

Investor Webinar Presentation

SYDNEY, AUSTRALIA (20 December 2023)

Melbana Energy Limited (ASX: MAY, Melbana) is pleased to advise it will host an investor webinar at 11:00 AM AEST on Wednesday, 20 December 2023.

Melbana will be providing further updates on the latest progress and ongoing operations at the Alameda-3 Appraisal Well in Cuba.

The briefing will be followed by a Q&A session.

Questions can be submitted now to alex@investorstream.com.au or in written form during the webinar.

Anyone wishing to attend the webinar must register using the below link.

Webinar Details

Date and time: 11:00 AM AEST (9:00 AM AWST) on Wednesday, 20 December 2023

Register via: <https://attendee.gotowebinar.com/register/1008957385489472604>

ENDS.

**For and on Behalf of the Board of
Directors:**

Andrew Purcell

For personal use only

Disclaimer

Summary of information: This presentation contains general and background information about Melbana Energy's activities current as at the date of the presentation and should not be considered to be comprehensive or to comprise all the information that an investor should consider when making an investment decision. The information is provided in summary form, and should not be considered to be comprehensive or complete.

Not financial product advice: This presentation is not financial product, investment advice or a recommendation to acquire securities and has been prepared without taking into account the objectives, financial situation or needs of individuals. Before making an investment decision investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs, and seek legal, taxation and financial advice appropriate to their jurisdiction and circumstances.

Disclaimer: Melbana Energy and its related bodies corporate and each of their respective directors, agents, officers, employees and advisers expressly disclaim, to the maximum extent permitted by law, all liabilities (however caused, including negligence) in respect of, make no representations regarding, and take no responsibility for, any part of this presentation and make no representation or warranty as to the currency, accuracy, reliability or completeness of any information, statements, opinions, conclusions or representations contained in this presentation. In particular, this presentation does not constitute, and shall not be relied upon as, a promise, representation, warranty or guarantee as to the past, present or the future performance of Melbana Energy.

Future performance: This presentation contains certain forward-looking statements and opinion. The forward-looking statements, opinion and estimates provided in this presentation are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward-looking statements, including projections, forecasts and estimates, are provided as a general guide only and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainties and other factors, many of which are outside the control of Melbana Energy. Past performance is not necessarily a guide to future performance and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward looking statements or other forecast.

Risks: An investment in Melbana Energy is subject to investment and other known and unknown risks, some of which are beyond the control of Melbana Energy.

Not an offer: This presentation is not, and should not be considered as, an offer or an invitation to acquire securities in Melbana Energy or any other financial products and neither this document nor any of its contents

will form the basis of any contract or commitment. This presentation is not a prospectus. Offers of securities in Melbana Energy will only be made in places in which, or to persons to whom it would be lawful to make such offers. This presentation must not be disclosed to any other party and does not carry any right of publication. Neither this presentation nor any of its contents may be reproduced or used for any other purpose without the prior written consent of Melbana Energy.

No Distribution in the US: This presentation is not an offer of securities for sale in the United States. Any securities to be issued by Melbana Energy have not been and will not be registered under the US Securities Act of 1933, as amended (the "US Securities Act") and may not be offered or sold in the United States absent registration or an exemption from registration under the US Securities Act. No public offer of the securities is being made in the United States and the information contained herein does not constitute an offer of securities for sale in the United States. This presentation is not for distribution directly or indirectly in or into the United States or to US persons.

Monetary values: Unless otherwise stated, all dollar values are in Australian dollars (A\$). The information in this presentation remains subject to change without notice.

No distribution: Distribution of this presentation may be restricted by law. Persons who come into possession of this presentation should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

Contingent and Prospective Resources: Unless otherwise specified, the information that relates to Contingent Resources and Prospective Resources for Melbana is based on, and fairly represents, information and supporting documentation compiled by Mr. Peter Stickland, who is a Director of the company and has more than 30 years of relevant experience. Mr. Stickland is a member of the European Association of Geoscientists & Engineers and the Petroleum and Exploration Society of Australia. Mr. Stickland consents to the publication of the resource assessments contained herein. The Contingent Resource and Prospective Resource estimates are consistent with the definitions of hydrocarbon resources that appear in the Listing Rules. Conversion factors: 6 Bscf gas equals 1 MMboe; 1 bbl condensate equals 1 boe; "MMstb" means million stock tank barrels of oil.

Prospective Resources Cautionary Statement (PRCS): The estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Future exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.

Transformational year

A lot has happened since last year

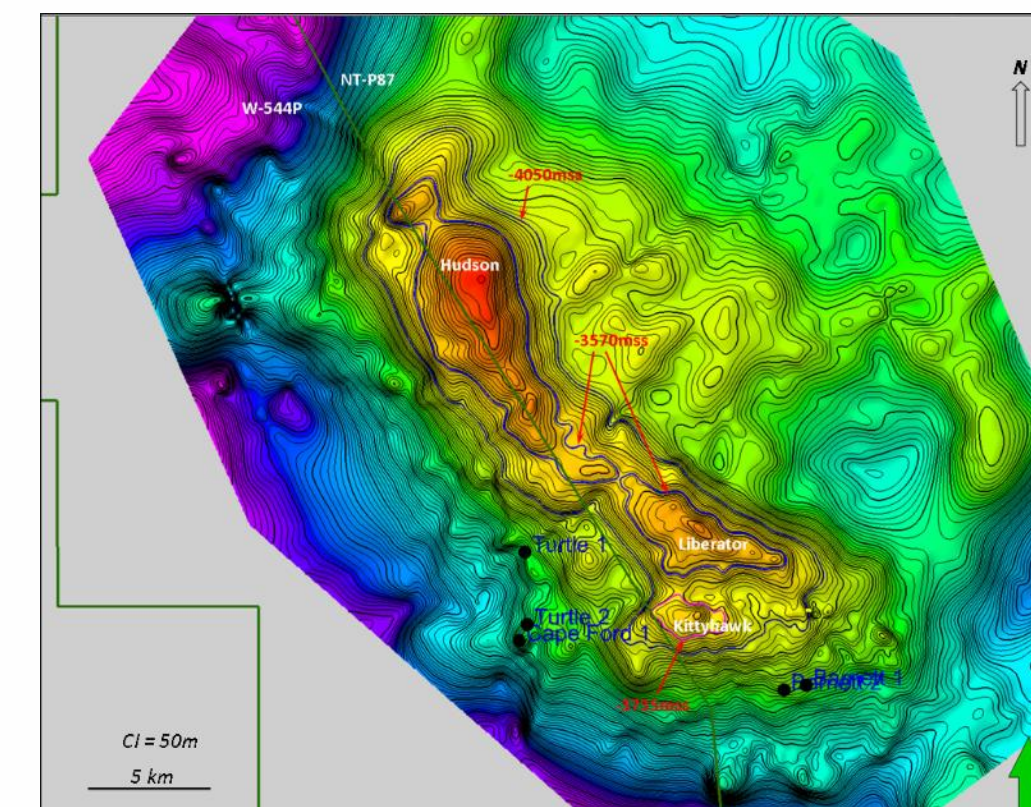

Corporate

- ▶ Strategy focused to become **\$1b company** within 3 years
- ▶ **\$31m** cash in bank fully funded for appraisal drilling
- ▶ Experienced General Counsel, Exploration Manager, CFO, CCO and COO appointed

Cuba

- ▶ Alameda-2 confirms shallow, high quality development project
- ▶ Alameda-2 early production project ironing out logistics
- ▶ Alameda-3 deep well targeting 179 million barrel best estimate prospective resource commenced
- ▶ Internal development studies and resource assessment progressing prior to third party review

Australia

- ▶ Billion-barrel Beehive prospect to be drilled as early as 2024 by major
- ▶ Adjacent billion-barrel Hudson prospect farm-out project underway
- ▶ AC/P70 interpretation project underway

For personal use only

2023 appraisal operation success

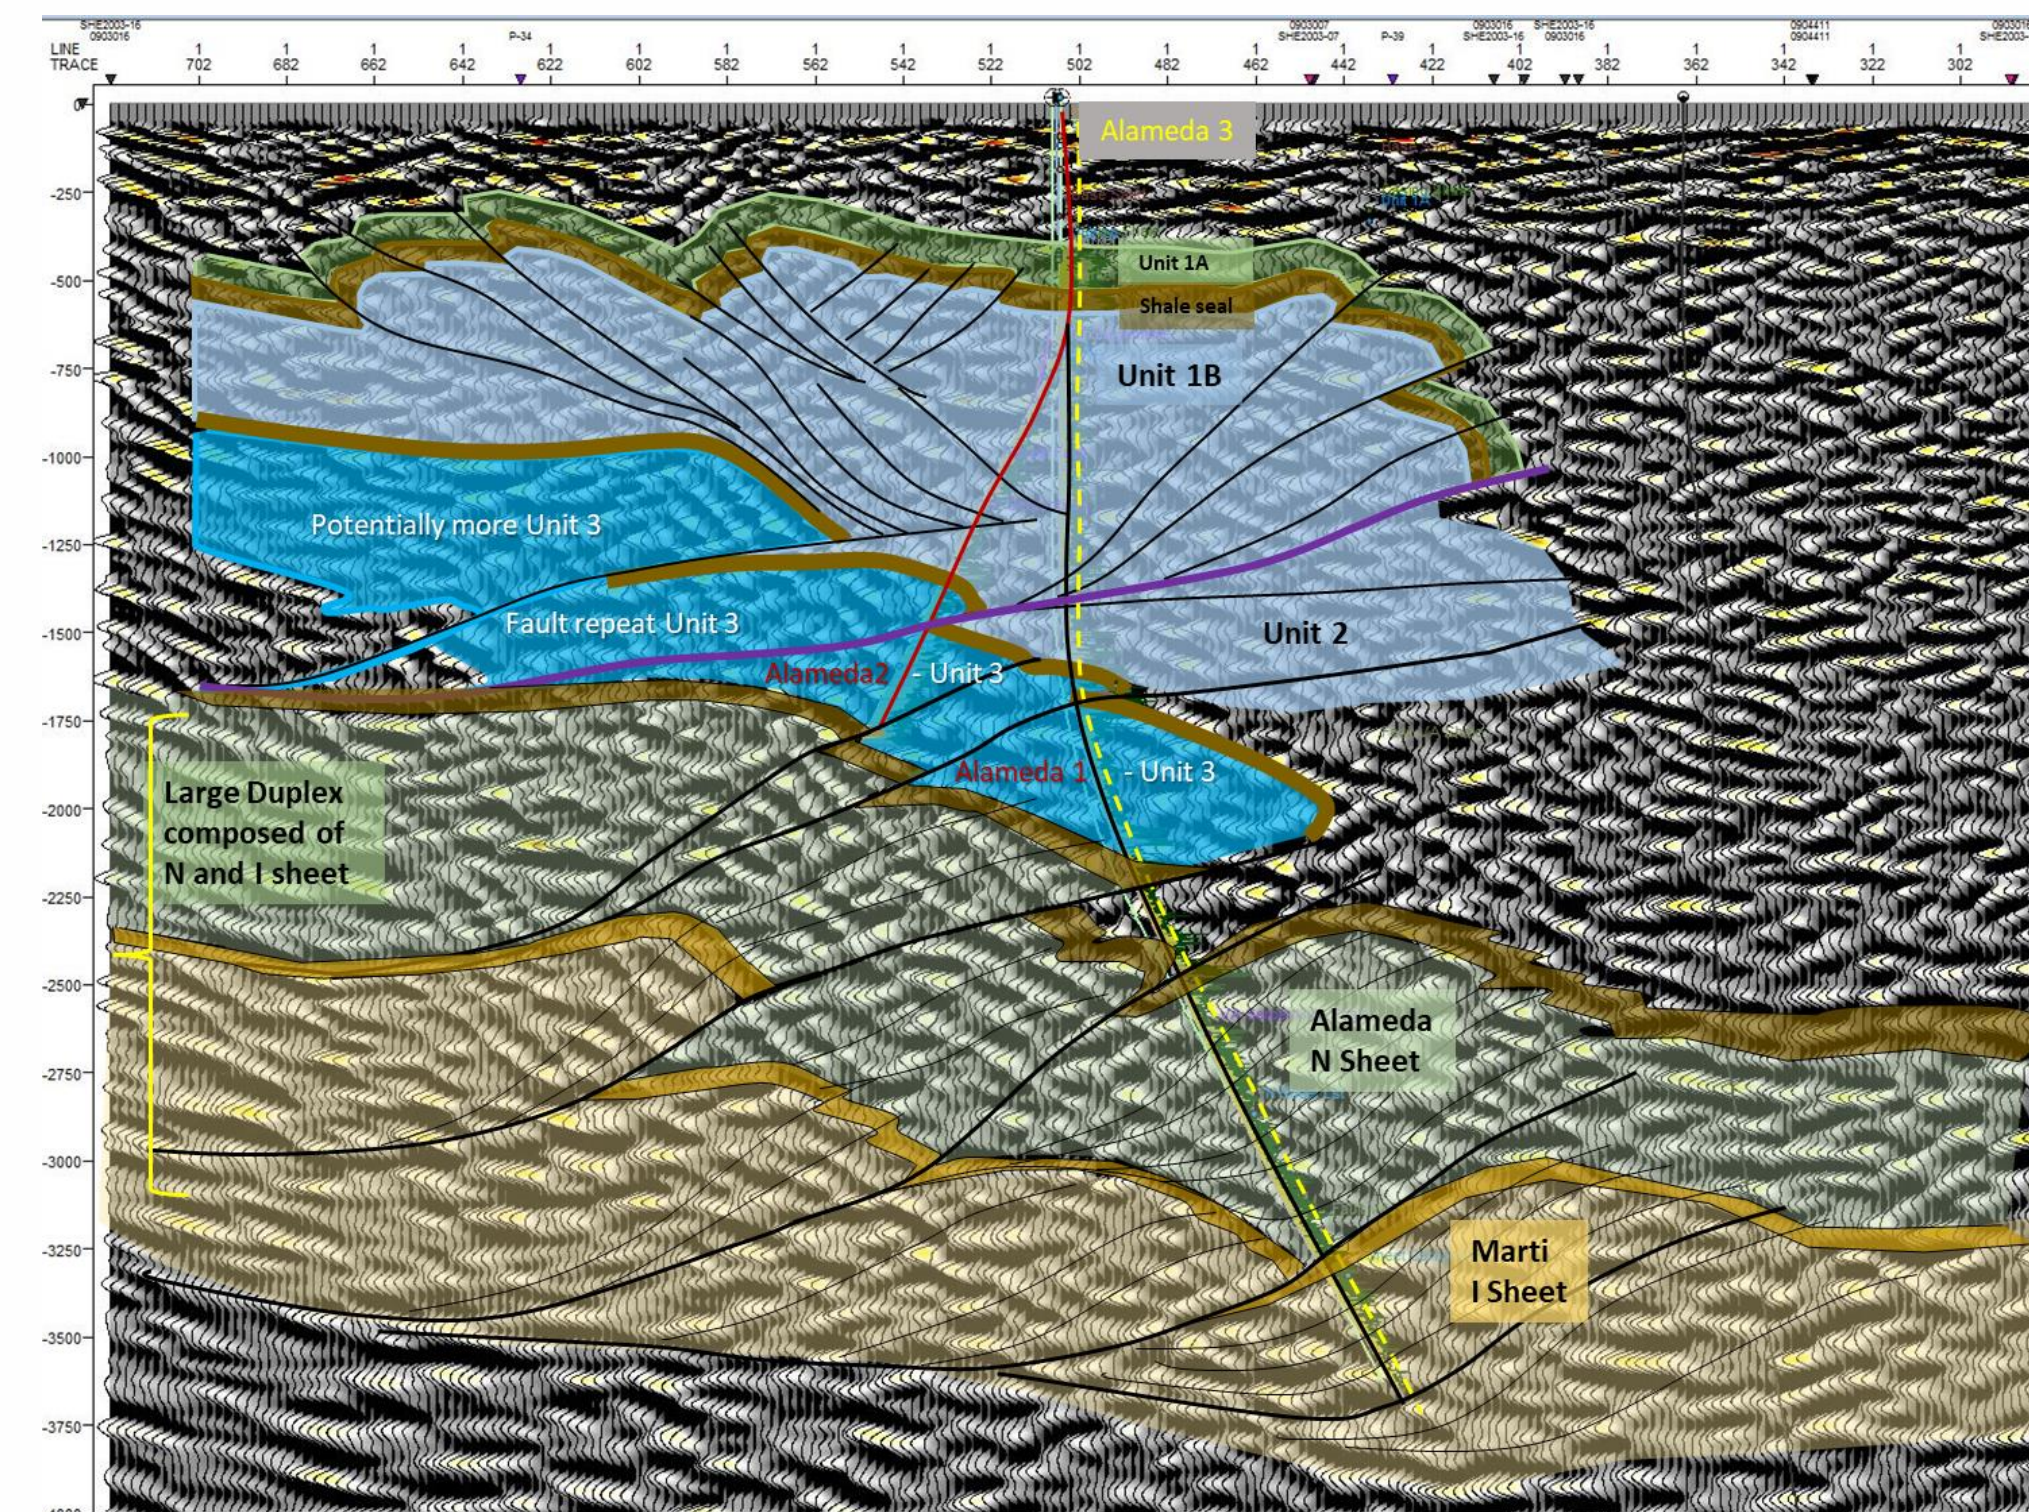

First Appraisal Well Alameda-2

- ▶ Goal was to log, core and test all three units of the Amistad formation, intersected during the drilling of Alameda-1 between 450m and ~2,000m, targeting 88 million barrels of Prospective Resource *
- ▶ Alameda-2 drilling commenced June 2023 and reached TD (1975m) ahead of schedule on 31 July 2023
- ▶ Unit 1B: 19° API, 30cP, low S oil
- ▶ Observed net pay increased to 615m (incl. fractures)

Same project management team and same contractors, thus leveraging the hard-earned experience they gained drilling Melbana's first two exploration wells in Cuba

Second Appraisal Well Alameda-3

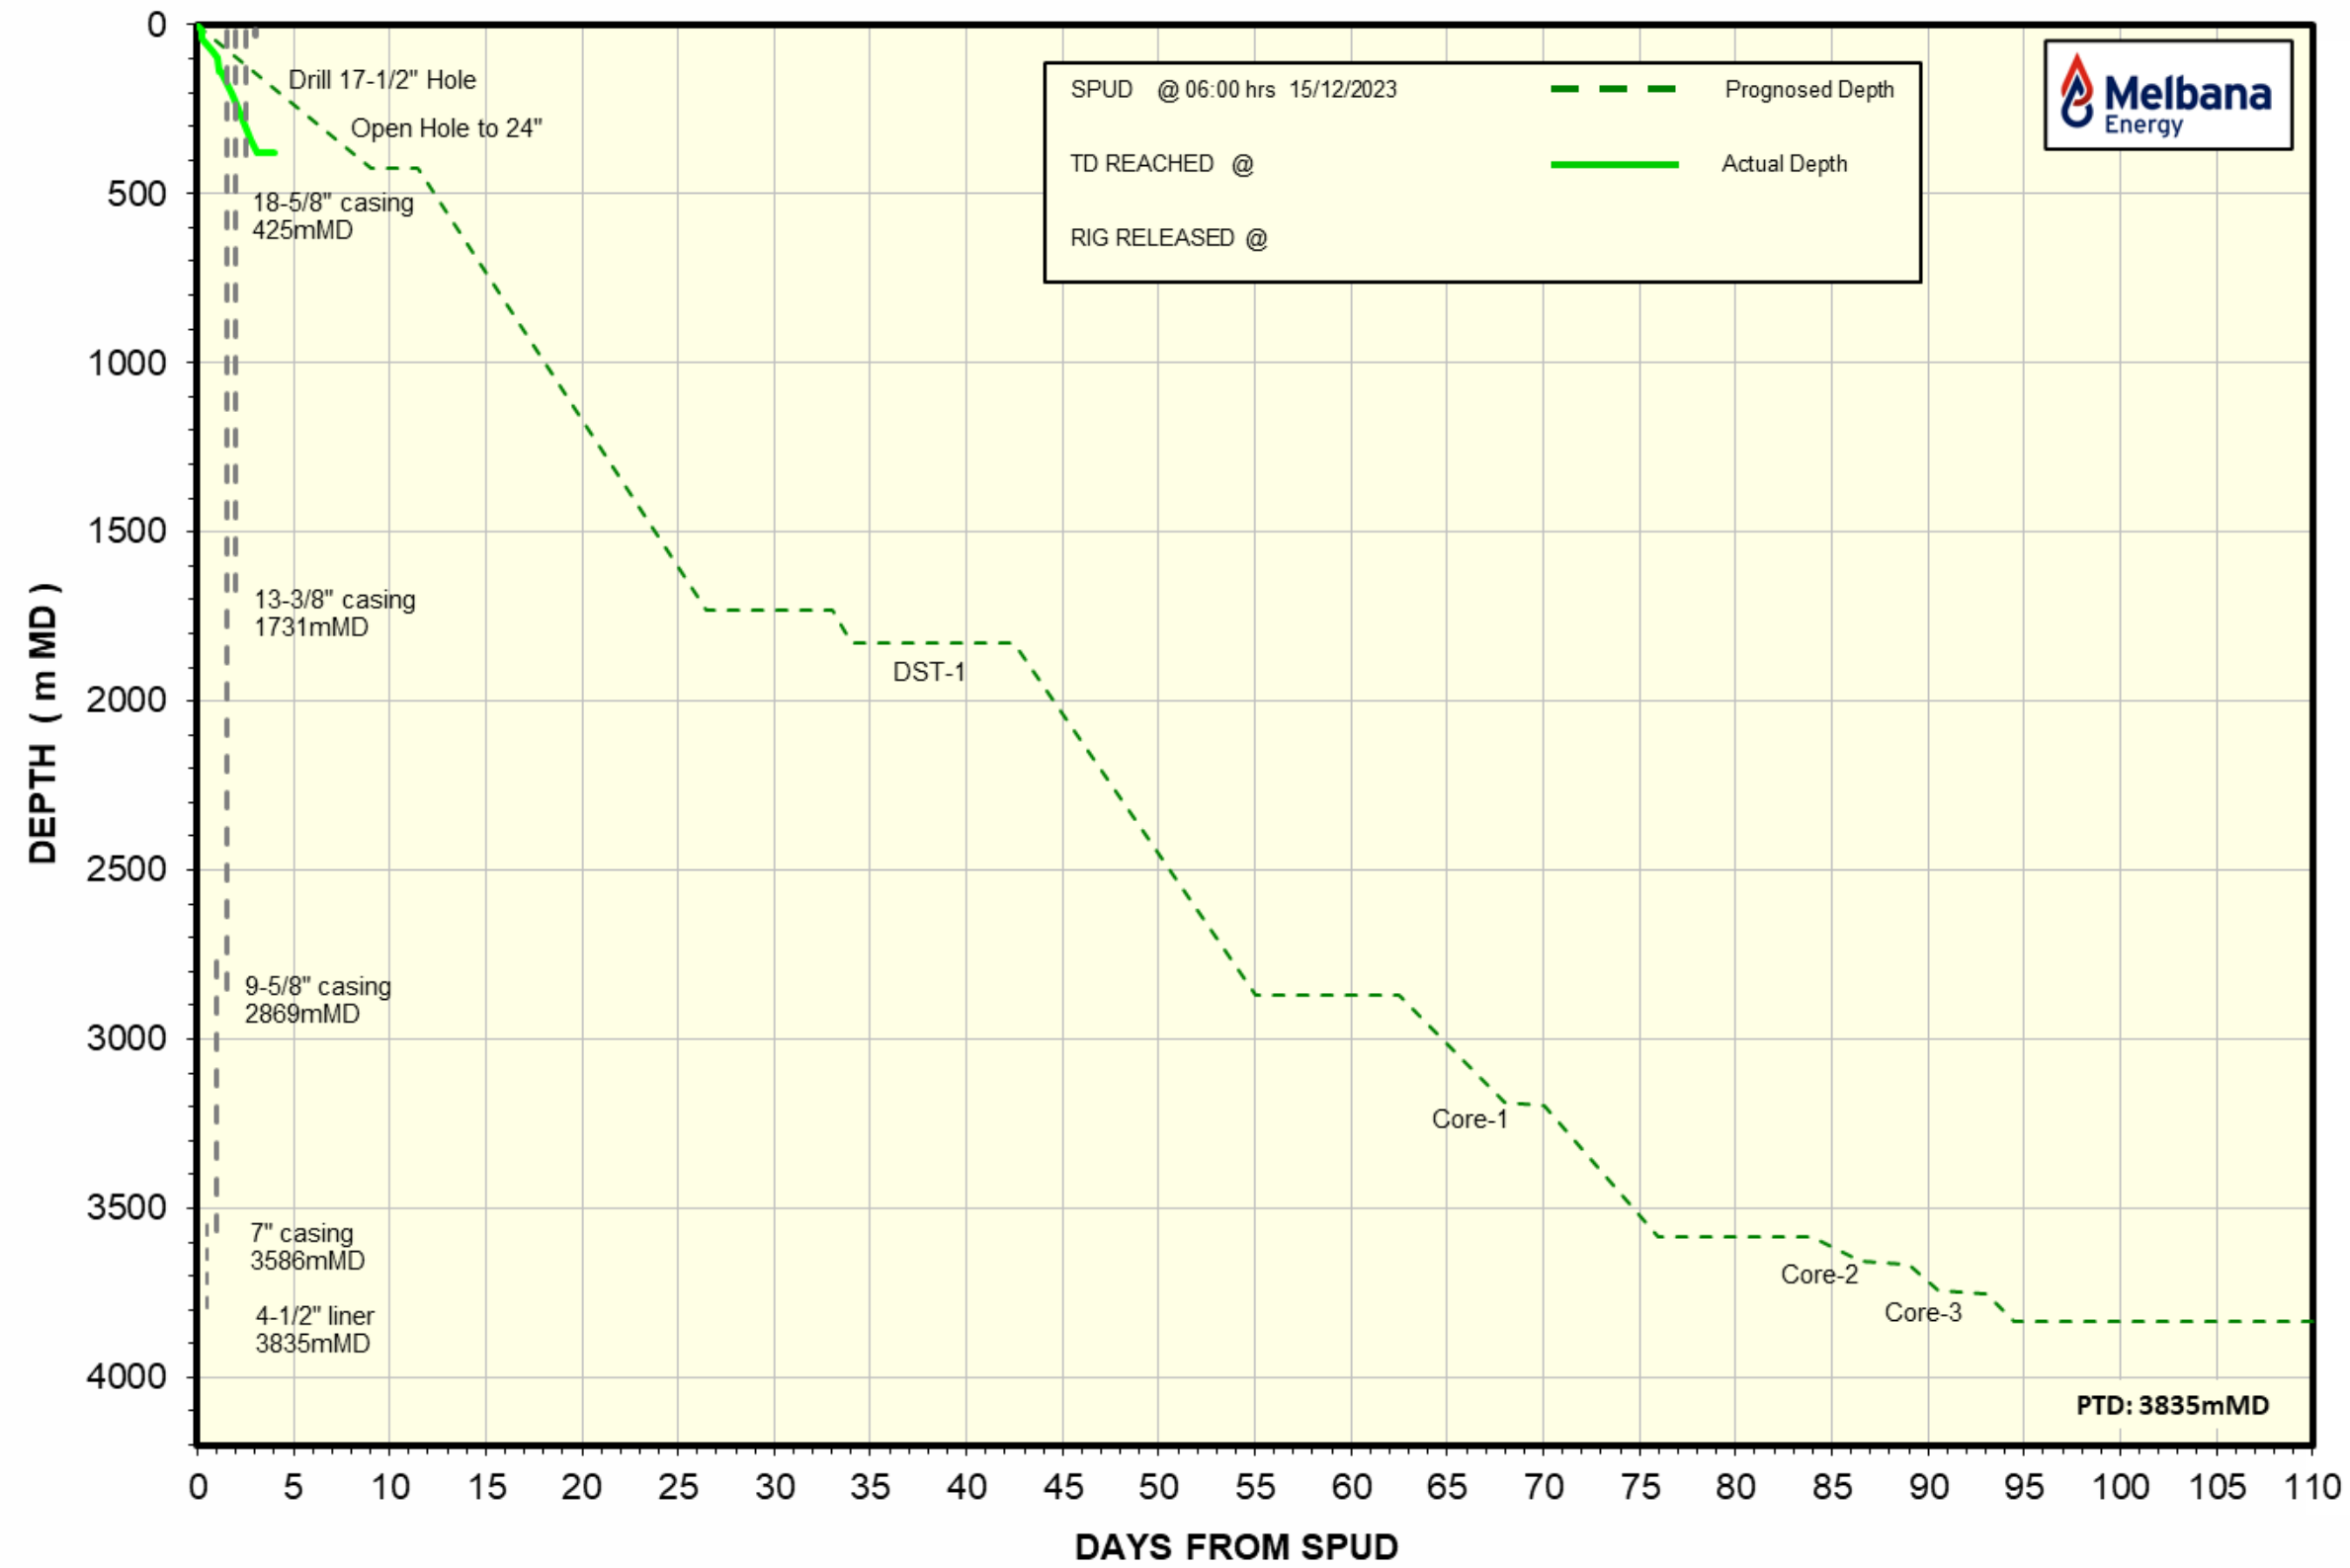

- ▶ Drilling commenced
- ▶ Test the Alameda and Marti formations
- ▶ **179** million barrels of Prospective Resource*

Alameda-2 drilled and completed in Unit 1B. Early production brought online in October. Alameda-3 commenced 15 December 2023.

* Gross unrisked best estimate Prospective Resource, see PRCS on page 2

Alameda-3 time vs depth plan

10,000 psi BOP

Installed after setting 18-5/8" casing to drill 17-1/2" section

Upgraded wellhead

Built to handle 18 5/8" casing at up to 10,000 psi

Alameda-3 operations / test sequence

- ▶ Drill 17-1/2" Hole to top of Unit-3

Alameda-3 operations / test sequence

- ▶ Run and Cement 13-3/8" Casing to isolate higher pressure intervals from shallower zones
- ▶ Once 13-3/8" casing cemented production can continue in Alameda-2

Unit-3

Alameda Reservoir

Marti Reservoir

Alameda-3 operations / test sequence

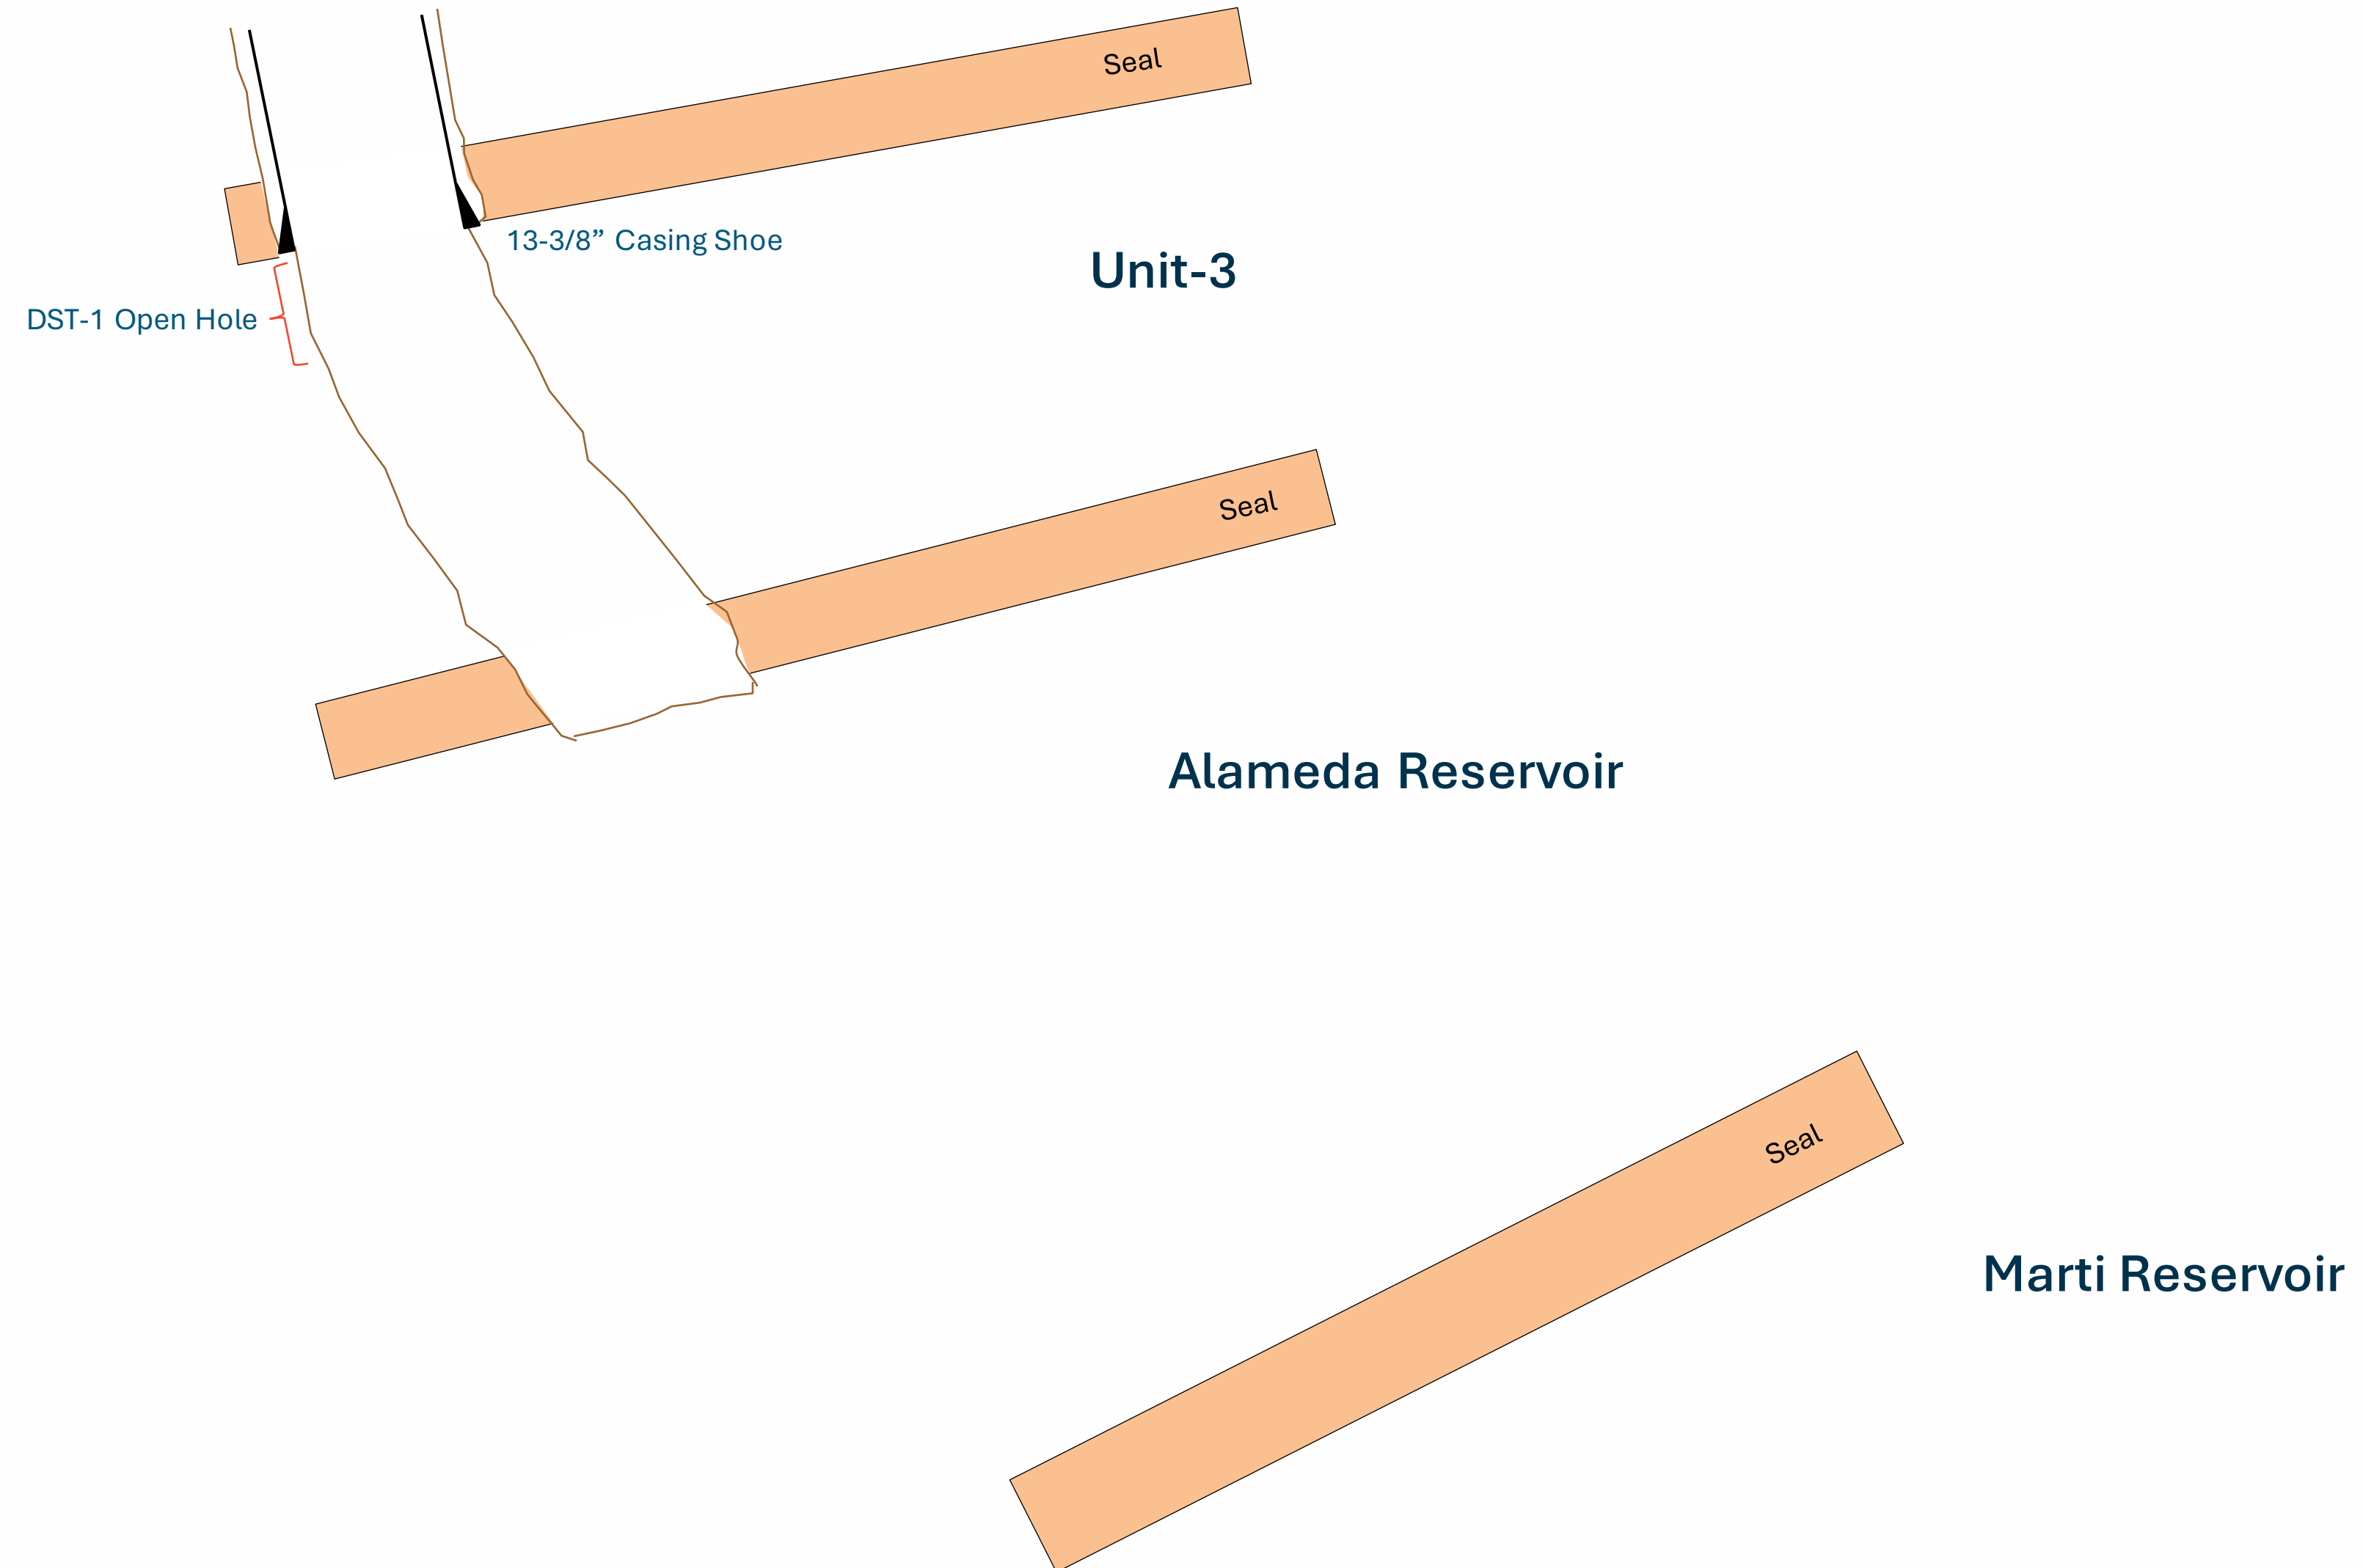

- ▶ Drill ~100m into Unit-3 and run Test-1 in open hole

For personal use only

Alameda-3 operations / test sequence

- ▶ Drill 12-1/4" hole to top of Alameda Reservoir Interval

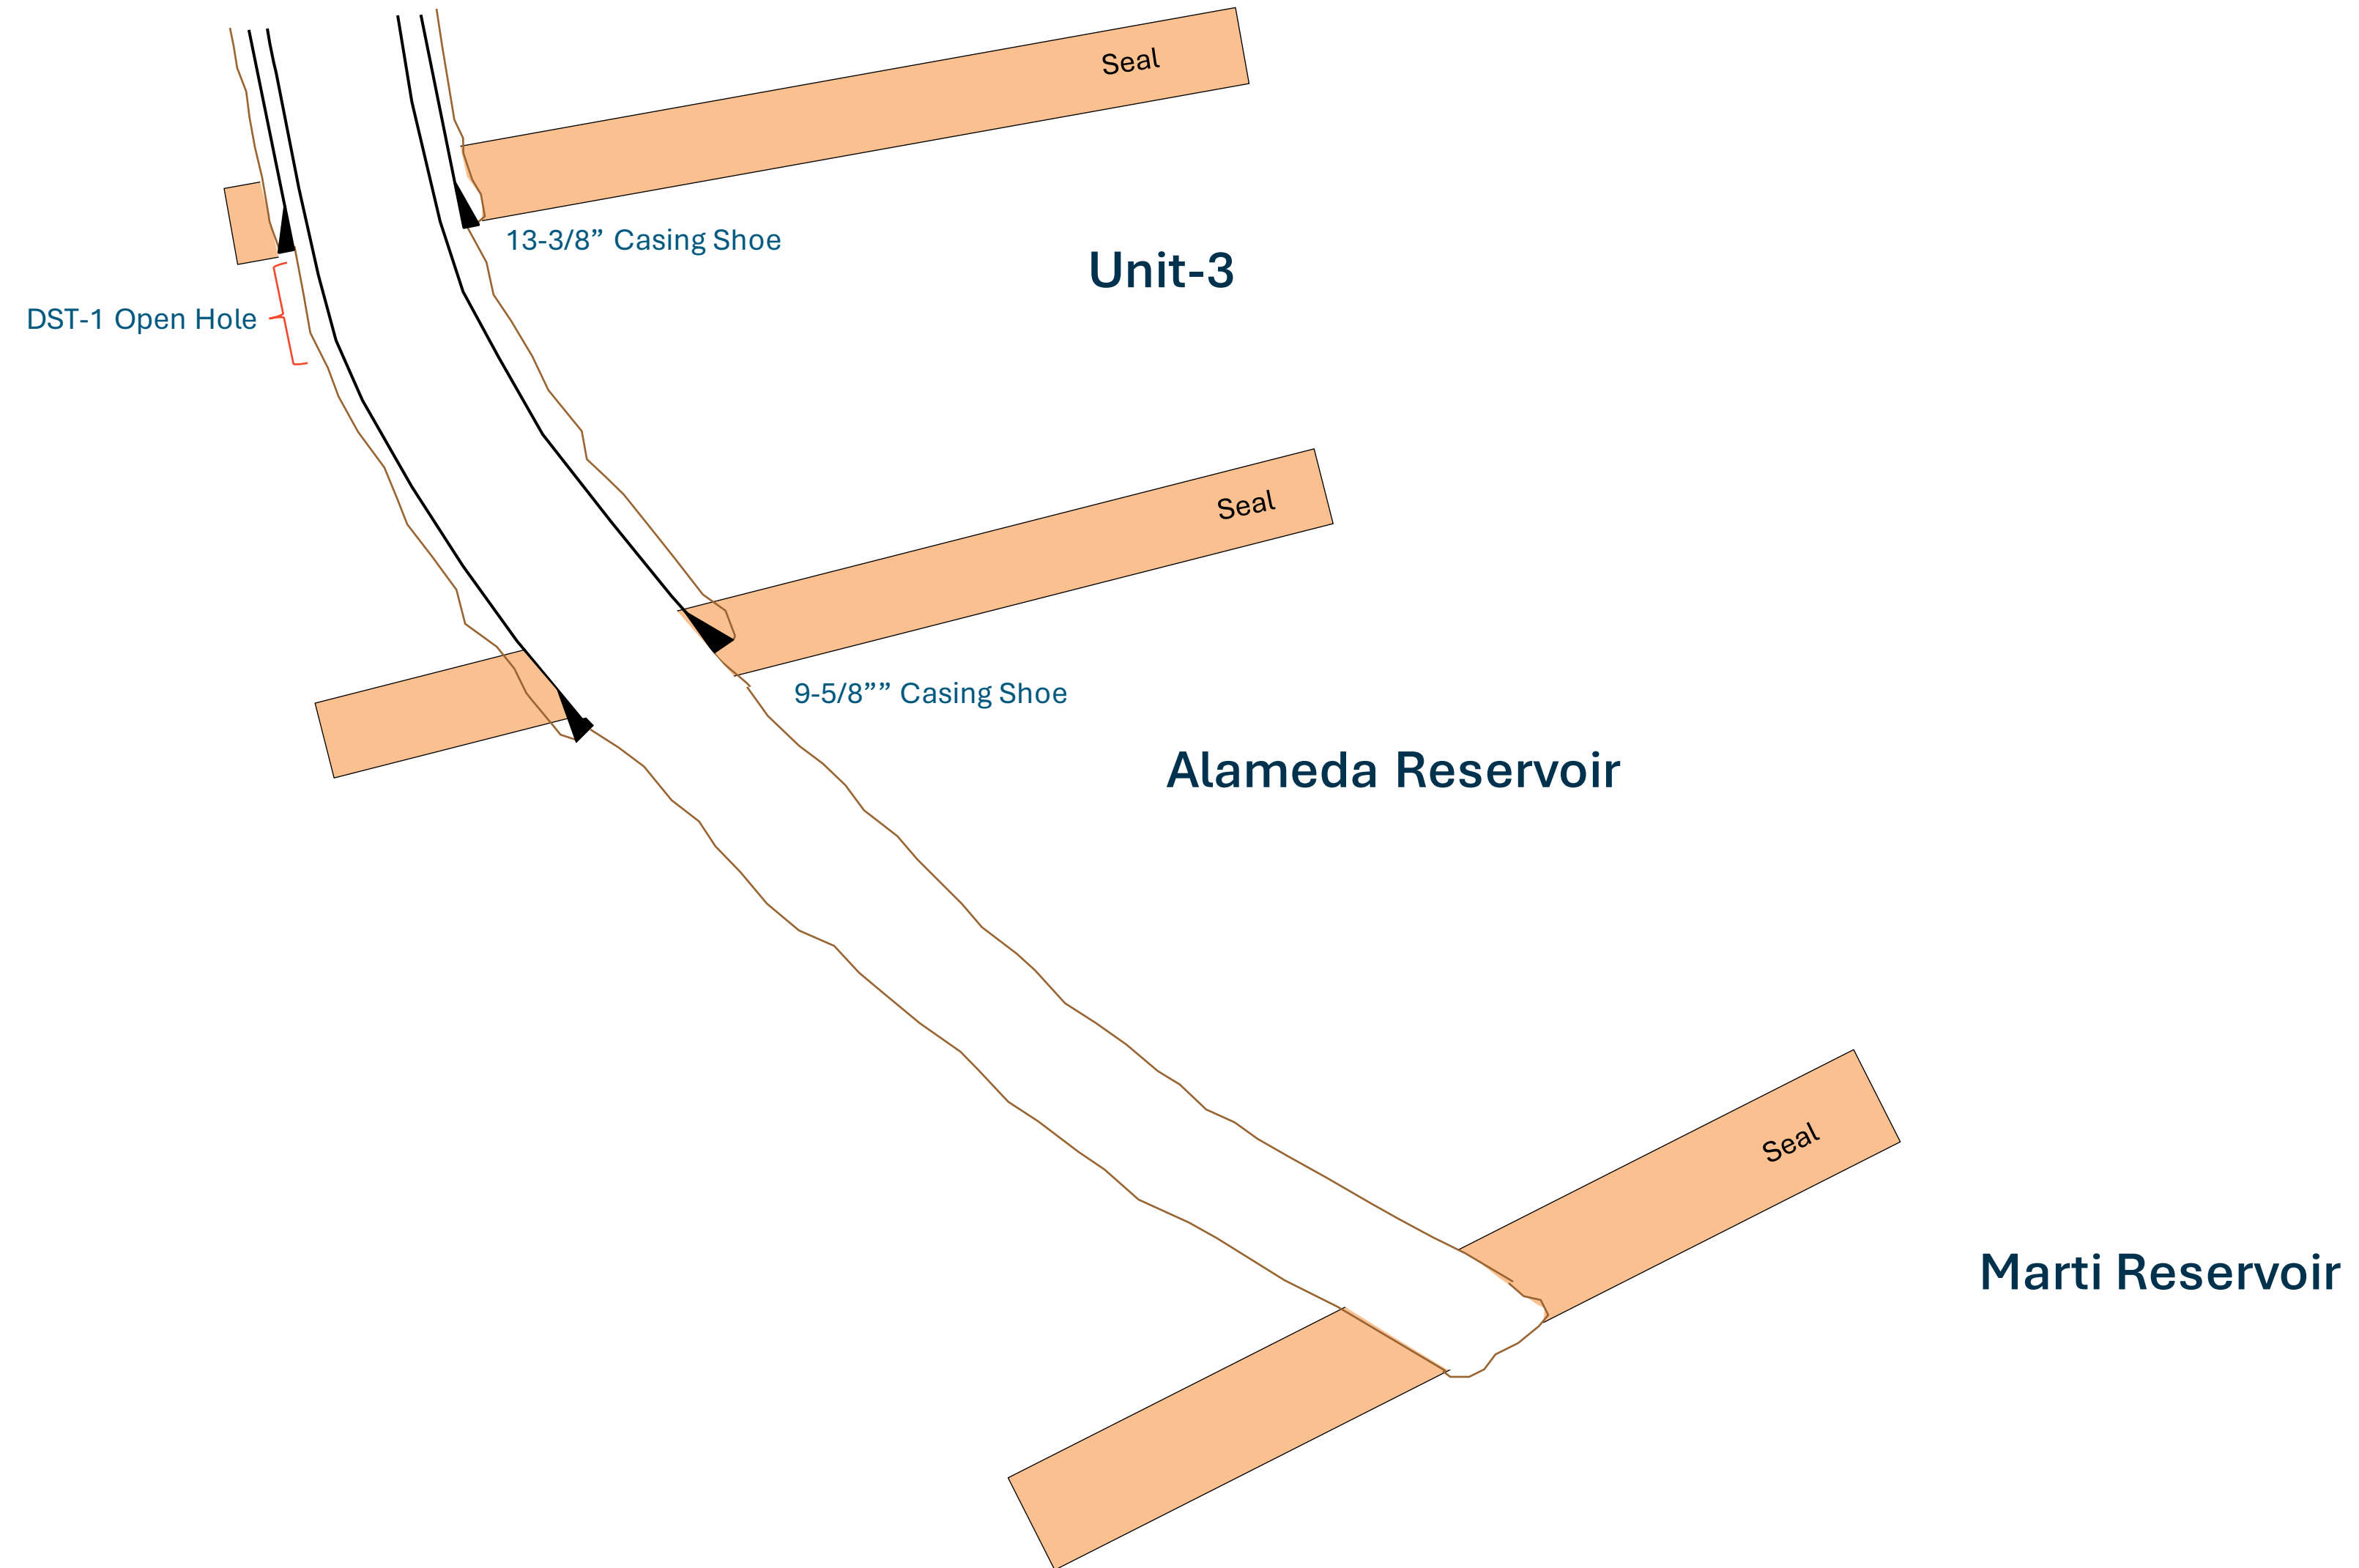

Alameda-3 operations / test sequence

- ▶ Set 9-5/8" Casing to secure the well and protect intervals already drilled from higher pressure

Alameda-3 operations / test sequence

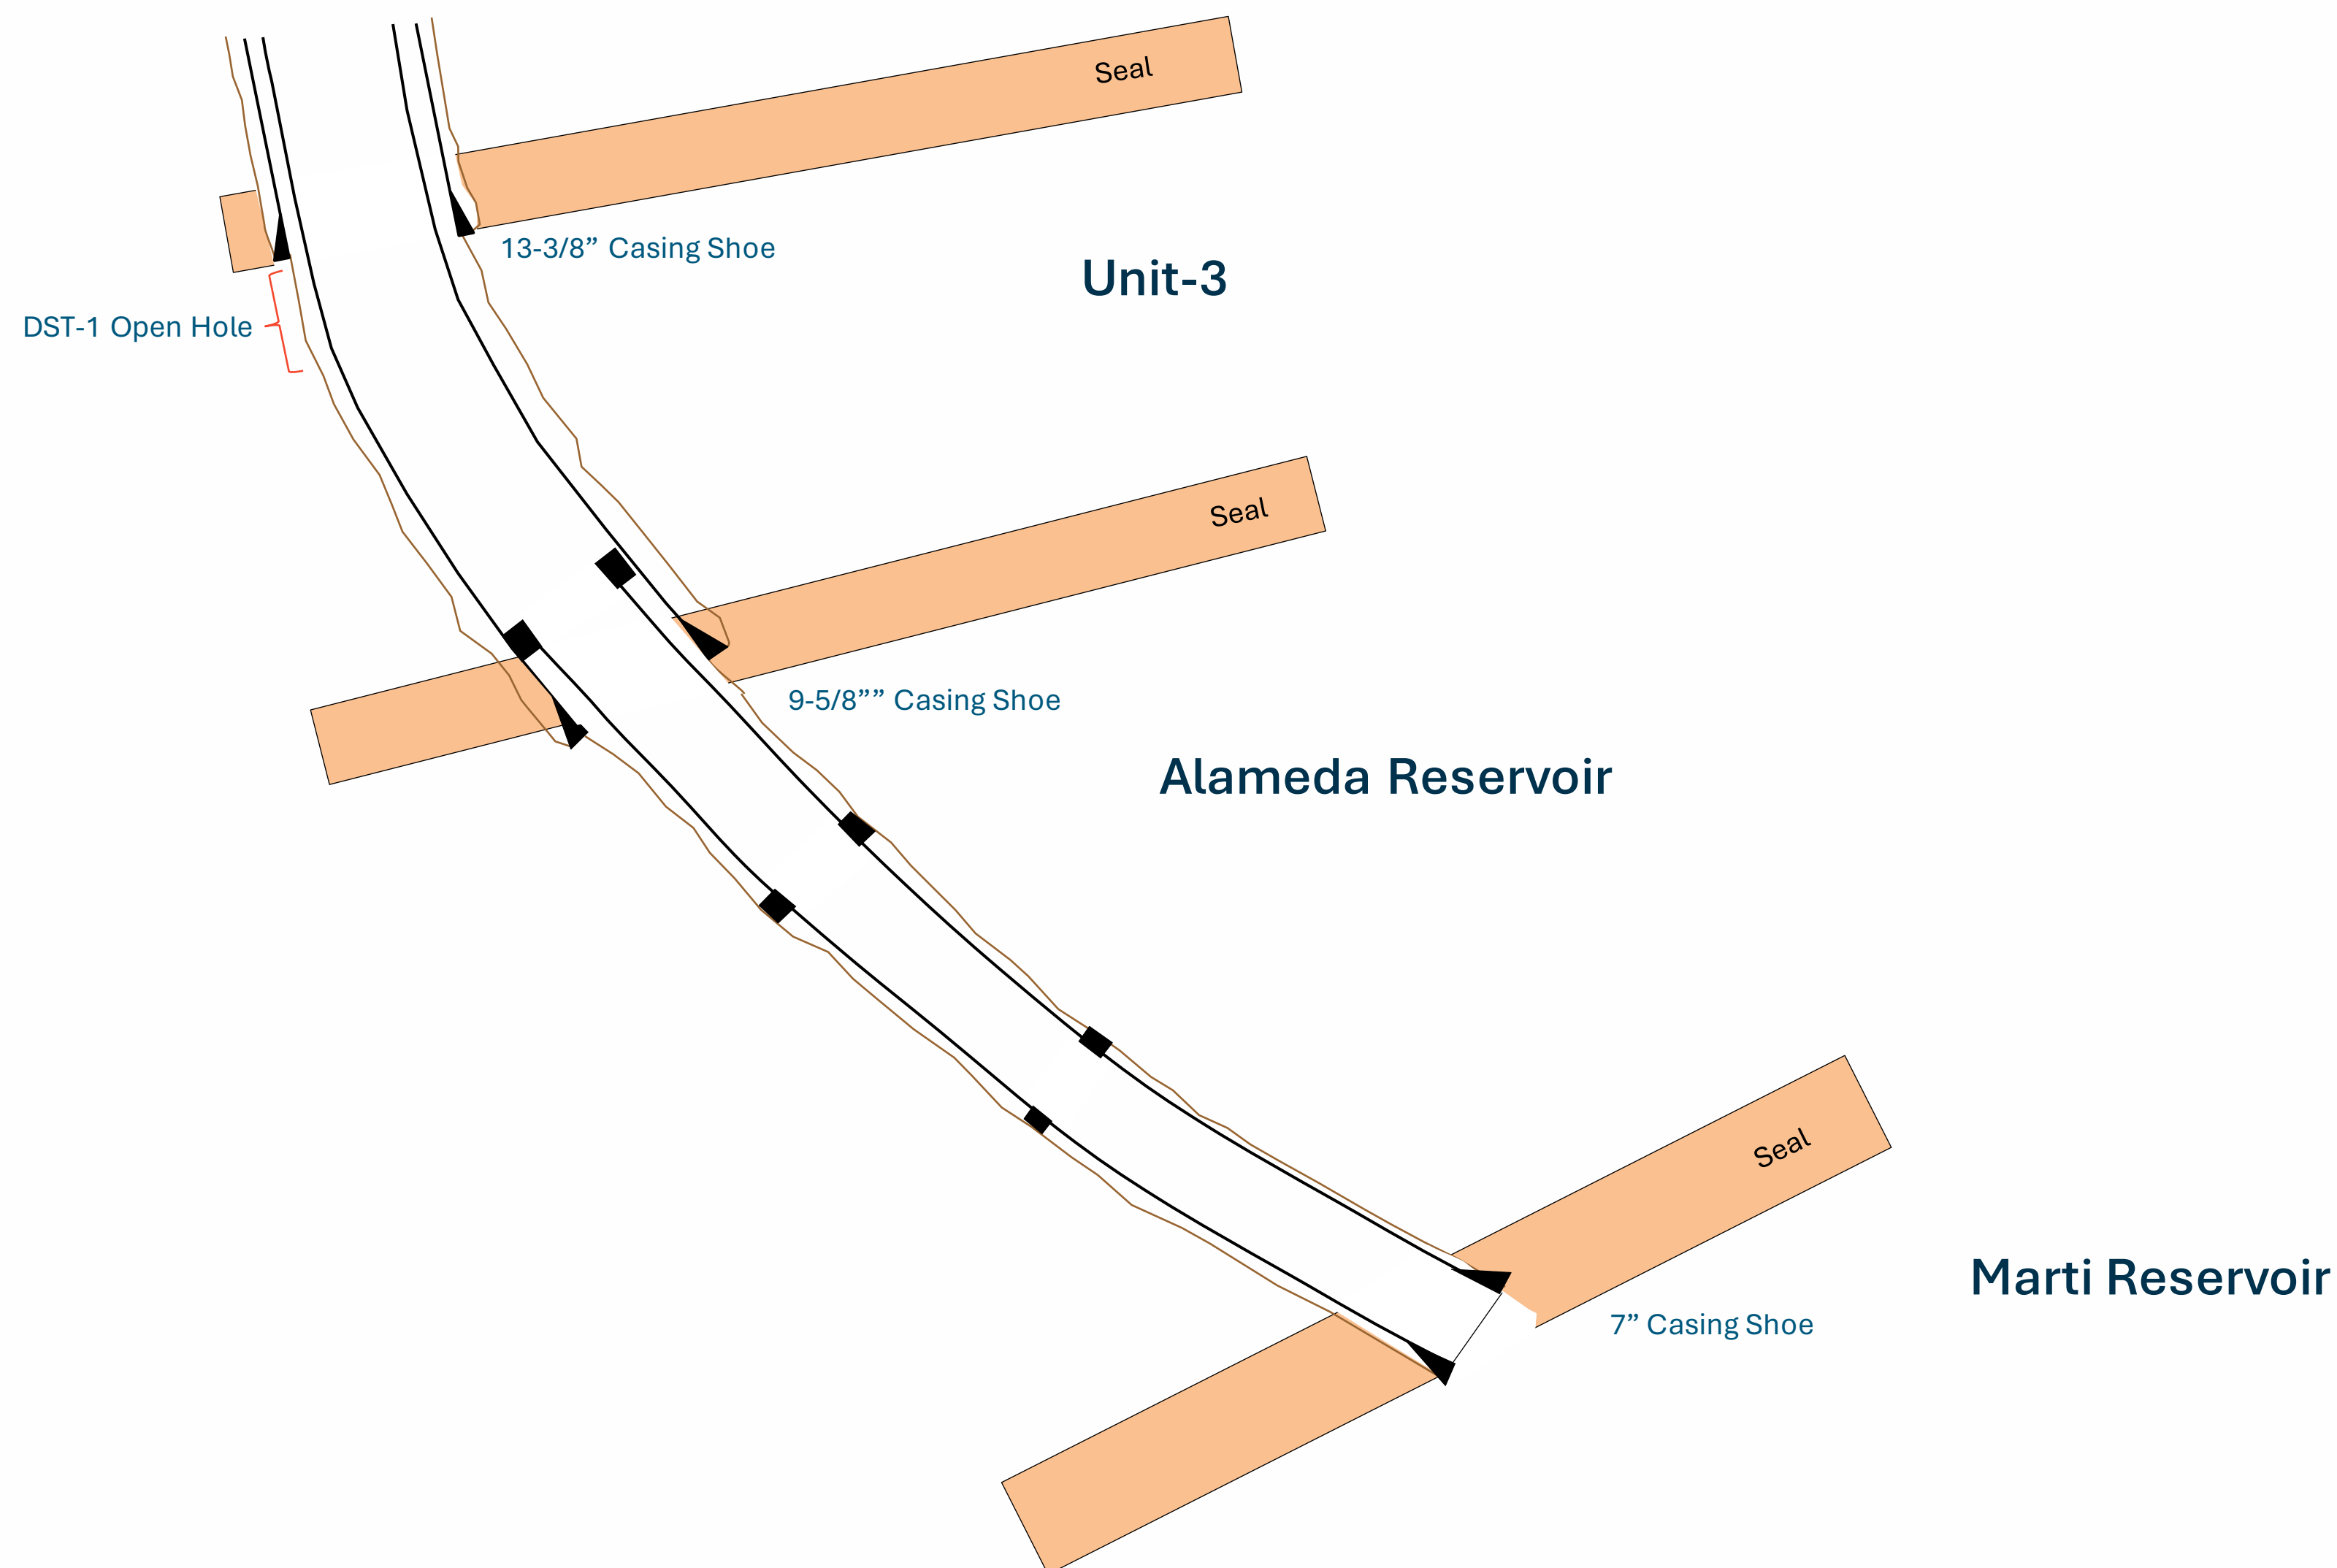

- ▶ Drill 8-1/2" hole to base of Alameda Reservoir Interval

For personal use only

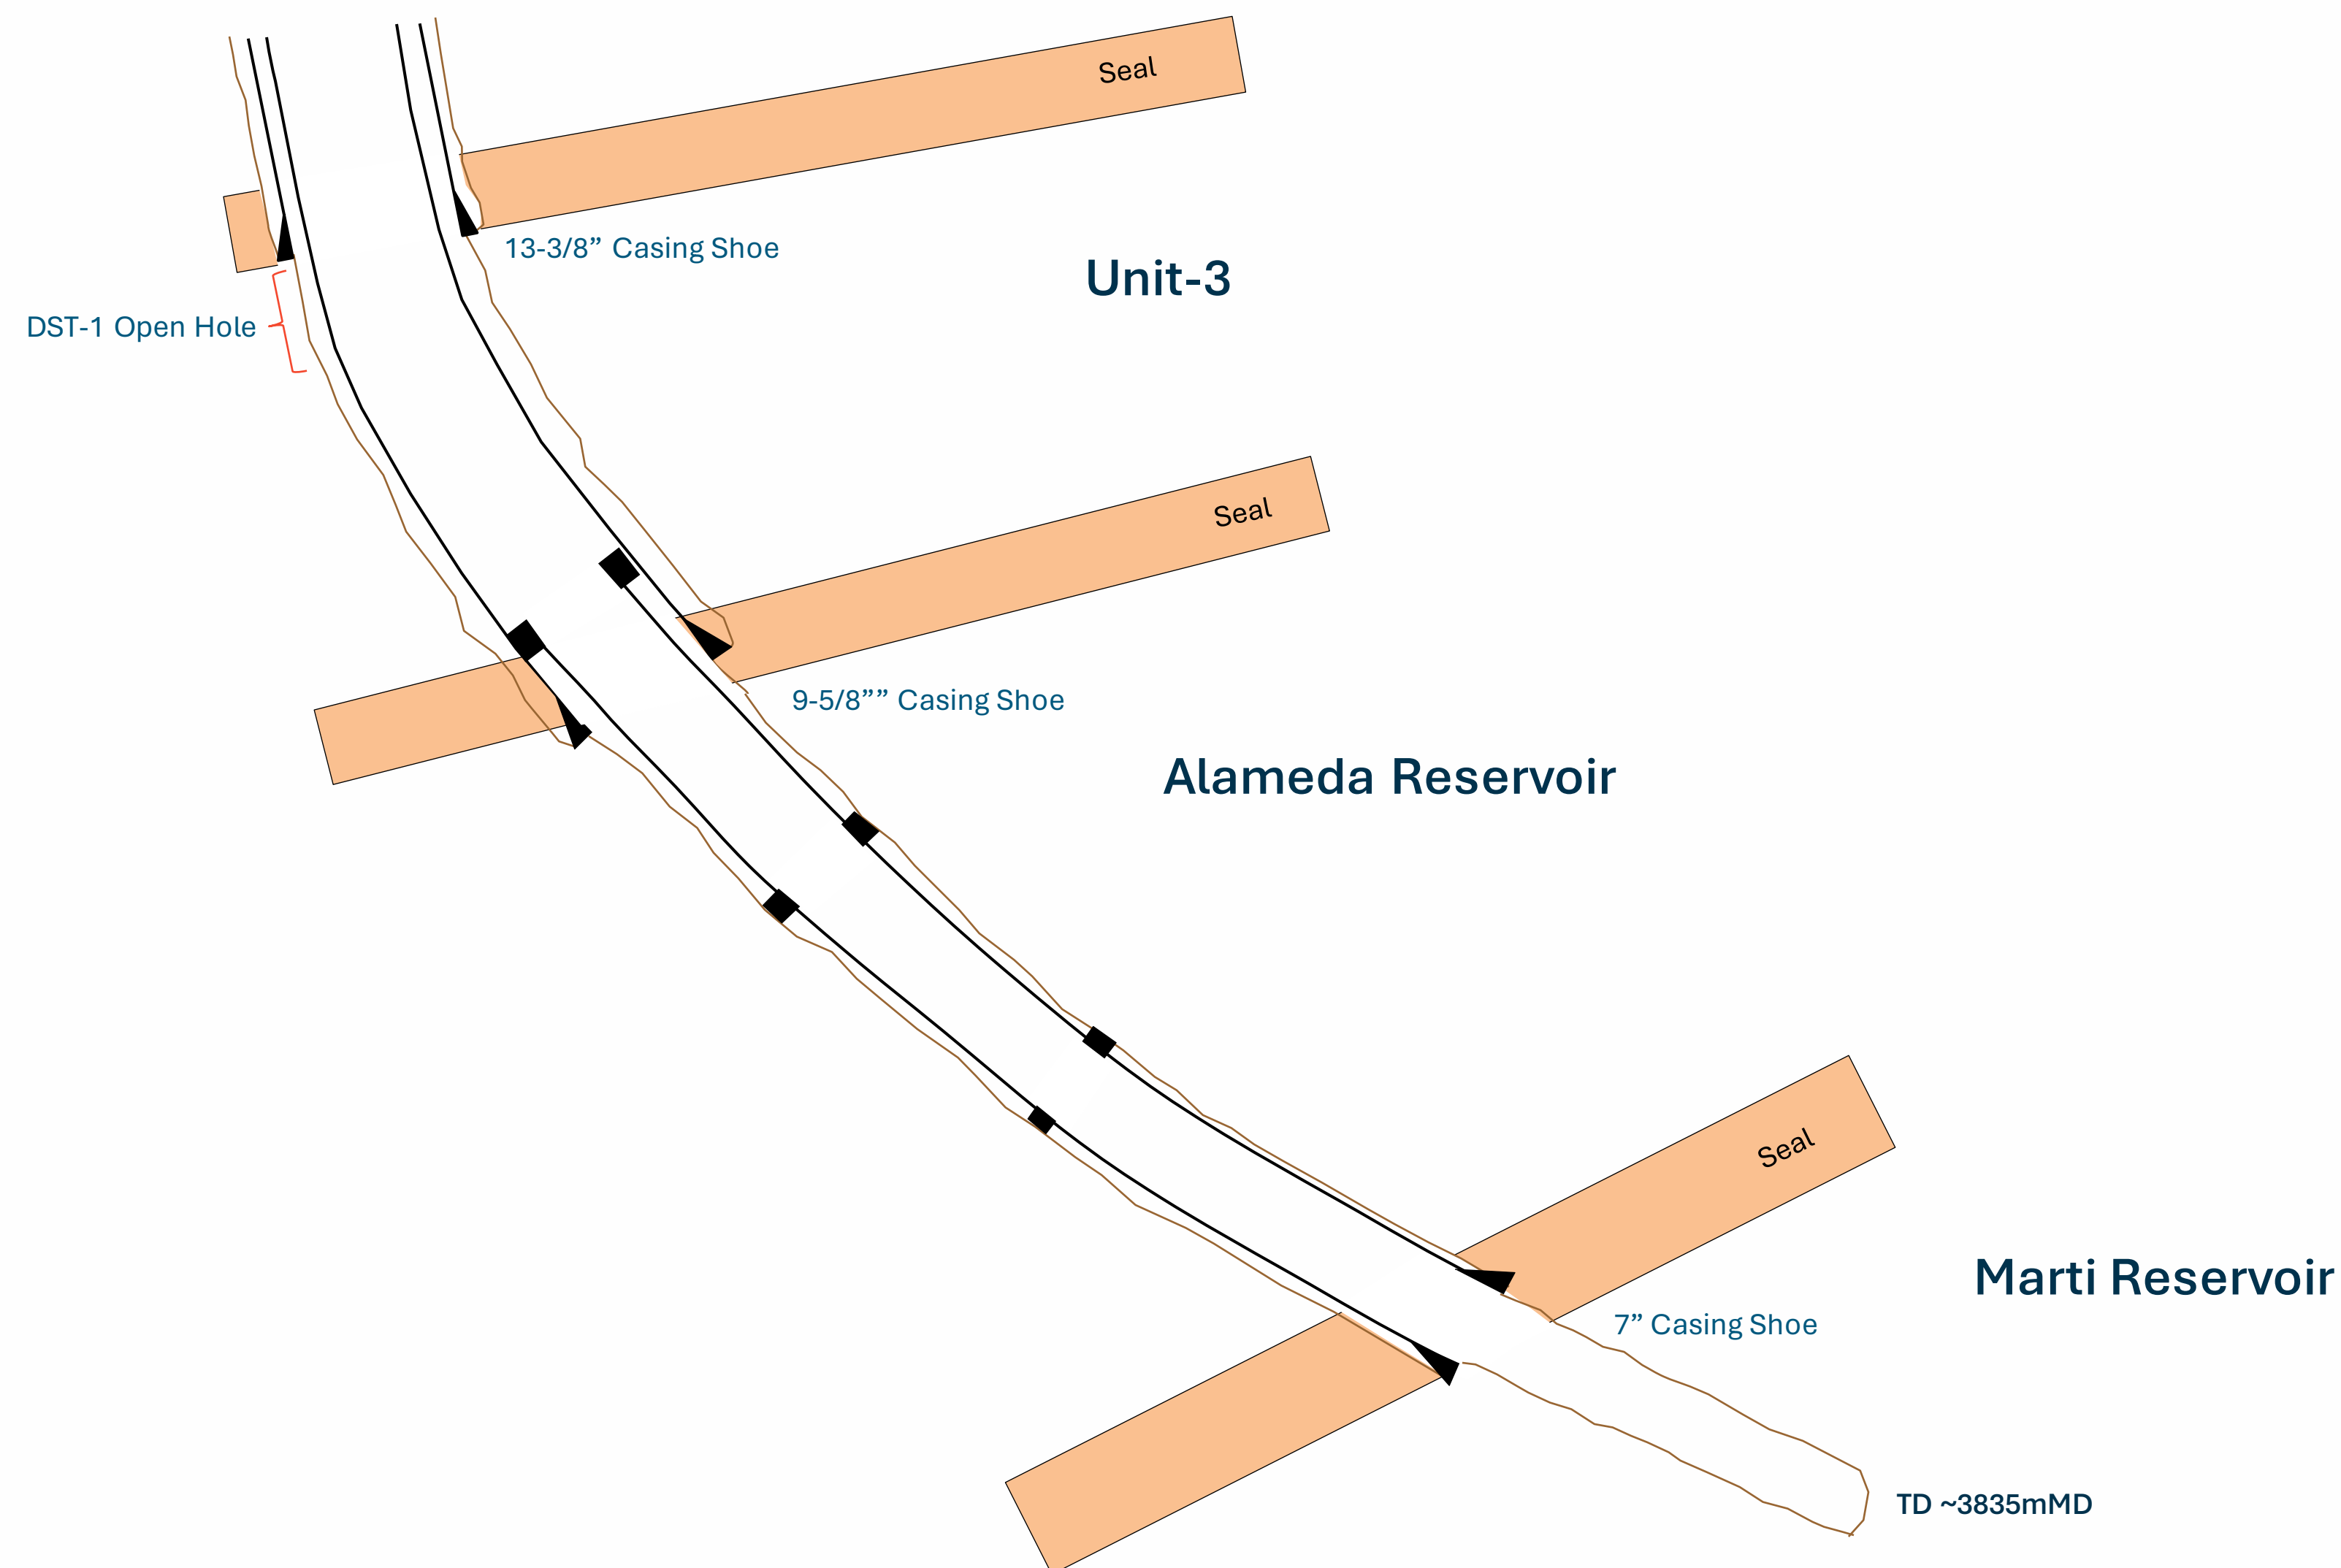

Alameda-3 operations / test sequence

- ▶ Set 7" Liner with open annulus and external casing packers to isolate potentially 3 zones within the Alameda Reservoir Interval

Alameda-3 operations / test sequence

- ▶ Drill to Total depth within the Marti Reservoir Interval

For personal use only

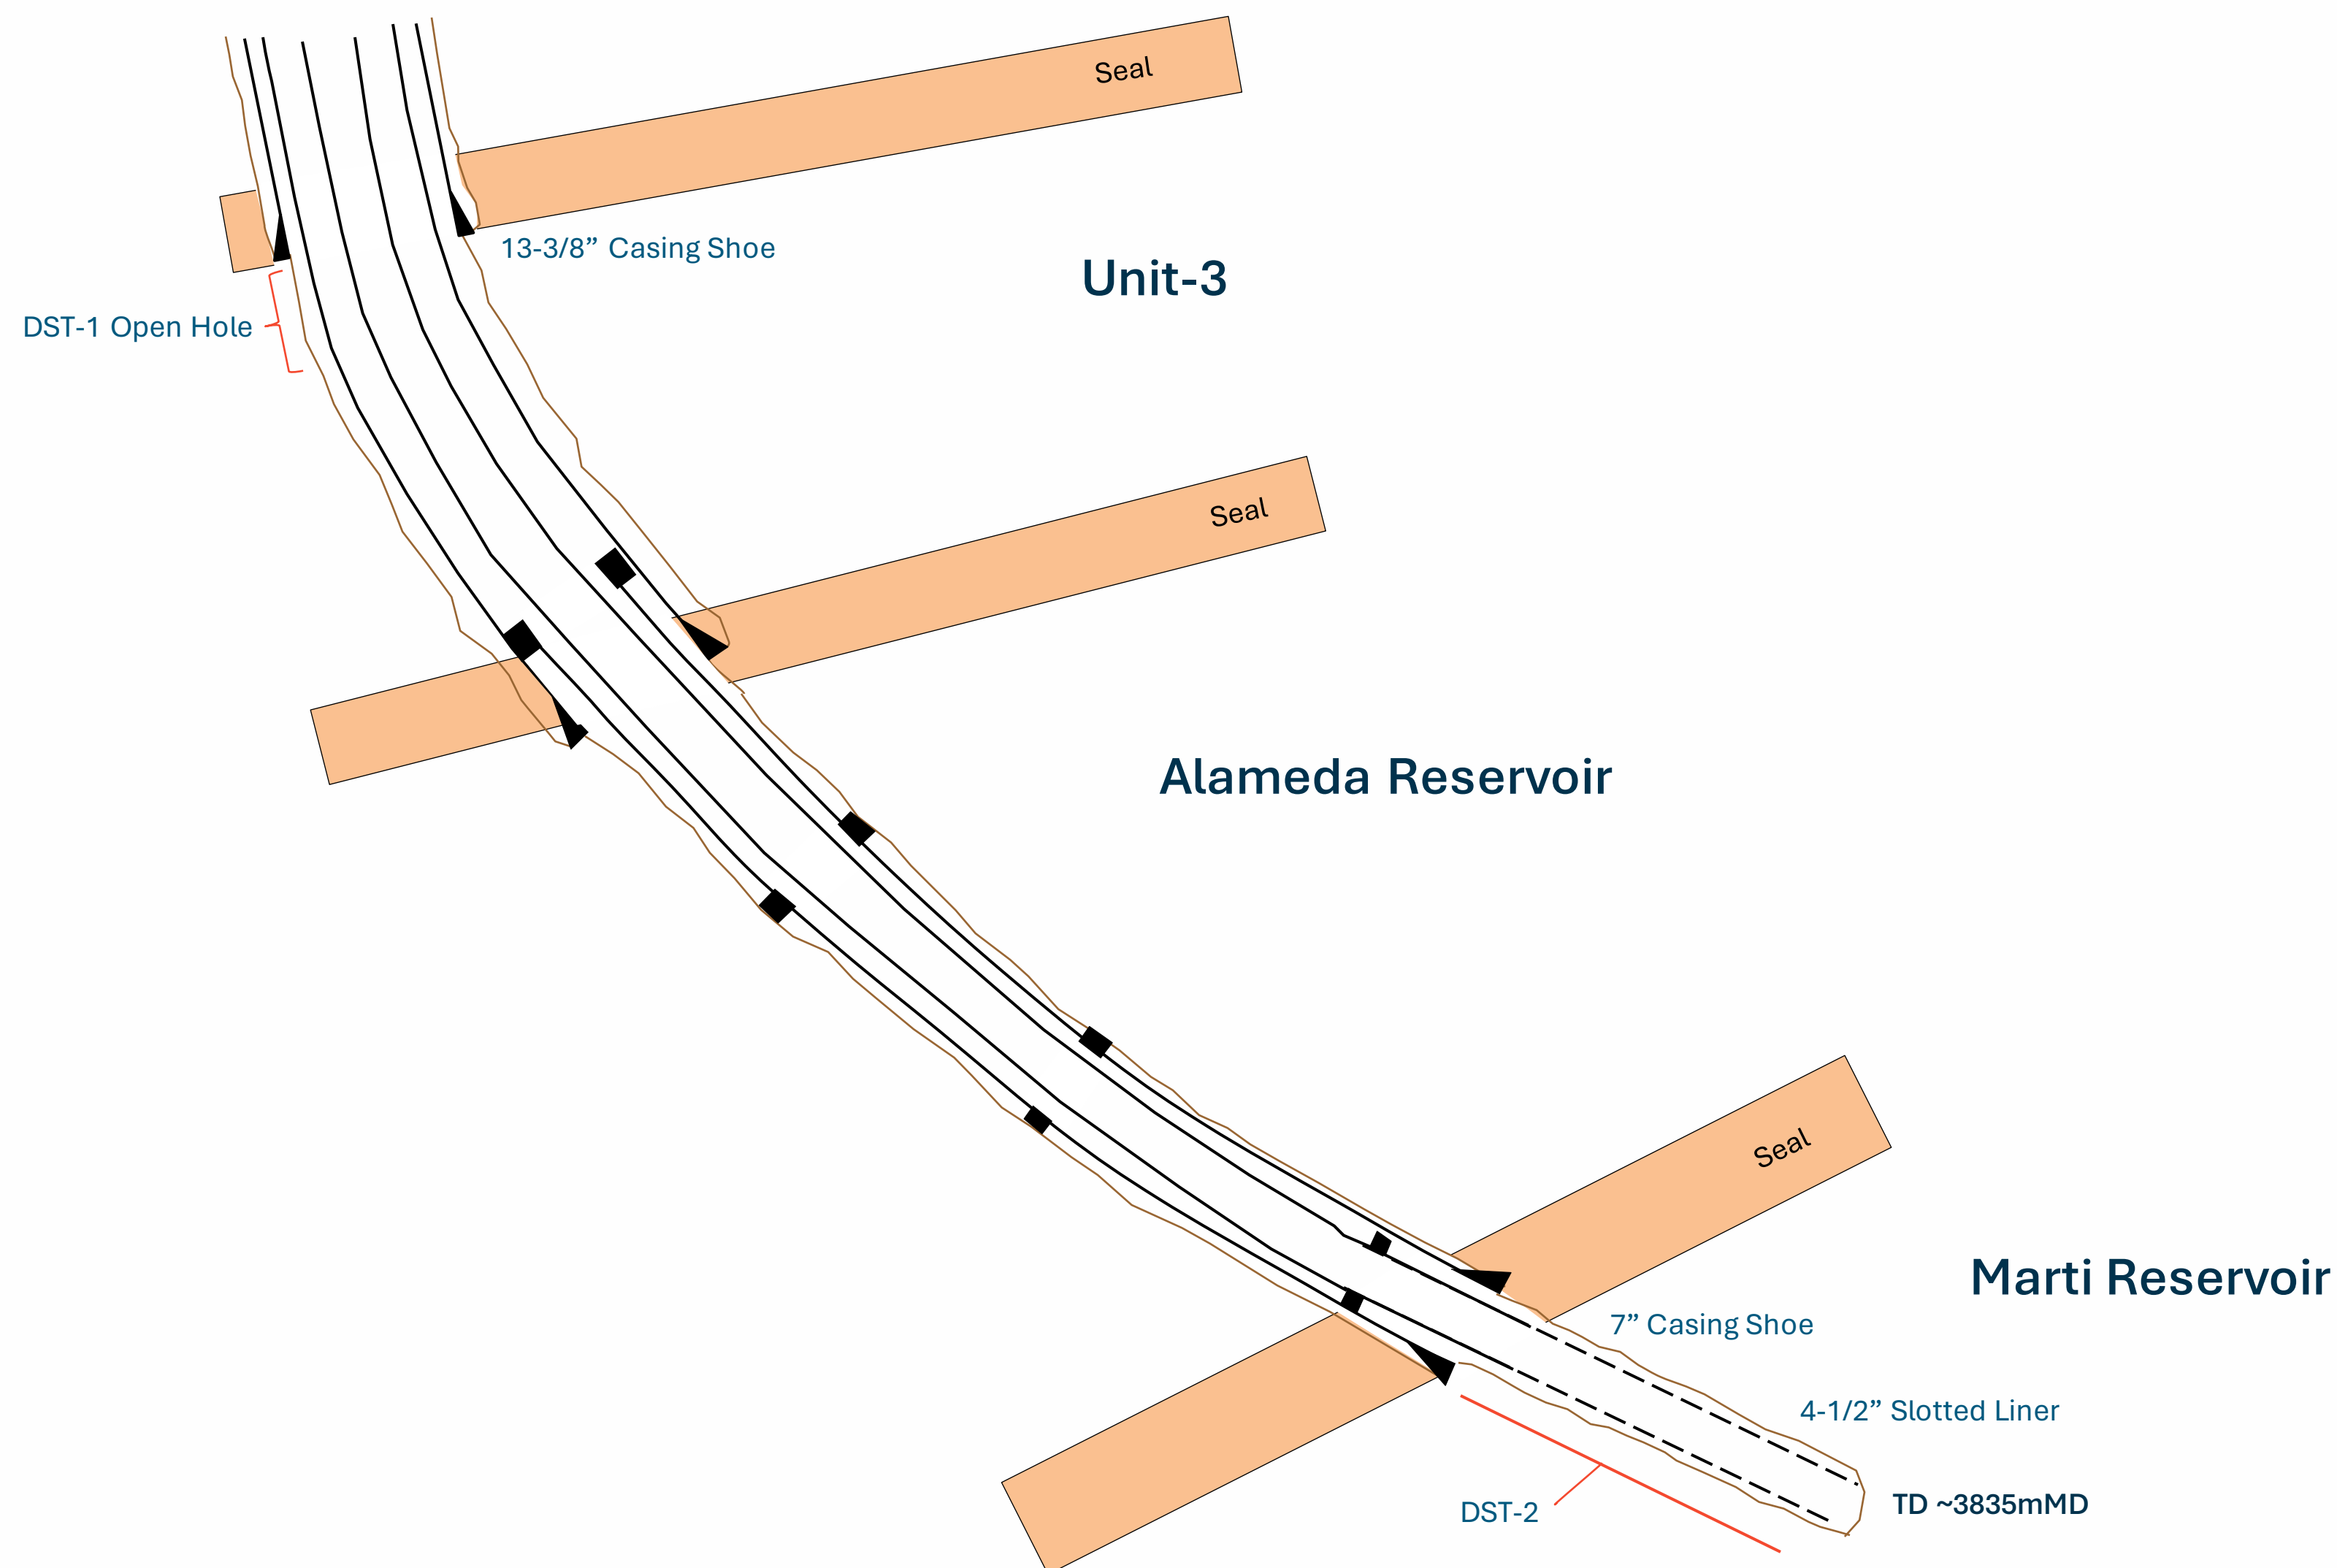

Alameda-3 operations / test sequence

- ▶ Set 4-1/2" Slotted liner over Marti Reservoir Interval

Alameda-3 operations / test sequence

- ▶ Run Test-2 in the Marti Reservoir Interval through the slotted liner

For personal use only

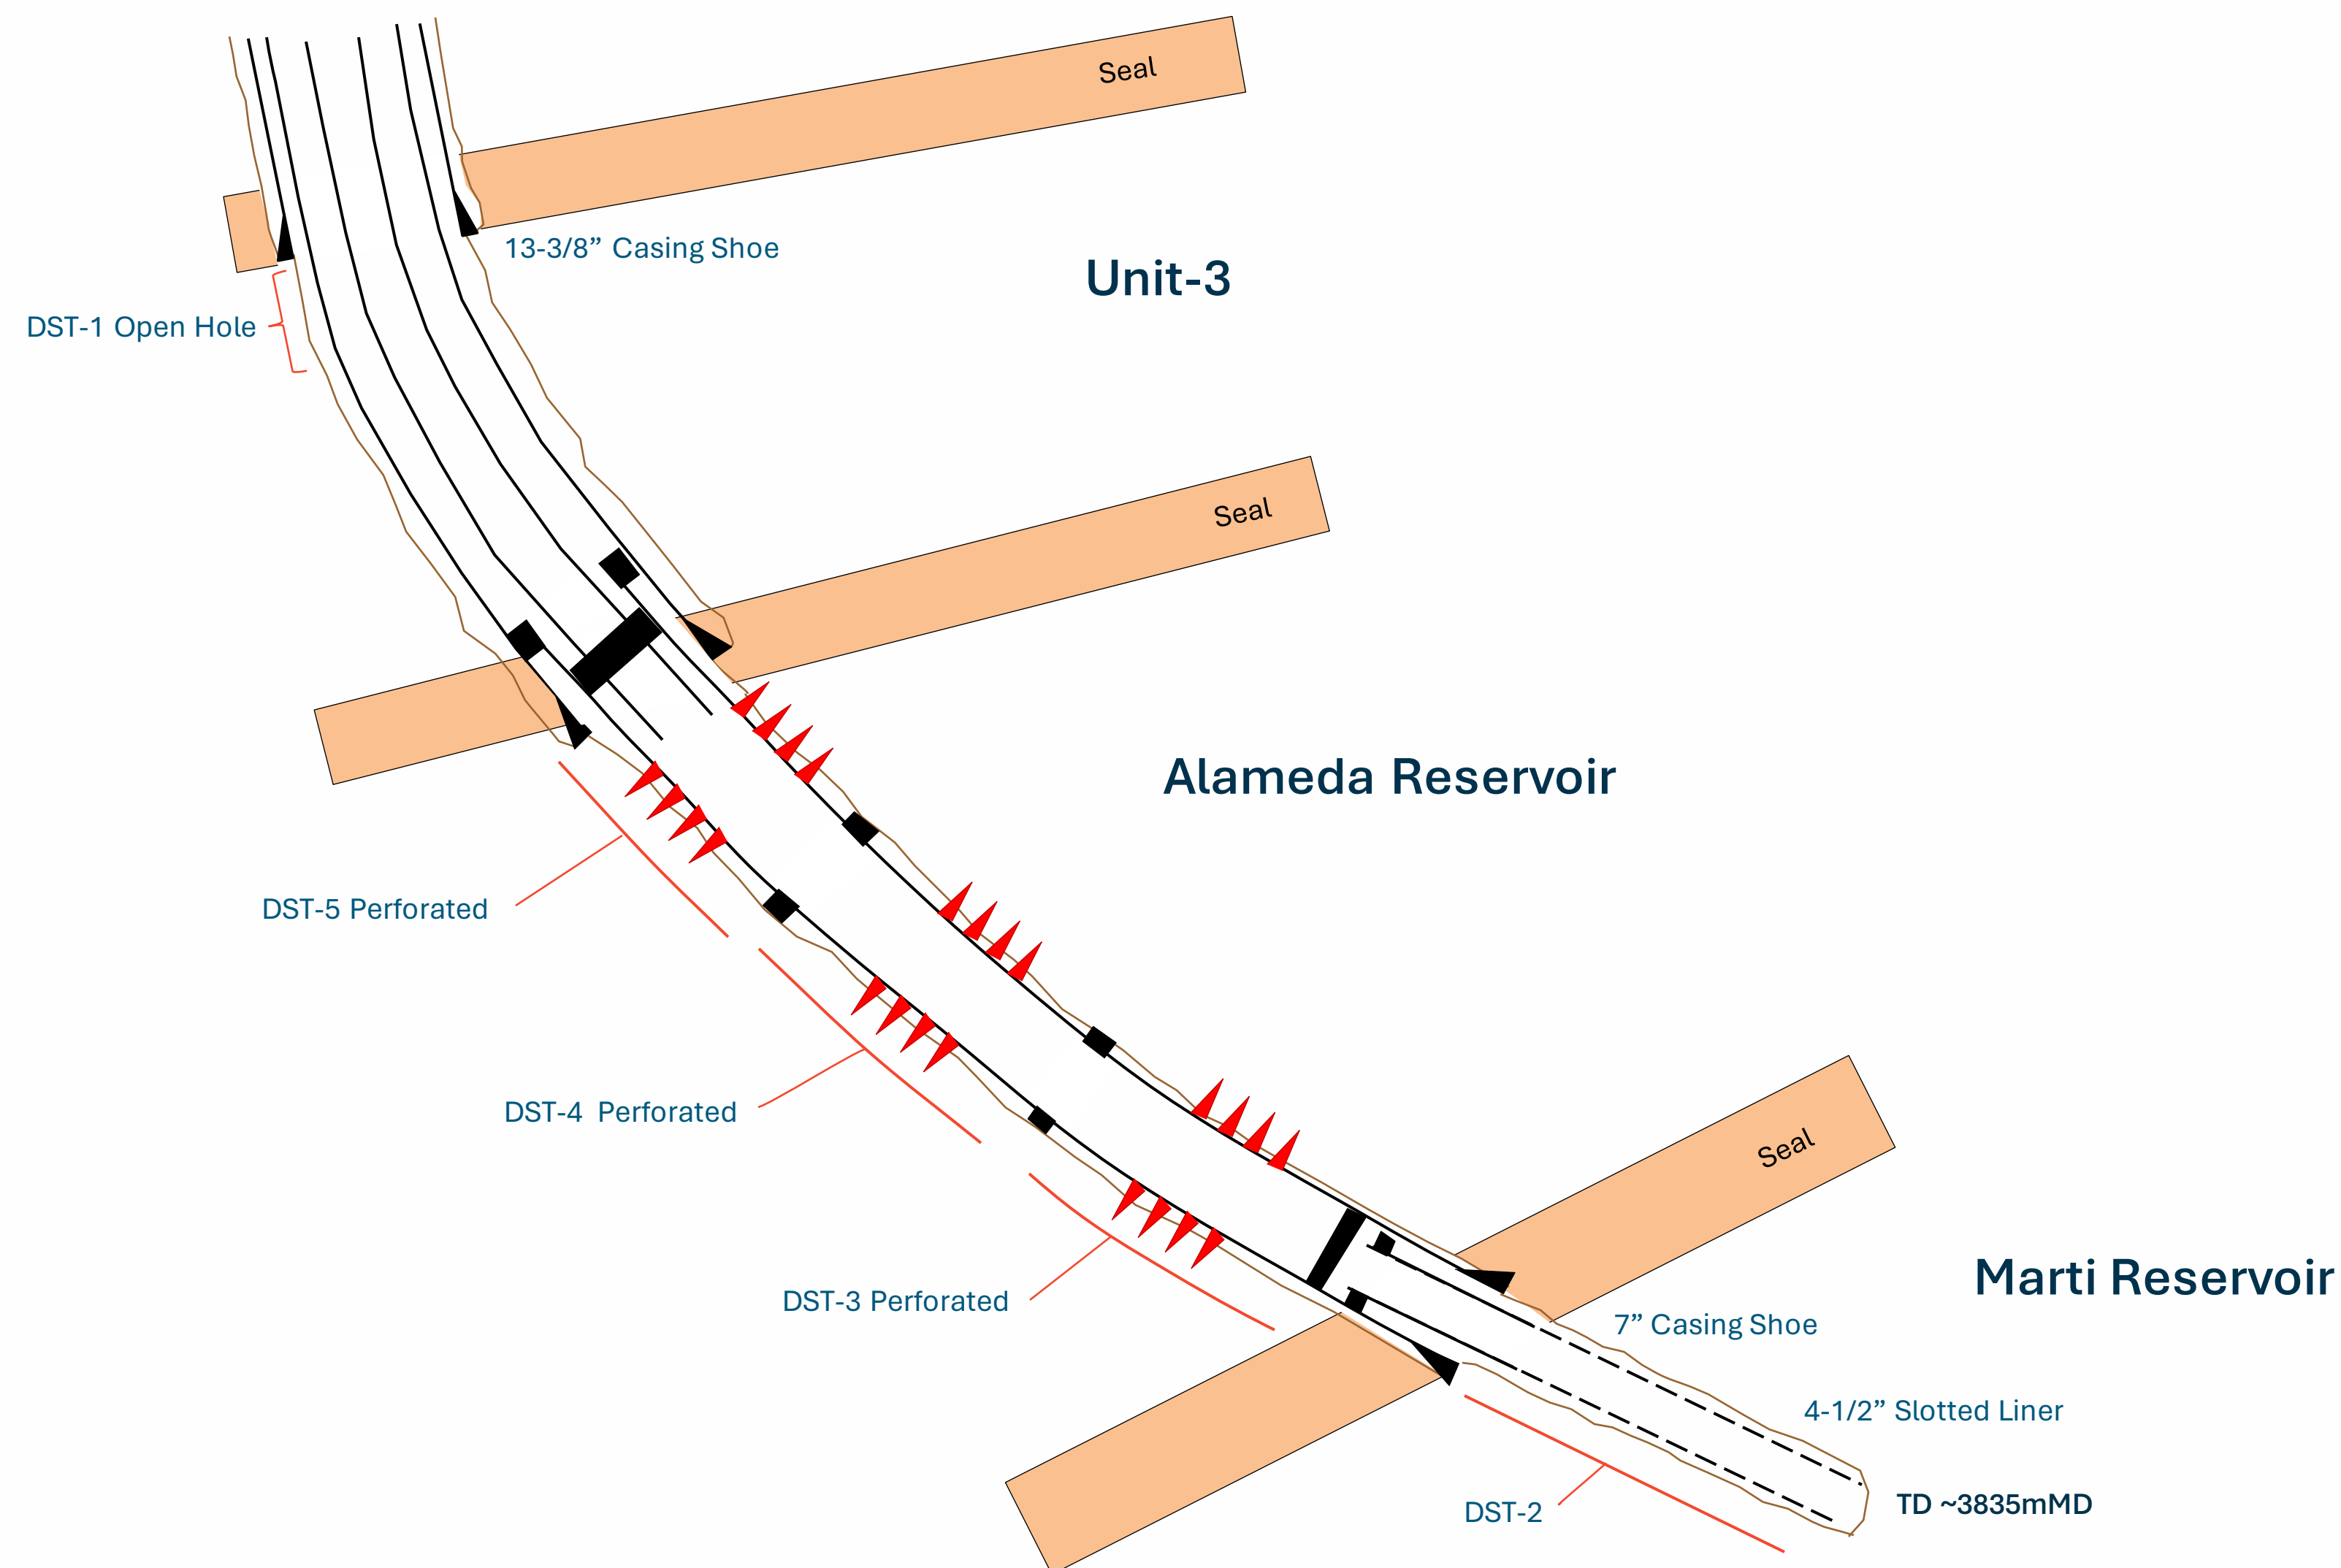

Alameda-3 operations / test sequence

- ▶ Set a removable bridge plug to isolate Marti Reservoir Interval from lower pressured Alameda Reservoir Interval

Alameda-3 operations / test sequence

- Provision to perforate and test up to 3 Alameda Reservoir Interval zones either separately or comingled depending on well results

Alameda-3 operations / test sequence

- ▶ Complete Best zone for Production

Field Development Planning

For personal use only

Forward plan

Step 1
Studies Underway
2023

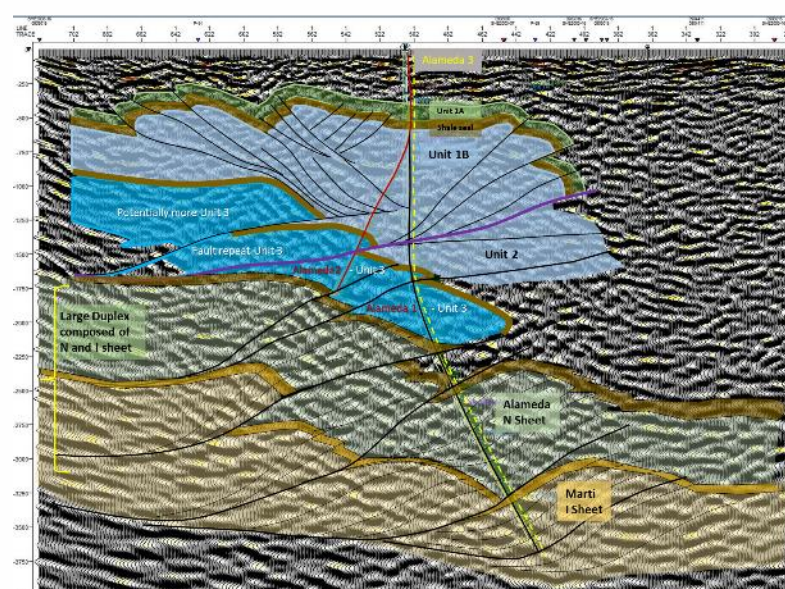

Step 2
Field Appraisal
2023 / 2024

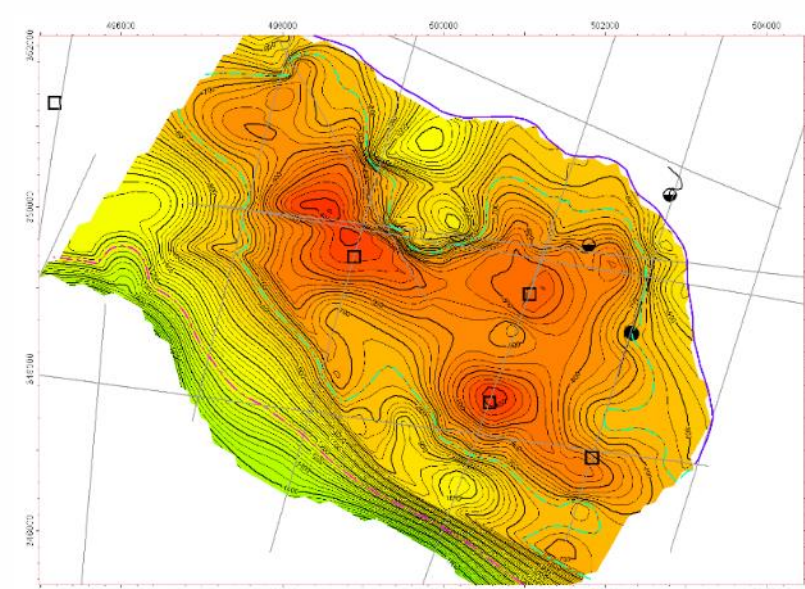

Step 3
Near term development
2024 / 2025

Step 4
Full field development
2025 / 2026

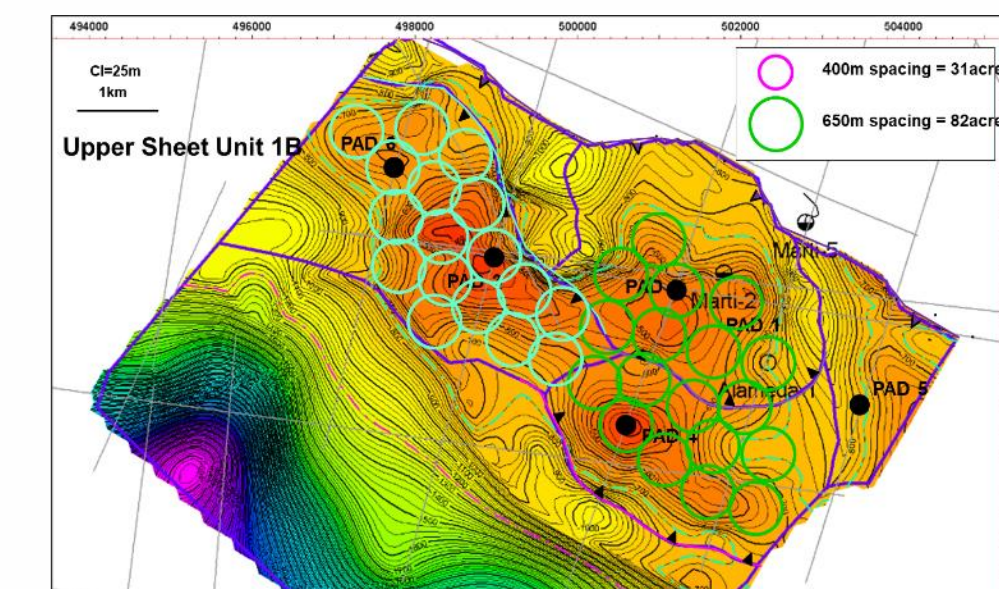

- ▶ Geological, engineering, commercial & marketing studies and planning
- ▶ Work with regulator to facilitate oil exports
- ▶ Continue production and discussions with oil offtakers

- ▶ Appraisal drilling (including Alameda-3), integrate results into reserves
- ▶ Further technical data acquisition and integration
- ▶ Continue to bring oil production to market

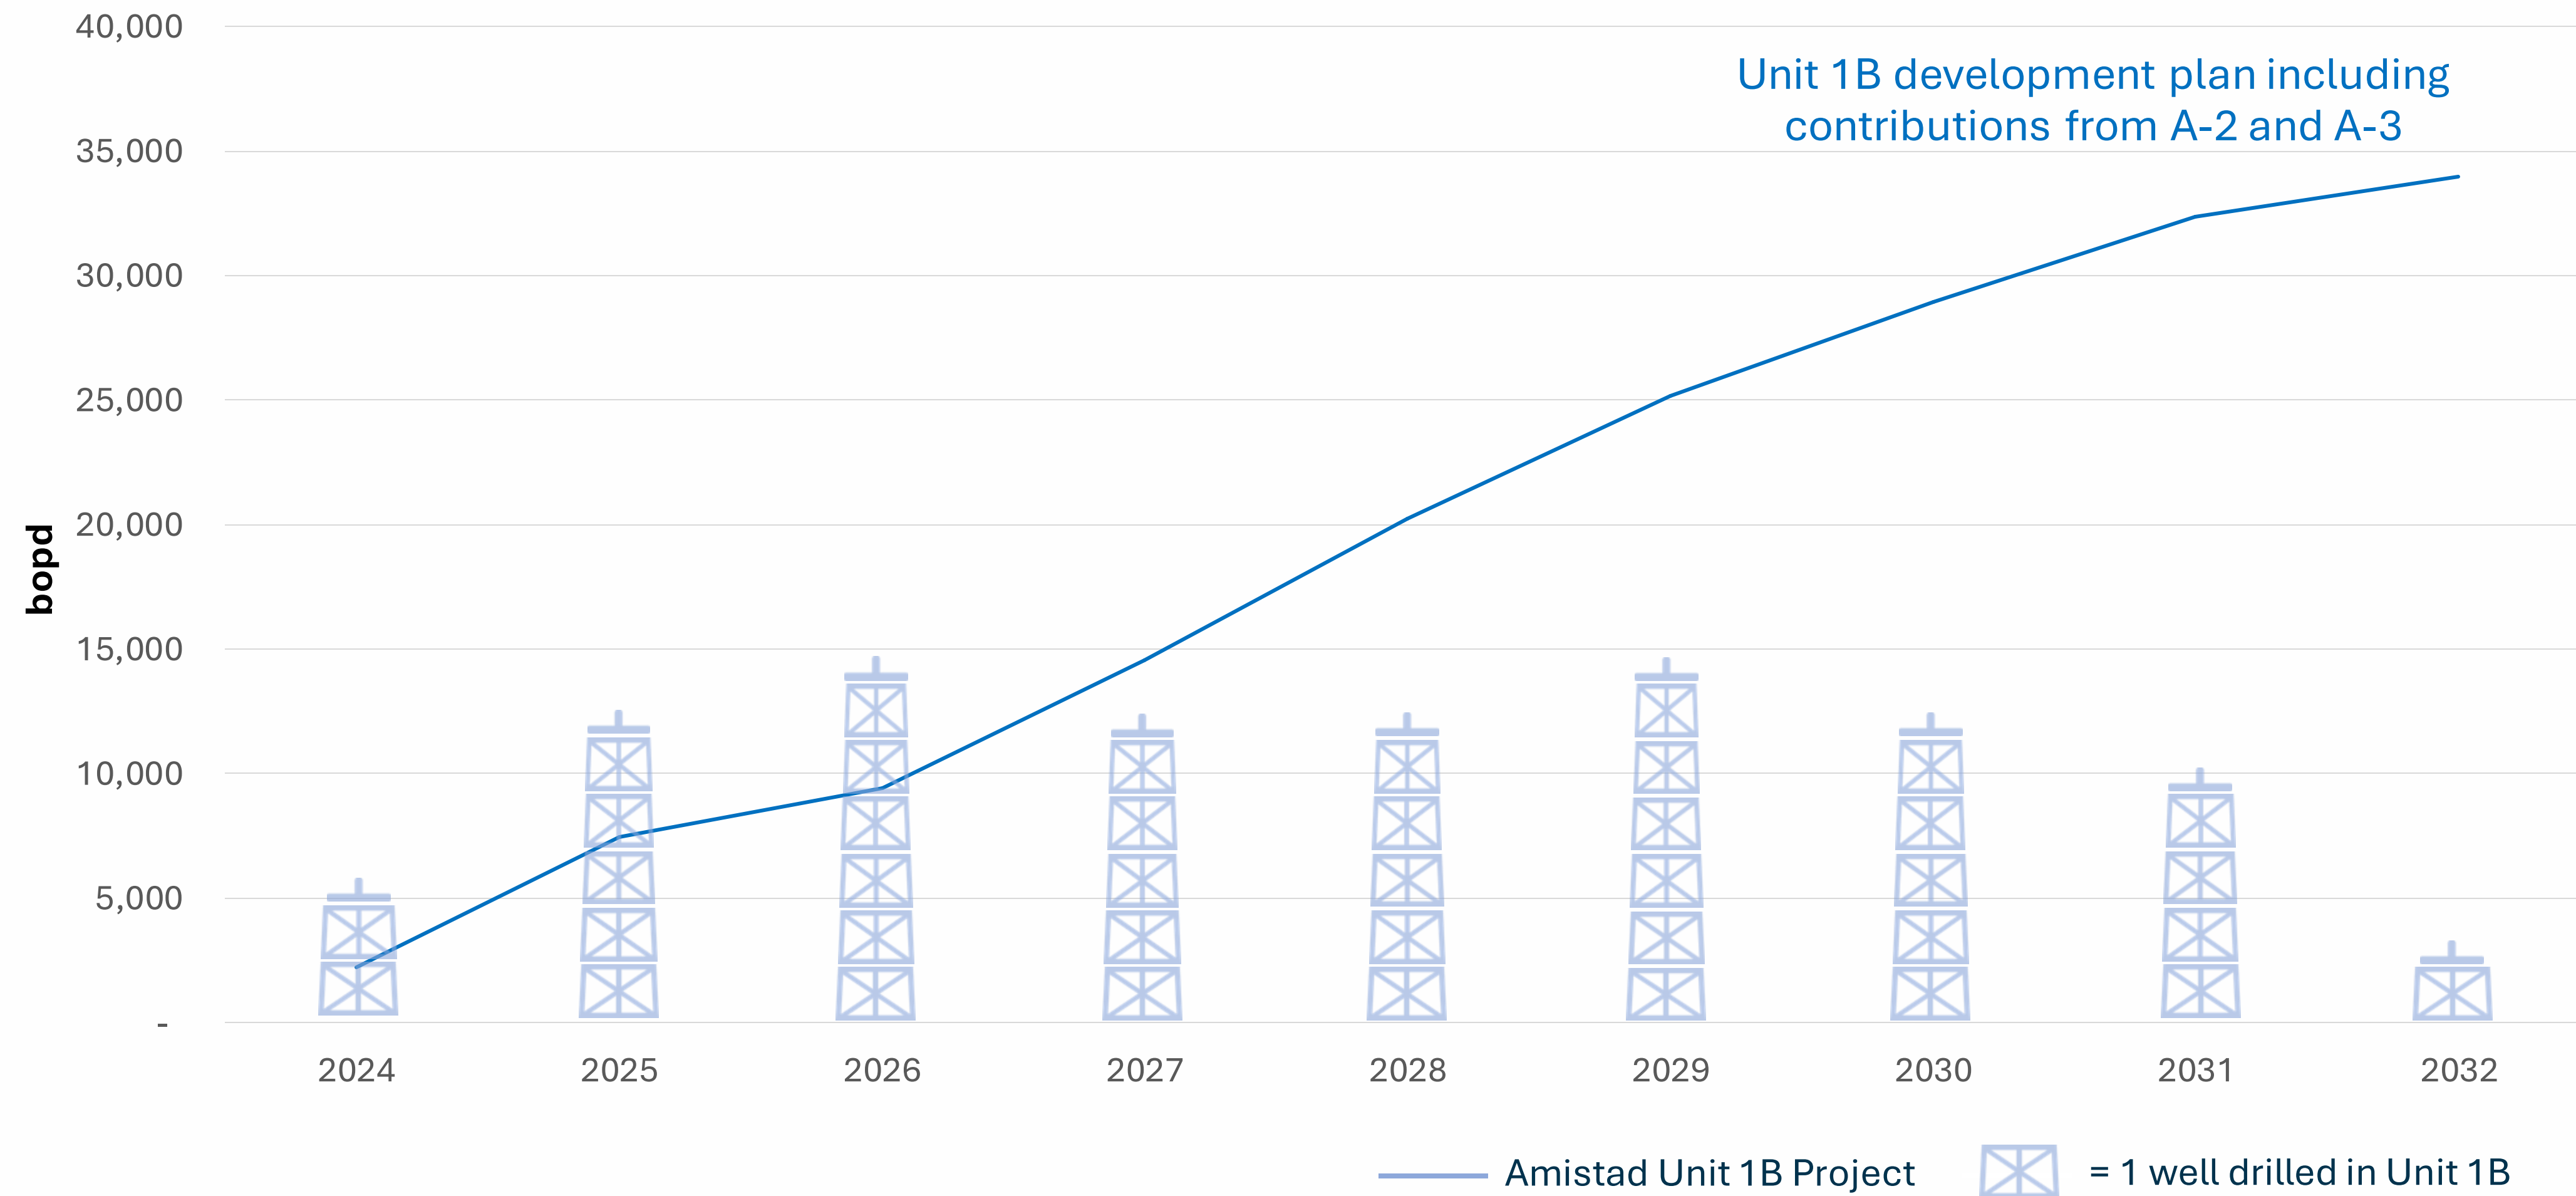

- ▶ Convert appraisal wells to production
- ▶ Technical data acquisition, interpretation and integration
- ▶ Drill development wells and bring oil to market

- ▶ Drill further development wells to increase production
- ▶ Define exploration targets
- ▶ Upgrade facilities as required to increase to plateau production

For personal use only

Amistad Unit 1B conceptual development *

* Conceptual plan, assumes 100% working interest, JV and regulatory approval

Unit 1B oil qualities export grade

Next six months

- ▶ Unit 1B favourable characteristics of lighter density, low sulphur and low viscosity
- ▶ Oil characteristics study underway to understand price against regional oil price markers
- ▶ Discussions underway with potential oil buyers
- ▶ Similar oils in region include, Escalante, Castilla, Merey, Marlim & Maya.
- ▶ Talking to oil traders to investigate potential to pre-fund development

Test	Unit	Results	<input checked="" type="checkbox"/> or <input type="checkbox"/>
API	API	18.7	<input checked="" type="checkbox"/>
Sulphur	% (m/m)	~ 2.6	<input checked="" type="checkbox"/>

API Gravity V Sulphur Content

° API	Classification	Sulphur (%)	Classification
> 31.1	Light	< 0.5	Low sulphurous
22.3 – 31.1	Medium	0.5 a 1.5	Medium sulphurous
10 – 22.3	Heavy	1.5 a 3.0	Sulphurous
< 10	Ultra heavy	> 3.0	High sulphurous

Pathway to market being clarified

- ▶ Utilise facilities at Alameda
- ▶ Existing trucking from Alameda to Varadero Tank Battery (VTB)
- ▶ Conclude exclusive storage at VTB
- ▶ Pre-FEED study of pipeline routes to VTB
- ▶ Pre-FEED study of pipeline from Alameda to Port Matanzas
- ▶ Batch from VTB to Matanzas using existing pipeline
- ▶ Potential to install tanks at Matanzas

For personal use only

Oil export options

Existing Matanzas Supertanker Port

- ▶ Import and export facilities
- ▶ Deep water channel
- ▶ Situated at the mouth of the River Yumuri and River San Juan in Matanzas Bay, northern Cuba
- ▶ Port is formed by an inlet length of 8km and a width of 6km
- ▶ Deep water is located 120m from shore;
- ▶ Depth in the fairway is over 180m
- ▶ Approx 40 vessels visit the port annually
- ▶ Max size: LOA 295m, draught 17.0m, 150,000DWT

Matanzas Port and Refinery facilities as seen from the bay
