Summary Compare to July 2022

Everything has improved:

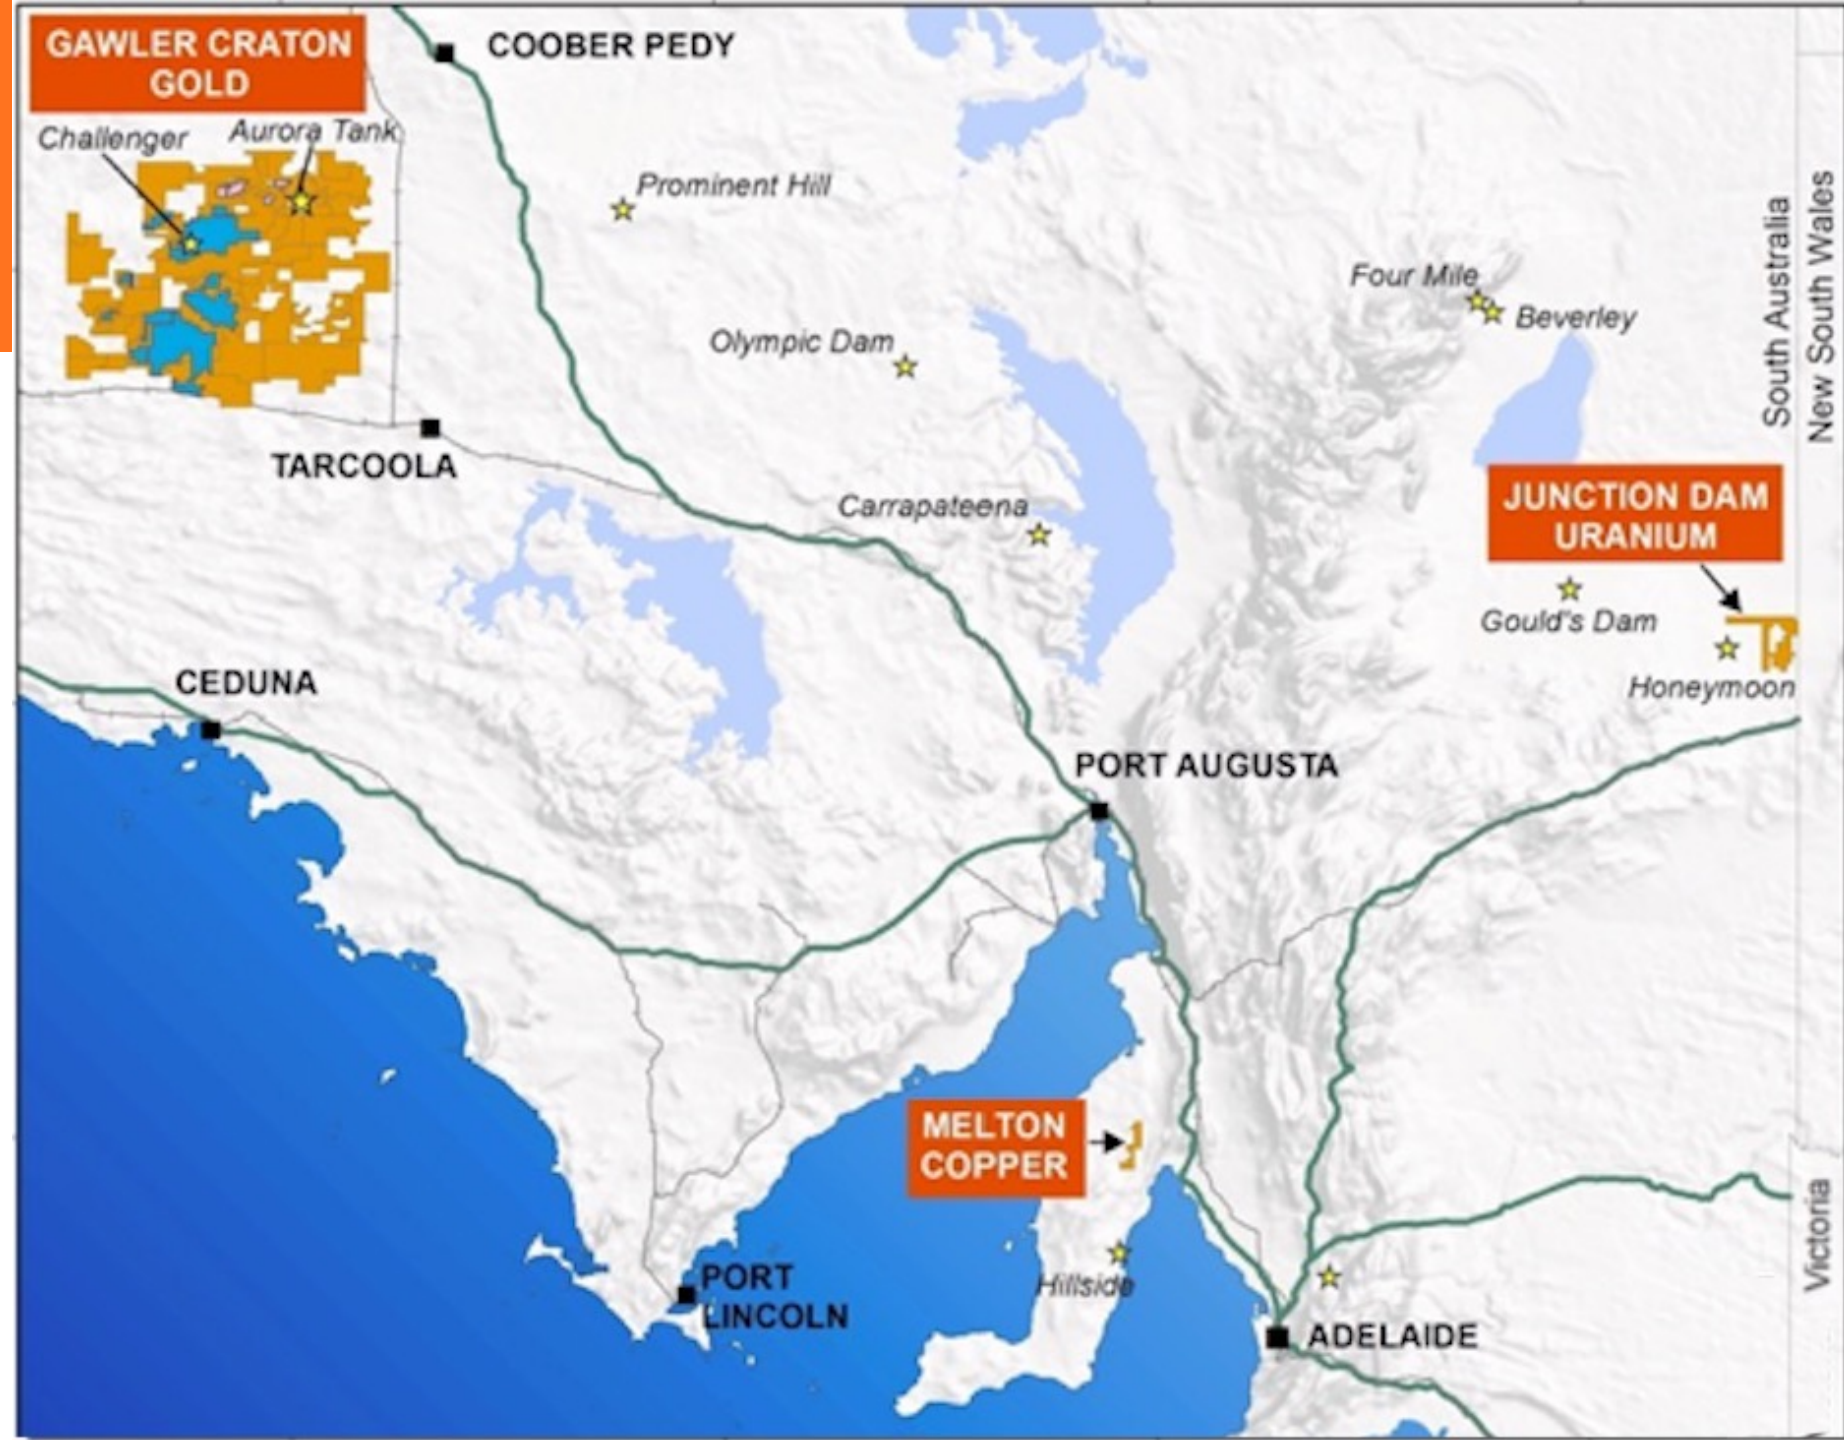

- Highest ever gold intersections **217g/t gold over 1m**
- **New high-grade gold zone** discovered at depth for first time, lying underneath the high-grade NW flank
- REE discovery
- Gold price up 20%
- Uranium price up over 60%
- WGCJV ownership: up from 79 % to 100%

And yet ...

2023 Exploration Highlights

New high-grade zone discovered

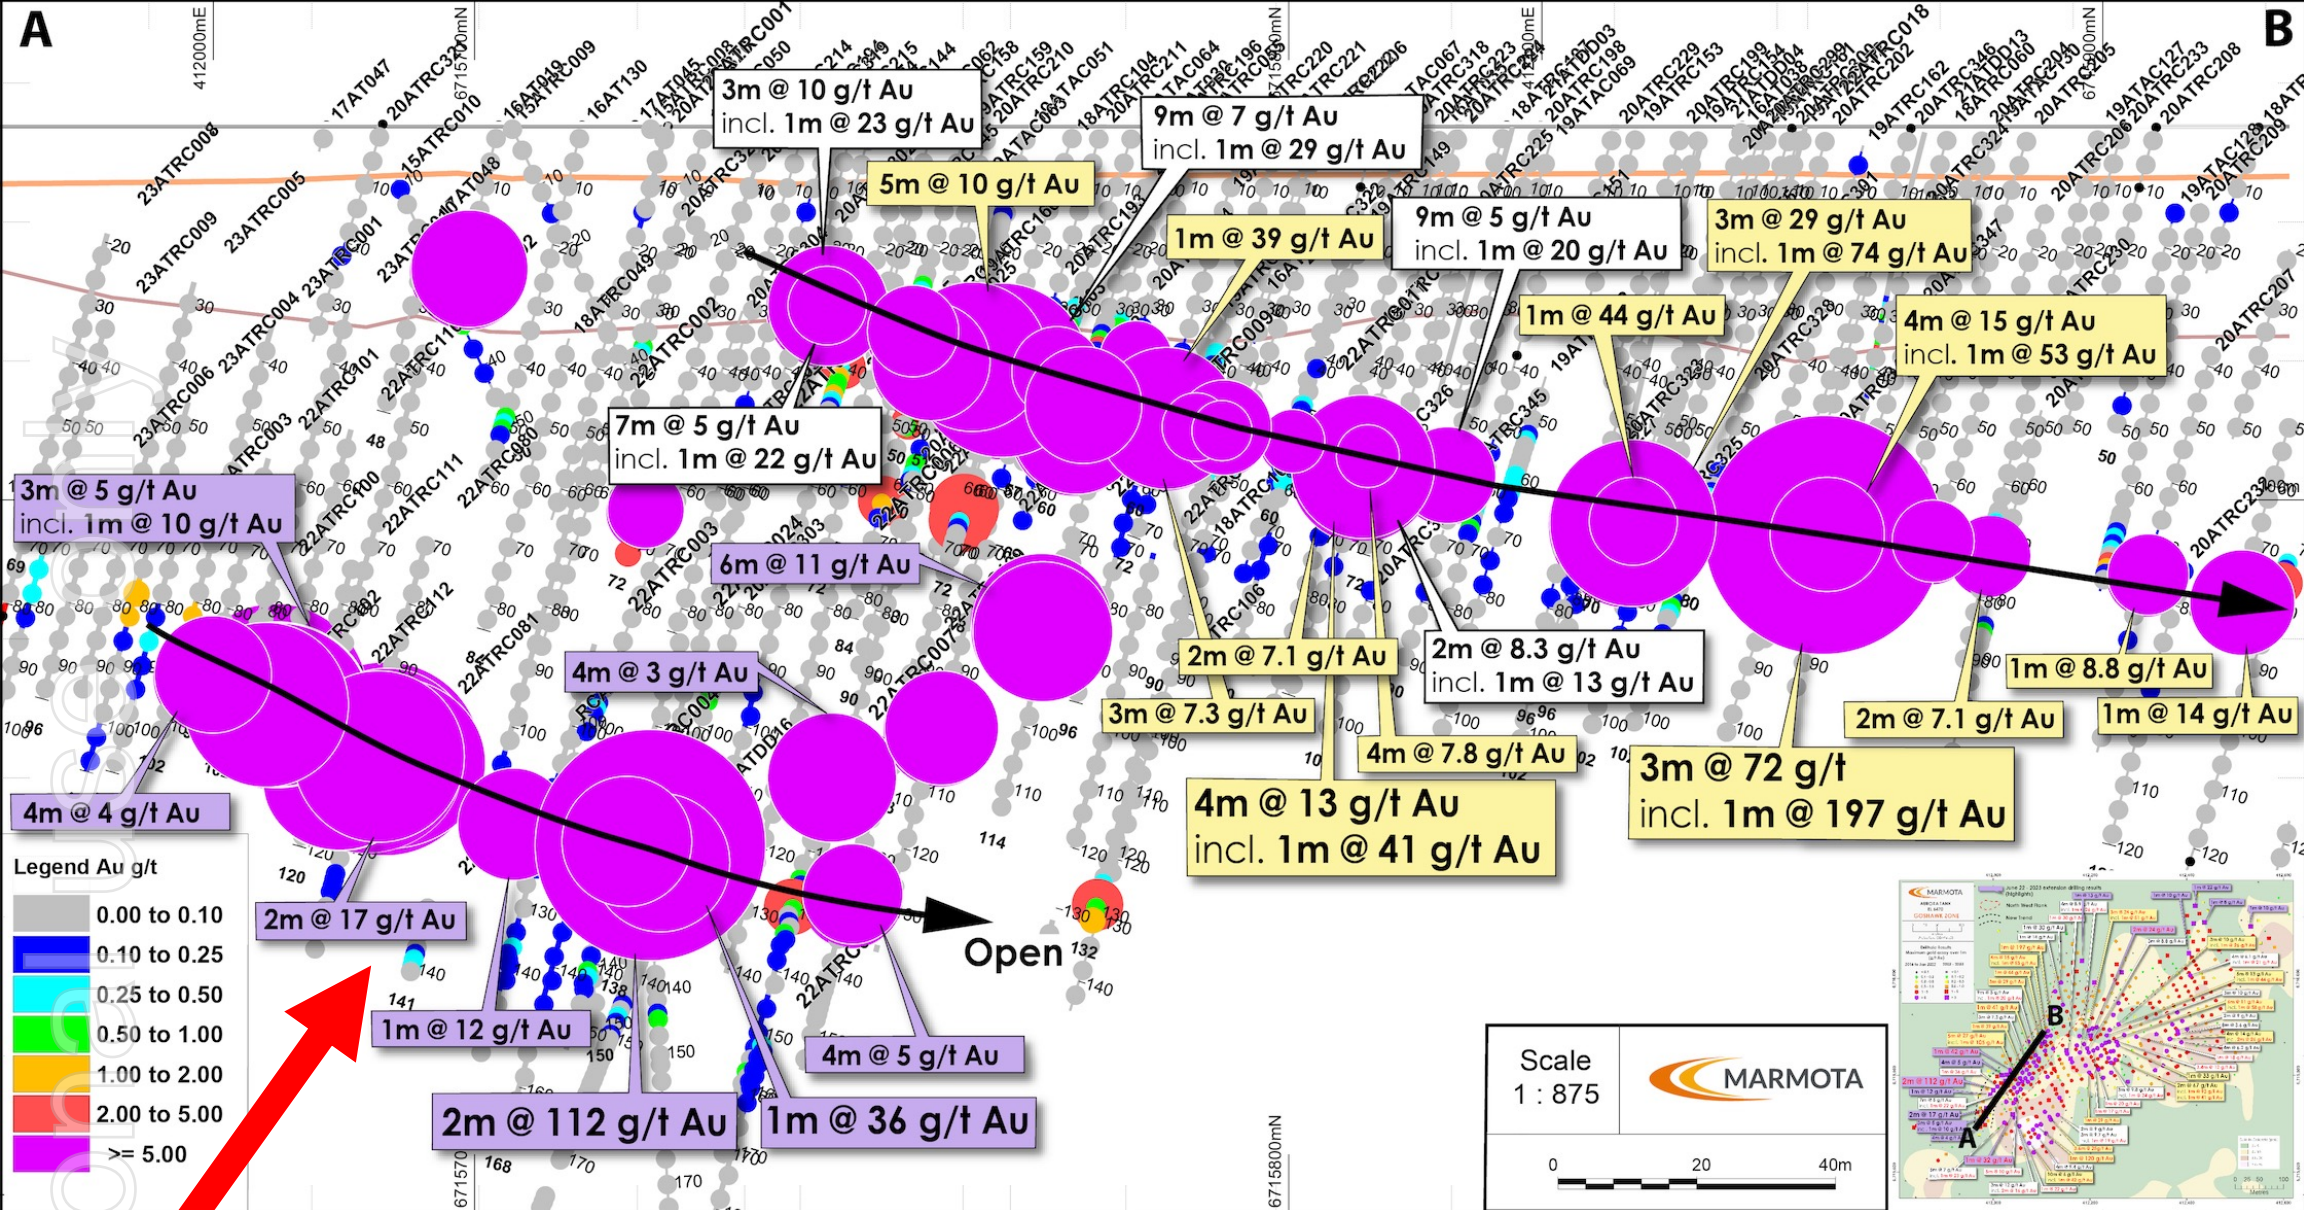

Situated underneath the high-grade NW flank

[ASX:MEU 3 April 2023]

High grades continue into fresh rock

Outstanding high grades at Aurora Tank occur not just conveniently close to surface, but **also extend deeper into fresh rock.**

Highest ever assays.

**Schematic Long-section
with NEW HIGH-GRADE ZONE beneath NW flank**

Primary Mineralisation

Tests of gold grains (105 g/t) collected at 38m downhole on the NW flank are predominantly **PRIMARY** mineralisation.

Suggests host mineralised lodes can be expected to geologically continue to depth below zone currently drilled

NOW PROVEN

**Primary gold grains
sampled from Hole 104**

(with fine-grained sulphosalts
contained within the primary
gold particles)

ASX: MEU

Bottle-roll tests

Aurora Tank
Excellent Gold Recoveries

Gold Recoveries (in %) vs Leach times in hours (for the 3 test samples)

Low-cost Low-capex Heap Leach Pathway

“ Marmota has been investigating the optimal pathway to production at Aurora Tank. Excellent **column leach test gold recoveries** suggest that Aurora Tank is amenable to **low-cost low-capex heap leach techniques**.

A heap leach means that Marmota would **not** need to construct a mill, nor share revenue with external parties for toll treatment in a mill. This is a highly desirable outcome for both the Company and our shareholders. ”

Marmota has water source at Aurora Tank

CAMP: INSTALLED + UPGRADED

- multiple sleeping quarters
- separate kitchen
- separate management office
- septic tank / waste management system
- 10,000L self-bunded fuel tank
- 90,000L capacity: water storage tanks
- potable water treatment system

ersona use only

First Pit Wall Parameters

ASX:MEU 16 June 2022

Transitioning from:

Discovery

Production

In May 2023 [ASX:MEU 11 May & 30 May 2023], Marmota **re-drilled** the diamond holes previously drilled in 2021 by GD Geodrill Australia Pty Ltd whose work unfortunately did not meet contractual quality or quantity requirements, and whose rig was not fit for its intended purpose, and which has caused substantial delay to our metallurgical testing program.

All of these problems were rectified in May this year by a new driller engaged by Marmota:

All holes re-drilled: excellent core recoveries.

The blockage to our important metallurgical program is finally over, enabling the testwork program to be commenced. The program is designed to optimise heap-leach gold recoveries.

Metallurgical, Infrastructure and Approvals

Optimised metallurgical work **NOW UNDERWAY**

Camp completed, Environmental studies completed, ticking off the boxes for the remainder

Key Takeaways

Aurora Tank is very fortunate to have:

- ✓ Outstanding **High-grade gold intersections**
- ✓ Mineralisation **Close to surface**
- ✓ **Excellent Gold recoveries** (metallurgy)
- ✓ Soft ground (potential for 'free dig')
- ✓ Primary mineralisation (potential to continue deeper)

Company focusing on potential for:

Low-cost Open-pit

Low-capex Heap leach pathway

MARMOTA

WGCJV

AGM UPDATE

Aurora Tank

Gawler Craton

ersonal use only

WGCJV increased to 100% ownership

1. Marmota is the manager and majority partner in the Western Gawler Craton Joint Venture (WGCJV) [via acquisition: Jumbuck gold transaction].
2. Existing JORC Resource of 319,000 ounces gold
— most on tenements near Aurora Tank.

Resource Estimates

Table 1. Jumbuck Project Mineral Resource Estimates May 2018 - 0.5g/t cut-off grade

Deposit 0.5 g/t cut-off grade	Indicated Resources			Inferred Resources			Total Mineral Resources		
	Mt	Au g/t	Au koz	Mt	Au g/t	Au koz	Mt	Au g/t	Au koz

MARMOTA

Uranium

ersonal use only

Junction Dam

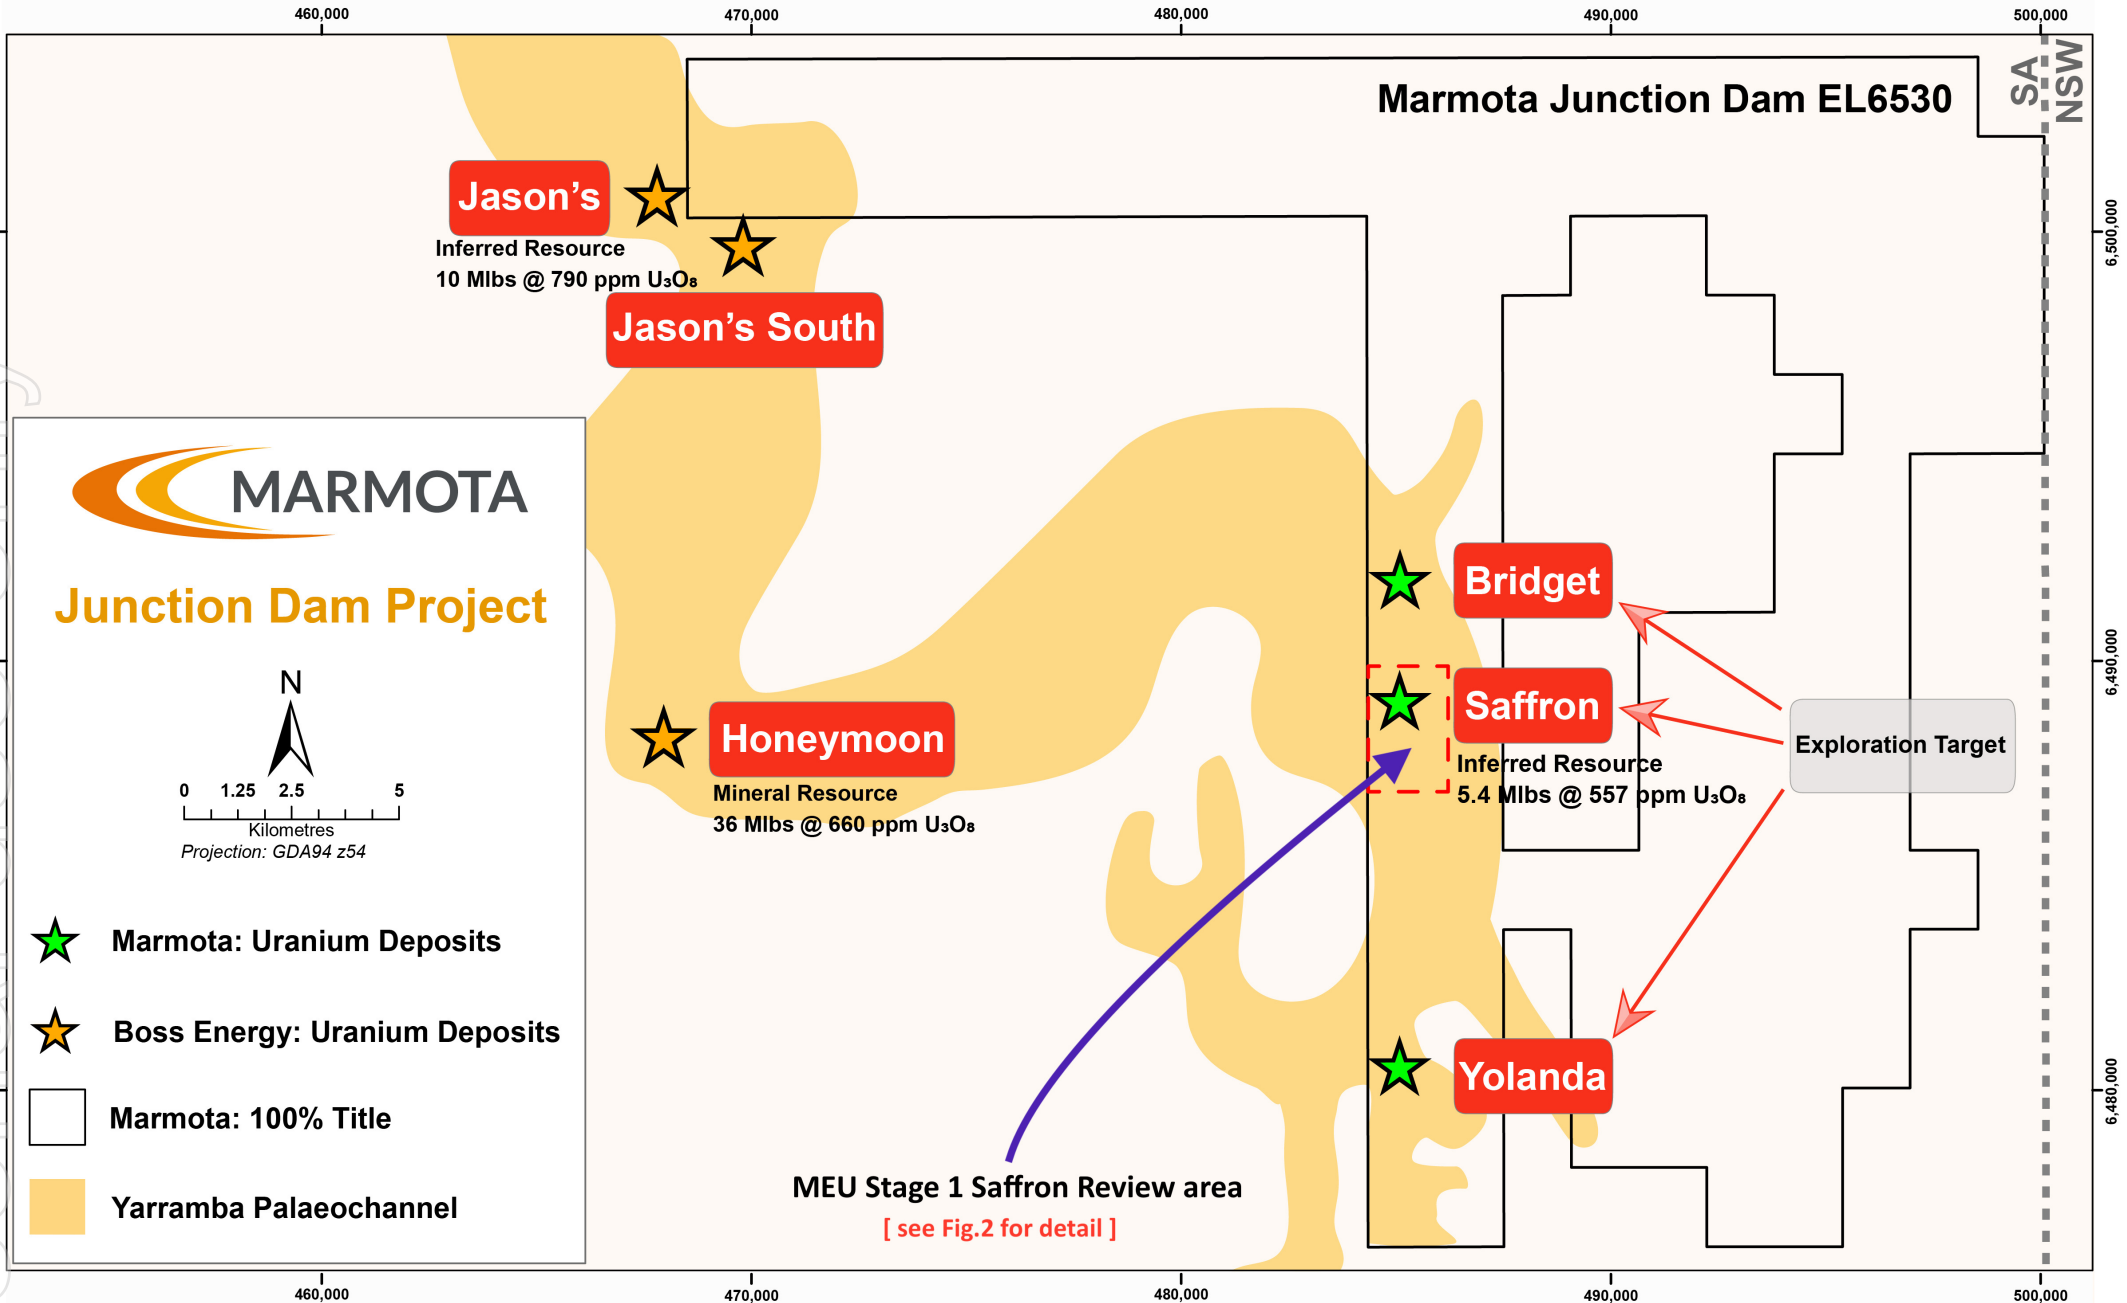

ersonal use only

- **By the end of 2014:**
MEU spent over A\$8 million developing Junction Dam uranium
[ASX:MEU 29 Sept 2014]
- **4 weeks ago:**
MEU announced decision to re-commence exploration at Junction Dam, to substantially grow the Company's uranium resource.
[ASX:MEU 26 Oct 2023]

Junction Dam: Background

1. MEU Junction Dam tenement book-ends BOTH sides of the palaeochannel that runs through the Boss Honeymoon (ASX:BOE) ISR uranium mine – one of just 4 permitted uranium mines in Australia (three of which are in South Australia).
2. Dramatic upturn in both uranium prices (**now US\$80 per pound**) and in sentiment
3. Value of uranium in the Yaramba Palaeochannel self-evident from the market cap of Boss Energy (ASX:BOE) which is currently ~ \$1.5 billion.
Heading back into production this quarter [ASX:BOE 11 Oct 2023].
4. According to their own feasibility studies, BOE need a larger resource to achieve economies of scale to lower cost of production and to extend mine life through development of satellite resources. BOE now drilling at Jasons.
[cf. ASX:BOE 21 June 2021, 4 Aug 2021 (p.6), 2 Sept 2021, 5 July 2023, 15 Nov 2023].

The Junction Dam uranium tenement (100% MEU) bookends both sides of the palaeochannel of the Boss Energy Ltd (ASX:BOE market cap ~ \$1.5 billion) Honeymoon uranium plant

More than a DOZEN companies have made unsolicited approaches to Marmota to try and obtain rights to Junction Dam.

Junction Dam Re-start

1. Three weeks ago:

MEU announced engagement of uranium expert Mark Couzens to:

- conduct stratigraphic and mineralisation review, and
- design first drill program for Junction Dam re-start

2. Making superb progress!

Exceeding all expectations

3. Stage 1 Review: Saffron Area

Already Identified 4 new target areas

4 New Targets Saffron area

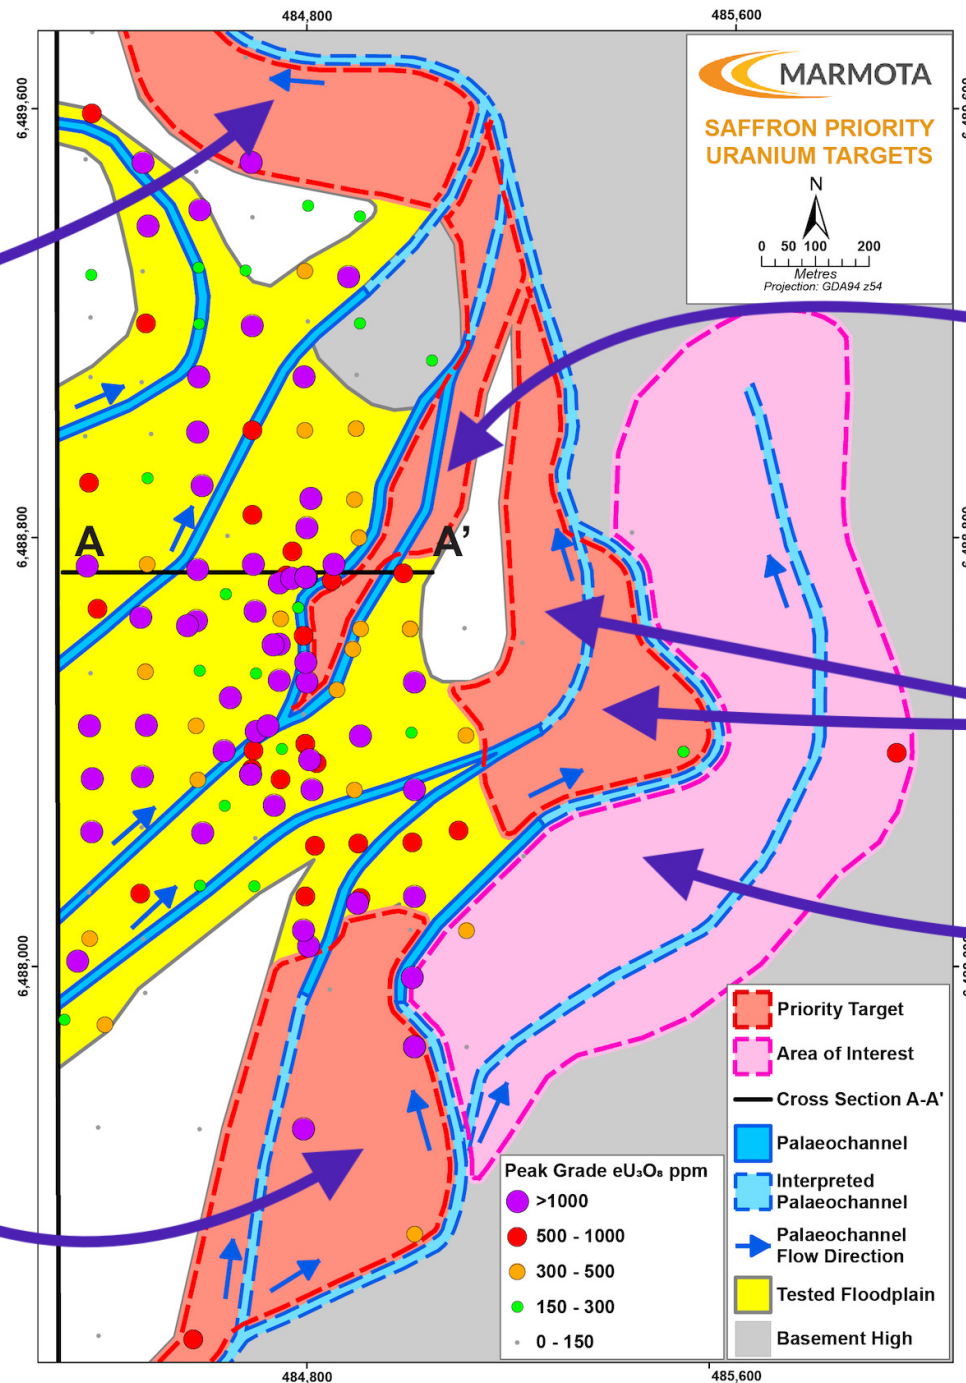

Target 1

Target 4

Target 3

Area of Interest

Target 2

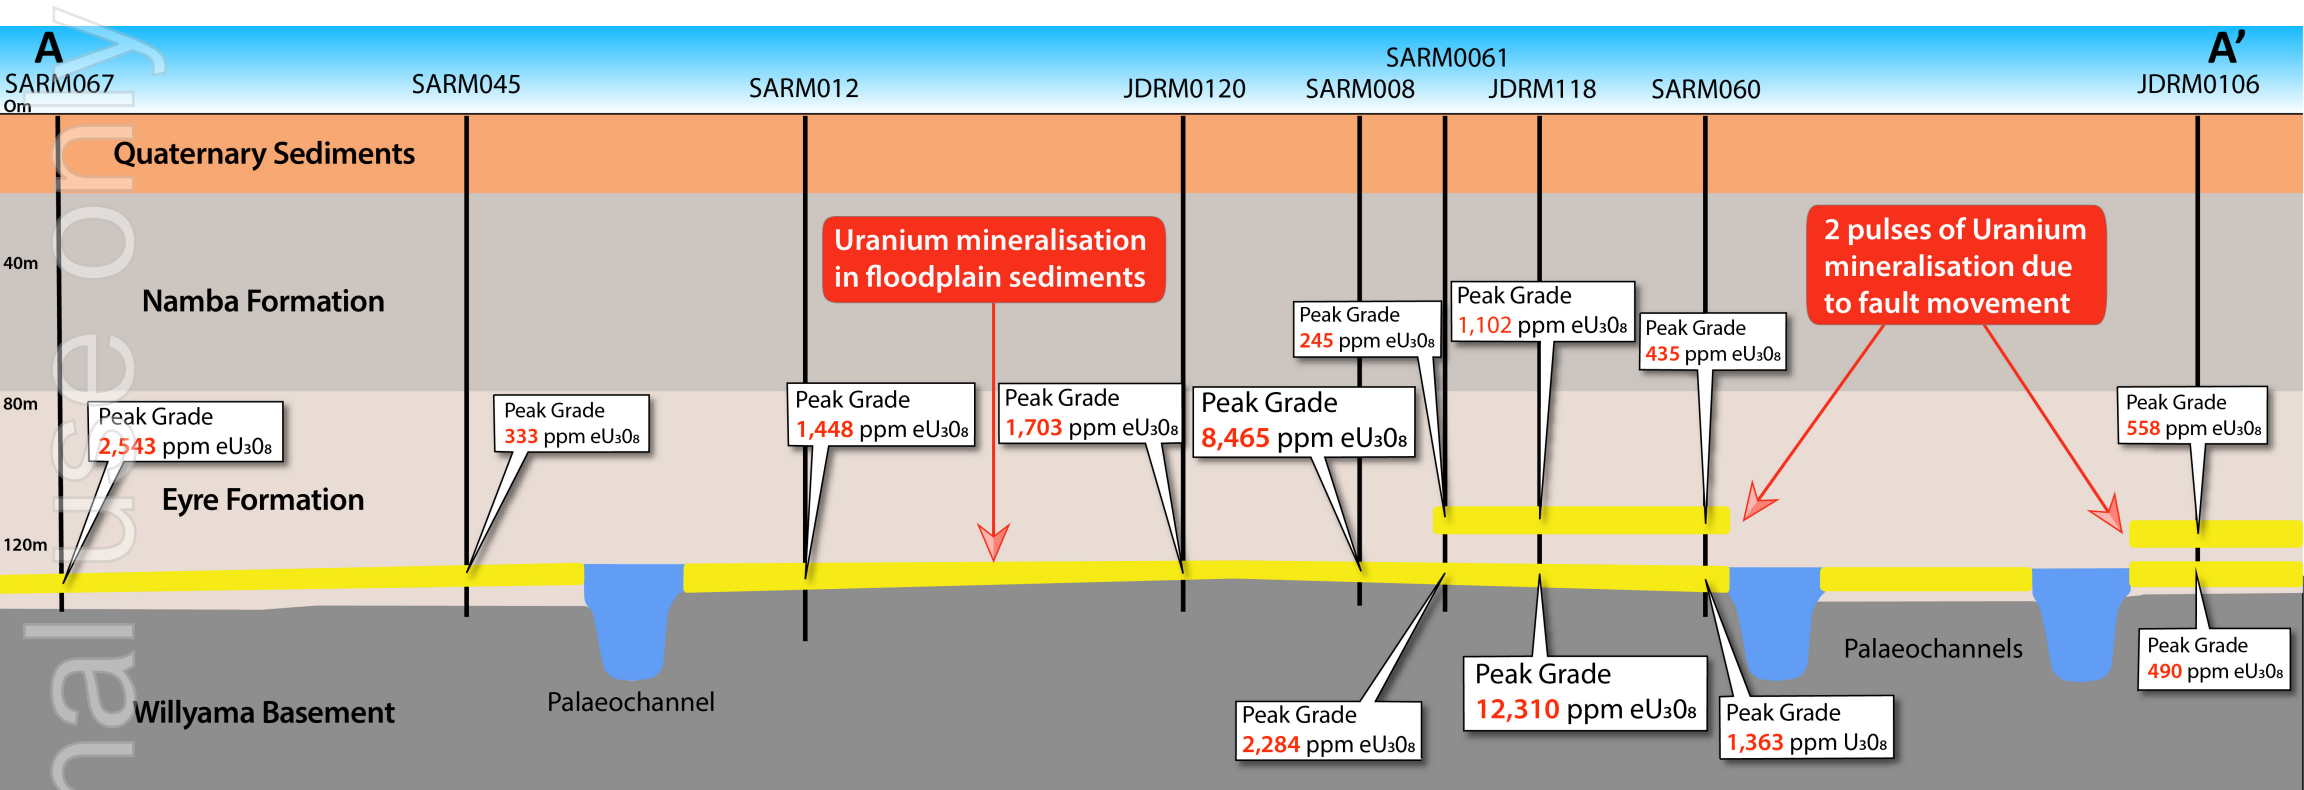

Junction Dam Re-start

“Junction Dam is one of the most exciting uranium projects I have worked on in Australia.”

Mark Couzens

Junction Dam Re-start

Schematic cross-section A-A' with a length of 600 metres across the Saffron Uranium Deposit

Key Takeaway

- ✓ **Junction Dam is one of the most exciting uranium deposits in SA, in the premier uranium jurisdiction of Australia**
- ✓ **Dramatic change in our perception of the potential of Junction Dam**
- ✓ **Sector is booming, and Marmota is perfectly located**
- ✓ **Both Aurora Tank gold and Junction Dam uranium provide Marmota shareholders with outstanding upside**

Disclaimer

This presentation has been prepared by Marmota Limited (“MEU”). The information contained in this presentation is a professional opinion only and is given in good faith. Certain information in this document has been derived from third parties and though MEU has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by MEU. Any forward-looking statements included in this document involve subjective judgement and analysis and are subject to uncertainties, risks and contingencies, many of which are outside the control of, and may be unknown to, MEU. In particular, they refer only to the date of this document, they assume the success of MEU’s strategies, and they are subject to significant regulatory, business, competitive and economic risks and uncertainties.

Actual future events may vary materially from those in the forward looking statements. Recipients of this document are cautioned not to place undue reliance on such forward-looking statements. MEU makes no representation or warranty as to the accuracy, reliability or completeness of information in this document and does not take responsibility for updating any information or correcting any error or omission which may become apparent after this document has been issued. To the extent permitted by law, MEU and its officers, employees, related corporations and agents, disclaim all liability, whether direct, indirect or consequential for any loss or damage arising out of, or in connection with, any use or reliance on this presentation or information.

Cautionary Statement

Estimates of exploration target sizes mentioned above should not be misunderstood or misconstrued as estimates of Mineral Resources. The estimates of exploration target sizes are conceptual in nature and there has been insufficient results received from drilling completed to date to estimate a Mineral Resource compliant with the JORC Code (2004) guidelines. Furthermore, it is uncertain if further exploration will result in the determination of a Mineral Resource.

Forward Looking Statement

This report may contain forward looking statements that are subject to risk factors which are based on MEU’s expectations relating to future events. Forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside the control of MEU, which could cause actual results to differ materially from such statements.

MEU makes no undertaking to update or revise the forward-looking statements made in this report to reflect events or circumstances after the date of this release.

Competent Persons Statement

Information in this exploration update relating to Exploration Targets, Exploration Results and Mineral Resources is based on information compiled by Aaron Brown, who is a Member of The Australian Institute of Geoscientists. He has sufficient experience which is relevant to the styles of mineralisation, metallurgical testwork and types of deposits under consideration and to the activities being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves.” Mr Brown consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.
