<b>Statutory profit after tax</b>	<b>4,385</b>	<b>987</b>	<b>3,398</b>

### Notes:

- Revenue and expenses reflected in the summary of results are attributable to the Shareholders of the Company.
- For income taxation purposes Generation Life Limited is a single taxpayer comprising policyholder Benefit Funds and a central management or shareholder fund with all the Company's assessable income, allowable deductions and other tax offsets being pooled.
- Based on normalised profit after tax of associates for the six months period ended 31 December 2023.
- The Group has adopted AASB 17 Insurance Contracts from 1 July 2023. This represents the net profit and loss impact of adopting AASB 17.

## Directors' Report

The Directors of Generation Development Group Limited (the "Company") submit herewith the interim condensed consolidated financial report of the Company and its controlled entities (the "Group") for the six months ended 31 December 2023. In order to comply with the provisions of the Corporations Act 2001, the Directors report is as follows:

### Directors

The names and particulars of the Directors of the Company during or since the end of the interim period are set out below. Directors were in office for the entire period unless otherwise stated:

Mr Robert Neil Coombe	Non-Executive Chairman
Mr William Eric Bessemer	Non-Executive Director
Ms Giselle Marie Collins	Non-Executive Director

### Review of Operations

The statutory profit after tax of Generation Development Group Limited ('the Group') for the interim period to 31 December 2023 was \$4.4m, increased by 344% from prior comparative period of \$1.0m.

Underlying profit represents the Group's preferred measure of the result of the ongoing business activities of the Group. This is a non-statutory measure not subject to review by the external auditor which excludes non-core items, included in the statutory result, to derive the underlying profit. The adjustments made are included in the statutory profit which is subject to review by the external auditor in the context of their review of the interim condensed consolidated financial report.

The underlying net profit for the Life / Administration business increased by \$455k or 13% to \$4.0m for the six months ended 31 December 2023, compared to \$3.5m in the prior comparative period. The Group underlying NPAT of \$4.9m includes earnings from associates, LifeIncome and income tax expense of GDG but excludes other items as reflected in the summary of results.

The increase was largely a result of continued FUM growth, which reached \$2.9b at 31 December 2023, 12% higher than at the start of the financial year.

### Product Sales Results

Generation Life Investment Bond's sales momentum is strong with potential legislative tailwinds from the proposed changes to the taxation on earnings of superannuation balance above \$3m and revision of stage three tax cuts. This has seen increased sales activity and interest.

Investment Bond application levels were higher in 1HY24 with new applications at 12,764 up 21.1% from prior corresponding period of 10,540. This comprised 7,264 LifeBuilder Bonds up 18.6%, 4,990 ChildBuilder bonds up 23.9% and notably 510 Funeral Bonds up 31.1%.

Savings plans have risen to \$47.5m up 12.6% from prior corresponding period of \$42.2m. Over 50% of policies received during the period came with a saving plan attached.

The number of direct businesses has increased by 17.8% in 1HY24 with 3,642 applications received directly from clients worth \$12.4m.

Pleasingly, 284 financial advisers wrote business for the first time with Generation Life in 1HY24 and 1,490 individual financial advisers have written business during the period up 17.7% prior corresponding period.

LifeIncome sales stood at \$7.7m for 1HY24 with a closing FUM of \$24.4m.

### Balance Sheet and Capital

- The Group held cash and cash equivalents of \$19.7m at 31 December 2023 (30 June 2023: \$16.9m) which includes \$2.1m of term deposits greater than 90 days and excludes cash and cash equivalents of the benefit funds that are attributable to the policy holders, providing the Group with strong levels of capital to support growth ambitions.
- The Group has no drawn borrowing facilities and Generation Life Limited, the Group's main operating subsidiary, continues to meet all regulatory capital requirements.

1. Plan for Life, Investment Bonds Market Report for period ended 30 September 2023.

## Dividend Policy

An interim dividend of 1 cent per share, partly franked, was declared on 28 February 2024 with payment date of 4 April 2024.

## Outlook

Investment bond sales continue to garner strong sales momentum. This positions us well for the full financial year to potentially match or exceed our annual sales record.

LifelIncome is expected to produce continued solid results. In addition to growing sales, the focus in the next 6 to 12 months would be to leverage off the recent MetLife distribution agreement and enter arrangements with superannuation funds with whom MetLife currently provides group life insurance.

We continue to see strong growth in Lonsec's Self-Managed Accounts business and Lonsec Investment Solutions.

## Auditor's independence declaration

The auditor's independence declaration is included on page 7 of the interim condensed consolidated financial report and forms part of this Directors' report.

## Rounding of amounts

The Company is a company of the kind referred to in ASIC Corporation instrument 2016/191, and in accordance with the Class Order amounts in directors' report and the interim consolidated financial report are rounded off to the nearest thousand dollars, unless otherwise indicated.

Signed in accordance with a resolution of the Directors made pursuant to s.306(3) of the Corporations Act 2001.

On behalf of the Directors

Mr Robert Coombe  
Non-Executive Chairman  
Melbourne, 28 February 2024

## Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of Generation Development Group Limited

I declare that, to the best of my knowledge and belief, in relation to the review of Generation Development Group Limited for the half-year ended 31 December 2023 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the review; and
- ii. no contraventions of any applicable code of professional conduct in relation to the review.

## Directors' Declaration

In the opinion of the directors of Generation Development Group Limited ("the Company"):

1. the interim condensed consolidated financial statements and notes set out on pages 9 to 50, are in accordance with the Corporations Act 2001 including:
  - a. giving a true and fair view of the Group's consolidated financial position as at 31 December 2023 and of its performance for the six months ended on that date; and
  - b. complying with Australian Accounting Standard AASB 134 *Interim Financial Reporting* and the Corporations Regulations 2001; and
2. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the directors:

On behalf of the Directors

Mr Robert Coombe  
Non-Executive Chairman  
Melbourne, 28 February 2024

The notes on pages 14 to 50 are an integral part of these condensed consolidated interim financial statements.

## Notes to the Interim Condensed Consolidated Financial Statements

### 1. Reporting entity

Generation Development Group Limited (the "Company") is a for profit public company listed on the Australian Securities Exchange (ASX: GDG) and incorporated in Australia. The Company operates as a Pooled Development Fund. This interim condensed consolidated financial report comprises the Company and its controlled entities (the "Group") as at and for the six months ended 31 December 2023. The Group is primarily involved in the provision of Life investment products within the Australian Life Insurance Sector.

### 2. Basis of preparation

This interim condensed consolidated financial report for the six months ended 31 December 2023 (1HY24) has been prepared in accordance with AASB 134 *Interim Financial Reporting and the Corporations Act 2001*.

This 1HY24 financial report does not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual financial statements as at 30 June 2023.

This 1HY24 financial report was approved by the Board of Directors on 28 February 2024. The Company is of a kind referred to in ASIC Corporation Instrument 2016/191, and amounts in the interim financial report have been rounded off to the nearest thousand dollars. All amounts are presented in Australian dollars, which is the functional currency of the Company and its subsidiaries.

The carrying values of amounts recognised on the Statement of financial position are often based on estimates and assumptions of future events. The key estimates and assumptions that have a significant risk of causing a material adjustment to the recognised amounts within the next annual reporting period are disclosed individually within each of the relevant notes to the financial statements.

The consolidated annual financial report of the Group as at and for the year ended 30 June 2023 is available upon request from the Company's registered office and principal place of business at Level 17, 447 Collins Street, Melbourne, Victoria 3000 or at [www.gendevdevelopmentgroup.com.au](http://www.gendevdevelopmentgroup.com.au).

### 3. New standards, interpretations and amendments adopted

The Group has adopted the following new accounting standards for the reporting period beginning on 1 July 2023:

#### AASB 17 Insurance Contracts

AASB 17 is a new accounting standard for all types of insurance contracts and replaces AASB 4 Insurance Contracts, AASB 1023 General Insurance Contracts and AASB 1038 Life Insurance Contracts. AASB 17 applies to reporting periods beginning on or after 1 January 2023. A further amendment was approved in March 2022 to add a transition option that permits an entity to apply a classification overlay relating to comparative information about the financial assets presented on the initial application of AASB 17 and AASB 9 at the same time.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### Impacts of adoption of AASB 17

The impacts of adoption of AASB 17 on the Group's consolidated statement of financial position from 1 July 2022 are as follows:

	30 Jun 2022 (previously reported)	AASB 17 Presentation changes	AASB 17 remeasurement	Restated 1 July 2022
	\$'000	\$'000	\$'000	\$'000
<b>Assets</b>

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 4. Material accounting policies adopted

Except as described below, the accounting policies applied in these interim financial statements are the same as those applied in the Group's consolidated financial statements as at and for the year ended 30 June 2023. Where appropriate, comparative information has been restated to be comparable with information presented in the current period.

The Group has applied the full retrospective approach on transition to AASB 17 for all groups of insurance contracts issued and reinsurance contract held. An additional statement of financial position as of 1 July 2022 is presented in these consolidated statements due to the retrospective application.

Changes in accounting policies are also expected to be reflected in the Group's consolidated financial statements as at and for the year ending 30 June 2024.

The Group has adopted AASB 17 for the reporting period beginning on 1 July 2023.

A qualitative assessment of the Group's distinct products was performed under AASB 17 B102 at the transition date and the following contracts were identified.

The Group has two distinct product groups:

1. Life Investment contracts – are currently measured under the financial instruments standard and will continue to be recognised under AASB 9. These contracts do not have "insurance risk".
2. Investment linked lifetime annuity contracts with direct participating features (DPF) – launched in March 2022, Investment linked lifetime annuity contract (Lifeline) is essentially investment related service contracts, for which the Group promises a return on investment and a lifetime annuity. Lifeline contracts meet the definition of insurance contracts with direct participation features, the Group has an obligation to pay policy holders an amount equal to the value to specified underlying items, minus a variable fee for services, these contracts are measured at transition date by applying the Variable Fee Approach (VFA) under AASB 17. In addition, the acquired legacy business with discretionary participation features (DPF) are closed benefit funds (which are in their natural "run-off" mode and closed for new applications). Analysis indicates both the policy liability and the profit release pattern under AASB 17 and AASB 9 are not materially different. The Group will continue to account for these under AASB 9.

#### Insurance contract liabilities - Lifeline

Lifeline insurance contracts are contracts regulated under the Life Act that involve the acceptance of significant insurance risk. Insurance risk is defined as significant if, and only if, an insured event could cause an insurer to pay significant additional benefits in any scenario, excluding scenarios that lack commercial substance (i.e. have no discernible effect on the economics of the transaction).

The financial reporting methodology used to determine the value of insurance contract liabilities is referred to as Variable Fee Approach (VFA) under AASB 17. The main feature of VFA include:

- A measurement of the present value of future cash flows, incorporation an explicit risk adjustment, remeasured every reporting period, i.e. the fulfilment cash flows.
- The risk adjustments reflect the compensation the Group requires for bearing the uncertainty about the amount and timing of the cash flows for non-financial risk as the Group fulfils insurance contracts.
- A Contractual Service Margin (CSM) represents the unearned profitability of the insurance contract to be recognised in profit or loss over the service period (i.e., the coverage period). It represents the variable fee to shareholders, and it is adjusted to reflect the effect of changes in economics as well as experience variances and /or assumptions changes that relate to future services.

The key areas of judgement in the determination of the liabilities are actuarial assumptions for risk adjustment, coverage units, mortality, acquisition and maintenance expenses, and economic assumptions for discount rates and inflation rates.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### Insurance contracts issued, and reinsurance contracts held

The Group issues investment-linked lifetime annuity insurance contracts which provide life insurance coverage and an investment component. Under the terms of insurance contracts issued, the Group has an obligation to pay policyholders an amount equal to the value to specified underlying items, minus a variable fee for service.

The Group accounts for these contracts applying the Variable Fee Approach (VFA) in accordance with AASB 17.

The Group reinsures longevity and mortality risk on insurance contracts issued, using proportional quota share reinsurance treaties and accounts for these contracts applying the General Measurement Model (GMM).

The determination of whether a contract or a group of contracts is onerous is based on the expectations as at the date of initial recognition, with fulfilment cash flow expectations determined on a probability-weighted basis. The Group determines the appropriate level at which reasonable and supportable information is available to assess whether the contracts are onerous at initial recognition and whether the contracts not onerous at initial recognition have a significant possibility of becoming onerous subsequently. The Group applies significant judgement in determining at what level of granularity the Group has sufficient information to conclude that all contracts within a set will be in the same group. In the absence of such information, the Group assesses each contract individually. The Group groups insurance contracts issued into annual cohorts based on financial year i.e., 1 July to 30 June.

The Fulfilment cash flows (FCF) are the current unbiased and probability-weighted estimates of the present value of the future cash flows, including a risk adjustment (RA) for non-financial risk. In arriving at a probability-weighted mean, the Group considers a range of scenarios to establish a full range of possible outcomes incorporating all the reasonable and supportable information available without undue cost or effort about the amount, timing, and uncertainty of expected future cash flows. The estimates of future cash flows reflect conditions existing at the measurement date including assumptions at that date about the future.

The Group estimates expected future cash flows for a group of contracts at a portfolio level and allocates them to the groups in that portfolio in a systematic and rational way.

The cash flow estimates include both market variables, which are consistent with observable market prices, and non-market variables, which are not contradictory with market information and based on internally and externally derived data.

The Group updates its estimates at the end of each reporting period using all newly available information, as well as historic evidence about trends. The Group determines its current expectations of probabilities of future events occurring at the end of the reporting period. In developing new estimates, the Group considers the most recent experience and earlier experience, as well as other information.

In accordance with AASB 17, onerous contracts are group of contracts which have costs in meeting the obligations under the contract exceed the economic benefits expected to receive from it. GDG's group of insurance contracts are onerous on initial recognition.

### Discount rates

The Group measures the time value of money using discount rates that reflect the liquidity characteristics of the insurance contracts and the characteristics of the cash flows, consistent with observable current market prices. They exclude the effect of factors that influence such observable market prices but do not affect the future cash flows of the insurance contracts.

The Group uses discount rates aligned with the single rate of expected investment return net of investment management fees on underlying assets. The discount rate varies across investment options.

For reinsurance contracts, the Group uses the bottom-up approach to determine discount rates in relation to reinsurance contracts held, calculated as risk free rates and an illiquidity premium. Reinsurance discount rate is considered at initial recognition as the date of treaty inception (or date of new addendum issued for subsequent cohorts).

All changes in the discount rates i.e., impact of locked-in rates vs. current rates, are recognised in profit or loss under Insurance finance income/(expenses) (IFIE).

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### Risk adjustment for non-financial risk

The Group measures the compensation it would require for bearing the uncertainty about the amount and timing of cash flows arising from insurance contracts, other than financial risk separately as an adjustment for non-financial risk. The Group uses the cost of capital method in estimating the risk adjustment. The level of capital and the cost of capital rate that feed this estimation technique are calibrated from the Group's regulatory capital and target capital and related return on equity and average earning rate on capital assets.

The Group is exposed to longevity risk and expense risk. No diversification is allowed between longevity risk and expense risk under AASB 17. For underlying insurance contracts issued, the risk adjustment is determined using the cost of capital (CoC) method at a total level and allocated down to groups of insurance contracts using PV Claims in the scalar approach.

The reinsurance risk adjustment is set equal to the gross risk adjustment for longevity risk only.

The Group has elected not to disaggregate and presents the entire change in the risk adjustment for non-financial risk as part of the insurance service result.

### Contractual Service Margin (CSM) and loss component

The Contractual Service Margin (CSM) is a component of the overall carrying amount of a group of insurance contracts representing unearned profit that the Group recognises as it provides insurance contract services over the coverage period.

If a group of contracts is onerous, the Group recognises a loss on initial recognition, resulting in the carrying amount of the liability for the group being equal to the fulfilment cash flows, and the CSM of the group being nil.

On initial recognition, the Group recognises any net cost or net gain on purchasing the group of reinsurance contracts held as a reinsurance CSM, unless the net cost of purchasing reinsurance coverage relates to events that occurred before the purchase of the group of reinsurance contracts, where the Group recognises such a cost immediately in profit or loss as an expense as part of insurance service result.

After the loss component (LC) is recognised, the Group allocates any subsequent changes in fulfilment cash flows relating to future service to the LC. Any changes not related to future service are allocated on a systematic basis between the LC and the LRC excluding LC.

Insurance acquisition cash flows included among the other FCF for an annual cohort of insurance contracts, in measuring the LRC, are amortised (expensed) on a straight-line basis over the coverage period, together with the same amount recognised in insurance revenue. See further details on insurance revenue and insurance service expense recognition in note (a) and note (b), respectively.

### Recognition and measurement

#### a. Insurance revenue

As the Group provides insurance services under a group of insurance contracts issued, it reduces its LRC and recognises insurance revenue, which is measured at the amount of consideration the Group expects to be entitled to in exchange for those services.

Insurance revenue consists of the sum of the changes in the liability for remaining coverage (LRC) related to the insurance service expense incurred in the period measured at the amounts expected at the beginning of the period, the change in the risk adjustment (RA) for non-financial risk, the amount of CSM for the services provided in the period, and other amounts, such as experience adjustments in relation to the difference between the expected cash flow estimate at the beginning of the period and the actual incurred amounts of insurance service expenses in the period (excluding insurance acquisition expenses).

#### b. Insurance service expense

Insurance service expense arising from groups of insurance contracts issued are recognised in profit and loss and includes incurred claims, attributable expenses incurred in the period, changes in the LIC related to claims and expenses incurred in the period, changes in the LRC related to future service that do not adjust the CSM, because they are changes in the Loss Components of onerous groups of contract and impairment and reversal of impairment of pre-acquisition DAC (as applicable).

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### c. Insurance finance income/(expenses) (IFIE)

IFIE present the effect of the time value of money and the change in the time value of money, together with the effect of financial risk and changes in financial risk of a group of insurance contracts issued and a group of reinsurance contracts held.

The Group recognises all IFIE in profit or loss only, with no disaggregation between profit or loss and OCI.

Changes in the obligation to pay the policyholder an amount equal to fair value of underlying items are presented in IFIE.

Where the amount directly attributable to the policyholder differs compared to expected due to investment return variance, the resulting impact will be reflected in IFIE.

For reinsurance contracts held, the Group adjusts the LRC for the time value of money using discount rates determined at initial recognition. The Group has elected not to disaggregate and presents the 'finance income/(expenses) from reinsurance contracts held' in profit or loss.

### d. Income or expenses from reinsurance contracts held

The Group has adopted a net presentation in the profit or loss for income or expenses from a group of reinsurance contracts held. Income or expenses from reinsurance contracts held consists of the following amounts:

- reinsurance premiums paid to the reinsurers
- annuity mortality adjustments receivable/payable based on expected vs actual mortality experience

### e. Income tax

*Income tax specifically chargeable to policyholders*

When income taxes are specifically chargeable to the policyholder under the terms of the contract, these are measured applying AASB 112, and the Group includes those amounts in the FCF applying AASB 17, in determining insurance liabilities/assets and insurance revenues/expenses. The Group accounts for them as a reduction in the liability for remaining coverage and recognises insurance revenue when incurred.

## 5. Use of estimates and judgements

In the application of the Group's accounting policies, management is required to make judgements, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimate and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

In preparing this interim condensed consolidated financial report, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied in the consolidated annual financial statements as at and for the year ended 30 June 2023.

### Key assumptions and estimates applied in the valuation of the LifeIncome insurance contract liabilities

The following are key estimations that was used in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in financial statements:

- Technique for estimation of future cash flows

The estimate of future cash flows shall be an estimate of the probability-weighted mean of the full range of outcomes within the boundary of the contract. The Group estimates the expected cash flows for insurance contracts issued and reinsurance contracts held separately at an entity level. The cash flows are determined at a policy level and then aggregated into groups of insurance contracts issued. A different policy identifier is used for reinsurance contracts held at the policy level for aggregation purposes.

- Discount rates

For reinsurance contracts, the Group uses the bottom-up approach to determine discount rates in relation to reinsurance contracts held, calculated as risk free rates and an illiquidity premium. The illiquidity premium is determined by reference to observable market rates, including Australian Commonwealth Government Securities, treasury bonds and corporate bonds.

Reinsurance discount rate is considered at initial recognition as the date of treaty inception (or date of new addendum issued for subsequent cohorts). This discount rate is locked-in, per the GMM, and is, thus, also used for CSM re-measurement and interest accretion. For subsequent measurement of FCF, the discount rate is set using the bottom-up approach, with current risk-free rates and an illiquidity premium.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

- Risk adjustment (RA) for non-financial risk

The risk adjustment is held to reflect the compensation the Group requires to bear the uncertainty about the amount and timing of the cash flows that arise from non-financial risks. The Group is exposed to longevity risk on insurance contracts issued due to the guarantee that payments of a set number of units will be made until death of the policyholder. It is also exposed to expense risk, being the risk that expenses associated with the costs of servicing the underlying insurance contracts will be larger than expected.

The Group determines risk adjustment at a total entity level and allocates it down to groups of insurance contracts using PV Claims in the scalar approach. Risk adjustment for group of insurance contracts is calculated based on the ratio of total risk adjustment relative to total PV claims. This ratio is pro-rated for the PV claims amount in relation to groups of insurance contracts issued.

In estimating the risk adjustment, the Group uses the cost of capital (CoC) method. The method looks at estimating the additional amount of capital required for the amount of uncertainty, and then estimating the expected cost of that capital over the period of the risk. The Group uses the risk-free discount rates to discount the risk adjustment for insurance contracts issued and reinsurance contracts held.

Capital held for longevity risk is expected to constitute the material portion of total capital. The capital held of expense risk is short term in nature and hence, the CoC on expense risk is immaterial. The expected CoC is calculated as the difference between the Group's target return on equity and the average earning rate of the capital assets. No diversification will be allowed for due to no correlation between longevity and expense risks. The Group determines the implied confidence level using the risk adjustment and statistical techniques, assuming losses are normally distributed, referencing a mean of 0 at 50% confidence level and the required capital which assumes that losses over the next year will be covered at an 80% confidence level (2023: 80%). The implied confidence level will be recalculated annually.

Confidence levels are applied to LRC and LIC and are expected to be consistent unless facts and circumstances clearly indicate otherwise.

Reinsurance risk adjustment is set equal to the gross risk adjustment for longevity risk only.

- Coverage unit methodology and CSM release

Coverage units are required to be set using a measure that will demonstrate the relative quantity of benefits expected to be provided over the life of the contract (the policyholder's lifetime).

The benefit payments (which include both annuity outgo and death benefit payment) provide a reflection of the quantity of benefits expected to be provided over the life of the contract and are, thus, used as coverage units. The initial expected benefit payments are determined by considering the probability-weighted average duration of contracts at inception.

CSM release for period is based on the ratio of actual benefits paid during the period relative to (actual benefits paid during the period and PV of expected benefit amounts for end of period). For reinsurance contracts held, CSM release for period is determined using the same method, however, benefit amounts used relate to the underlying insurance contracts issued.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 6. Risk and capital management

#### **Risk management governance and framework**

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework. The Board has adopted an approved Risk Management Plan, which reflects the Board's commitment to identifying, monitoring and mitigating risks as well as capturing opportunities.

The Board recognises the broad range of risks that the Group faces as a participant in the financial services industry. Increasingly, the risk of climate change is being considered within the investment process. The Group considers the risk of climate change within its risk management framework and work to ensure that these risks are mitigated where possible. The Group is not currently materially exposed to climate risk.

Day-to-day responsibility for risk management has been delegated to executive management, with review occurring at Audit and Risk Committees, and Board level. The Chief Executive Officer of Generation Life Limited and Chief Financial Officer of the Group are required to provide to the Board an annual certification that the Group's risk management system is operating efficiently and effectively in all material respects.

#### ***Underwriting risk management***

Underwriting risk consists of insurance risk, lapse risk and expense risk.

Insurance risk is the risk of the loss event occurrence, or the timing and amount of the loss being different from expectation.

The Group is exposed to different elements of insurance risks on insurance contracts issued:

- a) Longevity risk – the guarantee that payments of a set number of units will be made until the death of the policyholder.
- b) Mortality risk – the risk of losses arising from death of policyholders being earlier than expected.

The Group mitigates these risks by having reinsurance arrangements in place.

The Group is also exposed to the following risk which is not insurance risk but related to insurance contracts:

- Expense risk – the risk that expenses associated with the costs of servicing the insurance contracts issued will be larger than expected.

The risk arises from all insurance contracts issued. A sensitivity analysis to changes in expense rates is presented later in the note. The Group frequently monitors the expense level of each business unit to address expense risk. In addition, expense risk is being managed by the Group's ability to increase management fees or the ability to change benefit fund rules that govern the management fees.

There were no significant changes in the Group's objectives, policies, and processes for managing the risks and the methods used to measure the risks from the previous period.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### Sensitivities

The following table details the impact of changes in key assumptions on the Group's profit and loss, equity and CSM before and after risk mitigation from reinsurance contracts held. This analysis is based on a change in one risk variable with all other variables held constant. Sensitivity analysis assumes that changes to variables can be made independently, which is very unlikely to occur in practice. There were no changes made from the previous period in the methods and assumptions used in preparing the sensitivity analysis.

#### 31 Dec 2023

## 7. Equity accounting in associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investment in associates is accounted for using the equity method of accounting after initially being recognised at cost.

Under the equity method of accounting, the investments are initially recognised at cost including acquisition related costs. On the date of acquisition of an equity-accounted investee, fair values are attributed to the investee's identifiable assets and liabilities. Any positive difference between the cost of the investment and the investor's share of the fair value of the identifiable net assets acquired is goodwill, which is included in the carrying amount of the investment in the equity-accounted investee and is not shown separately.

After initial recognition, the consolidated financial statements include the Group's share of profit or loss of equity accounted investees. Dividends received or receivable reduce the carrying amount of the equity accounted investment. Details of investment made in associates are listed in note 17.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 8. Standards and interpretations issued but not yet effective

Certain new accounting standards and interpretations have been published that are not mandatory for 1HY24 reporting periods and have not been early adopted by the Group.

Title	Standards
Amendments to AASB 101-3	<i>Classification of liabilities as current or non-current</i>
Amendments to AASB 101	<i>Disclosure of Accounting Policies</i>
Amendments to AASB 108	<i>Definition of Accounting Estimate</i>
Amendments to AASB 112	<i>Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction</i>
IFRS S1	<i>General Requirements for Disclosures of Suitability-related Financial Information</i>
IFRS S2	<i>Climate-related Disclosures</i>

### 9. Segment reporting

The Group has the following two strategic divisions, which are its reportable segments. All segments' operating results are regularly reviewed by the Group's Chief Financial Officer to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

#### a. Operating segments

##### *Benefit Funds Management and Fund Administration*

The provision of administration and management services to the Benefit Funds of Generation Life Limited and administration services to institutional clients.

##### *Other Businesses*

This segment pertains to investment in Associates - Lonsec 49% (2023: 41%) and Claimfast 0% (2023: 12%). The holdings in Claimfast were disposed on 7 June 2023. Details of investment made in associates are listed in note 17.

#### b. Non-operating segments

Benefit Funds represents the operating result and financial position of the Benefit Funds which are required to be consolidated in the Group's financial statements in accordance with the accounting standards.

Where relevant, comparative financial information has been restated to ensure consistency in presentation of financial information across the applicable comparative periods.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

The reportable segments are divisions engaged in providing either different products or services. The statutory benefit funds are classified as a non-operating segment. Details of the operating and non-operating segments are detailed below:

\*The Group adopted AASB 17 *Insurance Contracts* from 1 July 2023 and has restated the prior comparative period. The impacts of adoption are detailed in Note 3.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 10. Financial risk management

All aspects of the Group's financial risk management objectives and policies are consistent with those disclosed in the consolidated annual financial report as at and for the year ended 30 June 2023.

### 11. Financial Instruments – Fair value and risk management

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy for financial instruments measured at fair value. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

The table below shows the valuation methods for different levels of financial instruments by fair value hierarchy.

**Level 1:** Fair value is calculated using quoted prices (unadjusted) in active markets for identical assets or liabilities. This comprises listed securities.

**Level 2:** Fair value for units in managed unlisted funds are calculated using disclosed offer prices provided from the responsible entity through third party data or directly from the responsible entity. Fair value from fixed interest assets where the principle prices are derived from the most liquid over the counter markets are provided via a reputable third party data vendor.

**Level 3:** Fair value is estimated using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Trade and other receivable and trade and other payables classified as held-for-sale are not included in the table below. Their carrying amount is a reasonable approximation of fair value.

	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
<b>Half year ended 31 Dec 2023</b>

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 17. Investment in associates

#### Lonsec Holding Pty Ltd

During the six months ended 31 December 2023, there were transactions between the Group and Lonsec Holdings Pty Ltd, totalling to \$41,500 relating to the cost of independently reviewing investment strategies developed by Generation Life. The amount has been eliminated on consolidation.

A reconciliation of the carrying amount of investment in associates is provided below:

	As at 31 Dec 23 \$'000	As at 30 Jun 23 \$'000
Carrying value of investment in associates at cost inclusive of deferred consideration and acquisition costs	30,336	28,941
Share of gain/(loss) in associates	2,129	1,395
<b>Closing carrying value in associates</b>	<b>32,465</b>	<b>30,336</b>

### 18. Income Tax

At 31 December 2023 neither Generation Development Group Limited nor any of its controlled entities were members of a tax consolidated group.

	Half year ended 31 Dec 23 \$'000	Half year ended 31 Dec 22 \$'000
<b>Income tax expense comprises:</b>		
<b>Current Tax</b>		
Current income tax benefit / (expense)	3,060	5,862
<b>Deferred Tax (expense) / benefit</b>		
(Derecognition) / recognition of tax losses	116	(541)
(Derecognition) / recognition of timing difference	(16,621)	(25,253)
<b>Total income tax expense</b>	<b>(13,445)</b>	<b>(19,932)</b>

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 19. Financial Assets

	As at 31 Dec 23 \$'000	As at 30 Jun 23 \$'000
Financial assets carried at amortised costs - Term deposits <sup>(a)</sup>	57,126	46,356
Financial assets carried at fair value through profit or loss - Investments <sup>(b)</sup>	2,856,935	2,505,317
<b>Total financial assets</b>	<b>2,914,061</b>	<b>2,551,673</b>
Current	2,914,061	2,551,673
Non-current	-	-
	<b>2,914,061</b>	<b>2,551,673</b>

(a) The term deposits have maturities ranging from three to twelve months

(b) Investments are amounts invested by the benefit funds in unlisted externally managed funds, listed securities and fixed interest assets

### 20. Issued Capital

	Number	\$'000
Balance at 1 Jul 2023	188,812,732	89,045
Issued during the period	1,797,519	89
<b>Balance at 31 Dec 2023</b>	<b>190,610,251</b>	<b>89,134</b>

### 21. Dividends

A final fully franked dividend of \$1,905,487 (one cent per ordinary share) for the financial year ended 30 June 2023 was paid on 5 October 2023 (2022: \$1,886,572). On 28 February 2024, the Company declared an interim dividend of one cent per ordinary share, partly franked, totalling \$1,906,103 to be paid on 4 April 2024. The Company's Dividend Reinvestment Plan (DRP) will be in operation for this dividend.

## Notes to the Interim Condensed Consolidated Financial Statements (continued)

### 22. Contingent liabilities

#### Banking facilities

The Group has the following finance facilities with National Australia Bank Limited:

- Direct debit facility of \$10,000,000 (2023: \$10,000,000) to be used for client's accounts as part of the Generation Life business;
- Electronic channel facility of \$5,000,000 (2023: \$5,000,000) to allow for transactions to be debited in the clearing account when funds are in the process of being cleared; and
- NAB credit card facilities of \$150,000 (2023: \$150,000) used by senior staff for business travel and client entertainment.

The above direct debit facility and the NAB credit card facility are backed by term deposits of \$120,000 and \$150,000, respectively.

The Company has issued letters of support in respect of certain of its subsidiaries in the normal course of business. Under these letters, the Company undertakes to ensure that those subsidiaries continue to meet their regulatory capital obligations subject to caps and certain conditions including that the entity remains a controlled entity of the Company.

#### Bank guarantee

The Group has the following bank guarantees in respect of its office tenancies:

- Bank guarantee of \$492,383 in respect of the office at Level 17, 447 Collins Street, Melbourne, VIC 3000.
- Bank guarantee of \$123,564 in respect of the office at Suite 9.02, Level 9, 6 O'Connell Street, Sydney, NSW 2000.

### 23. Subsequent events

On 28 February 2024, the Company declared an interim dividend of \$0.01 per ordinary share partly franked to be paid on 4 April 2024. The Company's Dividend Reinvestment Plan (DRP) has been activated for this dividend.

## Independent Auditor's Review Report

To the shareholders of Generation Development Group Limited

### Report on the Interim Condensed Consolidated Financial Report

#### Conclusion

We have reviewed the accompanying **Interim Condensed Consolidated Financial Report** of Generation Development Group Limited (the Company).

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the Interim Condensed Consolidated Financial Report of Generation Development Group Limited does not comply with the *Corporations Act 2001*, including:

- giving a true and fair view of the **Group's** financial position as at 31 December 2023 and of its performance for the **Half-year** ended on that date; and
- complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

The **Interim Condensed Consolidated Financial Report** comprises:

- Interim Condensed Consolidated Statement of Financial Position as at 31 December 2023;
- Interim Condensed Consolidated Statement of Profit or Loss and Other Comprehensive Income, Interim Condensed Consolidated Statement of Changes in Equity and Interim Condensed Consolidated Statement of Cash Flows for the Half-year ended on that date;
- Notes 1 to 24 comprising material accounting policies and other explanatory information; and
- The Directors' Declaration.

The **Group** comprises Generation Development Group Limited (the Company) and the entities it controlled at the Interim Period's end or from time to time during the Interim Period.

#### Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with these requirements.

KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. **Responsibilities of the Directors for the Interim Condensed Consolidated Financial Report**

The Directors of the Company are responsible for:

- the preparation of the Interim Condensed Consolidated Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*; and
- such internal control as the Directors determine is necessary to enable the preparation of the Interim Condensed Consolidated Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

**Auditor's Responsibilities for the Review of the Interim Condensed Consolidated Financial Report**

Our responsibility is to express a conclusion on the Interim Condensed Consolidated Financial Report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the Interim Condensed Consolidated Financial Report does not comply with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2023 and its performance for the Interim Period ended on that date, and complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of an Interim Condensed Consolidated Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
