**QUARTERLY ACTIVITIES REPORT FOR THE
PERIOD ENDED 30 SEPTEMBER 2023**

HIGHLIGHTS

- Daydream-2 well due to spud imminently
- Funding procured for Daydream-2: R&D, new equity and a debt facility
- Data Sharing Agreement signed with Santos
- Nomgon Pilot Project extended with successful drilling of Nomgon-10 well
- New CBM discoveries made in the Nomgon PSC

MANGAGING DIRECTOR'S REPORT TO SHAREHOLDERS FOR THE QUARTER

The last quarter was a period of intense activity for Elixir in both Queensland and Mongolia:

- Preparing for the now imminent spud of the Daydream-2 appraisal well – the highest impact well in Elixir's history.
- Expanding the Nomgon Pilot Project and adding new CBM discoveries in the Nomgon PSC.
- Procuring multiple new forms of finance – qualifying for R&D cash rebates from the Federal Government, new equity and a debt facility (secured on the R&D rebate).

Share market conditions have been challenging in this period – not only for Elixir, but for the vast majority of growth orientated companies globally, due to multiple factors ranging from rising interest rate to growing geopolitical tensions. However, the successful delivery of real projects should still be rewarding for investors and in the rest of this financial year investors in Elixir are exposed to multiple opportunities for the significant de-risking of the Company's gas resources.

In the last month major signs of growing support for the long term future for oil and gas emerged on multiple commercial fronts.

Arguably most significant were major corporate takeovers announced in the USA by that country's two largest energy Super-Majors – Exxon's acquisition of Pioneer Resources and Chevron's takeover of Hess Corporation. The total deal value in these two transactions alone is more than A\$200 billion.

It is not since the consolidation of Majors into Super-Majors in the 1990s that such a consolidation wave has hit the oil and gas sector – and there is now a widespread expectation that further mergers will follow in America and then this will spill out to the rest of the world.

What this means for the junior end of the sector in which Elixir sits is that the transactions demonstrate a number of things that are relevant to the energy sector as a whole:

- The expected demand for oil and gas will endure for many decades to come.
- Capital markets are increasingly recognizing that is the case and that the march to the energy transition will require gas in particular to be funded for this extended period.
- Big players want big resources – and some degree of diversification between oil/gas and countries.

In addition to this corporate activity, the last few months have seen a continuation of the trend we noted in the last quarterly: LNG purchase contracts being entered into for multiple decades.

For instance, Shell recently signed a contract with Qatar for gas to be delivered to the Netherlands for a 27 year period. This shows that real commercial dealings underpin the longer term health of our industry.

In Australia there is some disconnect between this reality of how long term and challenging the energy transition is versus what some politicians would like to be the case of an easy, short term and painless change. However, in the end of the day these political strategies - that are remarkably similar to those adopted by King Canute more than a millennium ago - will inevitably face the same drenching reality.

As we move increasingly closer to that point, Governments will have to support the development of the material gas resources in the likes of the Taroom Trough in Queensland that will be required to meet both domestic and international needs for decades to come.

Our imminent Daydream-2 well is therefore very well placed – in time and geographical location – to increase and de-risk large gas resources to meet these needs.

In Mongolia, our coal bed methane pilot at Nomgon is demonstrating remarkably similar characteristics as experienced in Australia in previous decades – the production of gas generally takes some time and requires the applications of learnings that can only be acquired from real experience. Over the coming months the pilot will be managed very closely to bring gas production up slowly but surely.

Site work for Daydream-2

MONGOLIAN GAS – NOMGON CBM PSC PROJECT

Elixir Energy Limited (“Elixir”) has a 100% interest in the Nomgon IX Coal Bed Methane (CBM) Profit Sharing Contract (PSC), located proximate to the Chinese border in Mongolia’s South Gobi region. The 30,000 square kilometre PSC was executed with the Mongolian Government in September 2018 and formally commenced in 2019.

The PSC has a minimum ten year exploration period and a thirty year (extendable) production period. Elixir is substantially ahead of its exploration expenditure commitments under the PSC, even notwithstanding the force majeure event caused by COVID-19 in recent years.

During the quarter the main focus areas were as follows:

- Expanding the Nomgon Pilot Project through the successful drilling of a new pilot well: Nomgon-10.
- Ongoing production testing at the Nomgon Pilot Project.
- The exploration and appraisal drilling program for calendar 2023 was largely undertaken in the better weather conditions in the quarter, with successful CBM discoveries being made in the Big Slope and Yangir sub-basins.

All work was undertaken safely, in accordance with local community expectations and without environmental incident.

AUSTRALIAN GAS – GRANDIS GAS PROJECT (ATP 2044)

Elixir has a 100% interest in petroleum exploration licence ATP 2044 located in Queensland (the Grandis Gas Project). This 1,000 square kilometre tenement is located proximate to the Wallumbilla gas hub and can access domestic and international gas markets.

During the quarter the Company undertook all the necessary technical, legal and commercial work required to initiate the spud of Grandis’ first well - the Daydream-2 appraisal well, which is now due imminently.

Elixir entered into a Data Sharing Agreement with neighbouring tenement holder Santos, which provides a framework for sharing well data and other technical cooperation.

After the end of the quarter, entered into a Term Sheet with Radium Capital under which the latter will provide the Company with a plain vanilla debt facility secured over R&D rebates due in connection with expenditure made in the current fiscal year.

MONGOLIAN GREEN HYDROGEN - GOBI H2 PROJECT

The *Gobi H2* green hydrogen project is located in Southern Mongolia and is being progressed by Elixir and Japanese company Terras Energy (a 85% owned subsidiary of Toyota Tsusho Corp.).

A key focus for the project in the quarter was engaging with potential hydrogen customers – in Mongolian and China.

ENVIRONMENT, SOCIAL & GOVERNANCE (ESG)

Elixir considers stakeholder engagement – particularly with local people in the areas of operations - to be critical for all of its projects, no matter where they are located.

In Mongolia in the quarter, Elixir continued to support tree planting operations in the Nomgon area of the South Gobi.

In Queensland, Elixir was pleased to formally engage with the traditional owners of the Grandis area – the Mandandanji people – whose representatives cleared the Daydream-2 site for cultural heritage purposes. Elixir and this group expect to sign a formal Cultural Heritage Management Agreement shortly, that provides a long term framework for engagement in the area.

CORPORATE AND FINANCIAL

Capital raising

During the quarter the Company undertook a placement that raised \$7 million. A Share Purchase Plan (SPP) was also announced, which closed after the end of the quarter, and which raised \$1.7 million.

Unlisted employee options	10,580,000

Financial

Elixir's cash reserves as at 30 September 2023 were \$11.3 million. The Company has no debt.

During the quarter, the Company spent \$3.9 million on exploration activities, primarily on long lead items, etc, for the Daydream-2 well and the Nomgon PSC drilling campaign.

Board and Management

No changes to Board and Management occurred in the quarter.

Annual and other General Meetings

The Company's Annual General Meeting was held after the end of the quarter on 16 October 2023. All resolutions were passed at the AGM. Refer to the above section *Changes in Equity capital* for further information on the resolutions.

Appendix 5B Disclosures

The attached Appendix 5B includes an amount of \$176,000 in item 6.1, which constitutes compensation for the Managing Director and non-executive director fees paid during the quarter. In addition, \$67,000 was paid to Key Management Personnel for services provided and reimbursement of expenses. There were no other related party transactions.
