instruments.

Financial assets at fair value through profit or loss (FVPL)
Financial assets that are held within a different business model other than 'hold to collect' or 'hold to collect and sell' are categorised at fair value through profit and loss. Further, irrespective of business model financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVPL. All derivative financial instruments fall into this category, except for those designated and effective as hedging instruments, for which the hedge accounting requirements apply (see below).

Impairment of Financial assets
The Group considers a broader range of information when assessing credit risk and measuring expected credit losses of its financial assets, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- (a) financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ('Stage 1') and
- (b) financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ('Stage 2').
- (c) 'Stage 3' would cover financial assets that have objective evidence of impairment at the reporting date.
- (d) '12-month expected credit losses are recognised for the first category while 'lifetime expected credit losses' are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Classification and measurement of financial liabilities
The Group's financial liabilities include borrowings and trade and other payables.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Group designated a financial liability at fair value through profit or loss.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

All interest-related charges and, if applicable, changes in an instrument's fair value that are reported in profit or loss are included within finance costs or finance income.

(t) Foreign currency
Transactions in foreign currencies are translated to the respective functional currencies of Group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the ex change rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the reporting period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

(u) Segment reporting
The Group determines and presents operating segments based on the information that internally is provided to the Managing Director (or the board in the absence of a Managing Director), who is the Group's chief operating decision maker.

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operating segments' operating results are regularly reviewed by the Group's Managing Director to make decisions about resources to be allocated to the segment and assess its perfor mance, and for which discrete financial information is available.

Segment results that are reported to the Managing Director include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

(v) Fair value measurements
Certain accounting policies and disclosures require the measurement of fair value, for both financial and non-financial assets and liabilities.

The Group uses observable data as much as possible when measuring the fair value of an asset or liability. Fair values of assets or liabilities are categorised into different levels in the fair value hierarchy based on the lowest input used in the valuation techniques as follows:

- **Level 1:** quoted (unadjusted market prices in active markets for identical assets or liabilities).
- **Level 2:** valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- **Level 3:** valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

The fair value of cash and short-term deposits, trade receivables, other current financial assets, trade payables and other current liabilities approximate their carrying values largely due to the short-term maturities of these instruments.

(w) Share-based employee remuneration
All goods and services received in exchange for the grant of any share-based payment are measured at their fair values. Where employees are rewarded using share-based payments, the fair values of employees' services are determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and earnings per share growth targets and performance conditions).

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to share rights reserve. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share rights expected to vest.

Non-market vesting conditions are included in assumptions about the number of share rights that are expected to become exercisable. Estimates are subsequently revised if there is any indication that the number of share rights expected to vest differs from previous estimates. Any cumulative adjustment prior to vesting is recognised in the current period.

Upon exercise of share rights, the proceeds received and the accumulated amount in the share rights reserve applicable to those share rights, net of any directly attributable transaction costs, are allocated to share capital.

3. Going Concern Basis of Accounting

The financial report has been prepared on the basis of a going concern. During the year ended 30 June 2023 the Group recorded a net cash outflow from operating and investing activities of \$2,728,352 and an operating loss of \$3,610,043. These conditions give rise to a material uncertainty that may cast significant doubt upon the Group's ability to continue as a going concern.

The ability of the Group to continue to pay its debts as and when they fall due is dependent upon the Group:

- Raising sufficient funds to meet the minimum exploration expenditure to continue to develop its exploration and evaluation assets itself, or through joint ventures; and
- Retaining and maintaining its exploration and evaluation assets and associated licences.

The Directors believe it is appropriate to prepare these accounts on a going concern basis because:

- Directors will not commit to expenditure unless sufficient funding has been sourced;
- The South Australian Department of Energy & Mining has granted an extension on the Group's licenses and expenditure commitments to December 2024.

The Directors believe they will be successful in achieving the above and have prepared the financial statements on a going concern basis.

If additional capital is not obtained or the above matters are not resolved in the Group's favour, the going concern basis may not be appropriate, with the result that the group may have to realise its assets and extinguish its liabilities, other than in the ordinary course of business and at amounts different from those stated in the interim financial report. No allowance for such circumstances has been made in the financial report.

4. Corporate and Administrative Expenses

	2023	2022
	\$	\$
ASX fees	59,765	27,608
Audit fees	78,756	54,675
Consulting fees	343,255	164,000
Corporate administration	256,708	51,221
Insurances	44,429	42,335
Legal fees	371,903	72,853
Share registry	88,449	21,734
Travel	17,361	1,126
	1,260,626	435,552

5. Income Tax Benefit

	2023	2022
	\$	\$
Loss before tax from continuing and discontinued operations	(3,610,043)	(2,026,538)
Prima facie income tax benefit at 25%	(886,932)	(506,635)
Effect of temporary differences and tax losses not recognised	886,932	506,635
Income tax benefit attributable to operating loss	-	-

A deferred tax asset with respect to accumulated tax losses has not been recognised as an asset as it is not considered probable at this time that future taxable income will be available against which to utilise the tax losses. Prior to utilising tax losses, the Company will need to satisfy the requirements of either the continuity of ownership test or same business test. The Company currently has tax losses of \$37,972,601 (2022: 34,298,557).

6. Cash and Cash Equivalents

	2023	2022
	\$	\$
Cash at bank and in hand	1,162,293	42,124
	1,162,293	42,124

7. Reconciliation of Loss after Tax to Net Cash Flows from Operations

	2023	2022
	\$	\$
Operating (loss) after income tax	(3,610,043)	(2,026,538)

Impairment loss	(169,820)	-	-	-	(169,820)
Closing net book amount	264,053	3,154	12,971	791	280,969

The Group's accounting policy is to carry property, plant and equipment at cost less accumulated amortisation and impairment, in accordance with AASB116. As a result of the Group recapitalising and relisting the ASX, the impairment indicators that existed at 30 June 2022 are no longer subsisting. The directors have determined that there were no impairment indicators that had been triggered as at 30 June 2023.

The accumulated impairment is a result of the impairment assessment undertaken in financial year ended 30 June 2022. For the year ended 30 June 2022, the directors assessed the recoverable amount of the land asset, performing a directors' valuation to determine the fair value less disposal costs in accordance with AASB136 and AASB13. An impairment of \$169,820 was recorded against the carrying value of land and recognised in the profit or loss for the year ended 30 June 2022. The directors' impairment assessment for the year ended 30 June 2022, included the following:

Fair value hierarchy

The fair value estimates for land are considered to be Level 3 estimates.

Significant Observable Inputs

1. Recent sales of land on Koppio/Tumby Bay area on the Eyre Peninsula and recent trends in the sale of land in other agricultural regions, adjusted for comparability considerations.
2. Land use deemed as pastoral.

Significant Unobservable Inputs

1. Estimated price per hectare is determined by assessing the asset's:

(a) location including surrounding land use, amenities and local services;

(b) improvement including structural, fencing and water;

(c) occupancy including dwellings, structures and licenses/leases.
2. Economic overview including local, State and industry economic overview.

Sensitivity analysis

The fair value measurement of freehold land is sensitive to changes in the unobservable inputs which may result in a significantly higher or lower fair value measurement. The following tables demonstrate the sensitivity to a reasonably possible change in significant unobservable inputs, with all other variables held constant (change in profit and equity):

	2022
Land	\$
Increase in estimated market value per hectare by 5%	13,203
Decrease in estimated market per hectare by 5%	13,203

11. Exploration and Evaluation

	2023	2022
	\$	\$
Opening net book amount	5,561,127	6,767,972
Exploration expenditure during the year	576,230	149,641
Depreciation charged to exploration	2,208	1,878
Less, exploration & evaluation expensed	(578,438)	(151,519)
Less, capitalised exploration impaired	-	(1,206,845)
Closing net book amount	5,561,127	5,561,127
Gross exploration assets capitalised	20,501,519	20,501,519
Provision for impairment	(14,940,392)	(14,940,392)
Net exploration assets	5,561,127	5,561,127

The recoverability of the carrying amount of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

The Group's accounting policy is to capitalise exploration costs in accordance with AASB6 and assess at each reporting date if any impairment indicators as defined in AASB6 paragraph 20. As a result of the Group recapitalising and relisting the ASX, the impairment indicators that existed at 30 June 2022 are no longer subsisting. The directors have determined that there were no impairment indicators that had been triggered as at 30 June 2023.

In the prior year, the Directors identified that the Group's current commitments and financial position represented impairment indicators under AASB6 and have performed an impairment analysis as required under AASB136. In assessing the recoverable amount of the capitalised exploration and evaluation costs, a Directors' valuation was performed to determine the fair value less disposal costs in accordance with AASB136 and AASB13. An impairment of \$1,206,845 was recorded against the capitalised exploration and evaluation costs and recognised in profit or loss for the year ended 30 June 2022. The directors' impairment assessment for the year ended 30 June 2022, included the following:

Fair value hierarchy
The fair value estimates for capitalised exploration and evaluation costs are considered Level 2 estimates.

Significant Observable Inputs
The fair value less disposal costs was based on the takeover bid announced on the ASX on 9 August 2022, of one (1) Quantum Graphite Limited ("QGL") share for every forty (40) Lincoln Mineral shares. QGL's shares were trading at \$0.40 (40 cents) per share at the close of trading on 9 August 2022. Refer to note 18, where QGL's take over offer lapsed on 14 July 2023.

Significant Unobservable Inputs
(a) Disposal costs to complete a sale transaction; and
(b) Condition of the underlying assets.

Sensitivity analysis
The fair value measurement of freehold land is sensitive to changes in the unobservable inputs which may result in a significantly higher or lower fair value measurement. The following tables demonstrate the sensitivity to a reasonably possible change in significant unobservable inputs, with all other variables held constant (change in profit and equity):

	2022
Capitalised exploration and evaluation costs	\$
Increase in estimated market value of shares per the offer by 10%	556,113
Decrease in estimated market value of shares per the offer by 10%	(556,113)

12. Trade and other Payables

	2023	2022
	\$	\$
Trade payables – external parties	17,421	203,522
Accrued expenses	66,654	2,064
	84,075	205,586

Trade payables are non-interest bearing and normally settled on 30-day terms. Trade payables and accrued expenses are stated at cost. No adjustment is required for fair value.

13. Financial Liabilities

As announced on 23 December 2021, Lincoln Minerals has entered into a convertible note agreement with Australia Poly Minerals Investments Pty Ltd (the note holder or "APMI"), a company associated with Poly Minerals Investments Limited ("PMI"), the largest shareholder of Lincoln Minerals. The agreement provided an option for the note holder to acquire up to 1,600,000 convertible notes at the face value of \$1 per note, with a coupon rate of 8% per annum.

On 12 September 2022, APMI agreed to terminate the convertible note agreement and the company agreed to treat the monies received from APMI as an advance under a Shareholder loan facility of \$1.6m with interest payable by the company on the sum advanced at 8% per annum, repayable at the earlier of the Company completing an equity raise or debt financing of not less than \$4 million or 31 December 2022.

On 21 November 2022, APMI and the Group agreed to waive the interest on its unsecured shareholder's loan.

On 16 January 2023, the \$4.6m rights issue was successfully completed, with proceeds used to repay the \$1.6m loan to APMI.

Advances received have been treated as a shareholder's loan below:

	2023	2022
	\$	\$
Shareholder's loan	-	510,000
Total Financial Liabilities	-	510,000

14. Contributed Equity

	2023	2022
	\$	\$
Share capital		
Fully paid ordinary shares	42,635,143	42,635,143
Opening balance	37,239,123	37,239,123
Addition of new shares issued via rights issue	4,622,869	4,622,869
Less rights issue expenses	(264,349)	(264,349)
Addition of new shares issued to directors	965,000	965,000
Addition of new shares issued to supplier	37,500	37,500
Closing balance	42,600,143	42,600,143
Movements in share capital:	Number	Number
Fully paid ordinary shares	1,420,711,808	574,983,686
Opening balance	574,983,686	574,983,686
Addition of new shares issued	845,728,122	-
Closing Balance	1,420,711,808	574,983,686

Holders of fully paid ordinary shares have the right, in the event of winding up the Company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of shares held. Fully paid ordinary shares entitle their holders to vote, either in person or by proxy, at a meeting of the Company. On a poll each fully paid ordinary share is entitled to one vote. No options were outstanding at 30 June 2023 and no options have been granted or exercised between the end of the year and the date of this report.

15. Reserves

	2023	2022
	\$	\$
Share-based payments reserve	35,000	-
Total Reserves	35,000	-

The share-based payment reserve represents the value of 5,000,000 performance rights issued to a KMP. The performance rights were issued at Nil value, vesting at date of issue and remain in holding lock for 12 months from date of issue, there is no exercise price for these performance rights.

As there are no other performance hurdles attached to the performance rights, they have been valued at the market price of the Company's ordinary shares as at date of issue.

Movements in reserve:	2023	2022
	\$	\$
Opening balance	-	-
Addition of new shares issued	35,000	-
Closing Balance	35,000	-

The share-based payments reserve is used to recognise the value of equity benefits provided to KMP as part of their remuneration and as part of their compensation for services.

16. Auditor’s Remuneration

The Auditor of Lincoln Minerals Limited is Grant Thornton Audit Pty Ltd.

	2023	2022
	\$	\$
Audit or review of financial reports	78,756	54,675
Total remuneration	78,756	54,675

17. Commitments and Contingencies

Commitments - Exploration licences

The Group’s exploration licence tenements are renewable on an annual basis at various renewal dates throughout the year and the amount of each expenditure covenant is set by the Minister for Mineral Resources Development at the time of each renewal. The South Australian Department of Energy & Mining has granted an extension on the Group’s licenses and expenditure commitments to December 2024.

	2023	2022
Expenditure required to maintain tenure of all of the exploration licences	\$	\$
Within one year	1,978,520	1,890,000
After one year but not more than five years	941,516	-
	2,920,036	1,890,000

Contingencies As at 30 June 2023 and the date of this report there were no contingencies.

18. Events Subsequent to Balance Date

The following events have occurred post 30 June 2023:

Merge of stock codes

On 17 July 2023, Lincoln Minerals’ ASX codes LML and LMLND merged as a result of Quantum Graphite Limited (ASX: QGL) lapsing their unsolicited takeover offer on 14 July 2023.

Changes in Directors

Ms Catherine Norman resigned from the non-executive Chair and acting CEO effective 24 July 2023.

Hon Ryan Smith was appointed as non-executive director on 25 July 2023.

Changes in Executives

Mr John Lam was appointed as non-executive director on 1 September 2023.

19. Earnings Per Share

	2023	2022
	\$	\$
Loss used to calculate basic and diluted loss per share (\$) attributable to members of the parent	(3,610,043)	(2,026,538)
Basic and diluted loss per share (cents) attributable to members of the parent	(0.35)	(0.35)
Weighted average number of ordinary shares on issue used in the calculation of basic and diluted earnings per share	1,000,347,747	574,983,686

The calculation of diluted earnings per share does not include weighted potential ordinary shares on issue as to do so would have the effect of reducing the amount of the loss per share.

20. Financial Instruments

The Group’s principal financial instruments comprise bank cash, short term deposits, trade receivables, shareholder’s loan and trade payables. The main purpose of these financial instruments is to finance the Group’s exploration operations and administration including management and the Board’s pursuit of best practice governance. It is, and has been throughout the period under review, the Group’s policy that trading in financial instruments shall not be undertaken.

The main risk arising from the Group’s financial instruments is cash flow interest rate risk. Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in note 2(s) to the financial statements.

Categories of financial instruments	2023	2022
	\$	\$
Financial assets:		
Cash and cash equivalents	1,162,293	42,124
Receivables and other assets	35,492	15,276
Other financial assets	30,000	30,000
Total Financial assets	1,227,785	87,400
Financial liabilities:		
Trade and other payables	84,075	205,586
Shareholder’s loan	-	510,000
Total Financial liabilities	84,075	715,586

The Group’s activities expose it to several financial risks which impact on the measurement of, and potentially could affect the ultimate settlement amount of, its financial instruments including market risk, credit risk, and liquidity risk.

Cash flow interest rate risk

The Group’s exposure to the risk of changes in market interest rates relate to its earnings on cash funds and debt securities held.

Commodity price risk

The Group has not commenced production as yet so in the reporting period there has been no commodity price risk.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group’s cash deposits, receivables and investments in debt securities.

Management has established a credit policy under which the counterparties are analysed for credit worthiness by reference to available information so as to manage the risk of exposure to default. The credit risk exposure is concentrated with banks (for cash) and the federal government (tax receivable).

The carrying amount of the Group’s financial assets represents the maximum credit exposure. The Group’s maximum exposure to credit risk at the reporting date was:

	2023	2022
	\$	\$
Cash and cash equivalents	1,162,293	42,124
Receivables and other assets	35,492	15,276
Other financial assets	30,000	30,000
	1,227,785	87,400

Liquidity risk

The Group has liquidity risk arising from trade and other payables. Trade payables are normally settled within 30 days and the contracted cash flows of trade and other payables equals their carrying amounts.

The following table details the Company's and the Group's remaining contractual maturity for its non-derivative financial liabilities.

	Weighted average effective interest rate	0-3 months	3-12 months	1-5 years
2023	%	\$	\$	\$
Non-interest bearing	-	84,075	-	-
2022	%	\$	\$	\$
Non-interest bearing	-	205,586		-
Interest bearing	8%	-	550,800	-

Fair values

The carrying amounts of financial assets and financial liabilities recorded at amortised cost in the financial statements approximate their fair values.

	2023	2022
	\$	\$
Carrying amounts:		
Financial assets:		
Fixed rate instruments	30,000	30,000
Cash and cash equivalents	1,162,293	42,124
	1,192,293	72,124
Financial liabilities:		
Shareholder loan	-	510,000

The weighted average interest rate on deposits for 2023 was 0.10% (2022: 0.10%). There was no interest charged on shareholder loan on settlement (2022: 8%).

Cash flow sensitivity analysis

A change of 130 basis points in interest rates at the reporting date would have affected the loss for the year by an insignificant amount. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay.

The table includes both interest and principal cash flows.

Interest rate risk

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

21. Key Management Personnel Disclosures and Related Party Transactions

Total	1,765,202	212,261

Loans to Key Management Personnel

Nil.

Other transactions with Key Management Personnel

A number of KMP or their related parties hold positions in other entities that result in them having control or significant influence over the financial or operating policies of those entities. During the year, the Company made payment to the following director and executive controlled entities for their services as KMP's:

- \$51,904 from Lionne Pty Ltd, an entity associated with Catherine Norman;
- \$55,833 from Y&M Investment Pty Ltd, an entity associated with Ruiyu Zhang;
- \$128,397 from Accosec Pty Ltd, an entity associated with Andrew Metcalfe;
- \$299,837 from SBI Markets Pty Ltd, an entity associated with Sam Barden.

Amounts stated above are exclusive of GST and were billed and payable under normal commercial terms and conditions. Balances outstanding as at the reporting date relating to these transactions were NIL.

22. Share Based Compensation

The Group established the Lincoln Minerals Limited Employee Security Ownership Plan.

A summary of the Rules of the Plan are set out below:

The maximum aggregate number of securities that may be issued under the Plan 10% of the issued capital of the Company.

The Plan provides for shares, options or other securities or interests (including performance rights) to be issued to eligible persons. The purpose of the Plan is to:

- (a) provide eligible persons with an additional incentive to work to improve the performance of the Company;
- (b) attract and retain eligible persons essential for the continued growth and development of the Company;
- (c) to promote and foster loyalty and support amongst eligible persons for the benefit of the Company; and
- (d) to enhance the relationship between the Company and eligible persons for the long-term mutual benefit of all parties.

Eligible persons are directors, officers and employees of, or consultants to, the Company or an associated body corporate and, in the case of consultants, may include bodies corporate.

Participants in the Plan, the number, type and terms of any securities offered or issue, and the terms of any invitation, offer or issue are determined by the Board with the advice of the remuneration committee, if any.

	Date of Issue	No. of shares issued	Market Value per share	Total Market Value
				\$
Sam Barden	20/1/2023	21,000,000	\$0.014	\$294,000
Sam Barden	9/2/2023	7,000,000	\$0.022	\$154,000
Sam Barden	4/4/2023	7,000,000	\$0.010	\$70,000
Sam Barden	2/6/2023	7,000,000	\$0.008	\$56,000
Catherine Norman	20/2/2023	9,000,000	\$0.019	\$171,000
Ruiyu Zhang	21/2/2023	5,000,000	\$0.014	\$70,000
Ruiyu Zhang	4/4/2023	4,000,000	\$0.010	\$40,000
Jason Foley	20/1/2023	5,000,000	\$0.014	\$70,000
Jason Foley	4/4/2023	4,000,000	\$0.010	\$40,000
Total		69,000,000		\$965,000

Details of performance rights issued to key management personnel as part of compensation during the year ended 30 June 2023 are set out below. The issue of shares to KMPs was linked to agreed KPIs, annual planning & strategic objectives.

	Date of Issue	No. of shares issued	Market Value per share	Total Market Value
				\$
Andrew Metcalfe	19/06/2023	5,000,000	\$0.007	\$35,000*
Total		74,000,000		\$1,000,000

* Granted on 19 June 2023; vesting at date of issue; in holding lock for 12 months.

The 5,000,000 performance rights issued to a KMP were issued at Nil value, vesting at date of issue and remain in holding lock for 12 months from date of issue, there is no exercise price for these performance rights.

Individual Directors and Executives disclosures Information regarding individual Directors and Executives compensation and equity instruments disclosures as required by Corporations

Directors and related parties of the Company may only participate in the Plan if prior shareholder approval is obtained in accordance with the ASX Listing Rules.

The objective of company's reward framework is to ensure employment reward for performance is competitive and appropriate for results delivered.

- The Board ensures that the reward satisfied the following key criteria:
- competitiveness and reasonableness;
 - acceptability to shareholders;
 - performance linkage/alignment of executive compensation;
 - transparency; and
 - capital management.

The remuneration framework compliments the reward strategy of the Group and aligns to the participants' interests:

- rewards capability and experience;
- reflects competitive reward for contribution to growth in shareholder wealth; and
- provides recognition for contribution.

Details of shares issued to directors and other key management personnel as part of compensation during the year ended 30 June 2023 are set out below. The issue of shares to KMPs was linked to agreed KPIs, annual planning & strategic objectives.

23. Segment Information

The Directors have considered the requirements of AASB 8 – Operating Segments and the internal reports that are reviewed by the chief operating decision maker (the Board) in allocating resources have concluded that at this time there are no separately identifiable segments.

24. Parent Entity Disclosure

As at and throughout the financial year ending 30 June 2023 the parent company was Lincoln Minerals Limited.

		2023	2022
	Note	\$	\$
Result of the parent entity			
Loss for the year		(3,610,043)	(2,026,538)
Other comprehensive income		-	-
Total comprehensive loss for the year		(3,610,043)	(2,026,538)
Financial position of parent entity at year end			
Current assets		1,284,954	115,031
Non-current assets		5,868,648	5,872,109
Total assets		7,153,602	5,987,140
Current liabilities		117,788	737,303
Non-current liabilities		-	-
Total liabilities		117,788	737,303
Total equity of the parent entity comprising of:			
Contributed equity	14	42,600,143	37,239,123

Accumulated Losses		(35,599,329)	(31,989,286)
Total equity		7,035,814	5,249,837

Parent entity contingencies
At 30 June 2023 there were no contingencies.

Parent entity commitments
Parent entity commitments are the same as those for the Group which are disclosed in note 17.

25. Controlled Entities

	Ownership Interest		
Name of Entity	Country of Incorporation	2023	2022
		%	%
Parent Entity:			
Lincoln Minerals Limited	Australia		
Subsidiaries:			
Australian Graphite Production Pty Ltd*	Australia	100%	100%
Australian Graphite Pty Ltd*	Australia	100%	100%
Lincoln Asia-Pacific Pty Ltd*	Australia	100%	100%
Lincoln Copper Pty Ltd*	Australia	100%	100%

* An application has been submitted to ASIC to deregister these companies as they hold no future value or benefit to the Group

26. Fair Value of Non-Financial Assets

Non-financial assets measured at fair value in the statement of financial position are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities
- **Level 2:** inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- **Level 3:** unobservable inputs for the asset or liability

As a result of the impairment assessments in the prior year certain assets were recorded at their fair value less cost to sell. The following table shows the levels within the hierarchy of non-financial assets measured at fair value on a non-recurring basis as at 30 June 2022:

	Level 1	Level 2	Level 3	Total
	\$	\$	\$	\$
Land (refer to note 10)	-		264,053	264,053
Exploration and Evaluation (refer to note 11)	-	5,561,127	-	5,561,127
	-	5,561,127	264,053	5,825,180

There were no non-financial assets carried at fair value in the current year.

Directors' Declaration

1. In the opinion of the Directors of Lincoln Minerals Limited (the Company):

(a) The consolidated financial statements and notes, and the remuneration report in the Directors' Report, are in accordance with the Corporations Act 2001 (Cth), including:

- (i) giving a true and fair view of the Group's financial position as at 30 June 2023 and of its performance for the financial year ended on that date; and
- (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001 (Cth); and

(b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

2. The directors have been given the declarations required by Section 295A of the Corporations Act 2001 (Cth) from the chief executive officer and chief financial officer for the financial year ended 30 June 2023.

3. The Directors draw attention to note 2(a) to the consolidated financial statements which includes a statement of compliance with International Financial Reporting Standards.

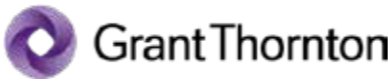

Signed in accordance with a resolution of the Directors

Independent Auditor's Report

To the Members of Lincoln Minerals Limited

Report on the audit of the financial report

Opinion

We have audited the financial report of Lincoln Minerals Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2023, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- a giving a true and fair view of the Group's financial position as at 30 June 2023 and of its performance for the year ended on that date; and
- b complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Liability limited by a scheme approved under Professional Standards Legislation.

Independent Auditor’s Report

Material uncertainty related to going concern

We draw attention to Note 3 in the financial statements, which indicates that the Group incurred a net loss of \$3,610,043 during the year ended 30 June 2023 and a net cash outflow from operating and investing activities of \$2,728,352. As stated in Note 3, these events or conditions, along with other matters as set forth in Note 3, indicate that a material uncertainty exists that may cast doubt on the Group’s ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter
Exploration and evaluation assets – Note 2(h) and 11	
At 30 June 2023, the carrying value of exploration and evaluation assets was \$5,561,127. In accordance with AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i> , the Group is required to assess at each reporting date if there are any triggers for impairment which may suggest the carrying value is in excess of the recoverable value. The process undertaken by management to assess whether there are any impairment triggers in each area of interest involves an element of management judgement. This area is a key audit matter due to the significant judgement involved in determining the existence of impairment triggers.	Our procedures included, amongst others: <ul style="list-style-type: none">obtaining the management reconciliation of capitalised exploration and evaluation expenditure and agreeing to the general ledger;reviewing management’s area of interest considerations against AASB 6;conducting a detailed review of management’s assessment of trigger events prepared in accordance with AASB 6, including;<ul style="list-style-type: none">tracing projects to statutory registers, exploration licenses and third-party confirmations to determine whether a right of tenure existed;enquiry of management regarding their intentions to carry out exploration and evaluation activity in the relevant exploration area, including review of management’s budgeted expenditure;understanding whether any data exists to suggest that the carrying value of these exploration and evaluation assets are unlikely to be recovered through development or sale; andassessing the appropriateness of the related financial statement disclosures.

Information other than the financial report and auditor’s report thereon

The Directors are responsible for the other information. The other information comprises the information included in the Group’s annual report for the year ended 30 June 2023, but does not include the financial report and our auditor’s report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Independent Auditor’s Report

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors’ for the financial report

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor’s responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: http://www.auasb.gov.au/auditors_responsibilities/ar1_2020.pdf. This description forms part of our auditor’s report.

Report on the remuneration report

Opinion on the remuneration report

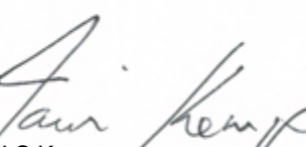

We have audited the Remuneration Report included in the Directors’ report for the year ended 30 June 2023.

In our opinion, the Remuneration Report of Lincoln Minerals Limited, for the year ended 30 June 2023 complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Resources and Reserves Statement

Mineral Resources

Information in this report that relates to Exploration Results, Mineral Resources and Exploration Targets was compiled by Dwayne Povey who is a Member of the Australasian Institute of Mining and Metallurgy.

Mr Povey was previously Chief Geologist for Lincoln Minerals Limited for a period in excess of 15 years and acted as the competent person during that time.

He currently provides consulting services to the company. Mr Povey has sufficient experience relevant to the styles of mineralisation and to the activities which are being reported to qualify as a Competent Person as defined by the JORC Code, 2012. Mr Povey consents to the release of the information compiled in this report in the form and context in which it appears.

Information extracted from previously published reports identified in this report is available to view on the Company's website www.lincolnminerals.com.au

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and,

in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.

The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Lincoln relies on drilling results from accredited laboratories in providing analytical results used to estimate Mineral Resources.

13.

Graphite Mineral Resources

Mineral Resources in accordance with JORC Code 2012 at Kookaburra Gully are set out below (Lincoln Minerals Limited, ASX Announcement 17 May 2017). At a nominal 5% cut-off, the estimated Measured, Indicated and Inferred Mineral Resources as at 30 June 2023 total 2.03Mt at 15.2% TGC for a total of 308,560 tonnes contained graphite.

Kookaburra Gully Mineral Resource (AGL 100%) as at 30 June 2022. These remain unchanged from 30 June 2021.

Domain	Class	Tonnage (Mt)	C (%)	TGC (%)	Density

Mt = million tonnes TGC = Total Graphitic Carbon

Graphite Ore Reserve

Based on Mineral Resources and Feasibility Study results for Kookaburra Gully, AMC Consultants and Lincoln estimated a Probable Ore Reserve displayed in the Table below and as released by the Company 27 November 2017.

Table 6.

Ore Reserve estimate at 8.5% TGC cut-off grade			
Classification	Tonnes (Mt)	TCG (%)	Contained Graphite (t)
Kookaburra Gully			
Probable	1.34	14.6	196,000

Information in this report that relates to Ore Reserves was compiled by Dwayne Povey based on mine optimisation and schedules prepared by Mr Wilson Feltus who was a full-time employee of AMC Consultants Pty Ltd and are members of the Australasian Institute of Mining and Metallurgy. Mr Povey and Mr Feltus have sufficient experience relevant to the styles of mineralisation and to the activities which are being reported to qualify as Competent Persons as defined by the JORC Code, 2012 and consent to the release of the information compiled in this report in the form and context in which it appears.

Iron Ore Mineral Resources

This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. JORC 2004 Mineral Resource estimates for combined hematite-goethite and magnetite iron ore mineralisation at Gum Flat total 109 million tonnes (Lincoln Minerals Limited, ASX release 7 June 2012). This includes a 12.3 Mt Indicated Mineral Resource for magnetite and a 1.4 Mt Indicated Mineral Resource for hematite-goethite at the Gum Flat Barns deposit.

No new information or data has been acquired that materially affects the information included in the original market announcements and, in the case of the following estimates of Mineral Resources, all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed and have not been materially modified from the original market announcements.

Gum Flat Mineral Resources (JORC 2004) as at 30 June 2023. These remain unchanged from 30 June 2022.

Prospect	Mineral Resource Category (JORC 2004)	Million Tonnes (Mt)	Head Grade (% Fe)	DTR (%)
Barns magnetite*	Indicated	12.3	26.6	22.1
Barns magnetite*	Inferred	88.9	23.5	17.1
Rifle Range magnetite#	Inferred	3.5	27.1	22.6
Barns hematite*	Indicated	1.4	49.8	
Barns hematite*	Inferred	0.7	46.0	
Rifle Range/SheoakWest hematite*	Inferred	2.2	39.5	
Total		109.0	24.8	

* Barns magnetite interpretation based on notional 10% Davis Tube Recovery (DTR) cut-off
Rifle Range magnetite interpretation based on notional 15% DTR cut-off
* Barns hematite interpretation based on notional 40% head Fe cut-off
*Rifle Range and Sheoak West hematite interpretation based on notional 35% head Fe cut-off

This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. The Inferred Mineral Resource for the Eurilla iron ore prospect within Lincoln’s EL 5942 is 21.7 Mt @ 33.3% Fe (JORC 2004). This includes a small resource containing 17.5% Mn + 29.2% Fe as indicated below (Lincoln Minerals Limited, ASX release 5 January 2009).

Eurilla Inferred Mineral Resource within EL 5942 (JORC 2004) as at 30 June 2023 (after Golder, 2008). These remain unchanged from 30 June 2022

	Domain	Mineral Resource Category	Tonnage (Mt)	Fe (%)	Calcined Fe (%)	SiO ₂ (%)	Al ₂ O ₃ (%)	P (%)	Mn (%)	S (%)	LOI (%)
1	Detrital	Inferred	2.2	41.2	44.4	21.7	7.4	0.1	0.3	0.1	7.0
2	Goethite-Hematite	Inferred	8.4	40.9	43.9	27.9	3.9	0.2	0.9	0.1	6.7
3	Goethite-Hematite-Manganese	Inferred	0.2	29.2	32.5	16.1	4.8	0.1	17.5	0.1	0.1
4	Magnetite	Inferred	11.0	26.0	26.4	49.4	1.9	0.2	0.4	0.1	2.6
	Total	Inferred	21.7	33.3	35.0	38.1	3.6	0.2	0.7	0.1	4.7

Mt = million tonnes
NB tonnages may not add up exactly as shown due to rounding of significant figures
NB estimates based on 0.001% Fe cut-off grades for domains 1,2 and 4 and 0.001% Mn cut-off for domain 3

The Company ensures that all Mineral Resource estimates are subject to appropriate levels of governance and internal controls. Exploration results are collected and managed by an independent competent qualified geologist. All data collection activities are conducted to industry standards based on a framework of quality assurance and quality control protocols covering all aspects of sample collection, topographical and geophysical surveys, drilling, sample preparation, physical and chemical analysis and data and sample management. Mineral Resource estimates are prepared by qualified independent Competent Persons. If there is a material change in the estimate of a Mineral Resource, the estimate and supporting documentation in question is reviewed by a suitable qualified independent Competent Persons. The Company reports its Mineral Resources on an annual basis in accordance with the JORC Code (2012).
