ASX Release 13 December 2023

MINING LEASE APPLICATION OVER THE LADY JULIE NORTH 4 DEPOSIT

Magnetic Resources lodged a Mining Lease application over its Lady Julie North 4 discovery. M38/1315 (pending) overlays Magnetic tenements P38/4170 and E38/3127 and covers an area of 238Ha (Figure 1).

The application was made on the basis of the declared gold resource at LNJ4 of 13.1Mt @ 2.0g/t containing 852,000ozs, bringing the total of the Laverton area resources to 22.7Mt @ 1.69 g/t for 1.24Mozs, which was published recently in an ASX release 23 November 2023 (also in Figures 1-2, Tables 1-2).

The rapidly growing LNJ4 resource is situated on the Chatterbox shear zone, a regional structure which hosts other significant gold deposits. An aggressive drilling program at LNJ4 has led to the recognition of thick high-grade breccia mineralisation and silica-pyrite alteration zones which remain open at depth. Further drilling at depth is anticipated to result in further growth of the LNJ4 resource.

Work is continuing on the development of a Mining Proposal which will apply to both M38/1315 and a further Mining Lease over other key deposits (Figure 2). Magnetic can now advise that the application has passed the initial 35-day period and will now move through the Department of Energy, Mines, Industry Regulation and Safety's review and approvals process.

Managing Director George Sakalidis commented:

“This is a major milestone for the Company. The Mining Lease application is the first stage in the mining approvals process.

Concurrently, we are still drilling at depth below the existing 825,000oz resource beneath the Lady Julie North 4 Resource. Further drilling at depth is anticipated to result in further growth of the LJN4 resource and additional structural studies are being completed on the recent core holes to help understand the setting of the breccia and silica-pyrite zones.

There are currently 2 diamond rigs and an RC rig on site trying to expand the resources both within and to the south along the Chatterbox shear along identified new target areas.”
