## PROJECT ACTIVITY

### Woodline Project

The compilation of the previous work, for the tenements granted during the previous quarter, continued up to the end of September. A review of the project is in progress.

### Tempest Project

The grant of new tenements, applied for during June and reported in the previous quarter, is still awaited.

These tenements are subject of a ballot with one other company and on grant, the Tempest Project will comprise 3 tenements covering 208 km<sup>2</sup>. The project footprint will cover areas where previous work give a strong indication of gold mineralisation in the basement and the cover.

### Fortnum Project

Following agreement with the traditional owners of the land on which the Fortnum Project is located, an aircore drilling program was completed during September. A total of 46 holes were drilled for 2640m (Figure 2).

The drilling targeted significant results generated by previous explorers and Nelsons program was designed to confirm the previously defined zone of anomalous results and to generate targets for infill aircore drilling, prior to RC drilling, if warranted.

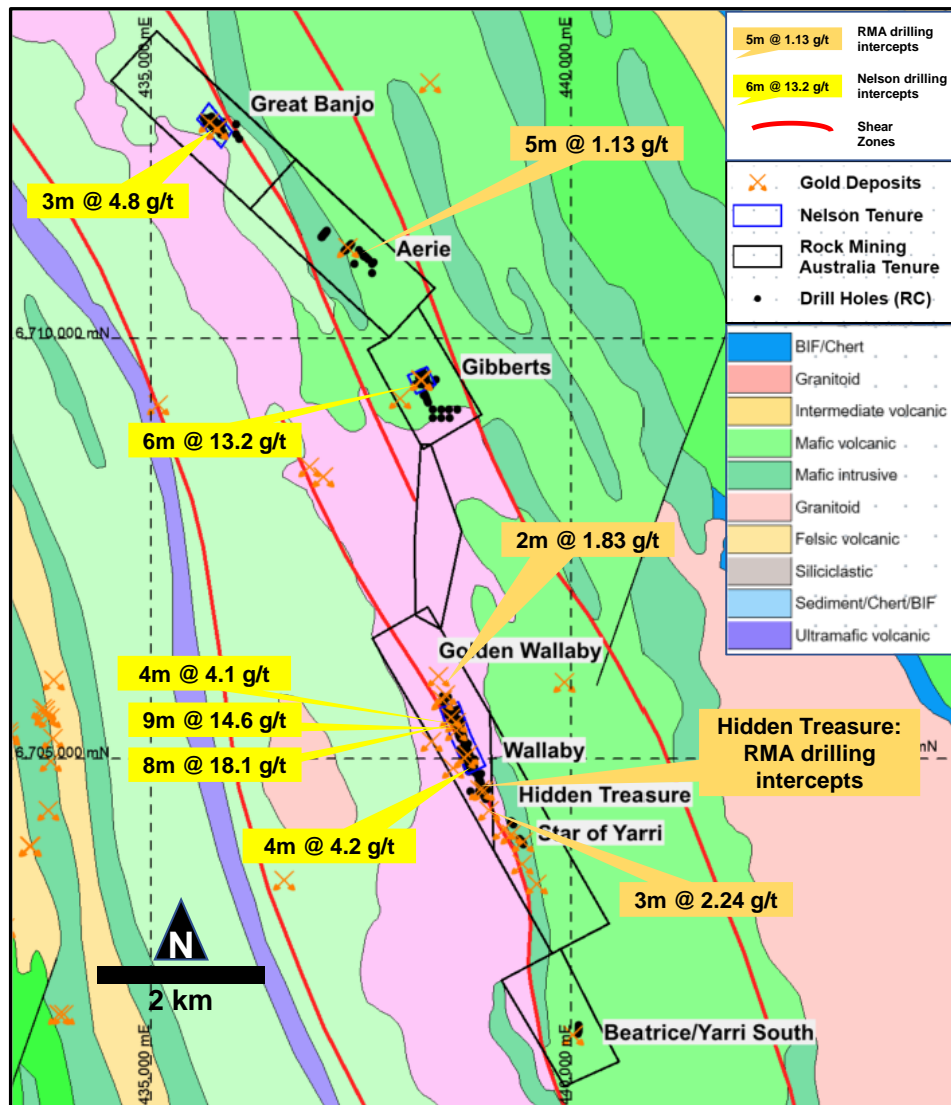

The samples from the drilling have been delivered to the laboratory and results are expected during November with re-sampling to be completed and reported before the end of the year.

The purchase of the Yarri Project tenements from Rock Mining Australia Ltd (RMA) was completed during the quarter and the tenement transfer process is continuing.

RMA's Yarri tenements completely surround the Nelson Yarri Project, which is 140 km northeast of Kalgoorlie. Both companies have completed significant drilling campaigns on the project and have generated numerous significant results, as previously reported (Figure 3).

**Figure 3: Yarri Project, showing drilling and intercepts by both Nelson and RMA at their respective regional prospects.**

By the end of September, the sale and purchase process was complete, the tenement transfer was largely complete and Nelson have completed the compilation of all previous work on the project.

## Happy Jack

The Company has a retained 1% NSR on any future gold production on this tenement.

## New Project Opportunities

The Company has allocated part of its working capital budget to the identification and evaluation of new mineral resource opportunities in Australia and overseas, undertaking a

review of a range of opportunities during the June quarter. Discussions and due diligence are on-going with several opportunities but no decisions have been made at this stage.
