

ASX Announcement  
 23 April 2024

# QUARTERLY REPORT MARCH 2024

## KCGM stands out; strong free cash generation; positive start to June quarter

### Operating performance

- LTIFR at 0.5 injuries per million hours worked (12-month moving average)
- Gold sold totalled **401koz** at an **AISC of A\$1,844/oz** (US\$1,213/oz)
  - KCGM delivers positive step-change, driven by increased access to high-grade Golden Pike North material
  - Weather impacts across Yandal masked strong milled tonnes at Jundee; Thunderbox mill remediation ongoing to improve availability and consistently deliver to capacity in the long term
  - Unplanned mill outages at Pogo offset modest grade uplift
- AIC of A\$2,620/oz as major growth projects continue across the Group, including KCGM Mill Expansion
- Generated underlying free cash flow of A\$143 million (vs December quarter: A\$102 million)

### FY24 Outlook

- FY24 guidance of 1,600-1,750koz gold sold (unchanged) at an AISC of A\$1,810-1,860/oz (revised 11 April)
- June quarter (4Q FY24) focus:
  - Kalgoorlie: At KCGM, higher milled tonnes and grade from increased access to Golden Pike North area
  - Yandal: Jundee higher grades; Thunderbox annualised mill throughput rate of 5Mtpa
  - Pogo: Improved mill throughput, reflecting improved capacity and continuity from completed projects
- Maintain FY24 growth capital guidance of A\$1,150-1,250 million; exploration budget of A\$150 million

### Fully funded organic growth strategy; A\$300 million on-market share buy-back open (A\$131 million remaining)

- Ended the March quarter with A\$1,076 million of cash and bullion; A\$2,576 million of liquidity
- Net cash<sup>1</sup> of A\$174 million, after A\$169 million interim dividend, highlights balance sheet strength

Commenting on the March quarter performance, Northern Star Managing Director Stuart Tonkin said:

*"The March quarter was challenging but also demonstrated the resilience of our teams at our three production centres. Adverse weather had a significant impact and contributed to the Company revising our cost guidance for the year, though I am pleased to confirm that we remain on track to deliver our FY24 production guidance into a strong gold price environment."*

*"At KCGM, our largest and lowest cost asset, the team achieved an exceptional operational and financial performance, with the Kalgoorlie Production Centre generating the Group's highest free cash flow per ounce. Strong milling performance was achieved at Jundee while Pogo remains positioned for a stronger June quarter with throughput expected to lift."*

*"We are focused on maintaining the strong operational momentum so far seen in the June quarter, which will enable us to safely generate significant free cash flow and, in turn, superior shareholder returns."*

**Northern Star's March quarterly conference call will be held today at 9:00am AEST (7:00am AWST).**

**The call can be accessed at: <https://loghic.eventsair.com/526795/665814/Site/Register>**

<sup>1</sup> Net cash is defined as cash and bullion (A\$1,076M) less corporate bank debt (A\$0M) less bond issue (A\$902M = US\$600M at AUD:USD rate of 0.65, less capitalised transactions costs).

## OVERVIEW

Northern Star Resources Ltd (ASX: NST) is pleased to report its operational and financial results for the March 2024 quarter, with gold sold of 400,825oz at an all-in sustaining cost (AISC) of A\$1,844/oz.

March quarter performance by production centre:

- Kalgoorlie: 227,486oz gold sold at an AISC of A\$1,592/oz
- Yandal: 114,033oz gold sold at an AISC of A\$2,070/oz
- Pogo: 59,306oz gold sold at an AISC of US\$1,567/oz

All-in costs (AIC) of A\$2,620/oz were higher than a year ago as capital growth projects continued across the Group, led by the KCGM Mill Expansion Project.

Figure 1: Group Gold Sales and AISC

Figure 2: Five-year growth pathway

## FY24 Outlook

Northern Star is safely executing its operational improvement and growth project pipeline while responsibly advancing our strategic purpose to deliver superior returns to shareholders.

Northern Star's financial position remains strong, with net cash of A\$174 million. The Company's FY24 growth program is fully funded and aligns with our capital management framework of allocating capital to those projects that will deliver superior returns.

The Company remains on track to deliver guidance of 1,600-1,750koz gold sold in FY24. On 11 April, Northern Star increased its FY24 AISC guidance to A\$1,810-1,860/oz, from A\$1,730-1,790/oz, following a challenging March quarter that included the impact of significant weather events. Gold sold is expected to significantly increase in the June quarter as a result of higher forecast ore volumes and grade at KCGM, delivery of expected improved milling availability at Thunderbox, higher grades at Jundee and increased milling capability at Pogo.

Northern Star's Group capital expenditure (sustaining, growth, exploration) for FY24 is forecast to be similar to FY23.

**Figure 3: FY24 Group guidance**

FY24 GUIDANCE (REVISED)	UNITS	KALGOORLIE	YANDAL	POGO	TOTAL*
Gold Sold	koz	840-900 Increase from 820-900	500-570 Decrease from 520-570	260-280 Maintain	<b>1,600-1,750</b> Maintain
AISC	A\$/oz	1,640-1,710 Decrease from 1,730-1,780	1,930-1,960 Increase from 1,655-1,700	2,150-2,190 (US\$1,410-1,440) Increase from 1,900-2,015 (US\$1,270-1,350)	<b>1,810-1,860</b> Increase from 1,730-1,790
Growth Capital Expenditure	A\$M	890-960 Maintain	205-225 Maintain	52-60 (US\$35-40) Maintain	<b>1,150-1,250</b> Maintain
Exploration	A\$M				<b>150</b> Maintain

\*Includes A\$3-5M of corporate investment.

Pogo AISC and Capital Expenditure converted at a currency using AUD:USD = 0.66 (vs 0.67 previously).

In FY24, Northern Star is committed to safely delivering our operational targets and advancing organic growth options across our portfolio. Major growth areas, which account for ~80% of FY24 growth capital expenditure, include:

**Figure 4: FY24 major growth capital expenditure options**

% OF GROUP CAPEX	PRODUCTION CENTRE	MAJOR GROWTH OPTIONS
44%	Kalgoorlie	KCGM Mill Expansion, primarily on enabling works (process plant, 33kV network upgrade, borefield upgrade) and major equipment
20%	Kalgoorlie	Sustaining waste material movement at KCGM, which unlocks high-grade Golden Pike North and Fimiston South ore for processing in the subsequent years; Mt Charlotte UG mine development; tailings dam lift
8%	Yandal	Pre-production of Orelia open pit and establishment of Wonder underground as high-grade feed sources for the expanded Thunderbox mill
6%	Kalgoorlie	Pre-production of Porphyry underground and Wallbrook open pit as feed sources for Carosue Dam Operations
4%	Pogo	Pogo UG mine development, UG capital drilling and assays

## KCGM Mill Expansion Project

Northern Star announced a positive Final Investment Decision for the KCGM Mill Expansion Project ("Mill Expansion"), located in Kalgoorlie, Western Australia, on 22 June 2023.

During the March quarter, Northern Star advanced engineering, design and construction works for the Mill Expansion. The capacity of KCGM's processing circuit, centred on the Fimiston Processing Plant, will replace most of the 13Mtpa plant, increasing the overall capacity to 27Mtpa and then consolidate the Gidji facility.

There is no change to Northern Star's FY26 profitable growth strategy. KCGM is expected to operate at 650kozpa by FY26 and increase to ~900kozpa from FY29 (steady state), following a two-year ramp-up (FY27-28) upon completion of the Mill Expansion.

### Financial Overview:

Cash flow generation from the existing operation continues during the three-year build (FY24-26) with cut-over only occurring once the build is complete (achievable by the newly expanded plant being located adjacent to the existing processing plant). Forecast free cash flow combined with cash on hand fully funds the Mill Expansion's A\$1.5 billion capital expenditure budget.

Capital expenditure during the March quarter was A\$95 million, bringing total project capital expenditure year to date to A\$247 million. FY24 capital expenditure for the project has been revised to A\$415 million, down from A\$525 million. The reduced spend (relating to finalising procurement contracts and associated project contingency) has no impact to the project schedule or overall budget, with the difference likely to be incurred over FY25 and FY26.

### Construction Update:

During the March quarter, all critical enabling works were completed and construction areas progressively handed over to the Primary Contractor.

#### Enabling Works:

- All critical path enabling works completed
- Demolition, clearance and excavation well advanced
- Construction areas progressively handed over to Primary Contractor
- Two accommodation camps fully operational

#### Engineering Design and Onsite Construction:

- Major design reviews and engineering design on track
- Primary crusher well progressed with first major concrete pours commencing early Q4
- Stage 2 Engineering awarded to the Stage 1 Primary Contractor and currently underway

- (1) Mine Operating Cash Flow is calculated as Revenue, less Cash Operating Costs (excluding inventory movements) and Sustaining Capital. Net Mine Cash Flow is calculated as Mine Operating Cash Flow less Growth Capital.
- (2) Includes the non-cash share-based payments expenses in corporate overheads.
- (3) Excludes exploration spend at non-producing projects and regional sites (A\$1M).
- (4) A\$32M of lease repayments are included in Sustaining Capex (A\$80M) and A\$15M in Growth Capex (A\$280M). Lease repayments are included in cash flows from financing activities in the Consolidated Statement of Cash Flows included in the Company's financial statements.
- (5) Excludes corporate growth capex (A\$4M).
- (6) Pogo Operations costs are presented in AUD which is the Group's reporting currency. USD cost disclosure is presented in Table 11. March quarter AUD:USD exchange rate is 0.66.
- (7) In March quarter, Kalgoorlie Operations Open Pit Ore Mined, Open Pit Mined Grade and Open Pit Ounces Mined recorded a year to date adjustment for the long term stockpiles mined at KCGM. Further detail is presented in Appendix 1, Table 6.

- (4) A\$92M of lease repayments are included in Sustaining Capex (A\$243) and A\$45M in Growth Capex (A\$822). Lease repayments are included in cash flows from financing activities in the Consolidated Statement of Cash Flows included in the Company's financial statements.
- (5) Excludes corporate growth capex (A\$8M).
- (6) Pogo Operations costs are presented in AUD which is the Group's reporting currency. USD cost disclosure is presented in Table 11. FYTD AUD:USD exchange rate is 0.65.
- (7) Kalgoorlie Operations Open Pit Ore Mined (tonnes), Mined Grade and Open Pit Ounces Mined includes a year to date adjustment for the long term stockpiles mined at KCGM. Further detail is presented in Appendix 1, Table 6

## OPERATIONS

### Safety Performance

Northern Star prioritises the safety and well-being of our people. At the end of the March quarter, the 12-month Lost Time Injury Frequency Rate (LTIFR) was 0.5 (injuries per million hours worked).

**Table 3: March 2024 Group safety performance (12-month moving average)**

Term	Kalgoorlie	Yandal	Pogo	Group
TRIFR	2.7	2.9	0.9	2.4
LTIFR	0.5	0.2	0.9	0.5

### Kalgoorlie Production Centre (KCGM, Carosue Dam, Kalgoorlie Operations)

Kalgoorlie sold 227koz at an AISC of A\$1,592/oz, compared with the performance in the December quarter of 220koz at an AISC of A\$1,683/oz. Mine operating cash flow was A\$302 million. Net mine cash flow was A\$102 million after growth capital of A\$200 million.

KCGM sold 128koz at an AISC of A\$1,407/oz, compared with the December quarter of 112koz at an AISC of A\$1,602/oz. Mine operating cash flow was A\$174 million. Net mine cash flow was A\$5 million after growth capital of A\$169 million.

At KCGM, access to the high-grade Golden Pike North area increased during the quarter as planned. The East Wall remediation works are nearing completion, with full access to this high-grade zone scheduled from FY25. Mining activities focused on ore sources at Golden Pike North and Oroya Brownhill, with material movement at East Wall remediation and Fimiston South. First development ore was mined from Fimiston Underground, reflecting the team's efforts on development, production drilling and infrastructure works during the quarter. Underground ore mined is expected to increase in the June quarter.

Ore volumes processed at KCGM were lower than the December quarter due to lower plant availability. Head grade was 13% higher due to ongoing contribution of Golden Pike North material as well as lower volumes of stockpile ore processed.

In the March quarter, the Company commenced allocating mining costs associated with additions to the long-term inventory stockpiles at KCGM. Prior to the approval for the development of the KCGM Mill Expansion Project in June 2023, these stockpiles were held at nil book value. Processing of this material is scheduled to commence post-completion of the Mill Expansion in FY26. The effect of this change has resulted in a financial year-to-date adjustment being applied in the March quarter in respect of 1H, lowering AISC for KCGM by A\$71/oz to A\$1,407/oz. Refer to Appendix 1, Table 6 for further details.

At Carosue Dam, gold sold was 9% lower than the December quarter due to reduced mill availability from a planned mill shutdown. Rainfall disruptions also significantly impacted mined and milled tonnes.

At the Kalgoorlie Operations, ore was sourced primarily from the Kanowna Belle and South Kalgoorlie underground mines, with ore feed directed to the Kanowna Belle mill. The South Kalgoorlie paste plant was successfully commissioned.

**Figure 6: Kalgoorlie Production Centre - Gold Sales and AISC**

### Yandal Production Centre (Jundee, Thunderbox, Bronzewing)

Yandal sold 114koz at an AISC of A\$2,070/oz, compared with the performance in the December quarter of 125koz at an AISC of A\$1,923/oz. Mine operating cash flow was A\$101 million. Net mine cash flow was A\$37 million after growth capital of A\$64 million.

For the March quarter, Jundee delivered strong milling throughput above the nameplate capacity of 3.0Mtpa. This achievement was masked by heavy rainfall impacting mined tonnes (mine delays, haulage, sub-optimal ore blending) and an unplanned electrical outage. Looking ahead, grades are expected to significantly recover in the June quarter.

Work on the Jundee renewable energy project continued to progress. The 16MW solar farm and battery energy storage system remains on track for commissioning in the June quarter. At the 24MW wind farm, civil works were completed and the major turbine components were delivered. Commissioning remains on track for FY25.

At Thunderbox, a planned mill shutdown and SAG reline were completed during the quarter, with additional impacts from heavy rainfall (supply chain challenges, mine delays) and unplanned mill outages (screens, pumps, chutes). Works associated with improving the stability and reliability of the plant continue during the June quarter with the focus on the crushing circuit, to deliver a stable annualised mill throughput rate of 5Mtpa.

Mining activities focused on Thunderbox underground, Thunderbox open pits (D Zone and Otto Bore) plus the satellite Orelia open pit. At Wonder Underground, Northern Star Mining Services' (NSMS) business achieved industry leading development rates during the quarter with high-grade ore feed expected to be introduced into the Thunderbox mill blend during the June quarter.

Figure 7: Yandal Production Centre - Gold Sales and AISC

### Pogo Production Centre

Pogo sold 59koz at an AISC of US\$1,567/oz, compared with the performance in the December quarter of 67koz at an AISC of US\$1,367/oz. Mine operating cash flow was US\$24.7 million. Net mine cash flow was US\$14.4 million after growth capital of US\$10.3 million.

Pogo's mining and processing volumes operated at slightly below the nameplate capacity of 1.3Mtpa as a result of a planned mill shutdown and an unplanned period of reduced capacity (bypass enacted from conveyor belt damage). A major contributing factor to Pogo's elevated cost base in the March quarter was higher power prices from a mechanical issue incurred by its external electricity provider. We expect power prices to normalise late in the June quarter.

During the March quarter, the mine delivered 192kt of stope ore, corresponding to 61% of total ore mined. Grades were lower than expected due to stope mine sequencing. Grades have increased so far in the June quarter with improved higher-grade stope ore contribution (approximately two thirds of total ore given increased milling capacity).

Mine development during the quarter averaged a monthly rate of 1,592 metres, from five development jumbos, with each month achieving above the target rate of 1,500 metres.

Figure 8: Pogo Production Centre - Gold Sales and AISC

Refer to Appendix 1 for additional operating and costs statistics on the individual operations.

## DISCOVERY AND GROWTH

During the quarter, A\$32 million was invested in exploration (FY24 guidance: A\$150 million) with the focus continuing to be on significant life-of-mine extensions and in-mine growth.

The Company expects to release its Resources, Reserves and Exploration Update (as at 31 March 2024) in early May 2024.

## FINANCE

For the March quarter, the average sales price realised by Northern Star was A\$3,024/oz to generate sales revenue of A\$1,212 million.

Non-cash inventory movement for the March quarter was an expense of A\$12 million, primarily relating to the drawdown of stockpiles at KCGM. Non-cash inventory movement is used for the reconciliation of AISC to EBITDA in the Profit and Loss statement.

Northern Star has a A\$300 million on-market share buy-back program, which remains open. At the end of the March quarter, the program was 56% complete (A\$169 million or 19.1 million shares) with A\$131 million remaining. A blackout period applied from 1 April 2024 up to and including 23 April 2024 (3Q FY24 results). The program will continue to be used opportunistically.

## Cash and equivalents

At 31 March, cash and bullion totalled A\$1,076 million. Cash, bullion and investments totalled A\$1,255 million.

Table 4: Cash, bullion and investments

		Jun Q 2023	Sep Q 2023	Dec Q 2023	Mar Q 2024
Cash and cash equivalents	A\$M	\$1,133	\$1,072	\$939	\$926
Bullion <sup>(1)</sup>	A\$M	\$114	\$123	\$150	\$150
Investments <sup>(2)</sup>	A\$M	\$191	\$189	\$179	\$180
<b>Total</b>	<b>A\$M</b>	<b>\$1,438</b>	<b>\$1,384</b>	<b>\$1,268</b>	<b>\$1,255</b>

<sup>(1)</sup> Bullion includes dore which has been received by the refiner in the quarter and sold and is awaiting settlement and bullion collected by a third-party transport provider.

<sup>(2)</sup> Includes investment in convertible debenture with Osisko Mining measured at fair value as required by Accounting Standards.

The waterfall chart below highlights the March quarter movements in cash, bullion and investments (A\$M). Underlying free cash flow from operations was A\$143 million compared with A\$102 million in the December quarter and A\$74 million a year ago. Underlying free cash flow includes A\$45 million of equipment finance/leases.

Figure 9: March quarter 2024 cash, bullion and investment movements

### Banking Facilities

Northern Star holds corporate bank facilities with maturity dates of December 2027 and December 2028 across two equal tranches totalling A\$1,500 million. The facilities remain undrawn and available at quarter end.

The Company also has US\$600 million senior guaranteed notes ("Notes"). The Notes, due in April 2033, are guaranteed by certain wholly owned subsidiaries of Northern Star with interest payable semi-annually at a rate of 6.125% per annum.

### Hedging

During the quarter, 158koz of hedges were added at A\$3,529/oz while 100koz of hedges were delivered at A\$2,564/oz.

Total hedging commitments as at 31 March comprised 1.923Moz at an average price of A\$3,094/oz.

Table 5: Hedging commitments at 31 March 2024

Term	Jun H 24	Dec H 24	Jun H 25	Dec H 25	Jun H 26	Dec H 26	Jun H 27	Dec H 27	Jun H 28	Total
Ounces (oz)	100,000	240,000	270,000	285,000	300,000	240,000	217,500	180,000	90,000	1,922,500

## CORPORATE

During the quarter on 28 March, Northern Star paid the FY24 interim dividend of A15 cents per share, totalling A\$169 million cash.

Subsequent to the quarter on 11 April, the Company released an Operational Update providing preliminary production results for the quarter ended 31 March 2024 and revising the FY24 ASIC guidance to A\$1,810-1,860/oz, up from A\$1,730-1,790/oz.

The issued capital of the Company at the date of this Report comprises:

- Ordinary Fully Paid Shares (NST): 1,149,487,243
- Performance & Conditional Retention Rights (NSTAA): 11,272,378
- NED Share Rights (NSTAC): 8,488

This announcement is authorised for release to the ASX by Stuart Tonkin, Managing Director & CEO.

**Forward Looking Statements**

Northern Star Resources Ltd has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Northern Star Resources Ltd, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it.

This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever.

This announcement may contain forward looking statements that are subject to risk factors associated with gold exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, Resource or Reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

**ASX Listing Rules Disclosures**

The information in this announcement that relates to the current Ore Reserves and Mineral Resources of Northern Star has been extracted from the ASX release by Northern Star entitled "Resources, Reserves and Exploration Update" dated 4 May 2023 available at [www.nsrltd.com](http://www.nsrltd.com) and [www.asx.com](http://www.asx.com) ("Northern Star Announcement").

Northern Star confirms that it is not aware of any new information or data that materially affects the information included in the Northern Star Announcement other than changes due to normal mining depletion during the thirteen month period to 22 April 2024, and, in relation to the estimates of Northern Star's Ore Reserves and Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the Northern Star Announcement continue to apply and have not materially changed. Northern Star confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from that announcement.

**Currency Conversion Rate**

Unless stated otherwise, all currency conversions for the March quarter have been converted at a currency of AUD:USD exchange rate of 0.66.

## APPENDIX 1 - ADDITIONAL INFORMATION - OPERATIONS

(1) March quarter open pit ore mined (tonnes) and open pit ounces mined includes a FYTD adjustment for long-term stockpiles mined at KCGM over the year. This low-grade ore is scheduled to be processed following the completion of the Mill Expansion. Physicals are summarised below on a quarterly basis. A FYTD cost adjustment has been applied in the March quarter in respect of 1H, lowering AISC for KCGM by A\$71/oz (A\$9M) to A\$1,407/oz. As such, there is no change to 1H24 AISC and financial statements.

Long-term Stockpile	Units	Sep-23 Qtr	Dec-23 Qtr	Mar-24 Qtr	FYTD

Non-Cash Ore Stock & GIC Movements	US\$/oz	21	(8)	8	1	1

(1) Corporate costs are allocated to Pogo based on services provided. The remaining amount is allocated to the Australian Operations based on gold sold (production ounces).

(2) Includes US\$3.2M of insurance recovery received in Dec quarter.

(3) Pogo Operations costs are presented in USD which is the functional currency of the operation. The figures are presented in AUD in Table 1 and Table 2 above, which is the Groups presentational currency. The March quarter AUD:USD exchange rate is 0.66 and FYTD AUD:USD exchange rate is 0.65 respectively.
