ASX ANNOUNCEMENT

DECEMBER 2023 QUARTERLY ACTIVITIES REPORT

Highlights

- **26 hole/2813m Reverse Circulation (RC) drilling program completed post quarter across the Company's Ravensthorpe Projects (Mt Cattlin and Mt Short JV)**
- **Results received for first two Mt Short RC holes, no significant lithium results returned**
- **Completion of 1523 auger sample program across Mt Short JV, designed to generate additional targets for drilling in 2024 (Assays pending)**
- **Wyloo JV Project gold targets finalised and heritage survey completed**

Woomera Mining Limited (ASX: WML) ("Woomera", "the Company") is pleased to present its Activities Report for the three-month period ending 31 December 2023.

Mt Cattlin Project, Ravensthorpe WA (WML 100%) (Lithium)

During the reporting period, access agreements were finalised with local landowners at the Mt Cattlin Lithium Project (Figure 1), clearing the way for the completion of a RC drilling programme immediately post quarter end.

15 RC holes totalling 1488m were drilled to test lithium geochemical anomalies defined in February 2023 (Figure 2). Assays are pending for all holes.

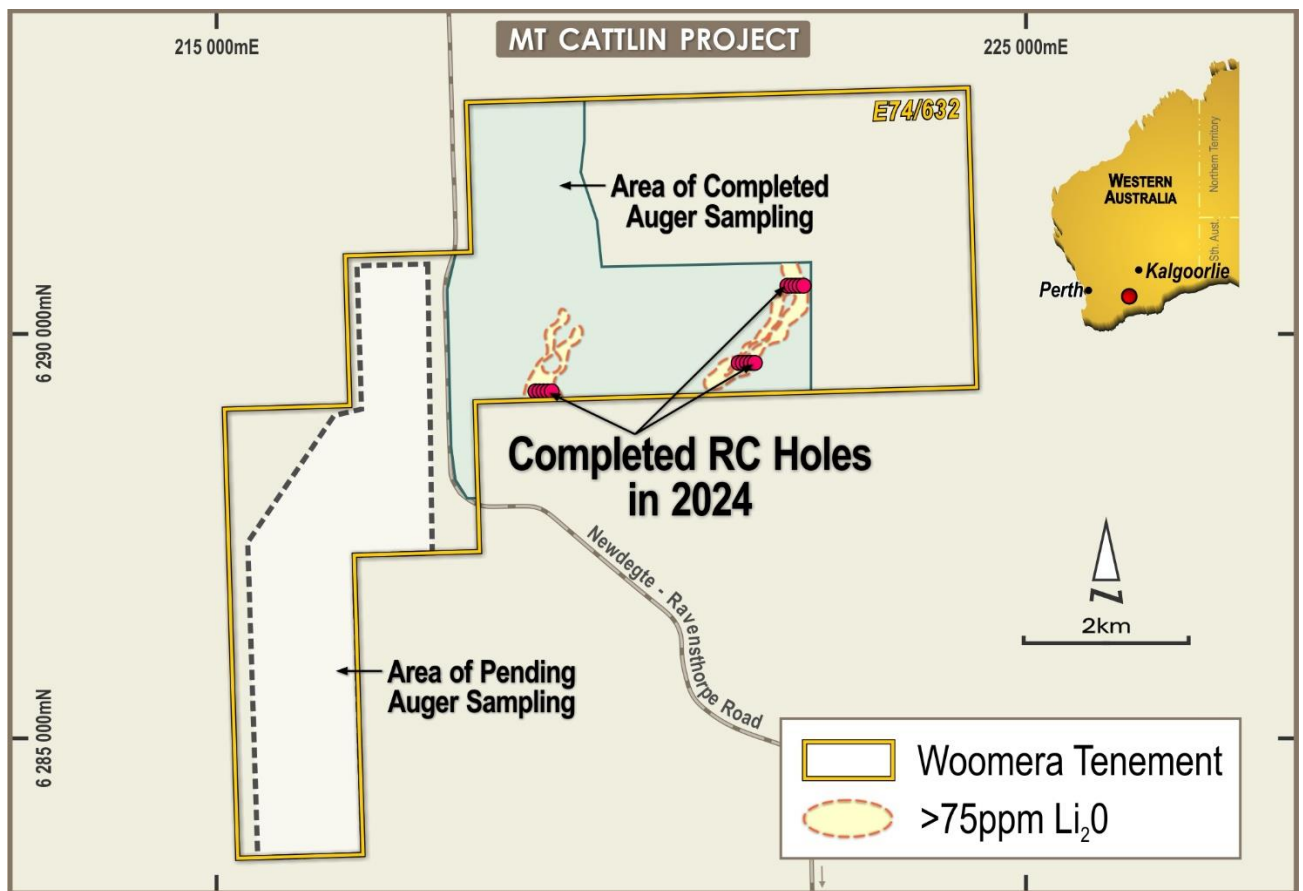

Figure 2: Completed Mt Cattlin RC drilling

Mt Short JV Project, Ravensthorpe WA (WML earning 70%) (Lithium)

Exploration work at the Mt Short JV comprised an auger sampling program which was completed during the Quarter and an 11 hole/1325m RC drill program that was completed immediately post Quarter end.

The auger sampling was designed to assess shallow covered greenstone sequences for pegmatite hosted lithium deposits on a nominal 400m x 50m grid over ~20km strike with 1523 samples collected. Assay results which are pending will be used to define additional targets for a potential follow-up drill campaign this year.

The RC programme (Figure 3) was designed to test beneath pegmatite intersections reported by previous base metal explorers (see ASX release dated 14 August 2023). Seven of the 11 holes intersected significant thicknesses of pegmatite for a total of 296.5m of pegmatite logged. The presence of pegmatites does not necessarily indicate lithium mineralisation which can only be confirmed by laboratory analysis.

For personal use only

Woomera received results for the first two RC holes drilled at Mt Short (MCRC001 and MCRC002) in mid-January 2024 with no significant lithium results returned. Assays are pending for the remaining RC drill holes.

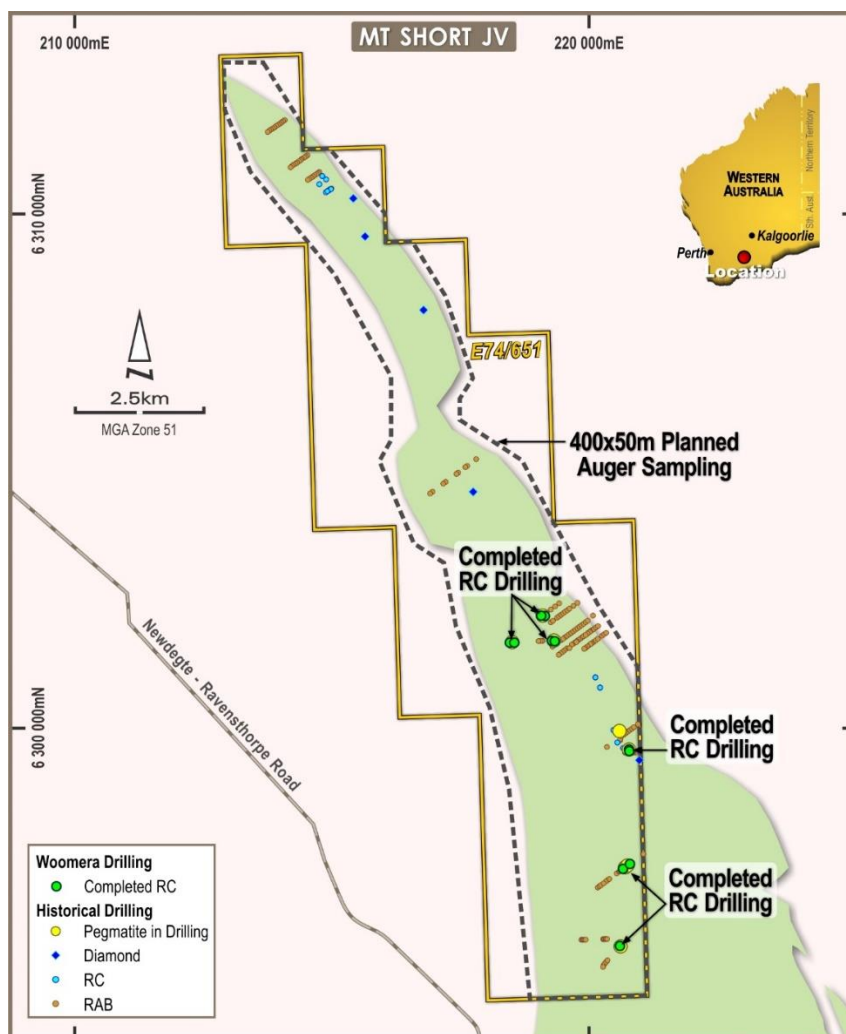

Figure 3: Completed RC drilling at Mt Short project in the current reporting quarter

Wyloo Dome JV (WML earning 60%) (Gold)

During the Quarter, Woomera received the report for the heritage survey that was completed at the New Morning Prospect and commenced planning for the maiden drilling program.

The Company plans to drill a minimum of four drill holes at New Morning, targeting electromagnetic (EM) conductors identified from a survey completed in 2022.

The New Morning Prospect (Figure 4) features an untested blind AEM conductor coincident with a large amplitude VTEM™ MAX anomaly. The anomaly lies adjacent to historical drilling which returned encouraging intersections of up to 40m at 0.11g/t Au, suggesting a near-miss scenario whereby this intersection is marginal to a higher-grade mineralised zone ¹.

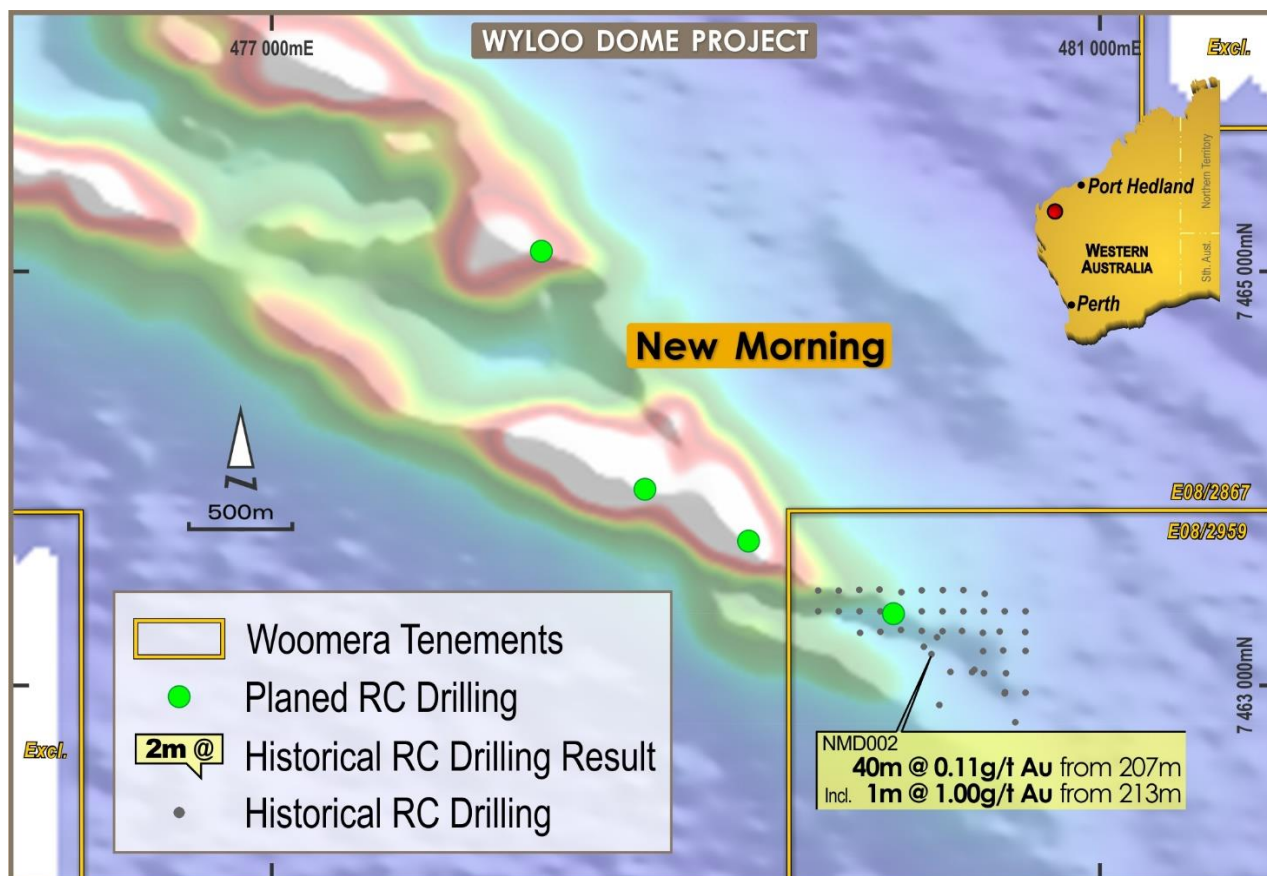

Figure 4: Proposed RC drilling at the New Morning prospect – Wyloo JV

Mt Venn Project (WML 80%/CAZ 20%) (Gold and Nickel/Copper/PGE)

A heritage survey was completed at Mt Venn during the previous Quarter.

Woomera intends to drill four EM conductors at the Mt Cornell Prospect in 2024 and is working towards finalising additional geophysical surveys and subsequent final drill hole design.

The Company is awaiting the grant of the Mining Entry Permit for E38/3581 prior to being able to commence drilling.

Musgrave Project (WML 100%) (Nickel / Copper / Cobalt)

Anomalies identified through an EM survey conducted over the Musgrave Project in May 2023 will be further evaluated in the March 2024 Quarter.

Corporate

In November, Woomera raised \$2.1 million from professional and sophisticated investors through the issue of 237 million Ordinary Shares at \$0.009 each to advance the drilling programme at the Ravensthorpe Lithium Projects. Following the receipt of shareholder approval at the Company's General Meeting in December 2023, the Company raised a further \$0.222m via the issue of a further 24.4m Ordinary Shares to the Directors.

On 28 November 2023, the Company held its 2023 Annual General Meeting at which all proposed resolutions were passed. The Company also held a general meeting on 21 December 2023 to approve the participation of the Directors in the Share Placement as noted above.

Cash on hand at the end of the quarter was \$2.48 million.

Expenditure

The total expenditure on exploration and development activities by the Company during the Quarter was \$346,000.

Payments to related parties or their associates in sections 6.1 and 6.2 of the Company's Appendix 5B related to Directors' fees, salary and superannuation during the period.

Forward-Looking Statements

Certain statements in this document are or maybe "forward-looking statements" and represent Woomera's intentions, projections, expectations or beliefs concerning among other things, future exploration activities. The projections, estimates and beliefs contained in such forward-looking statements necessarily involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Woomera, and which may cause Woomera's actual performance in future periods to differ materially from any express or implied estimates or projections. Nothing in this document is a promise or representation as to the future. Statements or assumptions in this document as to future matters may prove to be incorrect and differences may be material. Woomera does not make any representation or warranty as to the accuracy of such statements or assumptions.

Competent Persons Statement

The exploration results reported herein, insofar as they relate to mineralisation, are based on information compiled by Mr Ralf Kriege. Mr Kriege is CEO of Woomera Mining Limited and is a Member of the Australian Institute of Mining and Metallurgy with over twenty years of experience in the field of activity being reported. Mr Kriege has sufficient experience which is relevant to the styles of mineralisation and types of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' relating to the reporting of Exploration Results. Mr Kriege consents to the inclusion in the report of matters based on his information in the form and context in which it appears.

Previously reported Information

Information in the announcement references previously reported exploration results extracted from the Company's announcements. For the purposes of ASX Listing Rule 5.23 the Company confirms that it is not aware of any new information or data that materially affects the information included in the original announcement and that all material assumptions and technical parameters underpinning the estimates in the original announcements continue to apply and have not materially changed.
