(30 June 2023)

Net Cash from operating activities was \$945,580 in this period compared with \$1,859,614 in the previous corresponding period.

Given the recurring income base and confidence in the loan book profile this has allowed the Group to approve and announce a dividend policy for the year ended 30 June 2023. The dividend policy to continue for the current financial year. Ex-entitlement date is 8 March 2024

The Group's **revenues** from core operations were **\$7.5M** an increase compared to the previous half year (DEC 2022: \$7M)

**6.8%** ↑  
FROM: DEC 2022

The Group has seen a 6.8% increase in revenue from lending activities (interest and fees) as well as a notable decrease in Commission and brokerage from non-lending activities.

FROM: DEC 2022

The total assets and total liabilities grew 19% and 24% respectively and the slight reduction of the net assets was largely the result of an increase in employee provisions.

**41.2%** ↑  
FROM: DEC 2022

The earnings rate of loans and funds we operate have increased by 64% over the period, however, our net interest margin has eroded slightly due to a higher cost of capital associated with the wholesale note facility.

### REVIEW OF OPERATIONS

As the CEO of Finexia Financial Group Limited, I'm pleased to report on the Group's continued growth and strategic investments in becoming a leading private credit specialist.

This period to December 31, 2023 has been pivotal for us as we've focused on laying the groundwork necessary to capitalise on and scale our growing range of specialist private credit products and platforms.

The Group's commitment to strategic investments did impact our profit results, yet we've achieved a commendable 6.8% growth in topline revenue compared to the corresponding period. We have recorded a modest net profit after tax of \$153,042.

This is a significant decrease compared to last year, mainly driven by increased operating costs from the Group's strategic investments and a reduced net interest margin due to the use of more expensive wholesale capital. Despite this, the earnings rate on our loans and funds has risen, ensuring our overall net interest margin continues to be strong. Additionally, income from commission and brokerage on non-lending activities also fell. Largely a reflection of challenging conditions and volumes in equities markets (excluding ASX200)

The Group's net cash from operating activities for the period was \$945,580, with cash and equivalents on hand totalling \$8,341,796 as of 31 December 2023, we're pleased to announce a fully franked dividend of \$0.5 cent per share to our shareholders.

The Group's average interest earning assets have grown by an impressive 62% from the corresponding period, surpassing \$162 million with a net interest margin of 4.71% recorded for the period. In the current period, we are pleased to report that we did not incur any loan impairments, continuing our track record of very robust credit risk management and origination processes.

FROM PAGE 6

The Group's strategic investments have been multi-faceted, aimed at strengthening our operational capabilities and expanding our market reach. These include:

- Investing in talent acquisition for enhanced deal origination and loan fulfillment capabilities, leading to a considerable rise in employee costs as a percentage of revenue — an essential investment in the Group's human resources.
- Securing a securitised wholesale note to bolster the Group's loan funding capacity, particularly in our fastest-growing segment — the Childcare sector. While this involved an increase in net interest costs and considerable legal costs and fees, it now underpins much of our future capital strategy.
- Deploying technology to optimise the Group's marketing efforts and expand our product reach into the financial advisor space, resulting in increased corporate and professional expenses as a percentage of income.
- Recently implementing and now leveraging the advantages of a leading loan management system, enhancing the Group's operational efficiency and scalability.

In summary, while the Group's reduction in net profit and earnings per share reflect the impact of strategic investments, we are confident that these initiatives will yield sustained growth and value creation for our stakeholders over the long term.

The Group's near-term strategic priorities and initiatives encompass several key areas:

- Maximising the potential of the Group's market-leading loan products within the Childcare Sector. We have a genuine competitive advantage in our risk framework and products. Our objective is to profitably expand this segment of our business and establish ourselves as the premier non-bank childcare lender.  
To achieve this objective, we are vigorously engaging with wholesale funders for additional capital, leveraging both direct outreach and collaborations with leading consultants. Additionally, we are implementing targeted strategies to capture capital inflows from financial planners and advisors.
- Strengthening and expanding our loan distribution network, with a particular focus on growing the our Sydney-based private credit specialist team and better aligning our sales team's compensation with the Group's performance.
- Continuing the Group's efforts to leverage technology as a strategic asset, mitigating the impact of our scale and reach compared to larger competitors. One notable initiative involves investing in an artificial intelligence project designed to optimise the our credit risk management practices, improving efficiency and decision-making capabilities.
- Enhancing shareholder value for us involves two key strategies: effectively executing the company's strategic plan for long-term profitability in parallel with enhancing market communication and engagement. This approach addresses the value recognition challenges typical for companies of the Group's size, while we also plan to make prudent dividend payments aligned with our strategic goals.

### *Fair value measurement of financial instruments*

Financial assets and financial liabilities measured at fair value in the statement of financial position are grouped into three (3) levels of a fair value hierarchy. The three (3) levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: unobservable inputs for the asset or liability
