FY24 Ansarada Half-Year Results

Our Purpose

Bring order to the chaos organisations face to increase business value

Our Belief

Ansarada believes when information and processes are structured correctly, organisations gain the insight and confidence required to achieve better outcomes, for their business and their people

Our Values

Care

Courage

Curiosity

Change

Our Vision is clear and consistent: to bring order to the chaos that organisations often face managing critical information and processes. Our products help organisations do this in their Corporate Deals, Procurement of large complex infrastructure, Board and Committee management, Operational Risk, Compliance, and Sustainability/ESG Management. These areas when managed with more efficiency, order and control make it easier for organisations to increase their value, realise their potential for increasing their positive impact and delivering good growth.

Multiple growth drivers

Strong growth tailwinds:, digital efficiency, continued investment in product, rising risk and compliance obligations and increasing ESG demand.

ARR¹⁰ Growth: Strategy and execution focus

Deals ARR

- Focus on improving product value proposition for more Deals based ARR suitable use cases.
- Corporate use cases that are non transactional E.G. Investor reporting, Defence readiness, Corporate repository.
- Transforming reoccurring relationships into pure ARR relationships.

Procure ARR

- Build transactional pipelines for larger ARR conversion opportunities.
- Nurture and convert multi-use, multi-year single project customers into ARR subscribers. Accelerate customers through this funnel.
- Improve product and ARR packages for customers to see more value in ARR contracts.

ESG & GRC ARR

- Validate new products for Operational Resilience and ESG strategy setting (materiality assessments).
- Generate a viable customer acquisition model, with a CAC that is scaleable.
- Modernise and address legacy tech in acquired platform to maintain customer retention.

Continuing to improve freemium customer conversion to paid subscriber trends

“We have used the Ansarada platform for all our infrastructure procurements, since we began doing design build procurements here. Really the reason behind that, is it's just got the full suite, and all in one, so we don't need to use Ansarada for parts of our procurement and then other tools to build it in. Ansarada's got the ease of use, the access to the data, the Q and A functionality, and then the phenomenal customer support.”

“The Ansarada system manages all of our risks, our controls, our instant management, contracts, documents, registers. We use it for everything – and it's a god send. The regulatory landscape is constantly evolving. The amount of data being requested by the regulator is off the scale. Without structure, there is chaos. Ansarada brings order to chaos.”

Footnotes

1 Customers include any subscription/contract with an active platform. Customers may have more than one deal platform, board portal or governance solution open at any given time. Customer numbers include customers acquired through the freemium strategy.

2 As at 31 December 2023, refers to unique data room user profiles (unique profiles excludes those deleted or disabled)

3 Ansarada has active contracts with 2 of the top 5 largest companies in the world by market capitalisation as at December 31, 2023.

4 Non-Deal customers include active customers from GRC, Procure, Board and other non-deal related products.

5 International customers includes total active customers less customers from Australia and New Zealand.

6 Adjusted EBITDA represents earnings before interest, tax, depreciation and amortisation, excluding non-cash share-based expense, non-cash impairments, capital raising, business combination fees, redundancies expenses and other abnormal one-time costs.

7 AASB recognised revenue for the period ending 31 December 2023. Last twelve months (LTM) measures the accumulation of the prior 12 months AASB recognised revenue.

8 ARPA represents the average monthly revenue generated from customers on subscription-based contracts (excluding Procure subscriptions)

9 Subscriber refers to an active subscription contracts/customers at period end.

10 Annual Recurring Revenue (ARR) refers to revenue, normalised on an annual basis, that Ansarada expects to receive from its Enterprise Subscribers for providing them with Ansarada’s products or services. Enterprise Subscribers are a subset of our total subscribers and are defined as multi-product or multiple use under a single subscription including Governance, Risk & Compliance, some Procure and Deals contracts and Board products. Where the use case is Deals, enterprise would include a single agreement that includes more than five associated deal rooms. Where we have assessed that an existing customer has moved from being classified as transactional to enterprise, the prior year comparative figure is restated to aid comparability. In the current year, this change predominantly relates to customers on master service agreements that we have assessed meet the definition of enterprise and therefore ARR.

11 ARR subscribers refers to the subscribers with an enterprise contract that generate annual recurring revenue.

12 Customer Retention refers to the ARR subscribers that remain as active paying subscribers after a 12 month period. Retention is calculated as $[1-(\text{churn/opening ARR Subscribers})]$ over a 12 month period

13 Net Dollar Retention refers to the amount of monthly recurring revenue in a period generated from ARR Subscribers active in a corresponding period 12 months earlier divided by the MRR from that prior period

14 Freemium customers refers to customers that are utilising the products and services of Ansarada but have not yet hit the trigger point for payment. Ansarada offers free access to most products giving the customer the opportunity to experience value before converting to a paid subscriber.

15 MS Freemium refers to freemium customers from our Microsoft Startup channel

16 Deals revenue is revenue generated from a customer subscription contract to utilise the Deal room product

17 Sales and Marketing expenses (excluding depreciation) consist of personnel and related costs (including salaries, benefits, bonuses, commissions and payroll tax) directly associated with sales, customer service and marketing team activities to acquire new customers and grow revenue from existing customers. Other costs included are external advertising costs, marketing costs and promotional event costs as well as allocated overheads

18 GTM Spend is the cost of Sales & Marketing activities excluding related headcount costs.

19 Technology costs (excluding depreciation and amortisation) consist of personnel and related costs (including salaries, benefits, and payroll tax) and third-party costs associated with product design and development. Includes costs associated with Ansarada’s Vietnam product design and development capabilities that in 1H FY22 operated under a Build Operated Transfer (BOT) model. However as a result of the acquisition in 2H FY22, it is directly under the Group from that point onwards. Includes relevant software licenses, security testing and hosting costs.

20 General & Administration (excluding depreciation) consist of personnel and related costs (includes salaries, benefits and payroll tax) for the Company’s and Ansarada’s management team, finance, legal, human resources, operations and administration employees. These expenses also includes professional fees for legal, accounting, tax and other services and occupancy, travel and entertainment, administration and board costs.

21 Capex refers to the investments made in new product developments and features and is accounted for in accordance with AASB 138 standards

22 Gross Margin represents operating revenue less cost of revenue. Cost of revenue primarily relates to sales commissions for sales employees and third-party fees for software used to provide product features and VDR archive expenses

23 Cash Conversion Ratio is the ratio of Adjusted Cash Flow from Operations and Adjusted EBITDA

Deals - Secure Virtual Data Room, workflow, collaboration software

The problem

In dealmaking, many complex parts are involved. Deals are highly confidential, and managing critical information securely is the most important aspect of every deal. There are tasks to do, different things to understand, various people's opinions to gather, and lots of information to sort. As a dealmaker, the goal is to bring all these different pieces together smoothly. A dealmaker must handle the complexity of deals and bring everything together securely to make successful deals happen.

Current customers

The solution

Ansarada Deals™ goes beyond a basic Virtual Data Room. Ansarada is highly secure and simple to use, it changes how deals are managed by offering a complete solution. It comes with many useful tools like Deal Workflow, AI-powered Data Rooms, Ansarada Q&A, PMI (Project Management Integration), and safe file sharing & storage. Customers can work together securely with your team and partners.

Procure - Procurement management software

The problem

Many organisations face a kind of organised confusion. Most organisations still use manual processes and spreadsheets to capture, manage, evaluate, report and make decisions and recommendations on highly complex infrastructure projects. This can mess up processes and make project teams take the risks including creating high levels of transparency, compliance and clear audit trails. When projects become big and complex, they need better and secure management.

Current customers

The solution

Ansarada Procure, our end-to-end project procurement management platform, we've helped organisations across the world deliver over \$1tr of infrastructure projects, including public transport, freight rail, toll roads, bridges, ports, stadiums, hospitals, IT systems and broader precinct renewals. Our technology turns security, collaboration, and efficiency of complex procurement management into the natural order for organisations and the people behind them.

GRC - Governance, Risk and Compliance management software

The problem

Most organizations still use manual processes and spreadsheets to capture, manage, and report corporate compliance, risk management, and regulatory change across the business. Static spreadsheets quickly fall apart when it comes to managing and tracking all the complex governance, risk and compliance efforts within an organisation.

The solution

Ansarada GRC is a leading GRC solution that helps organisations of all sizes - from 10-person startups to 10,000 employee corporations - manage GRC more effectively. It's a long-term, user-friendly solution designed to adapt and scale based on the growth of your organisation and your evolving GRC program.

ESG - Sustainability management software

The problem

The overwhelming demand for sustainability reports, the maze of compliance, the unexpected breadth of ESG considerations – from carbon emissions to cybersecurity – it's enough to leave even the most steadfast leader feeling adrift and uncertain. Embarking on an ESG journey can feel like diving into a sea of complexity, acronyms, and confusion. ESG is no longer optional, but a challenge waiting to be solved. The question is, how can businesses uncover the simplest, most effective, and cost-efficient way to navigate these uncharted waters?

The solution

Ansarada helps businesses grow purposefully. Our Sustainability Management Platform transforms the complexities of sustainable practices into a clear and confident path forward. We bring order to the chaos, enabling companies to align with leading sustainability frameworks, deliver impact through innovation, bring people on the journey, and ultimately create long lasting value.
