## **Note 1. Material accounting policy information**

These general purpose financial statements for the interim half-year reporting period ended 31 December 2023 have been prepared in accordance with Australian Accounting Standard AASB 134 'Interim Financial Reporting' and the Corporations Act 2001, as appropriate for for-profit oriented entities. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 'Interim Financial Reporting'.

These general purpose financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these financial statements are to be read in conjunction with the annual report for the year ended 30 June 2023 and any public announcements made by the company during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, unless otherwise stated.

### **New or amended Accounting Standards and Interpretations adopted**

The consolidated entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

The adoption of these amendments did not have any impact on the Groups consolidated financial statements.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

## **Note 2. Operating segments**

### *Identification of reportable operating segments*

The consolidated entity is organised into two operating segments: *Energy and Resources*, and *Building Products*. These operating segments are based on the internal reports that are reviewed and used by the Board of Directors (who are identified as the Chief Operating Decision Makers ('CODM')) in assessing performance and in determining the allocation of resources. There is no aggregation of operating segments.

The CODM reviews EBITDA (earnings before interest, tax, depreciation and amortisation). The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements.

The information reported to the CODM is on a monthly basis.

The reported operating segments have been revised during the current financial period to align with the restructure of the consolidated entity's management group. The revised structure reflects the markets in which the Group operates. The CODM reviews the performance of the business based on monthly management reports reflecting this revised structure. Brockman Engineering (previously *Engineering*) and TSF Power (previously *Energy*) operate in the *Energy and Resources* market, while Syfon Systems and Tank Industries operate in the *Building Products* market (previously *Water*).

### *Types of products and services by segment*

#### **i. Energy and Resources**

The energy and resources segment designs, manufactures and installs equipment on electricity, oil and gas facilities. Its products range consists of constant load power stations, back up power generation equipment, clean energy solutions, large steel tanks, silos, cooling towers, pipe spooling, pressure vessels and fabricated structural steel. In addition the segment provides customer support services by way of ongoing maintenance, servicing of equipment and sourcing emergency equipment.

#### **ii. Building Products**

The building products segment designs syphonic roof drainage systems for large and/or complex roof structures, suppliers and installs metal panel tanks and prefabricated hydraulic systems.

The names of the operating segments were changed for the current financial year to better describe the markets in which the group businesses operate. Brockman Engineering (previously *Engineering*) and TSF Power (previously *Energy*) operate in the *Energy and Resources* market, while Syfon Systems and Tank Industries operate in the *Building Products* market (previously *Water*).

**Note 2. Operating segments (continued)**

*Intersegment transactions*

Intersegment transactions were made at market rates. The Energy and Resources operating segment purchases Quality Control services from the Building Products operating segment. Intersegment transactions are eliminated on consolidation.

*Intersegment receivables, payables and loans*

Intersegment loans are initially recognised at the consideration received. Intersegment loans receivable and loans payable that earn or incur non-market interest are not adjusted to fair value based on market interest rates. Intersegment loans are eliminated on consolidation.
