Sustainability

- We released our inaugural Sustainability Report in November 2023 – available to view on our website
- We understand that to have a sustainable business into the future, we must strive for continuous improvement across all aspects of our operations – environment, social and governance
- This, being our first Sustainability Report, provides us with the opportunity to establish baseline data across our key metrics and to set future targets for improvement

Environment

- Energy Consumption
- Greenhouse Gas (GHG) Emissions
- Water and Waste Management

Social

- Our People
- Our Communities

Governance

- Business Ethics and Transparency
- Legal/Regulatory Compliance
- Risk Management
- Stakeholder Engagement

Outlook

- Strong long-term demand outlook for minerals and metals relevant to the ongoing energy transition will continue to attract capital to build global supply
- The value of gold remains high, driven by demand and global geopolitical, and associated economic risks
- Australia’s railway construction and maintenance activity outlook is strong, supported by a number of significant publicly funded projects
- Domestic manufacturing continues to present opportunities for the Industrial Processes sector, as does the ongoing development of emerging markets in support of the energy transition, including waste and recycling, water and wastewater, and hydrogen
- Transformation of the global energy sector from fossil-based to zero-carbon sources represents a period of innovation and opportunity in the development of new systems that can operate on low carbon energy sources, whilst maximising waste recovery and reuse
- Lycopodium’s expertise will remain sought after given the macro environment and other drivers
