(Mark One)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2023

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-39059

AVITA MEDICAL, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

85-1021707
(IRS Employer
Identification No.)

28159 Avenue Stanford
Suite 220
Valencia, CA 91355

(Address of principal executive offices and Zip Code)

Registrant's telephone number, including area code: (661) 367-9170

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol	Name of each exchange on which registered
Common Stock, par value \$0.0001 per share	RCEL	Nasdaq Capital Market

Securities registered pursuant to section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐ Accelerated filer ☐

Non-accelerated filer ☒ Smaller reporting company ☒

Emerging growth company ☒

If an emerging growth company, indicate by check mark if the registrant has selected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☐

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the voting and nonvoting common equity held by non-affiliates of the registrant was approximately \$431,861,022 on June 30, 2023, using the closing price on that day of \$17.01.

The number of shares of the registrant's \$0.0001 par value common stock outstanding as of February 7, 2024 was 25,706,662.

DOCUMENTS INCORPORATED BY REFERENCE

List hereunder the following documents if incorporated by reference and the Part of the Form 10-K (e.g., Part I, Part II, etc.) into which the document is incorporated: (1) Any annual report to security holders; (2) Any proxy or information statement; and (3) Any prospectus filed pursuant to Rule 424(b) or (c) under the Securities Act of 1933. The listed documents should be clearly described for identification purposes (e.g., annual report to security holders for fiscal year ended December 24, 1980)

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K (this “Annual Report”) and our other public filings contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. Forward-looking statements can sometimes, but not always, be identified by words such as “believe,” “expect,” “anticipate,” “contemplate,” “continue,” “estimate,” “goal,” “guidance,” “forecast,” “look forward,” “outlook,” “predict,” “project,” “plan,” “should,” “target,” “intend,” “may,” “will,” “would,” “potential” and similar expressions to future periods. Forward-looking statements are not based on historical facts but rather represent current expectations and assumptions. Factors that may influence or contribute to the inaccuracy of the forward-looking statements or cause actual results to differ materially from expected or desired results may include, without limitation: future revenues; solvency; industry market conditions; increased competition; changes in our production capacity; failure to obtain, maintain and enforce our intellectual property rights; failure to obtain and/or maintain regulatory approvals and comply with applicable regulations; the conduct or outcome of pre-clinical or clinical (human) studies; operational and management restructuring activities; our ability to find and maintain partnerships relating to collaborations, strategic arrangements and licensing arrangements; our ability to expand our sales organization to address effectively existing and new markets that we intend to target; our ability to attract and retain qualified personnel, including management; tax and interest rates; inflation, recession, financial market disruptions and other economic conditions; productivity, business process, rationalization, investment, acquisition and acquisition integrations, consulting, operational, tax, financial and capital projects and initiatives; changes in the legal or regulatory environment; the impact of a cybersecurity breach, terrorist attack, pandemic or epidemic, or natural disaster; and future working capital, costs, revenues, business opportunities, cash flows, margins, earnings and growth.

Forward-looking statements relate to the future and are subject to many risks, assumptions and uncertainties, including those risks set forth in this Annual Report in Part I, Item 1A Risk Factors and elsewhere. Although we believe the expectations reflected in the forward-looking statements are reasonable, actual results, developments and business decisions could differ materially from those contemplated by such forward-looking statements. The environment in which we operate is highly competitive, highly regulated and rapidly changing and it is not possible for our management to predict all risks, as new risks emerge from time to time.

All subsequent written and oral forward-looking statements by or attributable to us or persons acting on our behalf are expressly qualified in their entirety by these factors. We undertake no obligation to publicly update or revise any forward-looking statements whether as a result of new information, future developments or otherwise, except as may be required by law.

As used herein, unless the context otherwise requires, references to “we,” “our,” “us,” “the Company,” and “AVITA Medical” refer to AVITA Medical, Inc., a Delaware corporation, and its subsidiaries (including AVITA Medical Pty Limited (“AVITA Australia”).

Currency

In this Annual Report, all references to “dollars” or “\$” are to the currency of the United States.

PART I

Item 1. BUSINESS

OVERVIEW

AVITA Medical is a commercial-stage regenerative medicine company transforming the standard of care in wound care management and skin restoration with innovative devices. At the forefront of our portfolio is our patented and proprietary RECELL® System (“RECELL System” or “RECELL”), approved by the United States Food & Drug Administration (“FDA”) for the treatment of thermal burn wounds and full-thickness skin defects, and for repigmentation of stable depigmented vitiligo lesions. RECELL harnesses the regenerative properties of a patient’s own skin to create an autologous skin cell suspension, Spray-On Skin™ Cells, delivering a transformative solution at the point of care. This breakthrough technology serves as the catalyst for a new treatment paradigm enabling improved clinical outcomes.

CORPORATE HISTORY

AVITA Australia, the former parent company of AVITA Medical, was founded in December 1992. AVITA Australia began trading its American Depositary Shares on the Nasdaq Capital Market (“Nasdaq”) under the symbol “RCEL” on October 1, 2019. Today, our common stock trades on the Nasdaq under the symbol “RCEL” and our CHESS Depositary Interests (“CDIs”) are traded on the ASX under the symbol “AVH.”

STRATEGY

AVITA Medical is focused on becoming the leading provider of regenerative medicine addressing unmet medical needs in burn injuries, full-thickness skin defects, and in skin repigmentation, such as vitiligo. We will continue to drive commercial revenue growth to generate positive cash flow and achieve operating profit. To achieve these objectives, we intend to:

- Become the standard of care in the U.S. burns industry by increasing RECELL penetration and adoption in burn centers
- Expand into U.S. trauma centers to increase utilization of RECELL for the treatment of full-thickness skin defects
- Launch RECELL GO™ following FDA approval to increase market adoption and expand our customer base
- Expand our global presence within the European Union and Australia through the exclusive use of third-party distributors
- Continue to build upon commercial activities in Japan through our partnership with COSMOTEC Company, Ltd (“COSMOTEC”) with our current Pharmaceuticals and Medical Devices Act (“PMDA”) approval for RECELL with an indication in burns
- Continue to pursue business development opportunities that are complementary to our core RECELL System indications and/or our targeted markets, such as the agreement with Stedical Scientific, Inc. Refer to Footnote 20 for further details
- Establish commercial payor coverage for the RECELL System in the U.S. for the treatment of vitiligo lesions; initial phase of coverage expected during the fourth quarter of 2025

PRODUCT PORTFOLIO

RECELL Platform

RECELL is a single use, stand-alone, battery operated, autologous cell harvesting device containing enzymatic and buffer solutions, sterile surgical instruments, and actuators. RECELL is FDA approved for the treatment of thermal burn wounds and full-thickness skin defects, and for repigmentation of stable depigmented vitiligo lesions. The platform technology of the RECELL System enables a thin split-thickness skin sample from the patient to be processed and prepared, producing an autologous cellular suspension called Spray-On Skin Cells. These Spray-On Skin Cells are prepared at the point of care in as little as 30 minutes, providing a new way to treat thermal burn wounds and full-thickness skin defects.

The regenerative skin cell suspension includes the patient's own skin cells, including keratinocytes, fibroblasts, and melanocytes, all of which play critical roles in skin regeneration. The application of these cells stimulates healing and repigmentation throughout the wound bed. The patented and proprietary platform technology underlying the Spray-On Skin Cell suspension originated in Australia, based on the seminal work of Professor Fiona Wood and fellow scientist Marie Stoner. In September 2018, the FDA approved RECELL as a Class 3 device through a premarket approval (“PMA”) for the treatment of second and third-degree

acute thermal burn injuries in patients 18 years and older. Following receipt of our original PMA, we commenced commercialization of the RECELL System in January 2019 in the United States.

In June 2021, the FDA approved expanded use of RECELL in combination of meshed autografting for acute full-thickness thermal wounds in both pediatric and adult patients, and for full-thickness thermal burns greater than 50% total body surface area (“TBSA”). As a result of having achieved an expanded indication for use in pediatric burns, the Biomedical Advanced Research and Development Authority (“BARDA”) funded U.S. Pediatric Burns trial has been closed to new enrollment.

In February 2022, the FDA approved a PMA supplement for the RECELL Autologous Cell Harvesting Device, an enhanced ease-of-use device aimed at providing clinicians a more efficient user experience and streamlined workflow.

On June 7, 2023, the FDA approved a PMA supplement for full-thickness skin defects based on results from our pivotal trial for soft tissue repair and reconstruction. Following this approval, we commenced a commercial launch on June 8, 2023.

On June 16 2023, the FDA approved a PMA application for the repigmentation of stable depigmented vitiligo lesions. Following FDA approval, the Company established a three-step framework to secure reimbursement. The first step is a post-market study called, TONE. TONE will evaluate repigmentation using the RECELL device and will also seek to measure the improvement in the quality-of life following treatment of stable vitiligo with RECELL. We expect to submit the study for publication by the end of 2024. The second step is to capture the longitudinal healthcare costs for a vitiligo patient through a health economics, which is also expected to be submitted for publication by the end of 2024. Following publication of both studies, it is expected that conversations with commercial payors will begin during the second quarter of 2025. Subsequently, we anticipate commercial coverage will be rolled out on a regional basis, considering state and geographic factors. The initial phase of coverage is likely to begin in the fourth quarter of 2025, with appropriately sized commercial support as coverage is established.

Additionally, on June 29, 2023, we submitted a PMA supplement to the FDA for RECELL GO™. RECELL GO maintains the FDA Breakthrough Device designation from predecessor devices. On September 29, 2023, the Company received notice from the FDA that additional information regarding the PMA supplement is required for the continuation of a substantive review for RECELL GO. This request, which is not unique to the Breakthrough Device Program, placed the application file on hold while the Company addresses the FDA's questions. A category of questions posed by the FDA requires additional in-house testing, which is substantially completed. Consequently, we expect to submit a response to the FDA no later than February 28, 2024. Upon the submission to the FDA, the application will reenter the 180-day cycle, with 90 days remaining in the review period. This timing would imply FDA approval on May 30, 2024, with a product launch on May 31, 2024.

TARGET MARKETS

Burns

Acute thermal burns are life-threatening and debilitating injuries that are among the most challenging and expensive to manage. These injuries require complex surgical procedures, long and costly hospitalization, and have a high potential for clinical complications and requirement for rehabilitation and scar treatment. In the U.S., approximately 40,000 people have burn injuries severe enough to require hospital admission annually, and it is estimated that 3,300 patients die each year. The majority of patients treated on an inpatient basis in the U.S. are treated in specialized burn centers.

Severe burns (typically defined as second- and third-degree) are commonly treated with autologous split-thickness skin grafts (“STSGs”) to achieve definitive closure of the burn wound. In a STSG, or autograft, donor skin is harvested from a healthy area of the patient’s skin. The donor skin is then typically perforated into a mesh that can be expanded and transferred to cover the prepared burn injury. Treatment with STSG results in additional trauma for the patient due to creation of a new donor site wound. Although the use of STSG has been a standard treatment for more than 50 years, autografting is associated with significant pain, itching, infection, dyschromia, dyspigmentation, delayed healing, and hypertrophic scarring of the donor site.

The clinical benefits of earlier wound closure are well recognized and include increased survival, reduced hospital length of stay, decreased pain duration, and reduced infection-related complications. However, in large burn injuries, the patient may have insufficient donor skin available to allow for immediate and complete treatment of the entire burn injury area when using traditional grafting techniques. The lack of available healthy donor skin in patients with large burn injuries is often the central problem impacting time to autografting and definitive closure of the wounds. In extensively burned patients, surgeons often must wait until the donor sites have healed so they can re-harvest from the sites, resulting in delays in treatment and closure, requiring multiple procedures, and extending hospital stay. While waiting for donor skin, the burn wounds may be temporarily covered by allogeneic skin (allograft, cadaver skin) or xenograft (typically pig skin). The overall cost of treatment with STSG is expensive - for example it would cost

approximately \$579,000 and 59.4 days in hospital for a patient with a 40% TBSA mixed-depth burn injury to recover and return to normal day to day activities.

The pivotal studies leading to the RECELL System's FDA PMA for the treatment of acute thermal burns demonstrated that the RECELL System treated burns used 97.5% less donor skin when used alone in second-degree burns, and 32% less donor skin when used with autograft for third-degree burns, compared to standard of care autografting. In these studies, a statistically significant reduction in donor skin required to treat burn patients with the RECELL System was realized without any associated compromise to healing or safety outcomes. Donor site outcomes from the clinical trial for second-degree burns also revealed a statistically significant reduction in patient-reported pain, increased patient satisfaction and improved scar outcomes.

Retrospective studies demonstrated that fewer autografting procedures are required for definitive closure of full-thickness burns when using the RECELL System versus conventional autografts. In pediatric cases (N = 284), treatment with the RECELL System resulted in a 56% reduction in the mean number of autograft procedures required compared to National Burn Repository ("NBR") data. Additionally, in adult patients with greater than 50% TBSA (N=318), the RECELL System resulted in a 60% reduction in the mean number of autograft procedures versus NBR data.

In addition to robust clinical data, RECELL has proven health economic benefits and a compelling cost-effectiveness model which shows that treatment using the RECELL System for deep partial-thickness burns reduces total treatment costs by an average of 26%, or approximately \$37,000, for patients with 10% TBSA and approximately \$150,000, for patients with 40% TBSA. For full-thickness burns, treatment using the RECELL System reduced total treatment cost by 3%, or approximately \$6,000 for patients with 10% TBSA and by 42% or approximately \$243,000, for patients with 40% TBSA. These cost reductions are attributed to decreasing the length of hospital stay, reducing the number of procedures required to close the burn wound, and minimizing the donor site size and associated wound care. All of these cost savings estimates are net of the cost of the RECELL System.

A budget impact model was developed and has been used to calculate the annual budget impact of current standard of care for the treatment of burns versus treatment using the RECELL System for a burn center with 200 patients. The model shows that treatment using the RECELL System reduces annual total treatment costs from approximately \$39.4 million to \$32.6 million, saving 17% or approximately \$6.8 million per year. In addition, real world evidence has been published by the Doctors at IQVIA and funded by the Company and BARDA indicating that these economic savings are demonstrated in a wide range of burn sizes.

The market for the treatment of burns in the U.S. is highly concentrated, with approximately 140 burn centers and approximately 300 burn surgeons who treat the majority of severe burn patients in the country (i.e., ~75%). Accordingly, our target market was predominantly burn centers, of which half are trauma centers. With FDA approval for full-thickness skin defects, we are expanding into these trauma centers, with the goal of capturing approximately 30% of RECELL-eligible burn injuries that are treated outside of dedicated burn centers.

Looking ahead, our goal is to establish RECELL as the standard of care for any burn injury that requires grafting for patients with 5% TBSA injury or greater. In the U.S., we estimate that there are approximately 35,000 patients annually that could benefit from our technology. Each RECELL System can treat up to 10% TBSA, and many patients require more than one device.

AVITA Medical has a policy of providing the RECELL System to a provider only after they have been certified, which includes extensive training in the use of the product and in the aftercare of the patient. In general, we have found that most U.S. burn centers follow the industry-standard process of evaluating the RECELL System and then taking it through their hospital's Value Analysis Committee ("VAC") prior to purchasing. In general, most surgeons follow a typical adoption curve, starting from where they see the greatest economic and clinical value, which is the use of RECELL for treatment of larger burns. With time and continued use, surgeons typically progress to adoption of RECELL for smaller, less severe burns and facial burns.

In the U.S., several existing reimbursement codes were in place prior to the commencement of commercial sales of the RECELL System. For inpatient treatment of burn patients, U.S. hospitals are reimbursed under Diagnosis Related Group ("DRG") Codes based on diagnosis of a patient's injuries. For physicians, Current Procedural Terminology ("CPT") codes for use in RECELL System procedures are recommended by the American Burn Association and are the same for both inpatient and outpatient use. In August 2020, we filed a Transitional Pass-through Payment Application ("TPT") with The Centers for Medicare & Medicaid Services ("CMS") to support a separate, additional Medicare payment for use of the RECELL System in the Outpatient Setting. On November 3, 2021, the Company was informed that CMS approved our TPT submission with the code effective as of January 1, 2022. The new "C" code provides additional payment which offsets the cost of the device in hospital outpatient facilities and ambulatory surgical centers for Medicare beneficiaries over a 2-to-3-year period before converting to a permanent code. Following the granting of the code, the Company is working with commercial carriers to ensure broader coverage. The new "C" code is not indication specific and lays the foundation for growth in other indications outside of acute thermal burns (such as soft tissue repair).

Full-Thickness Skin Defects

A wound is a breach in the integrity of the skin, with full-thickness wounds extending through the dermal layer to deeper tissues. Full-thickness skin defects include traumatic avulsion (e.g. degloving), surgical excision (e.g. necrotizing soft tissue infection), or resection (e.g., skin cancer). The cause or origin of the wound directly impacts healing potential, response to treatment options, and likely complications.

Traumatic Wounds. Traumatic wounds are subdivided by mechanism of injury into lacerations, abrasions, avulsions, crush, penetrating, or bites. Traumatic wounds often arise in high-energy circumstances and result in extensive zones of injury with damage to multiple tissue types. Missing cutaneous tissue, macerated edges, and contamination are common and can complicate wound healing. In the U.S., we estimate there are approximately 122,000 annual procedures that are eligible for treatment with RECELL.

Surgical Wounds. Surgical wounds are precise incisions intentionally created to access underlying organs, relieve compartmental pressure, excise diseased cutaneous tissue (infected or severely inflamed or necrotic), or to harvest tissue for autografting (flaps and grafts). In the U.S., we estimate there are approximately 12,500 annual procedures that are eligible for treatment with RECELL.

Surgical Excisions for Cancer. Surgical excisions for cancer are procedures used to remove and treat various skin cancers. In the U.S., we estimate there are approximately 136,000 annual procedures that are eligible for treatment with RECELL.

Chronic Wounds. Chronic wounds are wounds that do not heal within an expected time frame. These types of wounds include diabetic foot ulcers, venous leg ulcers, pressure ulcers, and non-pressure ulcers. In the U.S., we estimate there are approximately 128,000 annual procedures that are eligible for treatment with RECELL.

Similar to the burns indication, full-thickness skin defects are associated with large areas of skin loss and as such, some of the top unmet needs identified by surgeons are closely aligned:

- Reduced donor skin harvesting
- Reduced scarring
- Reduced pain
- Uniform pigmentation with surrounding skin

Given the interest to reduce donor skin harvesting, just as with the burns indication, we designed a clinical trial to demonstrate the use of less donor skin without compromising healing outcomes relative to conventional autografting. The trial was essentially a repeat of the successful previous trial in full-thickness burns, but with a population of patients with full-thickness, non-burn injuries. The study design included two co-primary endpoints based on pairwise comparisons where each subject received both RECELL treatment and standard of care treatment: one endpoint had a hypothesis of superiority for donor skin sparing and the other co-primary endpoint had a hypothesis of non-inferiority for healing. Both co-primary endpoints were met, demonstrating statistically significant donor sparing and non-inferior healing outcomes with RECELL versus standard of care, meaning less skin from the patient is required to repair and close the wound without compromising the healing outcomes relative to convention autografting. In addition to these results, RECELL has been successfully used outside the U.S. for many years and there exist several case reports on the treatment of traumatic injuries that have been the subject of peer-reviewed scientific publications and presentations at medical conferences.

In the U.S., we estimate that there are approximately 400,000 full-thickness skin defect procedures annually that are eligible for treatment with RECELL. The majority of our current burn accounts represent opportunities for use of RECELL in the treatment of full-thickness skin defects. In the second quarter of 2023, we expanded our commercial organization from 30 to 70. Our team is targeting approximately 800 acute wound accounts, representing both burn and trauma accounts. In the first half of 2024, we plan to further expand our commercial organization from 70 to 100.

The approval for the treatment of full-thickness skin defects represents a significant opportunity in which we are leveraging our existing resources while also creating synergies with the burns market. Approximately 50% of the U.S. burn centers are classified as trauma centers. Those trauma centers currently utilizing RECELL are now able to use RECELL to treat full-thickness skin defects as these centers have already approved RECELL through their respective VACs. Further, we are expanding our burn market opportunity by virtue of our approval for full-thickness skin defects as we are extending our reach to include trauma centers.

We anticipate RECELL being used in both the inpatient & outpatient settings across a wide range of wound sizes. From a reimbursement perspective, the same DRG code that is currently being used to treat inpatient burns is now being applied for the

treatment of full-thickness skin defects. Additionally, the outpatient TPT “C” code we have been granted for RECELL can also be utilized for the treatment of full-thickness skin defects in the outpatient setting.

Vitiligo

Vitiligo is a disease that causes the loss of skin pigmentation, or color, in patches. The extent of color loss from vitiligo is unpredictable, can affect the skin on any part of the body, and may also affect hair and the inside of the mouth. Vitiligo occurs when melanocytes, the pigment-producing skin cells, die or stop producing melanin, the pigment that gives skin, hair, and eyes color. Vitiligo is believed to be an autoimmune disorder in which a patient’s immune system attacks and destroys the melanocytes in the skin. It may also be caused by heredity factors or a triggering event, such as sunburn, stress, or exposure to industrial chemicals. Vitiligo affects people of all skin types, but it may be more noticeable in people with darker skin. It is estimated that worldwide vitiligo prevalence is between 0.5 to 2% of the population. The condition is not life-threatening or physically painful, but it can significantly alter physical appearance and have negative emotional and psychological consequences, thus causing a cascade of medical conditions with associated costs.

Vitiligo cannot be cured at present, and treatments generally fall into one of two categories:

1. Treatments to arrest the spread of vitiligo, such as steroid creams and non-steroidal anti-inflammatory creams. There are also a number of therapies under development designed to target the underlying autoimmune disease. One challenge in terms of achieving the desired patient outcome is that stopping the spread of vitiligo may not restore pigmentation to the areas already damaged.
2. Treatments to restore pigmentation include skin grafting, laser phototherapy (with and without topicals), and Melanocyte-Keratinocyte Transplantation Procedure (“MKTP”). MKTP requires expensive and substantial laboratory equipment and is currently only available in a handful of locations in the U.S.

RECELL does not treat underlying autoimmune disease. Rather, it works to restore pigmentation.

According to the FDA panel in 2021, there is a high level of depression, anxiety, and negative quality of life among vitiligo patients. Interest in vitiligo treatment tends to increase in individuals who have lesions in more visible areas (such as the face, neck and hands) as well as the younger female population. In 2022, over 400,000 patients pursued treatment for vitiligo in the U.S. We estimate that there are approximately 1.3 million people in the U.S. with stable vitiligo and a total addressable market of approximately \$5 billion. Vitiligo rates a 7.61 on the Dermatology Life Quality Index (“DLQI”), which is in the same range of other aesthetic dermatological disease analogs which receive healthy positive reimbursement such as Rosacea (5.2), Psoriasis (9.3) and Atopic Dermatitis (12.79).

The market is expected to grow, especially over the next decade, with the advent of novel treatment options including oral and topical Janus Kinase (“JAK”) inhibitors, such as Opzelura. Although these new products will both stabilize and re-pigment some patients, it is anticipated that many patients will need additional modes of treatment for re-pigmentation. Products (immunosuppressants) working to stabilize vitiligo and RECELL (working to restore pigmentation) are complementary. Further, large pharmaceutical companies with immunosuppressant assets in development will likely invest in disease awareness campaigns which will further grow consumer awareness and the market.

Following FDA approval, we established a three-step framework to secure reimbursement. The first step is a post-market study called, TONE. The second step is to initiate a health economics study to capture the longitudinal healthcare costs for a vitiligo patient. We expect to submit these two studies for publication by the end of 2024. Following publication of these studies, we plan to start conversations with commercial payors during the second quarter of 2025. Consequently, we anticipate commercial coverage will be rolled out on a regional basis, considering state and geographic factors. The initial phase of coverage is likely to begin in the fourth quarter of 2025, with appropriately sized commercial support as coverage is established.

INTERNATIONAL STRATEGY

In international markets, the RECELL System has received various approvals and registrations to promote skin healing in a wide range of applications including, burns, full-thickness skin defects, and vitiligo. These endorsements include TGA registration in Australia, CE mark approval in Europe, and PMDA approval in Japan under the Pharmaceuticals and Medical Devices Act for burns. Our global commercialization strategy is focused on Australia, the European Union, and Japan.

In February 2019, we entered into a partnership with COSMOTEC, an M3 Group company, to market and distribute the RECELL System in Japan. Following the approval of reimbursement pricing by the Japanese Ministry of Health, Labor, and Welfare, COSMOTEC began the commercial launch of RECELL in September 2022.

As part of our strategic growth plans, we plan to expand our global presence within the European Union and Australia through the exclusive use of third-party distributors. In November 2023, we entered into our first European distribution partnership with PolyMedics Innovations GmbH. PolyMedics Innovations will lead our expansion into Germany, Austria, and Switzerland.

We plan to actively identify new distribution partners in our focused markets over the next 6 to 12 months.

RESEARCH & DEVELOPMENT

Our research and development activities are focused on advancing our innovative products and building a comprehensive portfolio of solutions, as well as developing clinical applications to advance the management of wound care. Additionally, we continue to conduct clinical studies to provide further efficacy and health economic evidence.

We continue to commit resources to product development to ensure the RECELL system continues to evolve and that we maintain robust patent protection. In June 2023, we submitted a PMA supplement to the FDA for RECELL GO™. RECELL GO is comprised of a reusable durable base unit and a single-use sterile cartridge. The RECELL GO system aims to control the current manual process of cell disaggregation and filtration, as well as soak time, reducing variability across medical providers compared to the current device. This revolutionary design will also reduce training requirements, allowing us to leverage our sales team more effectively. In turn, we believe the reduction in training medical professionals will lead to increased adoption across our indications and the broader market. Additionally, RECELL GO offers us an opportunity to expand our intellectual property portfolio. With each iteration of our RECELL System, we anticipate preservation of the therapeutic power of Spray-on Skin Cells, deployed in devices that become appropriate for use in an increasing range of clinical settings. This is particularly important as we aim to enter the dermatology space, where there is a shift toward an emphasis on the volume of patients treated in a day.

RECELL GO maintains the FDA Breakthrough Device designation from predecessor devices. On September 29, 2023, we received notice from the FDA that additional information regarding the PMA supplement is required for the continuation of a substantive review for RECELL GO. This request, which is not unique to the Breakthrough Device Program, placed the application file on hold while we address the FDA's questions. A category of questions posed by the FDA requires additional in-house testing. The testing is already underway and we expect to submit a response to the FDA no later than February 28, 2024. Upon submitting a response to the FDA, the application will reenter the 180-day cycle, with 90 days remaining in the review period. This timing would imply a product launch on May 31, 2024.

TONE will evaluate repigmentation using the RECELL device and will also seek to measure the improvement in the quality-of-life following treatment of stable vitiligo with RECELL. TONE, including publication, is expected to be complete by the end of 2024. The second step is to initiate a health economics study to capture the longitudinal healthcare costs for a vitiligo patient, which is expected to be completed by the end of 2024. The purpose of these studies is to demonstrate how treating vitiligo with RECELL can significantly reduce the lifetime healthcare cost of patients. As a result, commercial payors will stand to benefit economically by providing coverage of RECELL for the repigmentation of stable depigmented vitiligo lesions. Following publication of these studies, we expect conversations with commercial payors to begin during the second quarter of 2025. Commercial coverage will be rolled out on a tiered basis based on state and geographic factors. The Company anticipates that the initial phase of reimbursement coverage will likely begin in the fourth quarter of 2025, with appropriately sized commercial support as coverage is established.

SALES AND MARKETING

Our commercial organization is focused on clinical case support, staff training, and building awareness to further expand interest in the clinical and economic benefits of RECELL. It is not uncommon in the treatment of wounds to have rotating staff and it is our commitment for all those working with RECELL to be comfortable with the technology both during the procedure as well as during aftercare.

We sell RECELL in the U.S. through our direct commercial organization of 70 individuals, which consists of 10 managers, 40 regenerative tissue specialists, and 20 clinical training specialists. Our commercial organization is composed of highly experienced medical sales representatives as well as former burn and trauma nurses. This organization covers both thermal and non-thermal wound accounts. We plan to further expand our commercial organization to 108 in the first half of 2024.

HUMAN CAPITAL

AVITA Medical's investment in the U.S. commercial success of RECELL has led to the development of best-in-class teams supporting sales, clinical education and training, reimbursement, medical affairs, as well as corporate management and infrastructure. As of December 31, 2023, we had 207 full-time and part-time employees. As of December 31, 2023, 99% of our workforce was based

in the United States, with a significant number of our management and professional employees having prior experience with leading medical product, biotech, or pharmaceutical companies. None of our employees are covered by collective bargaining agreements.

We embrace differences, diversity and varying perspectives amongst our employee base and are proud to be an equal opportunity employer. We do not discriminate based on race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, military or veteran status, sexual orientation or any other protected characteristic established by federal, state, or local laws. A diverse workforce as well as an inclusive culture and work environment are fundamentally important and strategic to us, beginning with our Board of Directors and CEO and extending to all levels of the Company. As of December 31, 2023, the Directors of the Company were 28.5% female, our senior executive team was 30% female and our total employee base was 50.2% female. In addition to promoting gender diversity, we encourage ethnically diverse talent when recruiting as well as providing employee training and development focusing on workplace diversity and inclusion.

INTELLECTUAL PROPERTY

We seek to protect our intellectual property, core technologies, and other know-how through a combination of patents, trademarks, trade secrets, confidentiality agreements, licenses, and IP assignments with our employees, consultants, business partners, suppliers, customers, and others. Additionally, we rely on our research and development program, clinical trials, know-how and marketing programs to advance our products and product candidates, and to expand our intellectual property rights.

As powerful complements to our IP rights, we also believe that the regulatory approval processes around the world will continue to provide additional and significant barriers to entry against meaningful competition.

As of December 31, 2023, AVITA Medical's patent portfolio comprised 22 patent grants and 31 pending patent applications worldwide, with patent coverage either secured or in progress in the U.S., China, Japan, Australia, Brazil, Canada, France, Germany, Hong Kong, Italy, Spain, the United Kingdom, and at the European Patent Office ("EPO").

AVITA Medical's patent portfolio covers the original RECELL product, all-in-one RECELL, RECELL GO, methods of using the RECELL System, methods of evaluating the therapeutic potential of Regenerative Epidermal Suspension ("RES"), a cell-free and allogeneic RES supernate, and methods of preparing a cell suspension with exogenous agents to promote wound healing. We expect that our research and development pipeline, strategic partnerships, and improvements to the RECELL System and RES will result in additional and diverse patent applications in the next calendar year.

In 2019, AVITA Medical filed a Patent Term Extension ("PTE") application with the U.S. Patent and Trademark for U.S. Patent No. 9,029,140, which covers the RECELL System, as a result of patent term lost to the FDA regulatory process. The PTE application was approved, and the patent term of U.S. Patent No. 9,029,140, has been extended to April 9, 2024. AVITA Medical's other patents have expected expiration dates ranging from 2032 to 2033, while AVITA Medical's pending patent applications, if granted, would have expiration dates ranging from 2032 to 2042.

Additionally, AVITA Medical owns and defends a global trademark portfolio comprising 142 registered trademarks, common or state law trademarks, and pending trademark applications, including "AVITA Medical," the AVITA Medical logo, "RECELL," "Spray-On Skin," the RECELL System logo, "RES," and others in the U.S. and international markets. In addition to patent and trademark protection, the Company also relies on trade secrets, know-how, and other proprietary information to develop and maintain our competitive position. We have robust confidentiality and invention disclosure procedures in place that incentivize our employees to innovate and allow us to maintain our rights to AVITA Medical innovations.

FACILITIES

AVITA Medical leases approximately 17,500 square feet of administrative and office space in Valencia, California that is currently leased through October 31, 2026. The Company operates an FDA-registered production plant in Ventura, California, in a 27,480 square foot facility that is currently leased through September 30, 2027. The Ventura facility has one 3-year option to extend the lease, at our sole option, which allows for a total lease extension period through September 30, 2030. The Company also has an administrative office lease in Irvine, California of approximately 10,700 square feet that is currently leased through the end of July 2028. We also lease a limited amount of incubator space in Irvine, California for scientific research and product development activities.

MANUFACTURING, SUPPLY AND PRODUCTION

We produce the RECELL System in the Ventura facility under current Good Manufacturing Practices (“cGMP”) and per ISO 13485, which also meets the regulatory requirements of other jurisdictions in which we sell the RECELL System. We maintain a state of regulatory compliance and inspection readiness at all times, and any future material changes to our production processes for the RECELL System will be submitted for approval to the FDA and regulatory authorities in other jurisdictions as required.

Within the Ventura facility we perform the final manufacturing, assembly, packaging, and warehousing of the RECELL System. Also included within the Ventura facility is a secure controlled-temperature warehouse that complies with the vendor-managed inventory (“VMI”) requirements of the contract with BARDA. The VMI contract with BARDA terminated on December 31, 2023.

AVITA Medical sources multiple components, sub-assemblies, and materials from third-party suppliers, who are required to meet our cGMP quality specifications and associated regulatory requirements. To ensure continuity of supply, we maintain multiple sources of supply for key components, subassemblies and materials, and the majority of critical raw materials and services have multiple qualified suppliers. While a small number of materials remain single sourced, we are actively working to qualify and validate additional suppliers for these materials as we continue to evaluate methods of removing risk from the supply chain for the RECELL System. We believe that our current manufacturing capacity at the Ventura facility is sufficient to meet the expected commercial demand for the RECELL System for burns, as well as other indications under development, for the foreseeable future.

AVITA Medical serves the U.S. burn market by shipping the RECELL System directly from our Ventura facility to U.S. burn centers. From time-to-time we may also store small quantities of the RECELL System at satellite distribution sites within the U.S. to better support access of the RECELL System to our U.S. customers.

BARDA CONTRACT

We have a contract with BARDA, under the Assistant Secretary for Preparedness and Response, within the U.S. Department of Health and Human Services. The contract provided funding for the development of the RECELL System. We entered into the contract on September 29, 2015, with the original contract period ending on December 31, 2023. We have executed a contract modification with BARDA to extend the period of performance to September 28, 2025.

Under the original contract, BARDA has provided funding and technical support for the development of the RECELL System. BARDA funded the completion of two randomized, controlled pivotal clinical trials, as well as Compassionate Use and Continued Access programs, and development of the health economic model demonstrating the cost savings associated with the RECELL System. BARDA exercised a contract option to fund a randomized, controlled clinical trial for a pediatric early intervention study which commenced enrollment in March 2020, and closed to enrollment in June 2021, subsequent to FDA-approval of an expanded RECELL indication for use that includes treatment of pediatric patients. The BARDA contract also supported the Company’s clinical trial in soft-tissue reconstruction, which led to the full-thickness skin defect indication. Also included in the BARDA contract was a provision for procurement of the RECELL System under a vendor-managed inventory system to bolster emergency preparedness in the amount of \$7.6 million and an additional \$1.6 million to support the logistics of emergency deployment of RECELL Systems for use in mass casualty or other emergency situations. We were contracted to manage this inventory of product until the earlier of the federal government requesting shipment or at contract termination on December 31, 2023. As of December 31, 2023, we had received cumulative payments of \$40.3 million under the original BARDA contract. Under the new contract, BARDA shall have access to AVITA Medical’s RECELL inventory in the event of a national emergency. BARDA shall pay for the devices requisitioned under this inventory along with a nominal annual maintenance fee to ensure first right of access.

COMPETITION

We currently believe that there is no direct competition for the RECELL system. Additionally, our innovative technology is supported by robust intellectual property rights and we believe that regulatory approval processes around the world will continue to provide additional and significant barriers to entry against meaningful competition. Despite these meaningful competitive advantages, the medical device, biotechnology, and pharmaceutical industries are highly competitive and subject to rapid advancements in technology, as well as changes in practice. In the future, we may face competition from various sources, including medical device, pharmaceutical, and wound care companies, academic and medical institutions, governmental agencies, medical practitioners, and public and private research institutions, among others. Consequently, any product that we successfully develop and/or commercialize will compete with both existing therapies and any new therapies that may emerge in the future.

In the burns and non-burn wound markets, our indirect competitor is primarily split-thickness autografts. While RECELL complements autografts for the treatment of various wound injuries, split-thickness autografts represent the traditional surgical

procedure and the current standard of care. However, based on our clinical trials, we believe that the RECELL system offers sustainable competitive clinical and economic advantages over the traditional surgical procedure. Additionally, in the burns market, Vericel Corporation markets Epicel® as a permanent skin replacement for deep-dermal or full-thickness burns; however, Epicel is a cultured epidermal autograft grown ex vivo and exclusively used to treat burns comprised of greater than or equal to 30% of TBSA.

GOVERNMENT REGULATIONS

The production and marketing of the RECELL System and any additional product candidates developed in future ongoing research and development activities are subject to regulation by numerous governmental authorities including the FDA in the U.S. and similar agencies in other countries throughout the world. Pursuant to its authority under the Federal Food, Drug, and Cosmetic Act (the “FD&C Act”), the FDA has jurisdiction over medical devices in the U.S. The FDA regulates the design, development, manufacturing, and distribution of medical devices to ensure that medical products distributed domestically are safe and effective for their intended uses. The FD&C Act classifies medical devices into one of three categories based on the risks associated with the device and the level of control necessary to provide reasonable assurance of safety and effectiveness. Devices deemed by the FDA to pose the greatest risk, such as life-sustaining, life-supporting or implantable devices, or devices deemed not substantially equivalent to a previously 510(k) cleared device are categorized as Class III. These devices typically require submission and approval of a PMA. The RECELL System is categorized as a Class III medical device, and in September 2018 the FDA granted our PMA for use in the treatment of acute thermal burns in patients 18 years and older. In June 2021, the FDA approved a supplement to our PMA to expand the use of RECELL in pediatric patients with full-thickness burns. In June 2023, the FDA approved a supplement to our PMA to expand the use of RECELL for full-thickness skin defects and an original PMA to expand the use of RECELL for the repigmentation of stable depigmented vitiligo lesions.

To support PMA supplements in the U.S. or applications for approval in other regions, the completion of additional clinical and non-clinical studies and supporting development activities will likely be required. Clinical trials can take many years to complete and require the expenditure of substantial resources. The length of time varies substantially according to the type, complexity, novelty and intended use of the product candidate. We cannot make any assurances that once clinical trials are completed by us or a collaborative partner, that we will be able to submit as scheduled a marketing approval request to the applicable governmental regulatory authority, or that such request and application will be reviewed and cleared by such governmental authority in a timely manner, or at all. Although we intend to make use of fast-track and abbreviated regulatory approval programs when possible and commercially appropriate, we cannot be certain that we will be able to obtain the clearances and approvals necessary for clinical testing or for manufacturing and marketing our product candidates. Delays in obtaining regulatory approvals could adversely affect the development and commercialization of our product candidates and could adversely impact our business, financial condition, and results of operations. During the course of clinical trials and non-clinical studies, product candidates may exhibit unforeseen and unacceptable safety considerations. If any unacceptable side effects were to occur, we may, or regulatory authorities may require us to, interrupt, limit, delay or abort the development of our potential products.

Any products manufactured or distributed by us pursuant to regulatory approvals are subject to continuing regulation by the FDA and similar agencies in other countries, including maintaining records supporting manufacturing and distribution under cGMP regulations, periodic reporting, advertising, promotion, compliance with any post-approval requirements imposed as a conditional of approval, recordkeeping and reporting requirements, including adverse events experiences. After approval, material changes to the approved product, such as adding new indications or other labeling claims, or changes to the manufacturing process, are subject to prior approval by FDA and other regulatory agencies. Medical device manufacturers and their subcontractors are required to register their establishments with the FDA, certain state agencies and international agencies. Subcontractors are subject to periodic announced and unannounced inspections by the FDA and other agencies for compliance with cGMP requirements. We have established processes in place for categorization of vendor criticality and the associated activities for qualification and monitoring of vendors. These activities include but are not limited to, requiring certification of supplier in conformance to relevant cGMP regulations and other FDA and international agency regulatory requirements, approved supplier lists, and regular Company conducted audits. In addition, all goods and services purchased from suppliers by us must be purchased from only those suppliers on the approved supplier list. Furthermore, the Company itself will continue to comply with all relevant FDA requirements and regulations and any applicable international agency regulatory requirements in its continued manufacturing and promotion of its FDA approved commercial product.

In addition to FDA approval in the U.S., the RECELL System has received various approvals and registrations in international markets. The RECELL System is TGA-registered in Australia, received CE-mark approval in Europe, and received Japan’s Pharmaceuticals and Medical Devices Act (PMDA) approval for burns in Japan.

HEALTHCARE LAWS AND REGULATIONS

AVITA Medical is a manufacturer of a medical device and therefore we are subject to regulations by the FDA and various federal and state healthcare laws and regulations. These regulations govern our advertising and promotional practices, our interactions

with healthcare providers (“HCPs”), and our reporting of any payments made to HCPs. AVITA Medical is committed to the highest standards of business conduct in accordance with the AdvaMed Code of Ethics.

Interactions with Healthcare Providers

Providing any benefits or advantages to HCPs in order to induce or encourage the use or referral of AVITA products is strictly prohibited by both U.S. and international laws and regulations. Restrictions under applicable Federal and State healthcare laws and regulations include but are not limited to the following:

- The Federal healthcare Anti-Kickback Statute (“AKS”). AKS prohibits any person from soliciting, offering, receiving, or providing any remuneration in cash or in kind, whether directly or indirectly, to induce or reward the referral, purchase, lease, order, or recommendation of any item or service for which payment may be made in whole or in part under a federal healthcare program such as Medicare and Medicaid.
- The Federal False Claims Act (“FCA”). FCA may be enforced by either the U.S. Department of Justice or private whistleblowers should they choose to bring civil (qui tam) actions on behalf of the federal government. The FCA imposes civil penalties, as well as liability for treble damages and for attorneys’ fees and costs, on individuals or entities who knowingly present, or cause to be presented, claims for payment that are false or fraudulent to the federal government. FCA also imposes similar penalties on those who make a false statement material to a fraudulent claim, or who improperly avoid, decrease, or conceal an obligation to pay money to the federal government.
- State and foreign laws and regulations may apply to sales or marketing arrangements and claims involving healthcare devices or services reimbursed by non-governmental third-party payors.

Additionally, certain state laws require medical device companies to comply with voluntary guidelines in our interactions with healthcare providers promulgated by global trade associations and relevant compliance guidance issued by the U.S. Department of Health and Human Services, Office of Inspector General. Such laws prohibit medical device manufacturers from offering or providing certain types of payments or gifts to health care providers; and/or require the disclosure of gifts or payments to healthcare providers.

Interactions with Foreign Officials and Entities

The U.S. Foreign Corrupt Practices Act (“FCPA”) prohibits any U.S. individual or business from paying, offering, or authorizing payment or offering of anything of value, directly or indirectly, to any foreign official, political party, or candidate for the purpose of influencing any act or decision of the foreign entity in order to assist the individual or business in obtaining or retaining business. The FCPA also obligates companies whose securities are listed in the U.S. to comply with accounting provisions requiring the companies to maintain books and records that accurately and fairly reflect all transactions of the companies, including international subsidiaries, and to devise and maintain an adequate system of internal accounting controls for international operations. We are also subject to similar regulations under the Australian bribery laws and other anti-corruption laws that apply in countries where we do business.

Federal and State Reporting

Pursuant to the federal National Physician Payment Transparency Program (Open Payments) Act, AVITA Medical is required to report annually to the Centers for Medicare and Medicaid Services within the U.S. Department of Health and Human Services. Additionally, in adhering to federal reporting requirements, all relevant state marketing reporting regulations, any payments, and transfers of value to physicians and teaching hospitals, as well as other categories of disclosures must be reported annually.

Privacy

AVITA Medical must comply with the federal Health Insurance Portability and Accountability Act of 1996 (“HIPAA”) which imposes criminal and civil liability for, among other conduct, making false statements relating to healthcare matters and executing a scheme to defraud any healthcare benefit program. It also imposes criminal and civil liability and penalties on those who violate requirements such as mandatory contractual terms which are intended to safeguard the security, transmission and use of individually identifiable health information.

Various state and foreign laws also govern the privacy and security of health information such as the European Union General Data Protection Regulation (“GDPR”). GDPR governs the use of individual health data and other personal information and imposes strict obligations and restrictions on the ability to use, access, process, and disseminate health data from clinical trials and adverse event reporting, among others.

ENVIRONMENTAL, HEALTH AND SAFETY MATTERS

We are subject to extensive environmental, health and safety laws and regulations in a number of jurisdictions, primarily in California and the U.S., governing, among other things: the use, storage, registration, handling, emission and disposal of chemicals, waste materials and sewage; chemicals, air, water and ground contamination; and air emissions and the cleanup of contaminated sites, including any contamination that could result from spills due to our failure to properly dispose of production waste materials. Our operations at our Ventura manufacturing facility produce a small amount of waste materials that are considered minimally hazardous, and we use a third-party waste disposal company to remove any waste generated during operations from the facility. Our activities require permits from various governmental authorities including local municipal authorities. Local and state authorities may conduct periodic inspections in order to review and ensure our compliance with the various regulations. We are not presently aware of any violations or deficiencies. These laws, regulations and permits could potentially require the expenditure by us for compliance or remediation.

AVAILABLE INFORMATION

The Company files annual, quarterly and current reports, proxy statements and other documents with the Securities and Exchange Commission ("SEC") under the Exchange Act. The SEC maintains a website that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The public can obtain any documents that we file with the SEC at www.sec.gov. In addition, copies of announcements made by the Company to ASX are available on the ASX website (www.asx.com.au) and also, under the heading "Investors: Press Releases" at the following link on our website <https://ir.avitamedical.com/press-releases/news-releases>. We maintain a website at www.avitamedical.com. Since becoming a domestic U.S. issuer on July 1, 2020, our filings with the SEC, including without limitation, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, are available free of charge on our website under the heading "Investors: Financials _SEC Filings" at the following link on our website (<https://ir.avitamedical.com/financials/sec-filings>), as soon as reasonably practicable after we file or furnish them electronically with the SEC. Information contained on our website is not part of or incorporated into this annual report.

ORGANIZATIONAL STRUCTURE

Prior to the Corporate Restructuring initiated during fourth quarter, the Company had a total of six subsidiaries and their corporate details and business activities are listed below:

<u>Subsidiary Name</u>	<u>Place of Incorporation</u>	<u>% Held</u>	<u>Business Purpose</u>
AVITA Medical Pty Limited.....	Australia	100	Operating Company
AVITA Medical Americas, LLC.....	Delaware	100	U.S. operations
AVITA Medical Europe Limited	United Kingdom	100	EMEA operations
Visiomed Group Pty Ltd	Australia	100	Asia Pacific Operations
C3 Operations Pty Ltd	Australia	100	Holding company
Infamed Pty Ltd	Australia	100	Inactive

By the end of the fourth quarter of 2023 the business activities of AVITA Medical Pty Limited, AVITA Medical Europe Limited, Visiomed Group Pty Ltd, C3 Operations Pty Ltd and Infamed Pty Ltd were liquidated. AVITA Medical Americas LLC was transferred from C3 Operations Pty Ltd to be directly held by the Company in preparation for each of AVITA Medical Pty Limited, AVITA Medical Europe Limited, Visiomed Group Pty Ltd, C3 Operations Pty Ltd and Infamed Pty Ltd to be deregistered during the course of 2024.

After the Corporate Reorganization (expected to occur by the end of the third quarter in 2024), the Company's entity structure will be as follows:

<u>Subsidiary Name</u>	<u>Place of Incorporation</u>	<u>% Held</u>	<u>Business Purpose</u>
AVITA Medical Americas, LLC	Delaware	100	U.S. operations

Item 1A. RISK FACTORS

Our business faces significant risks. You should carefully consider all of the information set forth in this annual report, including the following risk factors. Our business, results of operations, and financial condition could be materially and adversely affected by any of these risks, and in such event, the trading price of our common stock would likely decline, and you might lose all or part of your investment. This Annual Report also contains forward-looking statements that involve risks and uncertainties, and our results could materially differ from those anticipated in these forward-looking statements. See "Forward-Looking Statements" included elsewhere within this Annual Report for a discussion of certain risks, uncertainties and assumptions associated with these statements.

Risks Related to Our Business Operations

We have experienced significant losses, expect losses to continue for the foreseeable future and may never achieve or maintain profitability.

Although we have begun full scale marketing and sales of our RECELL[®] System in the United States and other jurisdictions, we have not yet achieved profitability. We had a total net loss of \$35.4 million and \$26.7 million for the year ended December 31, 2023 and December 31, 2022, respectively. We have incurred a cumulative deficit of \$298.0 million through December 31, 2023. We anticipate that we may continue to incur losses at least until U.S. sales of the RECELL System are adequate to fund operating expenses. We may not be able to successfully achieve or sustain profitability. Successful transition to profitable operations is dependent upon achieving a level of revenues adequate to support our cost structure, including in new markets for which we are not presently approved.

Servicing our debt requires a significant amount of cash and we are subject to a number of restrictive covenants relating to our indebtedness, which may restrict our business and financing activities.

Pursuant to the Credit Agreement that the Company entered with OrbiMed Advisors, LLC ("Credit Agreement") on October 18, 2023, we incurred \$40.0 million of indebtedness secured by substantially all of our assets and have the ability to incur an additional \$50.0 million of indebtedness. This level of debt could have significant consequences on future operations, including increasing our vulnerability to adverse economic and industry conditions and limiting our flexibility in planning for, or reacting to, changes in our business and the markets in which we compete.

Our ability to make scheduled payments of interest depends on our future performance, which is subject to interest rate risk, economic, financial, competitive and other factors beyond our control. We are exposed to risks related to a potential rising interest rate environment for the debt, which could cause our borrowing costs to rise and impact our liquidity. Our business may not generate cash flow from operations in the future sufficient to service our debt in cash and make necessary capital expenditures. In addition, if the Company's net revenue does not equal or exceed a certain amount for upcoming fiscal periods as set forth in the Credit Agreement, then the Company will be required to repay five percent of the outstanding principal amount of its indebtedness in equal quarterly installments, in addition to a repayment fee and a prepayment fee.

If we are unable to generate sufficient cash flow to satisfy payment obligations under the Credit Agreement, we may be required to adopt one or more alternatives, such as obtaining additional equity capital on terms that may be onerous or highly dilutive. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on our debt obligations.

The restrictions and covenants in the Credit Agreement may also prevent us from taking actions that we believe would be in the best interests of our business, and may make it difficult for us to successfully execute our business strategy or effectively compete with companies that are not similarly restricted. Our ability to comply with these covenants in future periods will largely depend on the success of our products, and our ability to successfully implement our overall business strategy. We may be unsuccessful in obtaining waivers or amendments to restrictions and covenants in the agreements. The breach of any of these covenants and restrictions could result in a default under the Credit Agreement, which could result in an acceleration of the repayment of our indebtedness.

Provisions in our U.S. government contracts, may affect our intellectual property rights.

Certain of our activities have been funded, and may in the future be funded, by the U.S. government, including through previous contracts with BARDA. When new technologies are developed with U.S. government funding, the government obtains certain rights in any resulting patents, including the right to a nonexclusive license authorizing the government to use the invention and rights that may permit the government to disclose our confidential information to third parties and to exercise "march-in" rights. The government can exercise its march-in rights if it determines that action is necessary because we fail to achieve practical application of the U.S. government-funded technology, because action is necessary to alleviate health or safety needs, to meet requirements of federal regulations, or to give preference to U.S. industry. In addition, U.S. government-funded inventions must be reported to the government, U.S. government funding must be disclosed in any resulting patent applications, and our rights in such inventions may be subject to certain requirements to manufacture products in the United States.

Development and commercialization of our products require successful completion of the regulatory approval process and may suffer delays or fail. We may be unsuccessful in obtaining additional approvals for our RECELL System for full thickness skin defects and skin conditions such as vitiligo.

In the United States, as well as other jurisdictions, we have been and will be required to apply for and receive regulatory authorization before we can market our products. For instance, our RECELL System has been approved by the FDA and regulatory authorities in Australia, the EU and Japan for use in certain treatments of burns, acute wounds, scars and vitiligo. However, we will require additional clinical data or approvals from regulatory authorities within these countries to market the product for the treatment of other indications, and from any other jurisdictions in which we seek to market the product. This process can be time-consuming and complicated and may be unsuccessful or otherwise result in unanticipated delays or fail altogether. For example, on September 29, 2023, the Company received notice from the FDA that additional information regarding the Company's PMA supplement for its latest device, RECELL GO is required for the continuation of the FDA's review. This request, which is not unique to the Breakthrough Device Program, placed the application file on hold for approximately 4 to 6 months while the Company addresses the FDA's questions.

To secure marketing authorization, an applicant generally is required to submit an application that includes the data supporting preclinical and clinical safety and effectiveness as well as detailed information on the manufacturing and control of the product, proposed labeling and other additional information. Before marketing authorization is granted, regulatory authorities may require the inspection of the manufacturing facility or facilities and quality systems (including those of third parties) at which the product candidate is manufactured and tested, as well as potential audits of the non-clinical and clinical trial sites that generated the data cited in the marketing authorization application.

We cannot predict whether any additional marketing authorizations will ultimately be granted or how long the applicable regulatory authority or agency will take to do so. Regulatory agencies, including the FDA, have substantial discretion in the approval process. In addition, the approval process and the requirements governing clinical trials vary from country to country. The policies of

the FDA or other regulatory authorities may change, and additional government regulations may be enacted that could prevent, limit or delay the necessary approval of any products we may develop and commercialize. We cannot predict the likelihood, nature or extent of government regulation that may arise from future legislation or administrative action, either in the United States or elsewhere. If we are slow or unable to adapt to new or changed requirements, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained, and we may not achieve or sustain profitability.

Additionally, any future regulatory approvals that we receive may also contain requirements for costly post-marketing testing and surveillance to monitor the safety and effectiveness of the product. Once a product is approved, the manufacturing processes, labeling, packaging, distribution, adverse event reporting, storage, advertising, promotion, import, export, and record keeping for the product will be subject to extensive and ongoing regulatory requirements. These requirements include submission of safety and other post-marketing reports, registration, and continued compliance with good manufacturing practices for any clinical trials that we conduct post-approval.

Finally, per FDA regulations, changes made to products, specifications, or test data evaluation methodology would generally require communication with the FDA. There are several pathways for communicating with the FDA of such changes. As part of such review, the FDA may request additional information, at which time the product may become temporarily unavailable.

Our success depends, in part, on our relationships with, and the efforts of, third-party distributors.

We rely on third-party distributors for a portion of our sales in countries outside of the U.S. Our distributors may not commit the necessary resources to market and sell our products to the level of our expectations, and, regardless of the resources they commit, they may not be successful. If we are not able to maintain our distribution network, if our distribution network is not successful in marketing and selling our products, or if we experience a significant reduction in, cancellation, or change in the size and timing of orders from our distributors, our revenues could decline significantly and lead to an inability to meet operating cash flow requirements, which would have a material adverse effect on our business, financial condition, and results of operations.

Obtaining and maintaining regulatory approval for a product candidate in one jurisdiction does not mean that we will be successful in obtaining regulatory approval for that product candidate in other jurisdictions.

Obtaining and maintaining regulatory approval for a product in one jurisdiction does not guarantee that we will be able to obtain or maintain similar approval in other jurisdictions, while a failure or delay in obtaining regulatory approval in one jurisdiction may have a negative effect on the regulatory approval process in others. For example, even though the FDA has granted marketing approval for use of our RECELL System for the treatment full-thickness skin defects and vitiligo, comparable regulatory authorities in foreign jurisdictions must also approve the manufacturing, marketing and promotion of the product candidate in those countries if not currently approved. Approval procedures vary among jurisdictions and can involve requirements and administrative review periods different from, and greater than, those in the United States, including additional preclinical studies or clinical trials as clinical trials conducted in one jurisdiction may not be accepted by regulatory authorities in other jurisdictions. In many jurisdictions outside the United States, a medical device must be approved for reimbursement before it can be approved for sale in that jurisdiction. In some cases, the price that we intend to charge for our products is also subject to approval.

We are highly dependent on our regulatory approval in the United States and failure to maintain that approval would materially impact our business and prospects.

Our business is highly dependent on the PMA we received in September 2018 from the FDA including subsequent secondary approvals of the PMA outside of burns. This PMA allows us to sell our RECELL System in the United States, our current primary market. While we intend to take every action and precaution to ensure that our PMA remains effective, it is possible that the FDA could take a position in the future that requires a modification, temporary suspension or revocation of our PMA. Any such action by the FDA would have a material adverse effect on our business.

We may encounter substantial delays in any further clinical studies necessary to support any regulatory applications for additional commercial applications of our technology.

We cannot guarantee that any preclinical testing or clinical trials will be conducted as planned or completed on schedule, if at all. As a result, we may not achieve the expected clinical milestones necessary for approval by the FDA, or other regulators, for the use of our RECELL System for additional applications in the United States or other countries.

A failure in a clinical study or regulatory application can occur at any stage. Events that may prevent successful or timely commencement, enrollment or completion of clinical development or a regulatory application include:

- delays in raising, or inability to raise, sufficient capital to fund the planned trials;
- delays in reaching a consensus with regulatory agencies on trial design;
- changes in trial design;
- inability to identify, recruit and train suitable clinical investigators;
- inability to add new clinical trial sites;
- delays in reaching agreement on acceptable terms for the performance of the trials with prospective clinical research organizations and clinical trial sites;
- delays in recruiting suitable clinical sites and patients (i.e., subjects) to participate in clinical trials;
- imposition of a clinical hold by regulatory agencies for any reason, including negative clinical results, safety concerns or as a result of an inspection of manufacturing or clinical operations or trial sites;
- failure by any relevant parties to adhere to clinical trial requirements;
- failure to perform in accordance with the FDA's Good Clinical Practice ("GCPs"), or applicable regulatory guidelines in other countries;
- delays in the testing, validation, manufacturing and delivery of the product candidates to the clinical sites;
- delays caused by clinical trial sites not completing a trial;
- failure to demonstrate adequate effectiveness;
- occurrence of serious adverse events in clinical trials that are associated with the product candidates that are viewed to outweigh its potential benefits;
- changes in regulatory requirements and guidance that require amending or submitting new clinical protocols;
- adverse events, safety issues, product recalls, manufacturing or supply chain interruptions, or poor clinical outcomes where the RECELL System is being used commercially; and
- disagreements with regulatory agencies in the interpretation of the data from our clinical trials.

Delays, including delays caused by the above factors, can be costly and could negatively affect our ability to complete clinical trials for our product candidates. If we are not able to successfully complete clinical trials or are not able to do so in a timely and cost-effective manner, we will not be able to obtain regulatory approval for the use of our RECELL System for additional applications, all of which could have a material adverse effect on our business, financial condition and results of operations.

We may be unsuccessful in commercializing our RECELL System, or other future products, due to unfavorable pricing regulations or third-party coverage and reimbursement policies.

We cannot guarantee that we will receive favorable pricing and reimbursement for use of our products. The rules and regulations that govern pricing and reimbursement for medical products vary widely from country to country or from indication to indication, and within the United States, can also vary widely from one health system or hospital to the next. In some foreign jurisdictions, including the EU, the government largely controls pricing of medical products. In other countries, coverage negotiations must occur at the regional or hospital level. Pricing negotiations can take considerable time after the receipt of marketing approval for a medical product.

As a result, even after obtaining regulatory approval for a product in a particular country, we may be subject to price regulations or limited reimbursement, which may delay or limit our commercial launch of the product and negatively impact the revenue we are able to generate from the sale of the product in that country. Adverse pricing limitations may hinder our ability to recoup our total investment in our RECELL System or other future products, even after obtaining regulatory approval.

If we are unable to promptly obtain coverage and profitable payment rates from hospital budget, government-funded and private purchasers for the RECELL System or any future products, this could have a material adverse effect on our operating results, our ability to raise capital needed to commercialize products and our overall financial condition.

For example, we presently benefit from various reimbursement codes, including the following:

- for hospitals in inpatient services using Medicare Severity Diagnosis-Related Groups ("MS-DRGs").
- Specific International Classification of Disease, 10th revision, Procedure Classification System ("ICD-10-PCS") code series describing our "cell suspension technique" for the use of the RECELL System.
- CPT codes to support physician reimbursement for professional healthcare services, ambulatory surgical center ("ASCs") reimbursement for facility services and hospital reimbursement for outpatient department services. Medicare reimburses

ASCs for services using CPT codes and reimburses hospitals for outpatient services using Ambulatory Payment Classifications (“APCs”).

In addition, in 2022, we were approved for a TPT C code to support additional Medicare payment in the outpatient hospital and the ASC setting. There can be no guarantee that the above reimbursement codes will not be withdrawn, reduced, consolidated or otherwise be altered in a manner which is not supportive of ongoing commercial use of the RECELL System.

We may require additional financing in the future to continue the development and commercialization of our RECELL System or any future products, which may cause dilution to our existing stockholders. If additional financing is not available, we may have to postpone, reduce or cease operations.

If we are unable to achieve profitability sufficient to permit us to fund our operations, repay the indebtedness under our Credit Agreement with OrbiMed and other planned actions, we may be required to raise additional capital. There can be no assurance that such capital would be available on favorable terms, or at all. If we raise additional capital through the issuance of equity, the percentage ownership held by existing stockholders may be reduced, and the market price of our common stock or CDIs could fall due to an increased number of shares or CDIs available for sale in the market. If we are unable to secure additional capital as circumstances require, we may not be able to fund our planned activities or continue our operations.

We face manufacturing risks that may adversely affect our ability to manufacture products and could reduce our gross margins and negatively affect our business and operating results.

Our success depends, in part, on our ability to manufacture our current and future products in sufficient quantities and on a timely basis to meet demand, while adhering to product quality standards, complying with regulatory quality system requirements and managing manufacturing costs. We have a manufacturing facility located in Ventura, California where we produce, package and warehouse the RECELL System. We also rely on global third-party manufacturers for production of some of the components used in the RECELL System. If our facility, or the facilities of our third-party contract manufacturers, suffer damage, or a force majeure event, this could materially impact our ability to operate.

We are also subject to other risks relating to our manufacturing capabilities, including:

- quality and reliability of components, sub-assemblies and materials that we source from third-party suppliers, who are required to meet our quality specifications, some of whom are our single-source suppliers for the products they supply;
- failure to secure raw materials, components and materials in a timely manner, in sufficient quantities or on commercially reasonable terms;
- inability to secure raw materials, components and materials of sufficient quality to meet the exacting needs of medical device manufacturing;
- inability to increase production capacity or volumes to meet demand; and

As demand for our products increases, we will have to invest additional resources to purchase raw materials and components, sub-assemblies and materials, hire and train employees and enhance our manufacturing processes. If we fail to increase our production capacity efficiently to meet demand for our products, we may not be able to fill customer orders on a timely basis, our sales may not increase in line with our expectations and our operating margins could fluctuate or decline. It may not be possible for us to manufacture our products at a cost or in quantities sufficient to make these products commercially viable or to maintain current operating margins, all of which could have a material adverse effect on our business, financial condition and results of operations. In addition, we are continually identifying additional third-party suppliers who could serve if necessary as replacement manufacturers should the need arise.

Certain of our products are dependent on specialized sources of supply potentially subject to disruption which could have a material, adverse impact on our business.

Due to the cost and regulatory requirements associated with qualifying multiple suppliers, in the prior year we single-sourced some of our material components. To the extent that any of these single-sourced suppliers experience disruptions in deliveries due to production, quality, or other issues, we are potentially subject to similar production delays or unfavorable cost increases. In the current year, we invested resources in obtaining additional suppliers for some of our key raw materials, but these efforts only mitigate, and not eliminate, our supply chain risk.

We rely on third parties to conduct, supervise and monitor our clinical trials. If these third parties do not successfully carry out their contractual duties or meet expected deadlines, we may not be able to obtain regulatory approval for or commercialize our drug product candidates and our business could be substantially harmed.

We rely on clinical research organizations (“CRO”), and clinical trial sites to ensure our clinical trials are conducted properly and on time. While we will have agreements governing their activities, we will have limited influence over their actual performance. CROs manage and monitor the clinical trials, duties and functions, and we will control only certain aspects of our CROs’ activities. Nevertheless, we will be responsible for ensuring that each of our clinical trials is conducted in accordance with the applicable protocol, legal, regulatory and scientific standards, and our reliance on the CROs does not relieve us of our regulatory responsibilities.

We and our CROs are required to comply with the FDA’s GCPs for conducting, recording and reporting the results of clinical trials to assure that the data and reported results are credible and accurate and that the rights, integrity and confidentiality of clinical trial participants are protected. The FDA, and comparable foreign regulatory authorities, enforces these GCPs through periodic inspections of trial sponsors, principal investigators and clinical trial sites. If we or our CROs fail to comply with applicable GCPs, the clinical data generated in our future clinical trials may be deemed unreliable and the FDA or other foreign regulatory authorities may require us to perform additional clinical trials before approving any marketing applications.

If our CROs do not successfully carry out their contractual duties or obligations, fail to meet expected deadlines, or if the quality or accuracy of the clinical data they obtain is compromised due to the failure to adhere to our clinical protocols or regulatory requirements, or for any other reasons, our clinical trials may be extended, delayed or terminated, and we may not be able to obtain regulatory approval for, or successfully commercialize, our product candidates. If any such event were to occur, our financial results and the commercial prospects for our product candidates would be harmed, our costs could increase, and our ability to generate revenues could be delayed. If any of our relationships with these third-party CROs terminate, we may not be able to enter into arrangements with alternative CROs or to do so on commercially reasonable terms. Further, switching or adding additional CROs involves additional costs and requires management time and focus. In addition, there is a natural transition period when a new CRO commences work. As a result, delays occur, which could materially impact our ability to meet our desired clinical development timelines. Though we carefully manage our relationships with our CROs, there can be no assurance that we will not encounter challenges or delays in the future or that these delays or challenges will not have a material adverse impact on our business, financial condition and prospects.

Product recalls or inventory losses caused by unforeseen events may adversely affect our operating results and financial condition.

Our products are manufactured, stored and distributed using technically complex processes requiring specialized facilities, highly specific raw materials and other production constraints. The complexity of these processes, as well as strict company and government standards for the manufacture, storage and distribution of our product candidates, subjects us to risks. In addition, process deviations or unanticipated effects of approved process changes may result in production runs of our RECELL System not complying with stability requirements or specifications. The occurrence or suspected occurrence of production and distribution difficulties can lead to lost inventories and in some cases product recalls, with consequential reputational damage and the risk of product liability. The investigation and remediation of any identified problems can cause production delays, substantial expense, lost sales and delays of new product launches. In the event our production efforts require a recall or result in an inventory loss, our operating results and financial condition may be adversely affected.

A cyber security incident could be disruptive to our business, compromise confidential data, cause reputation harm, and subject us to litigation and federal and state governmental inquiries.

We collect and store sensitive business and other information, including intellectual property and trade secrets, on our networks. Our business operations are dependent upon the secure maintenance of this information. Despite the implementation of security measures, our internal computer and information technology systems and those of our vendors and customers are vulnerable to attack and damage from computer viruses, malware, denial of service attacks, unauthorized access, or other harm, including from threat actors seeking to cause disruption to our business. We face risks related to the protection of information that we maintain—or engage a third-party to maintain on our behalf—including unauthorized access, acquisition, use, disclosure, or modification of such information. Cyberattacks are increasing in their frequency, sophistication and intensity and have become increasingly difficult to detect. Cyberattacks could include the deployment of harmful malware, ransomware, denial-of-service attacks, social engineering and other means to affect service reliability and threaten the confidentiality, integrity and availability of information. Beyond external criminal activity, systems that access or control access to our services and databases may be compromised as a result of human error, fraud or malice on the part of employees or third parties, or may result from accidental technological failure. A material cyberattack or security incident could cause interruptions in our operations and could result in a material disruption of our business operations, damage to our reputation, financial condition, results of operations, cash flows and prospects.

We receive, collect, process, use and store a large amount of information from our customers and our own employees, including personal information, protected health and other sensitive and confidential information. If threat actors are able to circumvent or breach our security systems, they could steal any information located therein or cause serious and potentially long-lasting disruption to our operations. Security breaches or attempts thereof could also damage our reputation and expose us to a risk of monetary loss and/or litigation, fines and sanctions. We also face risks associated with security breaches affecting third parties that conduct business with us or our customers and others who interact with our data. While we maintain insurance that covers certain security incidents, we may not carry appropriate insurance or maintain sufficient coverage to compensate for all potential liability.

We are subject to diverse laws and regulations relating to data privacy and security, such as HIPPA and similar U.S. state data protection regulations, including the California Consumer Privacy Act (CCPA), and European data privacy laws, including the E.U.'s General Data Protection Regulation. Complying with these numerous and complex regulations is expensive and difficult, and failure to comply with these regulations could result in regulatory scrutiny, fines, civil liability or damage to our reputation. In addition, any security breach or attempt thereof could result in liability for stolen assets or information, additional costs associated with repairing any system damage, incentives offered to clients or other business partners to maintain business relationships after a breach, and implementation of measures to prevent future breaches, including organizational changes, deployment of additional personnel and protection technologies, employee training and engagement of third-party experts and consultants. Additionally, the costs incurred to remediate any security incident could be substantial.

We cannot assure you that any of our third-party service providers with access to our, or our customers and/or employees' personally identifiable and other sensitive or confidential information will not experience security breaches or attempts thereof, which could have a corresponding effect on our business.

We rely on information technology systems for critical business functions and the operations of our business.

We rely upon complex, integrated information technology ("IT") systems in our business functions including our quality systems to operate our business. If any of our IT systems were to be disrupted or fail, our business could suffer irreparable harm, financial loss, and our operations would be adversely impacted.

The markets in which we operate are highly competitive and innovative. Our competitors may develop products that render our products less attractive or obsolete and our business may deteriorate.

The markets for our products are highly competitive and our competitors may develop products that may more effectively compete with our products, thus negatively impacting our sales, financial conditions and business prospects. Our competitors may have significantly more financial and other resources to invest in product development. We must continue to develop and market new products, or we risk our products becoming obsolete, in which case, our revenues may decline, and our business prospects may suffer.

Product development is an expensive, uncertain and lengthy process.

We have significant product development projects ongoing that, if successful, are intended to improve the ease and use of our device in our current burn indication, as well as in full-thickness skin defects, vitiligo and future indications. The costs, timeline and ultimate success of these product development programs are subject to risk and uncertainty. If we are not able to develop and obtain regulatory approval for these products in development in a timely fashion and within budget, our business prospects and financial condition may suffer.

Compliance with environmental, health and safety requirements is costly and, if not achieved, could result in material financial fines and penalties, expensive lawsuits, cessation of business operations, and a material adverse impact on the business.

Our manufacturing and other processes may involve the use of hazardous materials subject to federal, state, and local and foreign environmental requirements. Under some environmental laws and regulations, we could be held responsible for costs at third-party sites that we have used for waste disposal, or for contamination at our past or present facilities. Failure to comply with current environmental laws, or future laws, could result in significant fines, penalties and expenses which could have an adverse impact on our financial condition.

We may be subject to civil and criminal penalties if the FDA determines that we have marketed or promoted our products for off-label usage.

We are prohibited from promoting our products for uses that are inconsistent with the uses that have been approved by the FDA - also known as "off-label" uses. More specifically, we may not make claims, in our promotion materials, website or otherwise,

about the use of any RECELL products which are outside of their approved labeling and indications. If the FDA determines that our marketing activities constitute off-label promotion, the FDA could impose fines and penalties on the Company and our executives, withdraw or recall our approved product from the market, as well as limit our product from off-label usage.

Risks Relating to our Industry and Intellectual Property

We face competition from the existing standard of care and any future potential changes in medical practice and technology and the possibility that our competitors may develop products, treatments or procedures that are similar, more advanced, safer or more effective than ours.

The medical device, biotechnology and pharmaceutical industries, specifically relating to the areas where we currently or intend to market our RECELL System, are intensely competitive and subject to significant changes due to technology and medical practice standards. We may face competition from any number of different sources with respect to any products we develop and commercialize.

Our commercial opportunity could be reduced or eliminated if our competitors develop and commercialize products, treatments or procedures that are safer, more effective, have fewer or less severe side effects, are more convenient or are less expensive than our RECELL System or any future products we develop. Many of our current or future competitors may have significantly greater financial resources and experience and expertise in research and development, manufacturing, preclinical testing, conducting clinical trials, obtaining regulatory approvals and marketing approved products than we may have. Mergers and acquisitions in the pharmaceutical, medical device, and biotechnology industries or wound care markets may result in increased concentration of resources among a smaller number of our competitors. Other early-stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. These companies compete with us in recruiting and retaining qualified scientific and management personnel, establishing clinical trial sites and patient registration for clinical trials, as well as in acquiring technologies complementary to, or necessary for, our programs.

We could be subject to product liability lawsuits, which could result in costly and time-consuming litigation and significant liabilities.

The development of medical device products, such as our RECELL System, involves an inherent risk of product liability claims and associated financial liability and adverse publicity. Any products we may develop could be found to be harmful or to contain harmful substances and expose us to substantial liability and risk of litigation or may force us to discontinue production. We may be unable to obtain or maintain insurance on reasonable terms or otherwise protect ourselves against potential product liability claims that could impede or prevent further business development of any products we may create and commercialize. Furthermore, a product liability claim could damage our reputation, whether or not such claims are covered by insurance or have merit. A product liability claim against us or the withdrawal of a product from the market could have a material adverse effect on our business or financial condition. Furthermore, product liability lawsuits, regardless of their success, would likely be time consuming and expensive to resolve and would divert management's time and attention, which could seriously harm our business.

If we are unable to effectively protect our intellectual property, we may not be able to operate our business and third parties may be able to use and profit from our technology, both of which would impair our ability to be competitive.

Our success will be heavily dependent on our ability to obtain and maintain meaningful patent protection for our technologies and products throughout the world. Patent law relating to the technology fields in which we will operate is still evolving. The amount of ongoing protection for our proprietary rights therefore is uncertain. We will rely on patents to protect a significant part of our intellectual property and to enhance our competitive position. However, our presently pending or future patent applications may be denied, and any patent previously issued to us or our subsidiaries may be challenged, invalidated, held unenforceable or circumvented. In 2019, we filed a Patent Term Extension ("PTE") application with the U.S. Patent and Trademark for U.S. Patent No. 9,029,140, which covers the RECELL System, as a result of patent term lost to the FDA regulatory process. The PTE application was approved, and the patent term of U.S. Patent No. 9,029,140, has been extended to April 9, 2024. Our other patents have expected expiration dates ranging from 2032 to 2033, while our pending patent applications, if granted, would have expiration dates ranging from 2032 to 2042. Furthermore, the patent protections we have been granted may not be broad enough to prevent competitors from producing products similar to ours.

In addition, the laws of various foreign countries in which we may compete may not protect our intellectual property to the same extent as do the laws of the United States. If we fail to obtain adequate patent protection for our proprietary technology, our ability to be commercially competitive will be materially impaired.

In the ordinary course of business and as appropriate, we intend to apply for additional patents covering both our technologies and products, as we deem appropriate. Our existing patents and any future patents we obtain may not be sufficiently broad to prevent others from practicing our technologies or developing competing products and technologies. In addition, because patent law is evolving in the life science industry, the patent positions of companies like ours are uncertain. As a result, the validity and enforceability of our patents cannot be predicted with certainty.

We may find it difficult to protect our intellectual property rights throughout the world.

Filing, prosecuting and defending patents on all of our technologies and products in every jurisdiction is expensive. Competitors could reverse engineer our technologies in jurisdictions where we have not obtained patent protection to develop their own products. These products may compete with our products and may not be covered by any patent claims or other intellectual property rights.

The laws of some countries do not protect intellectual property rights to the same extent as the laws of the United States and many companies have encountered significant problems in protecting and defending such rights in foreign jurisdictions. This lack of protection, particularly in relation to biotechnology, could make it difficult for us to stop the infringement of our patents. Proceedings to enforce our patent rights in foreign jurisdictions could result in substantial cost and divert the efforts and attention of key personnel from other aspects of our business.

We may incur substantial costs as a result of litigation or other proceedings relating to patent and other intellectual property rights and we may be unable to protect our rights to, or use of, our technology.

If we choose to go to court to stop someone else from using the intellectual property claimed in our patents or our licensed patents, that individual or company has the right to ask the court to rule that these patents are invalid and/or should not be enforced against that third party. These lawsuits are expensive and would distract our key personnel and consume time and other resources, even if we were successful in stopping the infringement of these patents. In addition, there is a risk that a court will decide that these patents are invalid or unenforceable and that we do not have the right to stop the other party from using the inventions or, even if the validity or enforceability of these patents is upheld, the court may refuse to stop the other party because the competitors' activities do not infringe our rights.

If third parties make claims of intellectual property infringement against us, or otherwise seek to establish their intellectual property rights equal or superior to ours, we may have to spend time and money in response and potentially discontinue certain of our operations.

While we currently do not believe it to be the case, third parties may claim that we are employing their proprietary technology without authorization or that we are infringing on their patents. If such claims were made, we could incur substantial costs coupled with diversion of our management and key technical personnel in defending against these claims. Furthermore, parties making claims against us may be able to obtain injunctive or other equitable relief which could effectively halt our ability to further develop, commercialize and sell products. In the event of a successful claim of infringement, courts may order us to pay damages and obtain one or more licenses from third parties. We may not be able to obtain these licenses at a reasonable cost, if at all. Defense of any lawsuit or failure to obtain any of these licenses could prevent us from commercializing available products and have a material negative effect on our business.

Our current and future relationships with investigators, health care professionals, consultants, third-party payors, and customers will be subject to applicable healthcare regulatory laws, which could expose us to penalties.

Our business operations and current and future relationships with investigators, healthcare professionals, consultants, third-party payors and customers may expose us to broadly applicable fraud and abuse and other healthcare laws and regulations. These laws regulate the business or financial arrangements and relationships through which we conduct our operations, including how we research, market, sell and distribute our products for which we obtain marketing approval. Such laws include:

- the federal Anti-Kickback Statute prohibits, among other things, persons and entities from knowingly and willfully soliciting, offering, receiving or providing remuneration, directly or indirectly, in cash or in kind, to induce or reward, or in return for, either the referral of an individual for, or the purchase, lease, order or recommendation of, any good, facility, item or service, for which payment may be made, in whole or in part, under a federal healthcare program such as Medicare and Medicaid. A person or entity does not need to have actual knowledge of the federal Anti-Kickback Statute or specific intent to violate it to have committed a violation; in addition, the government may assert that a claim including

items or services resulting from a violation of the federal Anti-Kickback Statute constitutes a false or fraudulent claim for purposes of the civil False Claims Act;

- the federal false claims laws including the civil False Claims Act, which can be enforced through civil whistleblower or qui tam actions, and civil monetary penalties laws, which impose criminal and civil penalties against individuals or entities for knowingly presenting, or causing to be presented to the federal government, claims for payment that are false or fraudulent, knowingly making, using or causing to be made or used, a false record or statement material to a false or fraudulent claim, or knowingly making, or causing to be made, a false statement to avoid, decrease or conceal an obligation to pay money to the federal government; in addition, the government may assert that a claim including items and services resulting from a violation of the federal Anti-Kickback Statute constitutes a false or fraudulent claim for purposes of the civil False Claims Act;
- HIPAA imposes criminal and civil liability for, among other things, knowingly and willfully executing, or attempting to execute, a scheme to defraud any healthcare benefit program or making false or fraudulent statements relating to healthcare matters. Similar to the federal Anti-Kickback Statute, a person or entity does not need to have actual knowledge of the statute or specific intent to violate it to have committed a violation;
- HIPAA, as amended by the Health Information Technology for Economic and Clinical Health Act and its implementing regulations, also imposes obligations, including mandatory contractual terms, with respect to safeguarding the privacy, security and transmission of individually identifiable health information on health plans, health care clearing houses, and certain health care providers, known as covered entities, and their business associates, defined as independent contractors or agents of covered entities that create, receive or obtain protected health information in connection with providing a service for or on behalf of a covered entity as well as their covered subcontractors;
- a number of federal, state and foreign laws, regulations, guidance and standards that impose requirements regarding the protection of health data that are applicable to or affect our operations;
- the federal transparency requirements, sometimes referred to as the “Sunshine Act,” under the Patient Protection and Affordable Care Act, which requires certain manufacturers of drugs, devices, biologics and medical supplies for which payment is available under Medicare, Medicaid or the Children’s Health Insurance Program (with certain exceptions) to report annually to the government information related to payments or other “transfers of value” made to physicians (defined to include doctors, dentists, optometrists, podiatrists and chiropractors) and teaching hospitals, and requires applicable manufacturers and group purchasing organizations to report annually to the government ownership and investment interests held by the physicians described above and their immediate family members. Applicable manufacturers are also required to report such information regarding their relationships with physician assistants, nurse practitioners, clinical nurse specialists, certified registered nurse anesthetists and certified nurse midwives during the previous year; and
- analogous state and foreign laws and regulations, such as state anti-kickback and false claims laws, may apply to our business practices, including but not limited to, research, distribution, sales, and marketing arrangements and claims involving healthcare items or services reimbursed by non-governmental third-party payors, including private insurers, or otherwise restrict payments that may be made to healthcare providers and other potential referral sources; and state laws that require medical device companies to comply with the industry’s voluntary compliance guidelines and the relevant compliance guidance promulgated by the federal government; state laws that require medical device manufacturers to report information related to payments and other transfers of value to physicians and other healthcare providers, marketing expenditures or drug pricing, as well as state and local laws that require the registration of sales representatives; and state and foreign laws governing the privacy and security of health information in some circumstances, many of which differ from each other in significant ways and often are not preempted by HIPAA, thus complicating compliance efforts.

Defending against any such actions can be costly, time-consuming and may require significant financial and personnel resources. Therefore, even if we are successful in defending against any such actions that may be brought against us, our business may be impaired.

The continued successful commercialization of the RECELL system for FDA approved and pending indications, will depend in part on the extent to which government authorities and health insurers establish adequate reimbursement levels and pricing policies.

Continued sales of the RECELL System depend in part on the availability of coverage and reimbursement from third-party payers such as government insurance programs, including Medicare and Medicaid, private health insurers, health maintenance organizations and other health care related organizations, who are increasingly challenging the price of medical products and services.

Both the federal and state governments in the United States continue to propose and pass new legislation, regulations, and policies affecting coverage and reimbursement rates, which are designed to contain or reduce the cost of health care. Further federal and state proposals and healthcare reforms are likely, which could limit the prices that can be charged for the RECELL System and may further limit our commercial opportunity. For example, on August 16, 2022, President Biden signed the Inflation Reduction Act

of 2022, or the IRA, into law, which among other things, extends enhanced subsidies for individuals purchasing health insurance coverage in Affordable Care Act marketplaces through plan year 2025. The IRA also eliminates the “donut hole” under the Medicare Part D program beginning in 2025 by significantly lowering the beneficiary maximum out-of-pocket cost through a newly established manufacturer discount program. It is possible that the Affordable Care Act will be subject to judicial or Congressional challenges in the future. Accordingly, we continue to evaluate the effect that the Affordable Care Act has on our business.

There also may be future changes unrelated to the IRA that result in reductions in potential coverage and reimbursement levels for our product and we cannot predict the scope of any future changes or the impact that those changes would have on our operations. Cost control initiatives may decrease coverage and payment levels and, in turn, the price that we will be able to charge and/or the volume of our sales. We are unable to predict all changes to the coverage or reimbursement methodologies that will be applied by private or government payers. Any denial of private or government payer coverage, such as the Affordable Care Act, the IRA, as well as other federal, state, and foreign healthcare reform measures that have been and may be adopted in the future, or inadequate reimbursement could harm our business and reduce our revenue. Additionally, if rebate obligations associated with them are substantially greater than we expect, our future net revenue and profitability could be materially diminished.

Macroeconomic and Social Risks

Adverse changes in general economic conditions or uncertainty about future economic conditions, including economic uncertainty from the departures of critical personnel from the industry, could adversely affect us.

We are subject to the risks arising from adverse changes in general economic market conditions. Uncertainty about future economic conditions could negatively affect our current and prospective customers causing them to delay the purchase of our products. Poor economic conditions could harm our business, financial condition, operating results and cash flows. In addition, a number of nurses and other critical personnel in burn centers who are trained and well versed in the use of the RECELL system have determined to change occupations. Nationally, this has been termed the “great resignation”. The fact that many burn center employees have moved on to other positions or industries may limit our ability to increase adoption of our RECELL system as we will be required to train a new group of nurses and other personnel critical to the implementation of the RECELL system.

Customer and consumer demand for our products may be impacted by weak economic conditions, recession, equity market volatility or other negative economic factors in the U.S. or other nations. The severity and length of time that a downturn in economic and financial market conditions may persist, as well as the timing, strength and sustainability of any recovery from such downturn, are unknown and are beyond our control.

Risks Relating to Our Common Stock and CDIs

We have never paid a dividend on our common stock and CDIs and do not intend to do so in the foreseeable future, and consequently, investors’ only opportunity to realize a return on their investment in the Company is through the appreciation in the price of our common stock and CDIs.

We do not anticipate paying cash dividends on our common stock and CDIs in the foreseeable future and intend to retain all earnings, if any, for our operations. If we decided to pay dividends at some future time, we may not have sufficient funds legally available to do so. Even if funds are legally available for distribution, we may be unable to pay any dividends to our stockholders because of limitations imposed by a lack of liquidity. Accordingly, our stockholders may have to sell some or all of their common stock or CDIs (as applicable) in order to generate cash flow from their investment. Our stockholders may not receive a gain on their investment when they sell their common stock or CDIs and may lose some or all of their investment. Any determination to pay dividends in the future on our common stock and CDIs will be made at the discretion of our Board of Directors and will depend on our results of operations, financial conditions, contractual restrictions, restrictions imposed by applicable law, capital requirements, and other factors that our Board of Directors deems relevant.

As long as we remain subject to the rules of the ASX and of Nasdaq, we will be unable to access equity capital without stockholder approval if such equity capital sales would result in an equity issuance above regulatory thresholds and consequently, we may be unable to obtain financing sufficient to sustain our business if we are unsuccessful in soliciting requisite stockholder approvals.

Our ability to access equity capital is currently limited by ASX Listing Rule 7.1, which provides that a company must not, subject to specified exceptions, issue or agree to issue during any consecutive 12-month period any equity securities, or other securities with rights to conversion to equity, if the number of those securities in aggregate would exceed 15% of the number of outstanding common shares at the commencement of that 12-month period unless stockholder approval is obtained.

Our equity issuances will be limited by ASX Listing Rule 7.1 so long as we continue to be listed on the ASX and this constraint may prevent us from raising the full amount of equity capital needed for operations without prior stockholder approval.

In addition to ASX Listing Rule 7.1, we are also subject to Nasdaq Listing Rule 5635(d), commonly referred to as the Nasdaq 20% Rule, which requires stockholder approval of a transaction other than a public offering involving the sale, issuance, or potential issuance by a company of common stock (or securities convertible into or exercisable for common stock) equal to 20% or more of the common stock, or 20% or more of the voting power outstanding before the issuance for less than the greater of book or market value of the shares. While less restrictive than ASX Listing Rule 7.1, the operation of the Nasdaq 20% rule could limit our ability to raise capital through issuance of common stock or convertible securities without jeopardizing our listing status. If we were to violate the Nasdaq 20% rule, the Company would be subject to delisting from Nasdaq and share prices and trading volumes would likely suffer.

There has been relatively limited trading volume in the markets for our common stock and CDIs, and more active, liquid trading markets for such securities may never develop.

Trading in our common stock on Nasdaq and our CDIs on the ASX is often thin and susceptible to wide fluctuations in trading prices due to such limited trading volume and other factors, some of which may have little to do with our operations or business prospects. Limited liquidity in the trading markets for our common stock and CDIs may adversely affect a stockholder's ability to sell its shares of our common stock or our CDIs at the time it wishes to sell them or at a price that it considers acceptable. In addition, if a more active, liquid public trading market does not develop we may be limited in our ability to raise capital by selling shares of common stock or CDIs. We cannot assure you that more active, liquid public trading markets for our common stock and CDIs will develop or, if developed, will be sustained.

The market price and trading volume of our common stock and CDIs may be volatile and may be affected by variability in our performance from period to period and economic conditions beyond management's control.

The market price of our common stock (including common stock represented by CDIs) may be highly volatile and could be subject to wide fluctuations. This means that our stockholders could experience a decrease in the value of their common stock or CDIs regardless of our operating performance or prospects. The market prices of securities of companies operating in the medical device and biotech sectors have often experienced fluctuations that have been unrelated or disproportionate to the operating results of these companies. In addition, the trading volume of our common stock and CDIs may fluctuate and cause significant price variations to occur. If the market price of our common stock or CDIs declines significantly, our stockholders may be unable to resell our common stock or CDIs at or above their purchase price, if at all. There can be no assurance that the market price of our common stock and CDIs will not fluctuate or significantly decline in the future.

Some specific factors that could negatively affect the price of our common stock and CDIs or result in fluctuations in their price and trading volume include:

- actual or expected fluctuations in our operating results;
- actual or expected changes in our growth rates or our competitors' growth rates;
- results of clinical trials of our product candidates;
- results of clinical trials of our competitors' products;
- regulatory actions with respect to our products or our competitors' products;
- reports of one or more patient serious adverse events;
- publication of research reports by securities analysts about us or our competitors in the industry;
- our failure or the failure of our competitors to meet analysts' projections or guidance that we or our competitors may give to the market;
- fluctuations of exchange rates between the U.S. dollar and the Australian dollar;
- issuances by us of debt or equity securities;
- litigation involving our company, including stockholder litigation;
- investigations or audits by regulators into the operations of our company;
- proceedings initiated by our competitors or clients;
- strategic decisions by us or our competitors, such as acquisitions, divestitures, spin-offs, joint ventures, strategic investments or changes in business strategy;
- sales or perceived potential sales of the common stock or CDIs by us, our directors, executive management team or our stockholders in the future;
- short selling or other market manipulation activities;
- announcement or expectation of additional financing efforts;
- terrorist acts, acts of war or periods of widespread civil unrest;

- natural disasters and other calamities;
- changes in market conditions for biopharmaceutical stocks;
- our inability to raise additional capital, limiting our ability to continue as a going concern;
- changes in market prices for our product or for our raw materials;
- changes in market valuations of similar companies;
- changes in key personnel for us or our competitors;
- speculation in the press or investment community;
- changes or proposed changes in laws and regulations affecting our industry; and
- conditions in the financial markets in general or changes in general economic conditions.

The requirements of being a public company in the United States and listed on the ASX may strain our resources and divert management's attention.

As a public company, we are subject to the reporting requirements of the Exchange Act, the U.S. Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), the Dodd-Frank Act and the listing standards and the rules and regulations of Nasdaq. We are also subject to the reporting requirements under the ASX Listing Rules due to the listing of our CDIs on ASX. The requirements of these rules and regulations will increase our legal, accounting and financial compliance costs, make some activities more difficult, time consuming and costly, and can place significant strain on our personnel, systems and resources. As a result of our disclosure of information in filings required of a public company, our business and financial condition is more visible, which may result in threatened or actual litigation, including by competitors, stockholders or third parties. If such claims are successful, our business and operating results could be harmed, and even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and harm our business and operating results.

We are an emerging growth company, and the reduced disclosure requirements applicable to emerging growth companies may make our common stock less attractive to investors.

We are an "emerging growth company," as defined in the Jumpstart Our Business Startups Act of 2012 ("JOBS Act"). For as long as we continue to be an emerging growth company, we may take advantage of certain exemptions and relief from various U.S. reporting requirements that are applicable to other public companies that are not emerging growth companies, including (i) not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, (ii) having the option of delaying the adoption of certain new or revised financial accounting standards, (iii) reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements and (iv) exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. We have taken, and in the future may take, advantage of these exemptions until such time that we are no longer an emerging growth company. Accordingly, the information contained herein and in other reports we file with the SEC may be different than the information our investors receive from other public companies in which they hold stock. Further, we have elected to take advantage of the extended transition period for complying with new or revised accounting standards until those standards would otherwise apply to private companies. As a result, our operating results and financial statements may not be comparable to the operating results and financial statements of other companies who have adopted the new or revised accounting standards. It is possible that some investors will find our common stock and CDIs less attractive as a result, which may result in a less active trading market for our common stock and CDIs and higher volatility in our stock and CDI price.

We will remain an emerging growth company until the earliest of (i) the last day of the fiscal year following the fifth anniversary of the date of the first sale of our common stock pursuant to an effective registration statement under the Securities Act which, given the filing of the S-8 Registration Statement on August 27, 2020, will be December 31, 2025, (ii) the last day of the fiscal year in which we have total annual gross revenue of at least \$1.07 billion, (iii) the last day of the fiscal year in which we are deemed to be a "large accelerated filer" as defined in Rule 12b-2 under the Exchange Act, or (iv) the date on which we have issued more than \$1.0 billion in non-convertible debt securities during the prior three-year period.

If research analysts publish unfavorable commentary or downgrade our common stock or CDIs it could adversely affect our share price and trading volume.

The trading market for our common stock and CDIs depends, in part, on the research and reports that research analysts publish about us and our business and industry. If one or more research analysts downgrade our shares or CDIs, publish unfavorable commentary about the Company or cease publishing reports about us or our business, the price of our common stock and CDIs could decline. If one or more of the research analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our common stock and CDIs could decrease, which could cause our share price or trading volume to decline.

General Risk Factors

The Company's cash, cash equivalents and marketable securities could be adversely affected by bank failures or other events affecting financial institutions and could adversely affect our liquidity and financial performance.

We regularly maintain domestic cash deposits in Federal Deposit Insurance Corporation ("FDIC") insured banks, which exceed the FDIC insurance limits. We also maintain cash deposits in foreign banks where we operate, some of which are not insured or are only partially insured by the FDIC or other similar agencies. The failure or rumored failure of a bank, or events involving limited liquidity, defaults, non-performance, bankruptcy, receivership or other adverse developments in the financial or credit markets impacting financial institutions, may lead to disruptions in access to our bank deposits. These disruptions may adversely impact our liquidity and financial performance. There can be no assurance that our deposits in excess of the FDIC or other comparable insurance limits will be backstopped by the U.S. or applicable foreign government, or that any bank or financial institution with which we do business will be able to obtain needed liquidity from other banks, government institutions or by acquisition in the event of a failure or liquidity crisis. As such, those funds in bank deposit accounts in excess of the standard FDIC insurance limits are uninsured and subject to the risk of bank failure.

Currently, we have full access to all funds in deposit accounts or other money management arrangements. The failure of any bank in which we deposit our funds could reduce the amount of cash that we have available for our operations or delay our ability to access such funds. In the event of such failure, we may experience delays or other issues in meeting our financial obligations, our ability to access our cash and cash equivalents may be threatened and could have a material adverse effect on our business and financial condition.

Future adverse developments with respect to specific financial institutions or the broader financial services industry may also lead to market-wide liquidity shortages.

If we fail to manage our growth effectively, our business could be disrupted.

Our future financial performance and ability to successfully commercialize our products, which is not guaranteed, and to compete in the market will depend, in part, on our ability to manage any future growth effectively. We expect to make significant investments to facilitate our future growth through, among other things:

- new product development;
- commercial development of our RECELL System to such areas full-thickness skin defects and vitiligo;
- clinical trials for additional indications; and
- funding of our marketing and sales infrastructure.

Any failure to manage future growth effectively could have a material adverse effect on our business and results of operations.

Our growth and success depend on our ability to attract and retain additional highly qualified and skilled sales and marketing, research and development, operational, managerial and finance personnel.

Competition for skilled personnel is intense and the unexpected loss of an employee with a particular skill could have a material adverse effect on our operations until a replacement can be found and trained. If we cannot attract and retain skilled scientific and operational personnel for our research and development and manufacturing operations on acceptable terms, we may not be able to develop and commercialize our products. Further, any failure to effectively integrate new personnel could prevent us from successfully growing our company.

Our operations are subject to anti-corruption laws, including Australian bribery laws, and the FCPA and other anti-corruption laws that apply in countries where we do business.

Anti-corruption laws generally prohibit us and our employees and intermediaries from bribing, being bribed or making other prohibited payments to government officials or other persons to obtain or retain business or gain some other business advantage. We participate in collaborations and relationships with third parties whose actions could potentially subject us to liability under these anti-corruption laws. In addition, we cannot predict the nature, scope, or effect of future regulatory requirements to which our international operations might be subject or the manner in which existing laws might be administered or interpreted.

There is no assurance that we will be completely effective in ensuring our compliance with all applicable anti-corruption laws or other laws including trade related laws. If we are not in compliance with these laws, we may be subject to criminal and civil

penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition, results of operations and liquidity.

Likewise, any investigation of any potential violations of these laws by respective government bodies could also have an adverse impact on our reputation, our business, results of operations and financial condition.

Item 1B. UNRESOLVED STAFF COMMENTS

None

Item 1C. CYBERSECURITY

Risk Management and Strategy

AVITA Medical has implemented an Information Security Management System (“ISMS”). The Company’s ISMS is a continuous process designed to analyze the potential risks, vulnerabilities, the likeliness of occurrence and the related consequences of cybersecurity threats. The process is based on establishing the context, assessing the risks, and treating the risks. The key concept of the ISMS is to consistently maintain and improve confidentiality, integrity, and availability of information assets that should be protected by the organization on behalf of itself and its clients, and third parties. Once a risk, threat or vulnerability is identified, the Company establishes a risk treatment plan to take corrective action to prevent risks that can be avoided and minimize the ones that cannot. We engage an independent third-party cybersecurity services and consulting firm to continuously review our information security. We also conduct internal phishing campaigns and perform an independent penetration test on an annual basis. In addition, we conduct regular security awareness training and testing of our employees. The Company has not had any material cybersecurity incidents.

All related activities ISMC activities have been structured into a framework consisting of:

1. Context establishment - Established in accordance with the requirements of International Organization for Standardization 27001 and 27002 (“ISO 27001” and “ISO 27002”). The ISO 27001, Information security management systems, provides a framework and guidelines for establishing, implementing and managing an ISMS and ISO 27002, Information security controls, provides a reference set of generic information security controls including implementation guidance.
2. Risk Assessment - Relates to an evaluation and identification of risks, threats and vulnerabilities that exist or could exist, identifies the likelihood of occurrence and potential consequences. As part of the risk assessment management prioritizes the assessed risks from low to high based on likelihood and level of impact.
3. Risk Treatment – will detail the remediation process for risks, vulnerabilities and threats identified to reduce the risk to an acceptable level.
4. Risk Acceptance- The Company’s risk assessment is evaluated from a Low (1) to a High (3) on the Impact the threat would have on the Company and its operations and the likelihood of occurrence. Threat ratings created from the Impact and probability calculations will result with a value from 1- 9.
 - a. Low (1 – 2.99) = Risk level acceptable and no further action deemed necessary
 - b. Medium (2 – 5.99) and High (6 - 9) – implement risk management to reduce the risk to an acceptable level
5. Risk Communications- Results of the risk assessment are communicated to appropriate level of management. Report includes the identified risk and vulnerability summaries. Updates will include treatment plans and status updates.
6. Risk Monitoring and Review -Continuously performed to evaluate any changes or the need for changes. The Company uses the Ontrack software solution (“Ontrack”) to monitor and track all aspects of risk assessment. Ontrack also serves as tool to track any cybersecurity incidents and remediation tasks.

Disclosure of Management’s Responsibility

The Company’s Chief Financial Officer is primarily responsible for overseeing the Cybersecurity Risk Management Program and leading the Company’s efforts to mitigate technology risks in partnership with various business leaders in the organization. For qualifications of the CFO refer to Item 10 of the form 10-K. We have protocols, policies and tools in place to mitigate cybersecurity risk. They also provide the administrative, technical, and physical safeguards to ensure the security, confidentiality, integrity and availability of confidential information and personal information from unauthorized access, use, disclosure, alteration, destruction or theft. In addition, we engage an independent third party annually to assess our IT general controls and IT security. Special focus is given to maintaining and improving our alignment with ISO 27001. Additionally, we have a cybersecurity incident response plan in place that provides a documented framework for handling high and low severity security incidents and facilitates coordination across multiple parts of the business. We have engaged an external consultant to provide oversight and technical expertise to our ISMS

process. Finally, cybersecurity is integrated into the Company's training as all employees are required to take security awareness training.

Disclosure of the Board's Responsibility

While management is primarily responsible for assessing and managing cybersecurity risks on a day-to-day basis, the Company's Board of Directors oversees management's efforts to assess and manage risk. The Board (in conjunction particularly with the Audit Committee) monitors the cybersecurity risk assessment and response process. The Audit Committee is briefed by our Chief Financial Officer on our cybersecurity ISMS program and the overall cybersecurity risk environment. The briefing may include discussions on topics such as: information security and technology risks, cybersecurity risk assessment process and updates, information risk management strategies, and progress on cybersecurity and data protection training initiatives for employees, among others.

Item 2. PROPERTIES

Our principal corporate office is located at 28159 Avenue Stanford, Suite 220, Valencia, California 91355. We lease the 17,500 square foot facility under a lease agreement that expires on October 31, 2026. Our production plant in Ventura, California is a 27,480 square foot facility that we lease through September 30, 2027 with the right to extend the lease, at our sole option, as a result of two, three-year options that allow us to extend the lease up to an additional six years in total. The Company also has an administrative office lease in Irvine, California of approximately 10,700 square feet that is currently leased through the end of July 2028. We do not own any real property. We believe that leased facilities are adequate to meet current needs and that additional facilities will, if required, be available for lease to meet future needs.

Item 3. LEGAL PROCEEDINGS

We are currently not aware of any material pending legal proceedings to which we are a party or of which any of our property is the subject, nor are we aware of any such proceedings that are contemplated by any governmental authority. From time to time, as an operating business, we are involved in routine disputes (both formal and informal) with customers, manufacturing partners and employees.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

The Company's common stock is quoted on the Nasdaq Capital Market under the ticker symbol "RCEL" and the Company's CDIs are quoted on the ASX under the ticker code "AVH". One share of common stock on Nasdaq is equivalent to five CDIs on the ASX.

Holders

As of January 31, 2024, the Company had approximately 4 unique stockholders of record of our common stock (which includes 20,497 holders of record of the Company's CDIs, with each representing 1/5 of a share of common stock, and CHES Depositary Nominees Pty Ltd, holds the legal title to all of the outstanding common stock underlying the CDIs of the Company).

Dividends

We have never paid cash dividends to our stockholders or to the holders of ordinary shares in the former parent company, AVITA Australia. We intend to retain future earnings for use in our business and do not anticipate paying cash dividends on our common stock and CDIs in the foreseeable future. Any future dividend policy will be determined by our board of directors and will be based upon various factors, including our results of operations, financial condition, current and anticipated cash needs, future prospects, contractual restrictions and other factors as our board of directors may deem relevant.

Item 6. [Reserved]

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

Objective

The purpose of this Management's Discussion and Analysis is to better allow our investors to understand and view our company from management's perspective. We are providing an overview of our business and strategy including a discussion of our financial condition and results of operations. The following discussion and analysis of our financial condition and results of operations for the years-ended December 31, 2023 and 2022, should be read in conjunction with our consolidated financial statements and related notes included in this Annual Report.

Overview

AVITA Medical is a commercial-stage regenerative medicine company transforming the standard of care for skin restoration with innovative devices and autologous cellular therapies. At the forefront of our portfolio is our patented and proprietary RECELL® System, approved by the United States Food & Drug Administration ("FDA") for the treatment of thermal burn wounds and full-thickness skin defects, and for repigmentation of stable depigmented vitiligo lesions. RECELL harnesses the regenerative properties of a patient's own skin to create an autologous skin cell suspension, Spray-On Skin™ Cells, delivering a transformative solution at the point of care. This breakthrough technology serves as the catalyst for a new treatment paradigm enabling improved clinical outcomes.

Our objective is to become the leading provider of regenerative medicine addressing unmet medical needs in burn injuries, full-thickness skin defects, and in skin repigmentation, such as vitiligo. To achieve this objective, we plan to:

- Become the standard of care in the U.S. burns industry by increasing RECELL System penetration in burn centers
- Continue to commercialize the RECELL System in the U.S. for treatment of full-thickness skin defects
- Expand our global presence within the European Union and Australia through the exclusive use of third-party distributors.
- Launch RECELL GO following FDA approval to increase market adoption, expand our customer base, and facilitate international commercialization
- Establish commercial payor coverage for the RECELL System in the U.S. for the repigmentation of stable depigmented vitiligo lesions, which we expect will begin during the fourth quarter of 2025
- Further invest in our RECELL System platform to automate and improve workflow, speed, and ease of use as it relates to specific indications, as well as to build upon our intellectual property estate
- Continue to build upon commercial activities in Japan through our partnership with COSMOTEC Company, Ltd with our current PMDA approval for RECELL with an indication in burns
- Develop and pursue viable commercial activities outside of the U.S. and Japan following the FDA approvals of the RECELL System for full-thickness skin defects and repigmentation of stable depigmented vitiligo lesions
- Pursue business development opportunities that are complementary to our core RECELL System indications and/or our targeted markets
- Improve our margins and profitability by leveraging our current team and infrastructure across an expanding base of business in burns and in future indications
- With the successful execution of the exclusive distribution agreement with Stedical Scientific, Inc., we will begin distribution of the PermeaDerm® Biosynthetic Wound Matrix in the United States using our existing sales force. Refer to Note 20 of our Consolidated Financial Statements for further details

Business Environment and Current Trends

Changes in reimbursement rates by third party payors may place additional financial pressure on hospitals and the broader healthcare system. Healthcare institutions may take actions to mitigate any persistent pressures on their budgets and such actions could impact the future demand for our products. Geopolitical conditions may also impact our operations. Although we do not have operations in Russia, Ukraine or in the Middle East, the continuation of the Russia-Ukraine military conflict and the conflict in the Middle East, and potential escalation of the conflicts beyond their current scope may further weaken the global economy and could result in additional inflationary pressures and supply chain constraints.

Results of Operations

Year-Ended December 31, 2023, compared to the Year-Ended December 31, 2022

The table below summarizes the results of our operations for each of the periods presented (in thousands).

Statement of Operations Data:	Year-Ended December 31, 2023	Year-Ended December 31, 2022	\$ Change	% Change
Revenues	\$ 50,143	\$ 34,421	15,722	46%
Cost of sales	(7,780)	(6,041)	(1,739)	(29)%
Gross profit	42,363	28,380	13,983	49%
BARDA income	1,428	3,215	(1,787)	(56)%
Operating expenses:				
Sales and marketing	(37,291)	(21,913)	(15,378)	(70)%
General and administrative	(28,334)	(23,330)	(5,004)	(21)%
Research and development	(20,821)	(13,857)	(6,964)	(50)%
Total operating expenses	(86,446)	(59,100)	(27,346)	(46)%
Operating loss	(42,655)	(27,505)	(15,150)	(55)%
Interest expense	(1,143)	(16)	(1,127)	*nm
Other income, net	8,483	892	7,591	*nm
Loss before income taxes	(35,315)	(26,629)	(8,686)	(33)%
Income tax expense	(66)	(36)	(30)	(83)%
Net loss	\$ (35,381)	\$ (26,665)	(8,716)	(33)%

*nm = not meaningful

Total net revenues increased by 46%, or \$15.7 million, to \$50.1 million, compared to \$34.4 million in the year-ended December 31, 2022. Our commercial revenue, which excludes BARDA revenue, was \$49.8 million for the year-ended December 31, 2023, an increase of \$15.8 million, or 46%, compared to \$34 million in the year-ended December 31, 2022. The growth in commercial revenues was largely driven by deeper penetration within individual customer accounts and the full-thickness skin defects launch along with the commencement of commercial sales with our partner COSMOTEC in Japan.

Gross profit margin increased by 2% to 84.5% compared to 82.4% in the year-ended December 31, 2022. The increase in gross profit margin is largely driven by higher production along with lower shipping costs.

BARDA income consisted of funding from BARDA, under the Assistant Secretary for Preparedness and Response, within the U.S. Department of Health and Human Services, under ongoing USG Contract No. HHSO100201500028C. BARDA income decreased 56% or \$1.8 million to \$1.4 million, compared to \$3.2 million in the year-ended December 31, 2022, due to reimbursable clinical trials winding down.

Total operating expenses increased by 46% or \$27.3 million to \$86.4 million, compared with \$59.1 million in the year-ended December 31, 2022.

Sales and marketing expenses increased by 70%, or \$15.4 million, to \$37.3 million, compared to \$21.9 million incurred in the year-ended December 31, 2022. Higher costs in the current year were primarily attributed to higher salaries and benefits, commissions, recruitment fees and travel costs. The increase in salaries and benefits and recruitment fees are due to the preparation of the commercial launch of full-thickness skin defects in June 2023. Higher commissions and travel costs were directly associated with the increase in revenues.

General and administrative expenses increased by 21%, or \$5.0 million, to \$28.3 million, compared to \$23.3 million incurred in the year-ended December 31, 2022. The increase was attributable to salaries and benefits, deferred compensation expense, stock-based compensation, and severance costs. Higher salary and benefits are driven by the increase in headcount. The increase in deferred compensation expense is driven by our deferred compensation liability which generally tracks the movements in the stock market. Severance costs in the current year were due to the termination of three former executive officers, partially offset by the termination of a former executive officer in the prior year.

Research and development expenses increased by 50%, or \$6.9 million, to \$20.8 million, compared to \$13.9 million incurred in the year-ended December 31, 2022. The increase was primarily due to higher clinical trial costs associated with the TONE study as well as other research and development costs associated with furthering our pipeline, and the development of the next generation

RECELL GO for preparation of Spray-On Skin Cells, which resulted in a PMA submission in June 2023. We also had increased expenses associated with building out a team of Medical Science Liaisons in support of the new full-thickness skin defects indication.

Interest expense increased by \$1.1 million due to the new Credit Agreement entered into with OrbiMed Advisors, LLC on October 18, 2023.

Other income, net increased by \$7.6 million in the current year primarily due to an increase of \$2.1 million in income from our investment activities, wind down of certain foreign subsidiaries that resulted in a \$9.4 million gain, partially offset by a loss on debt issuance of \$1.2 million, debt issuance costs of \$0.8 million and the change of fair value for our debt of \$1.6 million and change in fair value of warrants for \$0.7 million. We had an increase of approximately \$2.1 million in interest income due to higher investment yields. By the end of the fourth quarter of 2023 the business activities of AVITA Medical Pty Limited, AVITA Medical Europe Limited, Visiomed Group Pty Ltd, C3 Operations Pty Ltd and Infamed Pty Ltd were essentially dissolved. As part of the liquidation the company recognized \$9.4 million of non-cash foreign currency exchange gains associated with the elimination of the foreign subsidiaries. The gains were offset by expenses related to issuance of debt. We recognized approximately \$1.2 million loss on debt issuance as the fair value of the debt and the warrants on the issuance date exceeded the proceeds received on October 18, 2023, the closing date. In addition, we incurred approximately \$0.8 million in debt issuance costs. We also recognized \$1.7 million and \$0.7 million of non-cash charges due to the change in fair value of the debt and the warrant liability, respectively. As permitted under ASC 825, we elected the fair value option to account for the debt, and recorded the debt and warrants at fair value with changes in fair value recorded in the Consolidated Statements of Operations. Changes in fair value related to instrument specific credit risk for the debt are included in Other comprehensive income in the Consolidated Balance Sheet.

Net loss increased by \$8.8 million, to \$35.4 million, over the \$26.7 million recognized in the year ended December 31, 2022. The increase in net loss was driven by the higher operating expenses, partially offset by higher revenues and the non-cash charges as described above.

Year-Ended December 31, 2022, compared to the Year-Ended December 31, 2021

The table below summarizes the results of our operations for each of the periods presented (in thousands).

Statement of Operations Data:	Year-Ended December 31, 2022	Year-Ended December 31, 2021	\$ Change	% Change
Revenues	\$ 34,421	\$ 33,025	1,396	4%
Cost of sales	(6,041)	(6,104)	63	1%
Gross profit	28,380	26,921	1,459	5%
BARDA income	3,215	1,590	1,625	102%
Operating expenses:				
Sales and marketing	(21,913)	(16,267)	(5,646)	(35)%
General and administrative	(23,330)	(21,693)	(1,637)	(8)%
Research and development	(13,857)	(15,669)	1,812	12%
Total operating expenses	(59,100)	(53,629)	(5,471)	(10)%
Operating loss	(27,505)	(25,118)	(2,387)	(10)%
Interest expense	(16)	(29)	13	45%
Other income, net	892	47	845	*nm
Loss before income taxes	(26,629)	(25,100)	(1,529)	(6)%
Income tax expense	(36)	(42)	6	14%
Net loss	<u>\$ (26,665)</u>	<u>\$ (25,142)</u>	<u>(1,523)</u>	<u>(6)%</u>

*nm = not meaningful

Total net revenue increased by 4% or \$1.4 million to \$34.4 million, compared to \$33.0 million in the year-ended December 31, 2021, which included \$7.9 million from our delivery of units to managed inventory for BARDA (of the Office for the Assistant Secretary for Preparedness and Response) for emergency response preparedness. Total commercial revenue, which excludes BARDA revenue, increased by 36% or \$9.0 million to \$34.0 million in the year-ended December 31, 2022, compared to \$25.1 million in the year-ended December 31, 2021. The growth in commercial revenues was largely driven by deeper penetration within individual customer accounts along with the commencement of commercial sales with our partner COSMOTEC in Japan.

Gross profit margin was 82% and relatively flat compared to the year-ended December 31, 2021.

BARDA income consisted of funding from BARDA, under the Assistant Secretary for Preparedness and Response, within the U.S. Department of Health and Human Services, under ongoing USG Contract No. HHSO100201500028C. Under the BARDA

contract, income of \$3.2 million was recognized during the year-ended December 31, 2022, compared to income of \$1.6 million for the year-ended December 31, 2021. BARDA income increased as a result of funding by BARDA for the pivotal trial for use of the RECELL System for soft tissue repair.

Total operating expenses increased by 10% or \$5.5 million to \$59.1 million, compared to \$53.6 million in the year-ended December 31, 2021.

Sales and marketing expenses increased by 35%, or \$5.6 million, to \$21.9 million, compared to \$16.3 million recognized in the year-ended December 31, 2021. Increased costs in the current year were primarily driven by higher selling costs, pre-commercialization costs and higher salaries and benefits. Higher selling costs are attributable to increased commissions due to increased revenue and higher costs for travel, hands-on professional education, and training. Increased pre-commercialization costs are driven by activities related to future RECELL launches in soft tissue repair and vitiligo. Higher salaries and benefits were primarily due to additional field personnel added to deepen penetration within individual customer accounts.

General and administrative expenses increased by 8%, or \$1.6 million, to \$23.3 million, compared to \$21.7 million recognized in the year-ended December 31, 2021. The increase was primarily driven by higher salaries and benefits and share-based compensation expenses. Higher salaries and benefits costs were due to the expansion of our workforce to support overall operations along with severance costs associated with the termination of a former executive officer. Higher share-based compensation expense was due to the new equity grants in the current period, partially offset by the reversal of expense for unvested awards related to the termination of a former executive officer in the current year.

Research and development expenses decreased by 12%, or \$1.8 million, to \$13.9 million, compared to \$15.7 million recognized in the year-ended December 31, 2021. Research and development costs were lower due to the following: pediatric burn study was closed for enrollment, soft tissue repair and vitiligo trial participants were in less costly follow-up phases this period compared to more costly recruitment and treatment phases in the prior period, and lower expense for sponsored research toward pipeline development in the current period. This is partially offset by higher development expenses in the current year from ongoing development of next generation devices for preparation of Spray-On Skin™ Cells as compared to the prior year due to early prototype development and testing.

Net loss increased by 6%, or \$1.5 million, to \$26.7 million, over the \$25.1 million recognized in the year-ended December 31, 2021. The increase in net loss was driven by higher operating expenses as described above, partially offset by higher revenue.

Liquidity and Capital Resources

Overview

We expect to utilize cash reserves until U.S. sales of our products reach a level sufficient to fund ongoing operations. AVITA Medical has funded its research and development activities, and more recently its substantial investment in sales and marketing activities, through raising capital by issuing securities and the issuance of debt. As of December 31, 2023, the Company had approximately \$22.1 million in cash and cash equivalents and \$66.9 million in marketable securities.

On October 18, 2023 (the “Closing Date”), the Company entered into a Credit Agreement (the “Credit Agreement”), by and between the Company, as borrower, and an affiliate of OrbiMed Advisors, LLC, as the lender and administrative agent (the “Lender”). The Credit Agreement provides for a five-year senior secured credit facility in an aggregate principal amount of up to \$90.0 million (the “Loan Facility”), of which \$40.0 million was borrowed on the Closing Date (the “Initial Commitment Amount”). In addition, an aggregate of \$50.0 million will be made available in two separate \$25.0 million tranches, at the Company’s discretion, subject to certain net revenue requirements. The first tranche of \$25.0 million will be made available on or before December 31, 2024. The second tranche of \$25.0 million will be made available on or prior to June 30, 2025, only if the first tranche was drawn upon. On the Closing Date, the Company closed on the Initial Commitment Amount, less certain fees and expenses payable to or on behalf of the Lender. The indebtedness under the Credit Agreement will be secured by substantially all of our assets and will accrue interest at a rate equal to the greater of (a) forward-looking one-month term SOFR rate and (b) four percent (4%) per annum, plus eight percent (8%). In the event that the Company does not meet certain twelve-month trailing revenue targets at the end of certain fiscal quarters, the outstanding balance of the loan must be repaid in equal quarterly installments of 5% of the funded amount through the maturity date. The Credit Agreement contains representations, warranties and covenants that are customary for this type of agreement.

On the Closing Date, we issued to an affiliate of the Lender a warrant (the “Warrant”) to purchase up to 409,661 shares of our common stock, at an exercise price of \$10.9847 per share, with a term of 10 years from the issuance date. The Warrant contains customary share adjustment provisions, as well as weighted average price protection in certain circumstances.

As of the date these financial statements were issued, we believe we have sufficient cash reserves to fund operations for the next 12 months.

Financing Activities

On April 14, 2023, we entered into a Sales Agreement with Cowen and Company, LLC pursuant to which the Company may sell from time-to-time up to 3,799,164 shares of its common stock (the “2023 ATM Program”). During the year-ended December 31, 2023, we did not make any sales under the 2023 ATM Program.

On October 18, 2023, as discussed above, we completed a Credit Agreement with the Lender for an aggregate amount up to \$90.0 million. On the closing date of the agreement we drew \$40.0 million.

On October 18, 2023, as discussed above, we issued to an affiliate of the Lender a warrant to purchase up to 409,661 shares of our common stock, at an exercise price of \$10.9847 per share, with a term of 10 years from the issuance date.

Given the above, we believe there is presently sufficient working capital to support our committed activities, our research and development programs and other activities over the next twelve months.

The following table summarizes our cash flows for the periods presented:

(In thousands)	Year-Ended	
	December 31, 2023	December 31, 2022
Net cash used in operations	\$ (38,011)	\$ (19,090)
Net cash provided by/(used in) investing activities	1,607	(19,332)
Net cash provided by financing activities	40,374	900
Effect of foreign exchange rate on cash and cash equivalents	(16)	(26)
Net increase/(decrease) in cash and cash equivalents	3,954	(37,548)
Cash and cash equivalents at beginning of the period	18,164	55,712
Cash and cash equivalents at end of the period	22,118	18,164

Net cash used in operating activities was \$38.0 million during the year-ended December 31, 2023, and \$19.1 million during the year-ended December 31, 2022. The increase primarily resulted from higher operating costs, partially offset by increased revenues.

Net cash provided in investing activities was \$1.6 million during the year-ended December 31, 2023 and cash used in investing activities was \$19.3 million during the year-ended December 31, 2022. Cash flows provided by investing activities were primarily attributable to maturities of marketable securities. Cash flows used in investing activities for the year-ended December 31, 2022 is primarily attributable to purchase of marketable securities.

Net cash provided by financing activities was \$40.4 million and \$0.9 million for the years-ended December 31, 2023 and 2022, respectively. The increase in cash provided by financing activities was due to the issuance debt.

Capital Management and Material Cash Requirements

We aim to manage capital to maintain optimal returns to stockholders and benefits for other stakeholders. We also aim to maintain a capital structure that ensures the lowest cost of capital available to us. We regularly review our capital structure and seek to take advantage of available opportunities to improve outcomes for us and our stockholders.

For the year-ended December 31, 2023, there were no dividends paid and we have no plans to commence the payment of dividends. We have no purchase commitments or long-term contractual obligations, except for lease obligations as of December 31, 2023. Refer to Note 7 of our Consolidated Financial Statements for further details on our lease obligations. In addition, we have no off-balance sheet arrangements (as defined in the rules and regulations of the SEC) that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors. We have no committed plans to issue further shares on the market but will continue to assess market conditions.

Critical Accounting Policies and Estimates

The SEC defines “critical accounting policies” as those that require the application of management’s most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

The preparation of consolidated financial statements in conformity with U.S. Generally Accepted Accounting Practices, or U.S. GAAP, requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We base those estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances. Actual results could differ from those estimates.

The following listing is not intended to be a comprehensive list of all of our accounting policies. Our significant accounting policies are described in Note 2 to our consolidated financial statements contained elsewhere in this Annual Report. In many cases, the accounting treatment of a particular transaction is dictated by U.S. GAAP, with no need for our judgment in its application. There are also areas in which our judgment in selecting an available alternative would not produce a materially different result. We have identified the following as our critical accounting policies.

Revenue Recognition

We recognize revenue when its customers obtain control of promised goods or services, in an amount that reflects the consideration which we expect to be entitled in exchange for those goods or services.

To determine revenue recognition for arrangements that are within the scope of Topic 606, *Revenue from contracts with customers*, (“ASC 606”), we perform the following five steps:

1. Identify the contract with a customer
2. Identify the performance obligations
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations
5. Recognize revenue when/as performance obligation(s) are satisfied

In order for an arrangement to be considered a contract, it must be probable that we will collect the consideration to which it is entitled for goods or services to be transferred. Once the contract is determined to be within the scope of ASC 606, we assess the goods or services promised with each contract, determines whether those are performance obligations and the related transaction price. We then recognize the sale of goods based on the transaction price that is allocated to the respective performance obligation when the performance obligation is satisfied.

Our revenue consists primarily of the sale of the RECELL System to hospitals or other treatment centers, COSMOTEC and to BARDA (collectively, “customers”), predominately in the United States. We evaluated the BARDA contract and concluded that a portion of the arrangement, such as the procurement of the RECELL system and the emergency preparedness, represents a transaction with a customer and as such are in the scope of ASC 606. Amounts received from BARDA for the research and development of the our product are classified as BARDA income in the Consolidated Statement of Operations and are accounted for under IAS 20. For further details refer to BARDA Income and Receivables below.

Revenues for commercial customers (COSMOTEC, hospitals and treatment centers) are recognized as control of the product is transferred to customers, at an amount that reflects the consideration expected to be received in exchange for the product. Revenues are recognized net of volume discounts. As such, revenue is recognized only to the extent a significant reversal of revenues is not expected to occur in subsequent periods. For our contracts that have an original duration of one year or less, we used the practical expedient applicable to such contracts and does not consider the time value of money. Further, because of the short duration of these contracts, we have not disclosed the transaction price for the remaining performance obligations as of each reporting period or when we expect to recognize this revenue. We have further applied the practical expedient to exclude sales tax in the transaction price and expense contract acquisition costs such as commissions and shipping and handling expenses as incurred.

For revenues related to the BARDA contract within the scope of ASC 606, we identified two performance obligations (i) the procurement of 5,614 RECELL units, (ii) emergency preparedness services. Through this contract we promise to procure the product through a vendor management inventory arrangement and to stand ready to provide emergency deployment services related to the product. Emergency preparedness services include procuring necessary storage containers, housing, and maintaining the containers (and product), and providing shipping and handling services in the event of an emergency situation. This stand ready obligation is a

series of distinct services that are substantially the same and have the same pattern of transfer to the customer, overtime as services are consumed.

The total transaction price for the portion of the BARDA contract that is within the scope of ASC 606, was determined to be \$9.2 million at contract inception. The transaction price was allocated on a stand-alone selling price basis as follows: \$7.6 million to the procurement of the RECELL product, which is classified as revenues when recognized in the Consolidated Statement of Operations and \$1.6 million to the emergency deployment services is classified as revenues when recognized in the Consolidated Statement of Operations. The \$1.6 million for emergency deployment includes variable consideration which is deemed immaterial to the contract as a whole. We estimated the stand-alone selling price of the procurement of the RECELL product based on historical pricing of our product at the initial execution of the contract. We estimated the stand-alone selling price of the emergency deployment services performed based on our projected cost of providing the services plus an applicable profit margin as denoted in the contract.

Our performance obligations are either satisfied at a point in time or over time as services are provided. The product procurement performance obligation is satisfied at a point in time, upon transfer of control of the product. As such, the related revenue for these performance obligations is recognized at a point in time as revenue within our Consolidated Statement of Operations. In addition to guidance under ASC 606, we recognize revenue from the sales of RECELL product to BARDA for placement into vaccine stockpiles in accordance with Securities and Exchange Commission (“SEC”) Interpretation, Commission Guidance regarding Accounting for Sale of Vaccines and BioTerror Countermeasures to the Federal Government for Placement into the Pediatric Vaccine Stockpile or the Strategic National Stockpile (SNS). Under this guidance, revenue is recognized when product is placed in the BARDA vendor-managed inventory (“VMI”) as control of the product has been transferred to the customer at the time of delivery to the VMI. RECELL units that have been delivered to BARDA have a product replacement obligation at no cost to BARDA due to product’s limited shelf-life. The estimated cost of the expired inventory over the term of the contract is accrued on a per unit basis at the time of delivery. The liability is released upon replacement of the product along with a corresponding reduction to inventory. The emergency preparedness services performance obligation is satisfied over time. Revenue for the emergency deployment will be recognized on a straight-line basis during the term of the contract as services are consumed over time. Services recognized are included in sales within the Consolidated Statement of Operations. Contract costs to fulfil the performance obligation are incremental and expected to be recovered are capitalized and amortized on a straight-line basis over the term of the contract. Contract costs are included in other long-term assets.

See Note 5 to our Consolidated Financial Statements included in this Annual Report for additional detail on revenue recognition.

Government Grants / BARDA Income and Receivables

We were granted a BARDA contract in September 2015, wherein BARDA provided funding to us to support the ongoing U.S. clinical regulatory program towards FDA premarket approval, Compassionate Use program, clinical and health economics research, and U.S. pediatric burn programs.

Income under the BARDA contract is earned under a cost-plus-fixed-fee arrangement in which we are reimbursed for direct costs incurred plus allowable indirect costs and a fixed-fee earned. Billings under the contracts are based on approved provisional indirect billing rates, which permit recovery of fringe benefits, general and administrative expenses and a fixed fee.

We have concluded that grants are not within the scope of ASC 606, as they do not meet the definition of a contract with a “customer”. We have further concluded that Subtopic 958-605, Not-for-Profit-Entities-Revenue Recognition also does not apply, as the Company is a business entity, and the grants are with governmental agencies. Government grants and related receivables are recognized when there is reasonable assurance that the grant will be received, and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognized as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate. When the grant relates to an asset, the fair value is credited to deferred income and is released to the profit or loss over the expected useful life of the relevant asset by equal annual installments.

Share-Based Compensation

We measure and recognize compensation expense on a graded-vesting method, for stock options and restricted stock units (“RSUs”), to employees, directors and consultants over the vesting period based on their grant date fair values. Compensation expense for performance-based awards is measured based on the number of shares ultimately expected to vest, estimated at each reporting date based on management’s expectations regarding the relevant performance criteria. We estimate the fair value of stock options on the date of grant using the Black-Scholes option pricing model. The fair value of RSUs is based on the closing stock price as determined per Nasdaq at the date of grant.

Determining the estimated fair value at the grant date requires judgment in determining the appropriate valuation model and assumptions, including, risk-free rate, volatility rate, annual dividend yield and the expected term.

The following assumptions were used in the valuation of stock options.

- Expected volatility – determined using the historical volatility using daily intervals over the expected term.
- Expected dividends – None, based on the fact that we have never paid cash dividends and does not expect to pay any cash dividends in the foreseeable future.
- Expected term – the expected term of our stock options for tenure only vesting has been determined utilizing the “simplified” method as described in the SEC’s Staff Accounting Bulletin No. 107 relating to stock-based compensation. The simplified method was chosen because we have limited historical option exercise experience due to its short operating history of awards granted, the first plan was established in 2016 and was primarily used for Executives awards. Further, we do not have sufficient history of exercises in the U.S. market given our redomiciliation from Australia to the United States in 2020.
- Risk-free interest rate – the risk-free interest rate is based on the U.S. Treasury yield in effect at the time of grant for a period approximately equal to the expected term of the award.

See Note 15 to our Consolidated Financial Statements included in this Annual Report for additional detail on share-based compensation.

Warrants

Warrants are accounted for in accordance with applicable accounting guidance provided in ASC Topic 815, *Derivatives and Hedging – Contracts in Entity’s Own Equity* (“ASC 815”), as a liability based on the specific terms of the warrant agreement and recorded at fair value. The warrants are subject to re-measurement at each settlement date and at each balance sheet date and any change in fair value is recognized in earnings. The fair value of the warrant liability, which is reported within Warrant liability on the Consolidated Balance Sheets, is estimated by the Company based on the Black-Scholes option pricing model with the following inputs (Level 3):

- Price of common stock
- Estimated expected term
- Estimated exercise price
- Estimated expected volatility
- Estimated risk free interest rate
- Estimated expected dividend rate

Long-term debt

We elected the fair value option (“FVO”) of accounting under ASC 825-10, *Financial Instruments* (“ASC 825”), to account for the debt. ASC 825-10, provides FVO election that allows companies an irrevocable election to use fair value at the date of issuance and subsequently remeasure every reporting period. The fair value of the debt is reported in the Consolidated Balance Sheets. Changes in fair value are reported in earnings in Other income in the Consolidated Statements of Operations. Any changes in fair value caused by instrument-specific credit risk are presented separately in other comprehensive income. We have elected to present interest expense separately from changes in fair value and therefore will present interest expense associated with the debt. All costs associated with the issuance of the Credit Agreement accounted for using the fair value option were expensed upon issuance. Refer to Note 6 for further details.

The fair value of the debt was determined using a Monte Carlo simulation in order to capture the probability of different potential cash flows outcomes associated with the contractual terms of the instrument. The below assumptions were used in the Monte Carlo simulation (Level 3):

- Estimated risk free interest rate
- Estimated revenue volatility
- Estimated revenue discount rate
- Estimated future revenue projection
- Estimated expected dividend rate

Income Taxes

Income taxes are accounted for using the liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that a portion of the deferred tax asset will not be realized.

We review our uncertain tax positions regularly. An uncertain tax position represents our expected treatment of a tax position taken in a filed return or planned to be taken in a future tax return or claim that has not been reflected in measuring income tax expense for financial reporting purposes. We recognize the tax benefit from an uncertain tax position when it is more-likely-than-not that the position will be sustained upon examination on the basis of the technical merits or the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired.

See Note 16 to our Consolidated Financial Statements included in this Annual Report for additional detail on income taxes.

Recent accounting pronouncements

See discussion of recent accounting pronouncements in Note 2 of the Consolidated Financial Statements located in Item 8 in this Annual Report.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, we are not required to provide the information required by this item.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our financial statements and supplementary data are attached hereto beginning on Page F-1 and are incorporated by reference herein.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures of a company that are designed to ensure that information required to be disclosed by the company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its chief executive officer and chief financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. As required by Rules 13a-15(b) and 15d-15(b) under the Exchange Act, our management, with the participation of our chief executive officer and chief financial officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures as of December 31, 2023. Based on this evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective as of December 31, 2023.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for our company, as this term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. As required by Rules 13a-15(e) and 15d-15(e) under the Exchange Act, our management, with the participation of our chief executive officer and chief financial officer, conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2023, based on the criteria set forth in the Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2023.

This report does not include an attestation report of our independent registered public accounting firm regarding our internal control over financial reporting, in accordance with applicable SEC rules that permit us to provide only management's report in this report.

Changes in Internal Control over Financial Reporting

During the three-months ended December 31, 2023, there were no material changes made in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act).

Inherent Limitations on Disclosure Controls and Procedures

Management recognizes that any controls and procedures, no matter how well-designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the benefits of possible controls and procedures relative to their costs. Because of these inherent limitations, our disclosure controls and procedures may not prevent or detect all instances of fraud, misstatements, or other control issues. In addition, projections of any evaluation of the effectiveness of disclosure or internal controls to future periods are subject to risks, including, among others, that controls may become inadequate because of changes in conditions or that the degree of compliance with policies or procedures may deteriorate.

Item 9B. OTHER INFORMATION

None

Item 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

For personal use only

PART III

Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Identification of Directors

Name	Age	Position with the Company and Principal Occupation	Director Since	Board Term Expires
Lou Panaccio	66	Chairman of the Board of Directors	July 2014	June 2024
Jeremy Curnock Cook	74	Non-Executive Director	October 2012	June 2024
Professor Suzanne Crowe	73	Non-Executive Director	January 2016	June 2024
Jan Stern Reed	64	Non-Executive Director	July 2021	June 2024
Robert McNamara	67	Non-Executive Director	June 2023	June 2024
Cary Vance	58	Non-Executive Director	June 2023	June 2024
James Corbett	65	Executive Director and Chief Executive Officer	July 2021	June 2024

Lou Panaccio has served as Chairman of the Board of Directors since July 2014. Mr. Panaccio is a successful healthcare businessman with extensive experience leading companies from concept to commercialization. Mr. Panaccio possesses more than 35 years of executive leadership experience in healthcare services and life sciences, including more than 25 years of board-level experience. Mr. Panaccio is currently a Director of ASX50 company and one of the world's largest medical diagnostics companies, Sonic Healthcare Limited, where he has served since 2005. In addition, Mr. Panaccio is Director of Unison Housing Limited, was a Chairman of Genera Biosystems Limited until June 2019, is a Chairman of Adherium Limited and a Director of Rhythm Biosciences Limited, both of which are publicly listed (ASX) development-stage medical diagnostics/devices companies. We believe Mr. Panaccio is qualified to serve on our Board of Directors based on his extensive experience in the healthcare services and life sciences sectors and his experience in serving on boards.

Jeremy Curnock Cook has served as a Director since October 2012. He is a veteran in the life sciences/healthcare industry and has been actively supporting the commercialization of healthcare innovations and helping entrepreneurs build their international businesses over the past 45 years. Founder and Managing Director of BioScience Managers, Mr. Curnock Cook brings his decades of international experience to our Board of Directors. Over his career, Mr. Curnock Cook has successfully managed in excess of US \$1 billion in equity investments. He launched the first dedicated biotechnology fund for the Australian market and is a former head of the life science private equity team at Rothschild Asset Management, an early pioneer and significant investor in the sector. In his early career he founded the International Biochemicals Group which he successfully sold to Royal Dutch Shell. Mr. Curnock Cook founded a European-focused seed fund with Johnson & Johnson and built the International Biotechnology Trust. Mr. Curnock Cook has served on more than 40 boards of directors in the life science sector in the UK, Europe, USA, Canada, Japan and Australia. In addition to serving on our Board of Directors, Mr. Curnock Cook currently serves on the following boards: International BioScience Managers Ltd appointed March 2000, Bioscience Managers Pty Ltd appointed January 2003, REX Bionics Pty Ltd appointed February 2012, Sheldon LTD (formerly Sea Dragon) appointed October 2012, Adherium Ltd appointed April 2015, Bioscience Managers UK Ltd appointed August 2017, Marine Department Ltd, appointed January 2019, JLCC Ltd appointed December 2019, Tidal Sense LTD (formally CRiL) appointed November 2020 and Humanetix Ltd appointed September 2021. We believe Mr. Curnock Cook is qualified to serve on our Board of Directors based on his extensive experience in the life sciences sector.

Professor Suzanne Crowe AO has served as a Director since January 2016. Australian-based, she is a physician-scientist and ASX/Nasdaq-listed company director with expertise in supporting companies with their medical and scientific strategies. A Fellow of the Australian Institute of Company Directors, and Emeritus Professor, Monash University Melbourne, she is currently a Director of Sonic Healthcare Ltd, a large global medical diagnostics company. Past board positions include St Vincent's Health Australia Ltd (2012-2021), the country's largest not-for-profit health and aged care provider. After 35 years at both, she has recently retired from the Burnet Institute, having served as Associate Director Clinical Research, and The Alfred Hospital Melbourne, where she held the appointment of Senior Specialist Physician in Infectious Diseases. She was appointed as Officer of the Order of Australia in June 2020 in recognition of her distinguished services to health, clinical governance, biomedical research, and education. We believe Professor Crowe is qualified to serve on our Board of Directors based on her technical experience and extensive expertise in supporting companies with their medical and scientific strategies.

Jan Stern Reed has served as a Director since July 2021. She has more than 35 years of legal, management and business leadership experience primarily within the healthcare industry, and brings significant expertise in corporate governance, compliance, and risk management. Ms. Reed served as Senior Vice President, General Counsel and Corporate Secretary at Walgreens Boots Alliance, Inc., a global health and wellbeing company. Prior to Walgreens, Ms. Reed was Executive Vice President, Human Resources, General Counsel and Corporate Secretary of Solo Cup Company, where she was responsible for the legal, human resources, internal audit, corporate communications, and compliance functions. Prior to Solo Cup Company, she was Associate

General Counsel, Corporate Secretary and Chief Corporate Governance Officer at Baxter International, Inc. Ms. Reed holds a Bachelor of Arts degree from the University of Michigan and a Juris Doctor from the Northwestern University Pritzker School of Law. Ms. Reed currently serves as a board member of Stepan Co. (NYSE: SCL), a major manufacturer of specialty and intermediate chemicals used in a broad range of industries, and AngioDynamics, Inc. (NASDAQ: ANGO), an industry-leading and transformative medical technology company focused on restoring healthy blood flow in the body's vascular system, expanding cancer treatment options, and improving quality of life for patients. We believe Ms. Reed is qualified to serve on our Board of Directors based on her extensive experience in legal, human resources, corporate governance, general management and business leadership, primarily within the healthcare industry.

Robert McNamara has served as a Director since April 2023. He is an accomplished senior executive with over 25 years of leadership experience in public and privately held companies in the medical device and technology industries. His extensive experience in operations and financial management spans across early stage, high growth, and mature companies. He is currently a member of the Board of Directors and Chair of Audit Committee for Axonics, Inc. Additionally, Mr. McNamara is a member of the Board of Directors and Chair of Compensation Committee for Xtant Medical Holdings. Prior to these appointments, Mr. McNamara served as Executive Vice President, Chief Financial Officer of LDR Holding/Spine. Prior to this role, he served as the Chief Financial Officer of three publicly traded medical device companies including Accuray, Somnus Medical Technologies, and Target Therapeutics. Mr. McNamara holds a Bachelor of Science in Accounting from the University of San Francisco and an MBA from The Wharton School, University of Pennsylvania. We believe Mr. McNamara is qualified to serve on our Board of Directors because of his experience with financial management and other requirements of U.S. public and private companies, and considerable expertise in the medical device and technology industries.

Cary Vance has served as a Director since April 2023. Mr. Vance has over 25 years of extensive leadership experience with commercial and operational expertise in the healthcare industry. He is currently the President and Chief Executive Officer of PhotoniCare, Inc., a position he has held since May 2023. Prior to this appointment, he was President and CEO of Titan Medical, and he continues to serve as an independent director for Titan Medical's Board of Directors. Previously, Mr. Vance served as President and CEO of XCath, a privately held neurovascular robotics company, having also served in similar roles at OptiScan Biomedical, Myoscience, and Hansen Medical. He strategically transformed and commercialized these businesses and markets with disruptive, enabling, and game-changing novel technologies. Mr. Vance has also executed on equity and debt financing strategies as an integral step to successful value creation and M&A events. Prior to his role at Hansen Medical, he served in various global executive leadership roles at Teleflex, Covidien, and GE HealthCare. Mr. Vance is Lean/Six Sigma Black Belt Certified, NACD Certified, and holds both a Bachelor of Arts degree in Economics and an MBA from Marquette University. We believe Mr. Vance is qualified to serve on our Board of Directors based on his leadership experience and extensive expertise in commercial and operations in the healthcare industry.

James Corbett was appointed as President and CEO of the Company effective as of September 28, 2022. Mr. Corbett served as a Non-Executive Director from July 2021 to September 28, 2022. He has approximately 40 years of leadership experience in the medical device field, most recently, as CEO of CathWorks Ltd., a software-based medical technology company. Mr. Corbett has extensive global commercial and operating experience, serving as an expatriate General Manager of Baxter Japan and later as General Manager and President of Scimed Life Systems Inc. and Boston Scientific International respectively. During his career he has served as CEO of three publicly listed companies; Microtherapeutics Inc (MTIX), ev3 Inc (evvv), Alphatec Spine (ATEC). Mr. Corbett has also led two privately funded companies as CEO: Home Diagnostics Inc. and Vertos Medical. Mr. Corbett has extensive capital market and governance experience from both public and private environments. Mr. Corbett holds a Bachelor of Science in Business Administration from the University of Kansas. Mr. Corbett is a board member of two privately held medical device companies. We believe Mr. Corbett is qualified to serve on our board of directors based on his global commercial and operating expertise in supporting companies with their medical and scientific strategies.

Identification of Named Executive Officers

Name	Age	Position	Date First Elected or Appointed
James Corbett	65	Chief Executive Officer	September 2022
David O'Toole	65	Chief Financial Officer	June 2023
Donna Shiroma	61	General Counsel	June 2018

James Corbett is discussed above under "Identification of Directors".

David O'Toole an accomplished financial executive with extensive experience in both public company operations and capital markets, Mr. O'Toole joined AVITA Medical in 2023 as its Chief Financial Officer. Mr. O'Toole most recently served as CFO of Opiant Pharmaceuticals, a biopharmaceutical company developing treatments for addiction and drug overdose, which was acquired

by Indivior in March of 2023. Prior to that, he served as CFO of Soleno Therapeutics, a company focused on the development and commercialization of novel therapeutics for the treatment of rare diseases. Prior to Soleno, Mr. O'Toole held the role of CFO for three publicly traded life sciences companies where he built and led high-performance teams. Prior to his CFO experience, he spent over 24 years in public accounting, including 16 years with Deloitte & Touche. He holds a Bachelor of Science in accounting from the University of Arizona and is a Certified Public Accountant (non-active).

Donna Shiroma has served as General Counsel, Chief Compliance Officer, and Corporate Secretary since June 2018. Ms. Shiroma has more than 20 years of legal and compliance experience in the pharmaceutical and medical device industries and has played an instrumental role in transitioning companies from clinical to commercial entities. Prior to joining the Company, she served in roles of increasing responsibility as corporate counsel, vice president of legal, chief privacy officer, chief compliance officer, chief commercial officer and general counsel. Her prior professional experiences are with: Astex Pharmaceuticals from 2017 to 2018, Ascend Therapeutics from 2008 to 2017, PDL BioPharma from 2006 to 2008, and several Johnson & Johnson companies from 2001 to 2006. Ms. Shiroma holds a B.S. in Environmental Sciences from University of California, Berkeley, and a Juris Doctor degree from Santa Clara University School of Law. She is licensed in the State of California as an attorney.

Term of Office

Our Directors are elected for a term of one year and until their respective successors are elected and qualified, or until their earlier resignation, disqualification, or removal. Our executive officers are appointed by our Board of Directors and hold office for such terms as may be prescribed by our Board of Directors and until their successors are appointed, or until their earlier resignation or removal.

Family Relationships

There are no family relationships between our Directors or executive officers.

Involvement in Certain Legal Proceedings

None of our Directors or executive officers has been involved in any of the following events during the past ten years:

- a) any bankruptcy petition filed by or against any business or property of such person or any partnership or business in which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time;
- b) any conviction in a criminal proceeding or being a named subject of a pending criminal proceeding (excluding traffic violations and other minor offences);
- c) being the subject of any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining, barring, suspending or otherwise limiting his or her involvement in any type of business, securities or banking activities;
- d) being found by a court of competent jurisdiction (in a civil action), the SEC or the Commodity Futures Trading Commission to have violated a federal or state securities or commodities law, and the judgment has not been reversed, suspended, or vacated;
- e) being the subject of, or a party to, any federal or state judicial or administrative order, judgment, decree, or finding, not subsequently reversed, suspended or vacated, relating to an alleged violation of: (i) any federal or state securities or commodities law or regulation; or (ii) any law or regulation respecting financial institutions or insurance companies including, but not limited to, a temporary or permanent injunction, order of disgorgement or restitution, civil money penalty or temporary or permanent cease-and-desist order, or removal or prohibition order; or (iii) any law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or
- f) being the subject of, or a party to, any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization (as defined in Section 3(a)(26) of the Exchange Act), any registered entity (as defined in Section 1(a)(40) of the Commodity Exchange Act), or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member.

Gender Diversity

Under the 4th Edition of the ASX's Corporate Governance Principles and Recommendations the Company is required to set measurable objectives for achieving gender diversity in the composition of its board, senior executives and workforce generally. As of the date of this Form 10-K, the Company's Directors of the Company are 28.5% female and 71.5% male.

The Company is also in the process of developing measurable objectives for achieving gender diversity in the composition of its senior executives and workforce generally in accordance with its Code of Ethics and Business Conduct. The Company will disclose its measurable objectives, the time period for achieving those objectives and the Company's progress towards achieving those objectives in future reporting periods.

Performance Evaluations

At least annually, the Nominating and Corporate Governance Committee will lead the Board of Directors in a self-evaluation to determine whether the board, its committees and individual directors are functioning effectively. The board completed its last self-evaluation during the fiscal year-ended December 31, 2023.

Additionally, the Nominating and Corporate Governance Committee, Compensation Committee and Audit Committee conduct an annual evaluation of each Board committee as it relates to the composition of each committee, the frequency and length of meetings, each committee's primary responsibilities, and the effectiveness of each of the committee's duties. The Nominating and Corporate Governance Committee and Compensation Committee completed its self-evaluation during the fiscal year-ended December 31, 2023.

The Company's Compensation Committee undertakes a review of the performance of the Company's CEO and the executive management team annually during the first quarter of the calendar year. While no performance evaluation for the fiscal year-ended December 31, 2022 took place in 2023, the Company's Compensation Committee completed a performance evaluation for the fiscal year-ended December 31, 2023 on or around January 3, 2024.

Code of Ethics

We have adopted a Code of Conduct, or the Code, that constitutes a "code of ethics" as that term is defined in paragraph (b) of Item 406 of Regulation S-K and that applies to our executive officers, non-executive Directors, management and employees of the Company. A copy of the Code is available on our website at www.avitamedical.com.

If we make any amendments to the Code or grant any waivers, including any implicit waiver, from a provision of the Code, we will disclose the nature of such amendment or waiver on our website. The information on our website is not incorporated by reference into this Annual Report.

Section 16(a) Beneficial ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act requires the Company's Directors and certain of its executive officers and persons who beneficially own more than 10% of the Company's common shares to file reports of and changes in ownership with the SEC. Based solely on the Company's review of copies of SEC filings it has received or filed, the Company believes that each of its Directors, executive officers, and beneficial owners of more than 10% of the shares satisfied the Section 16(a) filing requirements during the fiscal year-ended December 31, 2023.

Election of Directors

Our Board of Directors consists of seven members. Directors are elected at our annual general meeting of stockholders and hold office for a term of one year and until their successors have been elected and qualified or until the earlier of their resignation or removal. Our Directors were most recently elected at our 2023 annual general meeting on June 6, 2023, to hold office for a term of one year or until his or her successor is duly elected and qualified. Any newly created directorship or any vacancy occurring on our Board of Directors may be filled only by a majority of the remaining members of our Board, even if such majority is less than a quorum, and each Director so elected shall hold office until the expiration of the term of office of the Director whom he or she has replaced or until his or her successor is elected and qualified. Under ASX Listing Rule 14.4, any Directors of the Company (except a managing Director) must not hold office without re-election past the third annual general meeting following the Director's appointment or three years, whichever is longer.

Stockholder Nominees for Director

There have been no material changes to the procedures by which stockholders may recommend nominees to the Board of Directors.

Committees of the Board of Directors

Our Board of Directors has established an audit committee, a compensation committee, and a nominating and corporate governance committee, each of which operates pursuant to a written charter adopted by our Board of Directors. Our Board of Directors may also establish other committees from time to time to assist the Board of Directors. The composition and functioning of all of our committees comply with all applicable requirements of the Sarbanes-Oxley Act, Nasdaq and SEC rules and regulations and the ASX Listing Rules and also align with the ASX Corporate Governance Council's 4th Edition Corporate Governance Principles and Recommendations. Each committee has a charter, which is available on our website at www.avitamedical.com. As of the date of this report, the composition of our audit, compensation, and nominating and corporate governance committees were as follows:

Director	Independent	Compensation Committee	Audit Committee	Nominating and Corporate Governance Committee
Lou Panaccio	X	Member	Member	
Jeremy Curnock Cook	X	Member		Member
Professor Suzanne Crowe	X	Member		Member
Jan Stern Reed	X	Member	Member	Chair
Robert McNamara	X		Chair	Member
Cary Vance	X	Chair	Member	

Audit Committee

Nasdaq Marketplace Rules require us to establish an audit committee comprised of at least three members, each of whom is financially literate and satisfies the respective "independence" requirements of the SEC and Nasdaq and one of whom has accounting or related financial management expertise at senior levels within a company. In addition, the ASX Listing Rules and the 4th Edition of the ASX's Corporate Governance Principles and Recommendations require us to have an Audit Committee comprised of at least three members, all of whom are non-executive Directors and a majority of whom are "independent" Directors, and which is chaired by an independent Director who is not the chair of the Board.

We have a separately-designated standing Audit Committee established in accordance with Section 3(a)(58)(A) of the Exchange Act. Our Audit Committee assists our Board of Directors in overseeing the accounting and financial reporting processes of our company and audits of our financial statements, including the integrity of our financial statements, compliance with legal and regulatory requirements, our registered public accounting firm's qualifications and independence, and such other duties as may be directed by our Board of Directors. The Audit Committee is also required to assess risk management in conjunction with the Board of Directors.

Our Audit Committee currently consists of four Board members, each of whom satisfies the "independence" requirements of the SEC, Nasdaq Marketplace Rules, the ASX Listing Rules and the 4th Edition of the ASX's Corporate Governance Principles and Recommendations. Our Audit Committee is currently composed of Robert McNamara, Lou Panaccio, Cary Vance and Jan Stern Reed. Each qualifies as an "independent director" within the meaning of Nasdaq Marketplace Rules and the 4th Edition of the ASX's Corporate Governance Principles and Recommendations. Mr. Curnock-Cook was interim, Chairman of the Audit Committee from September 2022 through April 2023. Mr. Robert McNamara is the current Audit Committee Chair and was appointed to that role as of May 2023, following his appointment to the Board of Directors. Our Board of Directors has determined that Robert McNamara is an "audit committee financial expert", as defined in item 407(d)(5)(ii) of Regulations S-K. The Audit Committee meets at least two times per year. See below for summary of attendance.

The Audit Committee held a total of five meetings during the annual period ended December 31, 2023. The meetings attended by each Director, and the number of meetings that they were each eligible to attend, is as follows:

Audit Committee Meeting Attendance

		Meetings attended/Meetings held
Robert McNamara	(1)	3/5
Jeremy Curnock Cook	(2)	5/5
Lou Panaccio		4/5
Jan Stern Reed		5/5
Cary Vance	(3)	3/5
James Corbett	(4)	5/5

- (1) Mr. Robert McNamara was elected to the Board of Directors on April 1, 2023. Mr. McNamara was appointed by the Board of Directors to serve as Audit Committee Chair, with effect from May 10, 2023.
- (2) Mr. Jeremy Curnock Cook stepped down as a member of the Audit Committee, with effect from May 10, 2023.
- (3) Mr. Cary Vance was elected to the Board of Directors on April 1, 2023. Mr. Vance was appointed by the Board of Directors to serve as an Audit Committee member, with effect from May 10, 2023.
- (4) Mr. James Corbett was not a member of the Audit Committee but was in attendance at all Audit Committee meetings in 2023 as CEO.

Compensation Committee

Our Board of Directors has established a Compensation Committee, which is comprised of independent Directors, within the meaning of Nasdaq Marketplace Rules and also the 4th Edition of the ASX's Corporate Governance Principles and Recommendations. The Compensation Committee must be comprised solely of non-executive directors in accordance with the ASX Listing Rules and must also be chaired by an independent Director in accordance with the 4th Edition of the ASX's Corporate Governance Principles and Recommendations. The Compensation Committee is responsible for reviewing the salary, incentives, and other benefits of our directors, senior executive officers and employees, and to make recommendations on such matters for approval by our Board of Directors. The Compensation Committee is also responsible for overseeing and advising our Board of Directors with regard to the adoption of policies that govern our compensation programs. Professor Suzanne Crowe, Jeremy Curnock Cook, Jan Stern Reed, Cary Vance and Lou Panaccio are the current members of the Compensation Committee, and each qualifies as an "independent Director" within the meaning of Nasdaq Marketplace Rules and the 4th Edition of the ASX's Corporate Governance Principles and Recommendations. Cary Vance is the chair of this committee (being an independent Director who is not the chair of the Board).

The Compensation Committee held a total of five meetings during annual period ended December 31, 2023. The meetings attended by each Director, and the number of meetings that they were each eligible to attend, is as follows:

Compensation Committee Meeting Attendance

		Meetings attended/Meetings held
Professor Suzanne Crowe		5/5
Jeremy Curnock Cook		4/5
Lou Panaccio		5/5
Jan Stern Reed	(1)	5/5
Cary Vance	(2)	3/5
James Corbett	(3)	5/5
Robert McNamara	(4)	3/5

- (1) Ms. Jan Stern Reed stepped down from role as Compensation Committee Chair and was appointed by Board of Directors to serve as Compensation Committee member, with effect from May 10, 2023.
- (2) Mr. Cary Vance was elected to the Board of Directors on April 1, 2023. Mr. Vance was appointed by the Board of Directors to serve as member of Compensation Committee, with effect from May 10, 2023. Mr. Vance was then appointed to Compensation Committee Chair beginning with August 9, 2023 meeting.
- (3) Mr. James Corbett was not a member of the Compensation Committee but was in attendance at all Compensation Committee meetings in 2023 as CEO.
- (4) Mr. Robert McNamara was elected to the Board of Directors on April 1, 2023.

Nominating and Corporate Governance Committee

Our Board of Directors has established a Nominating and Corporate Governance Committee. Under the 4th Edition of the ASX's Corporate Governance Principles and Recommendations, our Nominating and Corporate Governance Committee should have at least three members, a majority of whom are independent, and should also be chaired by an independent director. Professor Suzanne Crowe, Robert McNamara, Jan Stern Reed and Jeremy Curnock Cook are the current members of the Nominating and Corporate Governance Committee and each qualifies as an "independent director" within the meaning of Nasdaq Marketplace Rules and the 4th

Edition of the ASX's Corporate Governance Principles and Recommendations. Jan Stern Reed is the Chair of this committee (being an independent director). The Nominating and Corporate Governance Committee is responsible for identifying individuals qualified to become members of our Board of Directors, recommending nominees for election at the stockholders meetings or to fill vacancies that arise on our Board of Directors, and recommending qualified and experienced directors to serve on the committees of our Board of Directors. In addition, the Nominating and Corporate Governance Committee is responsible for leading the Board of Directors to complete a self-evaluation of the board, its committees, and the individual directors.

The Nominating and Corporate Governance Committee held a total of four meetings during the annual period ended December 31, 2023. The meetings attended by each Director, and the number of meetings that they were each eligible to attend, is as follows:

Nominating and Corporate Governance Committee Meeting Attendance		
		Meetings attended/Meeting held
Lou Panaccio	(1)	3/4
Jeremy Curnock Cook		4/4
Professor Suzanne Crowe		4/4
Jan Stern Reed		4/4
Robert McNamara	(2)	3/4
James Corbett	(3)	4/4
Cary Vance	(4)	3/4

- (1) Mr. Lou Panaccio stepped down as a member of the Nominating and Corporate Governance Committee, with effect from May 10, 2023.
- (2) Mr. Robert McNamara was elected to the Board of Directors on April 1, 2023. Mr. McNamara was appointed by the Board of Directors to serve as member of the Nominating and Corporate Governance Committee, with effect from May 10, 2023.
- (3) Mr. James Corbett was not a member of the Nominating and Corporate Governance Committee but was in attendance at all Nominating and Corporate Governance Committee meetings in 2023 as CEO.
- (4) Mr. Cary Vance was elected to the Board of Directors on April 1, 2023.

Board of Directors' Meetings

The Board of Directors held a total of seven meetings during the annual period ended December 31, 2023. The meetings attended by each Director, and the number of meetings that they were each eligible to attend, is as follows:

Board of Directors' Meeting Attendance		
		Meetings attended/Meetings held
Lou Panaccio		7/7
Jeremy Curnock Cook		7/7
Professor Suzanne Crowe		7/7
Jan Stern Reed		7/7
Robert McNamara	(1)	4/7
Cary Vance	(2)	5/7
James Corbett		7/7

- (1) Mr. Robert McNamara was elected to the Board of Directors on April 1, 2023.
- (2) Mr. Cary Vance was elected to the Board of Directors on April 1, 2023.

Item 11. EXECUTIVE COMPENSATION

The particulars of the compensation paid to the below listed "named executive officers" of our company are set out in the summary compensation below.

- *James Corbett, Chief Executive Officer*
- *David O'Toole, Chief Financial Officer*
- *Donna Shiroma, General Counsel*

SUMMARY COMPENSATION TABLE

The following table sets forth for our named executive officers the following information for the annual period ended December 31, 2023 and December 31, 2022.

Name and Position	Year	Salary	Bonus	Stock Awards (1)	Option Awards (2)	All Other Compensation (3)	Total
		(\$)	(\$)	(\$)	(\$)	(\$)	(\$)
Named Executive Officers:							
James Corbett	2023	625,000	491,188	-	912,500	39,987 (4)	2,068,675
Chief Executive Officer	2022	156,992	100,726	-	1,232,747	5,119 (4)	1,495,584
David O'Toole	2023	245,048	146,753		1,607,150	7,875 (5)	2,006,826
Chief Financial Officer	2022	-	-	-	-	-	-
Donna Shiroma	2023	431,526	209,829	-	547,500	47,249 (6)	1,236,104
General Counsel	2022	416,902	178,662	178,672	82,524	47,155 (7)	903,915

- (1) Amounts in this column represent awards of restricted stock units with the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. The fair value determined at the date of grant in accordance with U.S. GAAP based on the closing price of our common stock on the applicable grant date. The vesting of these stock awards is subject to continuation of employment over the relevant vesting period.
- (2) Amounts in this column represent awards of stock options with the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. Amounts in this column represent option awards issued to the individuals noted, based on the fair value determined at the date of grant in accordance with U.S. GAAP. See Note 15- Share-Based Payment Plans to our Consolidated Financial Statements included in Part II, Item 8. "Financial Statements and Supplementary Data" for the assumptions used in determining the grant date fair value of option awards. The vesting of these option awards are subject to various performance or tenure related criteria.
- (3) Amounts in this column represent all other compensation for the covered fiscal year that the smaller reporting company could not properly report in any other column of the Summary Compensation Table. This includes the non-qualified deferred compensation employer match, 401(k) match, and fringe benefits such as car allowance, accommodations and medical benefits, along with related taxes on grossed up fringe benefits.
- (4) Relates to accommodation costs associated with the executive commuting from his home to our offices in Valencia, California (including an amount necessary to gross up these costs for income tax purposes under U.S. federal and California State laws).
- (5) Represents 401(k) employer match contribution.
- (6) Comprised of (a) \$28,045 in non-qualified deferred compensation employer match and (b) \$19,204 in 401(k) employer match contribution.
- (7) Comprised of (a) \$28,855 in non-qualified deferred compensation employer match and (b) \$18,300 in 401(k) employer match contribution.

Employment Contracts

The following table outlines the specified terms of the relevant employment contracts for the named executive officers of the Company. For compensation information of named executives refer to the table above.

Role	Name	Contract Duration	Period of Notice (2) (3)	Termination payments provided for by contract (1)
Chief Executive Officer (CEO)	James Corbett	Three years with automatic one-year extensions on each anniversary.	Termination by the Company with or without Cause— No notice period. Termination by executive- with or without Good Reason - 90 days prior written notice.	18 months
Chief Financial Officer (CFO)	David O'Toole	Open ended contract	Termination by the Company or Executive with or without Cause— No notice period.	12 months
General Counsel (GC)	Donna Shiroma	Open ended contract	Termination by the Company or Executive with or without Cause— No notice period.	12 months

- (1) Termination payments only in the event of employment termination for involuntary termination without cause or termination for “Good Reason.”
- (2) “Cause” - For the CEO, "Cause" shall mean the occurrence of any of the following events: (i) Executive's unauthorized misuse of the Company's trade secrets or proprietary information, (ii) Executive's conviction or plea of nolo contendere to a felony or a crime involving moral turpitude, (iii) Executive's committing an act of fraud against the Company, or (iv) Executive's gross negligence or willful misconduct in the performance of his duties that has had or is likely to have a material adverse effect on the Company. Except for a failure, breach or refusal which, by its nature, cannot reasonably be expected to be cured, Executive shall have ten (10) business days from the delivery date of the Company's written notice of termination within which to cure any acts constituting Cause. For the CFO, Cause is defined as (i) conviction of, or a plea of guilty or nolo contendere to, a felony or crime involving moral turpitude; (ii) participation in an act of fraud or theft against the Company; (iii) willful and material breach of any contractual, statutory, fiduciary, or common law duty owed to the Company including without limitation Section 4.1 of this Agreement; (iv) willful and repeated failure to satisfactorily perform job duties; or (v) any willful act that is likely to and which does in fact have the effect of injuring the reputation, business, or a business relationship of the Company. For the GC, Cause is defined as: conviction of, or a plea of guilty or nolo contendere to, a felony or crime involving moral turpitude; participation in an act of fraud or theft; willful and material breach of any contractual, statutory, fiduciary or common law duty owed to the Company; intentional and repeated failure of Executive to perform Executive's job duties after receiving notice of the stated deficiencies and Executive willfully failing to address the deficiencies and deliberately continuing to not perform stated job duties; or any willful, deliberate, premeditated act by Executive that materially and demonstrably injures the reputation, business or a business relationship of the Company.
- (3) “Good Reason” - For the CEO, Good Reason is defined as (i) a material reduction in Executive's Base Salary unless a proportionate reduction is made to the Base Salary of all members of the Company's senior management, (ii) a permanent relocation of Executive's principal place of employment by more than 50 miles from the location in effect immediately prior to such relocation, (iii) any material by the Company of any material provision of this Agreement, or (iv) a material diminution in the nature or scope of Executive's authority or responsibilities from those applicable to Executive as of the Effective Date (date of hire). For the CFO and GC, Good Reason is defined as (i) a material diminution in Executive's authority, duties, or responsibilities in effect at the time of this Agreement; (ii) any reduction in the Executive's then current base salary; (iii) relocation of Executive's principal place of work by a distance of fifty (50) miles or more from the Executive's then current principal place of work without the Executive's consent; (iv) material breach by the Company of any provision of this Agreement; provided, however, that the conduct described in the foregoing subsections (i) through (iv) will only constitute Good Reason if such conduct is not cured within thirty (30) days after the Company's receipt of written notice from the Executive specifying the particulars of the conduct the Executive believes constitutes Good Reason.”

Compensation Principles

The Compensation Committee has a formal Compensation Governance Framework which, at the core, consists of a Compensation Committee Charter (the “Charter”). The Charter outlines responsibilities and duties of the members, sets forth the frequency of meetings, establishes and reviews the overall compensation policies and practices of the Company and also sets forth the process to review and approve the executive compensation program for the Chief Executive Officer and other executive officers, and make appropriate recommendations to the Board of Directors.

Compensation Committee

The Compensation Committee approves or makes recommendations to our Board of Directors on decisions concerning compensation of the executive management team and Board of Directors on a periodic basis to ensure that it is consistent with our short-term and long-term goals. The Compensation Committee assess the appropriateness of the nature and amount of compensation of our executives by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the recruitment and retention of a high-quality board and executive team.

Additionally, the Compensation Committee is responsible for evaluating the performance of the Company’s key senior executives. The Company’s Chief Executive Officer and other members of management regularly discuss the Company’s compensation issues with Compensation Committee members. The Compensation Committee reviews and recommends to the Board of Directors the overall bonus and equity incentive awards for employees of the Company. Additionally, the Company’s Chief Executive Officer makes recommendations to the Compensation Committee for review, modification (if applicable) and approval in relation to bonuses and equity incentive awards for members of the executive management team.

Resignation, Retirement, Termination for Cause, or Resignation without Good Reason Arrangements

The Company does not have any agreements or plans other than the current employment contracts in place for the named executive officers that would provide additional compensation in connection with a retirement.

Potential Payments upon Involuntary Termination, Resignation without Good Reason or Change-In-Control

The employment contract provides for the following severance payments upon termination by us without cause or by the employee for good reason (as defined in the particular employment agreement): (i) payment of the employee’s then-current base salary for a period of 18-months for the CEO and 12-months for the CFO or General Counsel, following termination (ii) a pro-rated target bonus for the period during which the employee was employed in the year of termination and (iii) continued coverage under our group health and benefits plan consistent with the term of the base salary; and (iv) immediate acceleration of unvested stock options and restricted stock unit awards.

Outstanding Equity Awards at Fiscal Year-End

The following table presents information regarding outstanding equity awards held by our named executive officers as of December 31, 2023 (in US dollars).

Name	Option awards				Stock awards	
	Number of securities underlying unexercised options exercisable	Number of securities underlying unexercised unearned options	Option exercise price (2)	Option expiration date (2)	Number of unearned shares, units or other rights have not vested	Market or payout value of unearned shares, units or other rights have not vested (1)
James Corbett, Chief Executive Officer	5,834	1,641	\$12.18	12/22/2031	2,891	\$14,455
	56,574	169,722	\$5.64	9/28/2032		
	-	100,000	\$14.17	6/6/2033		
David O'Toole, Chief Financial Officer	-	150,000	\$17.00	6/15/2033		
Donna Shiroma, General Counsel	17,000	-	\$4.38	6/25/2028	29,216	\$146,080
	26,100	-	\$6.38	11/1/2028		
	64,700	-	\$5.99	11/30/2028		
	3,462	3,463	\$20.21	7/6/2031		
	6,884	13,766	\$4.97	7/1/2032		
	-	60,000	\$14.17	6/6/2033		

- (1) Amounts in this column are calculated by multiplying the closing market price of the Company's stock as of December 31, 2023 by the number of shares or units of stock awards.
- (2) Represents range of exercise price and expiration dates as options were granted on different dates throughout their tenure.

Director Compensation

The following table sets forth certain information regarding the compensation earned by or awarded to each non-employee Director who served on our Board during the fiscal year-ended December 31, 2023 (in US dollars). We do not provide separate compensation to our executive Directors, such as James Corbett, who served as our Chief Executive Officer during the fiscal year-ended December 31, 2023.

	Fees earned in cash (1)	Stock awards (2)	Option awards (3)	Total
Non-Executive Directors				
Lou Panaccio - Chairman	\$ 123,983	\$ 87,500	\$ 23,203	\$ 234,686
Jeremy Curnock Cook	89,164	87,500	23,203	199,867
Suzanne Crowe	84,580	87,500	23,203	195,283
Jan Stern Reed	100,417	87,500	23,203	211,120
Robert McNamara	70,836	234,499	63,773	369,108
Cary Vance	66,669	234,499	63,773	364,941
Total Non-Executive Directors	\$ 535,649	\$ 818,998	\$ 220,358	\$ 1,575,005

- (1) Amounts are composed of the following: \$70,000 for fees as a Board Member, \$35,000 for Chair of the Board, \$20,000 for Audit Committee Chair, \$15,000 for Compensation Committee Chair, \$10,000 for Nominating and Corporate Governance Chair, \$10,000 for Audit Committee Member, \$7,500 for Compensation Committee Member, and \$5,000 for Nominating and Corporate Governance Member.
- (2) Amounts in this column represent awards of restricted stock units with the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. The fair value determined at the date of grant in accordance with U.S. GAAP based on the closing price of our common stock on the applicable grant date. The vesting of these stock awards are service based and subject to continued participant as Board Members.
- (3) Amounts in this column represent awards of stock options with the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. Amounts in this column represent option awards issued to the individuals noted, based on the fair value determined at the date of grant in accordance with U.S. GAAP. See Note 15- Share-Based Payment Plans to our Consolidated Financial Statements included in Part II, Item 8. "Financial Statements and Supplementary Data" for the assumptions used in determining the grant date fair value of option awards. The vesting of these option awards are service based and subject to continued participant as Board Members.

Equity Compensation Plan Information as of December 31, 2023

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)

Total	2,925,290		2,294,367

- (1) Upon closing of the Redomiciliation, the 2016 Plan was terminated with respect to future grants and accordingly, there are no more shares available to be issued under the 2016 Plan.
- (2) The 2016 Plan were previously approved and adopted by the shareholders of AVITA Australia, the former parent company.

No securities were purchased on-market:

- under or for the purposes of an employee incentive plan; or
- to satisfy the entitlements of the holders of options or other rights to acquire securities granted under an employee incentive plan.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

For common stockholders, the information required with respect to this item will be incorporated herein by reference to our Definitive Proxy Statement for our 2024 Annual Meeting of Stockholders or an amendment of this report to be filed with the SEC no later than 120 days after the close of our year ended December 31, 2023.

In addition to the Company's primary listing on the Nasdaq Capital Market, the Company's shares of common stock are also quoted in the form of CDIs on the ASX and trade under the ticker symbol "AVH". As part of our ASX listing, we are required to comply with the various disclosure requirements as set out under the ASX Listing Rules. The following information is intended to comply with the ASX Listing Rules (where that information has not been provided elsewhere in this Annual Report).

Australian Disclosure Requirements

Principal Stockholders and Management

The following table provides certain information regarding the ownership of our common stock (including our CDIs), as of January 31, 2024 by each person or group of affiliated persons known to us to be the beneficial owner of more than 5% of our common stock (including our CDIs); each of our named executive officers; each of our Directors; and all of our named executive officers and Directors as a group. The table also sets out the names of all persons (to the best of the Company's knowledge) who have disclosed pursuant to the *Corporations Act 2001* (Cth) that they are "substantial shareholders" of the Company and carry 5% or more of the voting rights attached to the issued securities of the Company.

Unless otherwise indicated in the table or the related notes, the address for each person named in the table is c/o AVITA Medical, Inc., 28159 Avenue Stanford Suite 220, Valencia, CA 91355.

Title of Class	Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership ⁽¹⁾		Percentage of Class ⁽²⁾
	More than 5% stockholders:			
	BlackRock, Inc. 50 Hudson Yards New York, NY 10001	1,806,149	(3)	7.03%
	The Vanguard Group, Inc. 100 Vanguard Blvd., Malvern, PA 19355	1,392,780	(4)	5.42%
	Directors and named executive officers:			
Common Stock	Lou Panaccio	44,948	(5)	*
Common Stock	Jeremy Curnock Cook	22,384	(6)	*
Common Stock	Professor Suzanne Crowe	28,996	(7)	*
Common Stock	Jan Stern Reed	33,952	(8)	*
Common Stock	Cary Vance	-		*
Common Stock	Robert McNamara	-		*
Common Stock	James Corbett	71,097	(9)	*
Common Stock	David O'Toole	17,484	(10)	*
Common Stock	Donna Shiroma	132,656	(11)	*
	All executive officers and directors as a group (9 persons)	351,517		1.37%

* Represents beneficial ownership of less than 1% of the outstanding common stock.

- (1) Except as otherwise indicated, we believe that the beneficial owners of the common stock listed above, based on information furnished by such owners, have sole investment and voting power with respect to such shares, subject to community property laws where applicable. Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to securities.
- (2) Percentage of ownership is based on 25,706,578 shares of our common stock issued and outstanding as of January 31, 2024 (including common stock represented by CDIs). Common stock subject to options or RSUs exercisable within 60 days of January 31, 2024 are deemed outstanding for purposes of computing the percentage ownership of the person holding such option or RSUs but are not deemed outstanding for purposes of computing the percentage ownership of any other person.
- (3) Represents shares beneficially owned by BlackRock, Inc. as of December 31, 2023, obtained from Schedule 13G filed by BlackRock, Inc. with the SEC on January 26, 2024.
- (4) Represents shares beneficially owned by Vanguard, Inc. as of December 31, 2023, as obtained from Schedule 13G filed by Vanguard, Inc. with the SEC on February 13, 2024.
- (5) Reflects 16,939 shares of common stock and 100,320 CDIs, which translates into 20,064 shares of common stock. CDIs include 29,860 CDIs which translates into 5,972 shares of common stock that are held by The Panaccio Superannuation Fund. In

addition, the amount includes 7,945 shares of stock options to acquire 7,945 shares of our common stock exercisable within 60 days of January 31, 2024.

- (6) Reflects 14,439 shares of common stock and 7,945 shares of stock options to acquire 7,945 shares of our common stock exercisable within 60 days of January 31, 2024.
- (7) Reflects 16,939 shares of common stock, 20,560 CDIs, which represent 4,112 shares of our common stock and 7,945 shares of stock options to acquire 7,945 shares of our common stock exercisable within 60 days of January 31, 2024.
- (8) Reflects 22,723 shares of common stock and 11,229 shares of stock options to acquire 11,229 shares of our common stock exercisable within 60 days of January 31, 2024.
- (9) Reflects 8,689 shares of common stock and 62,408 shares of stock options to acquire 62,408 shares of our common stock exercisable within 60 days of January 31, 2024.
- (10) Reflects 17,484 shares of common stock.
- (11) Reflects 14,510 shares of common stock and 118,146 shares of stock options to acquire 118,146 shares of our common stock exercisable within 60 days of January 31, 2024.

Jurisdiction of incorporation and restrictions on the acquisition of securities

The Company is incorporated in the State of Delaware in the United States of America. As a foreign company registered in Australia, the Company is not subject to Chapters 6, 6A, 6B and 6C of the *Corporations Act 2001* (Cth) dealing with the acquisition of its shares (including substantial holdings and takeovers).

Under the Delaware General Corporation Law, the Company's shares are generally freely transferable, subject to restrictions imposed by United States federal or state securities laws, by the Company's certificate of incorporation or by-laws or by an agreement signed with the holders of shares on issue. The Company's certificate of incorporation and bylaws do not impose any specific restrictions on the transfer of its shares. Repurchases of the Company's securities are governed by the safe harbor provisions set forth in Rule 10b-18 of the Securities Exchange Act of 1934. However, provisions of the Delaware General Corporation Law, the Company's certificate of incorporation and the Company's by-laws could make it more difficult to acquire the Company by means of a tender offer (takeover), a proxy contest or otherwise, or to remove incumbent officers and directors of the Company. These provisions could discourage certain types of coercive takeover practices and takeover bids that the Company's board may consider inadequate and encourage persons seeking to acquire control of the Company to first negotiate with the board.

Australian Corporate Governance Statement

The Board of Directors and employees of the Company are committed to developing, promoting and maintaining a strong culture of good corporate governance and ethical conduct. The Board of Directors confirm that the Company's corporate governance framework is generally consistent with the ASX's Corporate Governance Council's "Corporate Governance Principles and Recommendations" (4th Edition) ("ASX Governance Recommendations"). The Company's Corporate Governance Statement is available for viewing at <https://ir.avitamedical.com/corporate-governance>. The Corporate Governance Statement sets out the ASX Governance Recommendations and the Company's response as to how and whether it follows those recommendations. Where the Company's practices depart from a recommendation, the Board of Directors has disclosed in the Corporate Governance Statement the departure along with reasons for the adoption of its own practices. The Company's most recent Corporate Governance Statement, dated February 22, 2024 and approved by the Board of Directors remains accurate as of the date of this Annual Report on Form 10-K.

Issued capital

As of January 31, 2024, the Company's issued share capital was as follows:

- 25,706,578 shares of common stock, of which:
 - 13,436,606 shares of common stock were held by 4 stockholders of record quoted on Nasdaq; and
 - 12,269,972 shares of common stock were held by CHESS Depositary Nominees Pty Limited ("Authorized Nominee") (on behalf of 20,497 CDI securityholders) representing 61,349,860 CDIs quoted on ASX.

As of January 31, 2024, the following unquoted securities were on issue, which entitle the holders of those securities, upon vesting of their conversion rights, to be issued shares of common stock (including in certain cases in the form of CDIs) of the Company:

- the equivalent of 3,695,568 unquoted options held amongst 126 option holders. Specifically:
 - the equivalent of 333,771 options are on issue to Mr. James Corbett, CEO;

- the equivalent of 3,361,797 options were granted (and are on issue) to 125 employees and directors of the Company under Avita Australia's 2016 Equity Incentive Plan and 2020 Equity Incentive Plan and the Company's 2021, 2022 and 2023 AGM Awards; and
- the equivalent of 225,180 unquoted restricted stock units ("RSUs") held as follows:
 - the equivalent of 2,891 RSUs held by Mr. Corbett, CEO; and
 - the equivalent of 222,289 RSUs held by 31 employees of the Company under Avita Australia's 2020 Employee Incentive Plan and the Company's 2021, 2022 and 2023 AGM Awards.

As of January 31, 2024, the Company does not have any restricted securities that are on issue or any securities subject to voluntary escrow that are on issue.

Voting Rights

The Company's bylaws provide that each stockholder has one vote for every share of common stock entitled to vote held of record by such stockholder. If holders of CDIs wish to attend and vote at the Company's general meetings, they will be able to do so, provided, in case of voting, that the relevant steps as set out below are complied with by the CDI holder. Under the ASX Listing Rules and ASX Settlement Operating Rules, the Company must allow CDI holders to attend any meeting of the holders of the underlying securities, unless relevant United States laws at the time of the meeting prevent CDI holders from attending those meetings.

In order to vote at such meetings, CDI holders have the following options:

- instruct the Authorized Nominee (as the legal owner of the shares of common stock) to vote the common stock represented by their CDIs in a particular manner. A voting instruction form will be sent to CDI holders with the notice of meeting or proxy statement for the meeting and that instruction form must be completed and returned to the Company's registry prior to the record date fixed for the relevant meeting ("CDI Voting Instruction Receipt Time"), which is notified to the CDI holder in the voting instructions included in the notice of meeting; or
- inform the Company that they wish to nominate themselves or a third party to be appointed as the Authorized Nominee's proxy with respect to their common stock underlying their CDIs for the purposes of attending and voting at the meeting. The instruction form must be completed and returned to the Company's registry prior to the CDI Voting Instruction Receipt Time.

Alternatively, a CDI holder can convert their CDIs into a holding of common stock and vote those shares of common stock at a meeting of stockholders. Such a conversion must be undertaken prior to the record date fixed by the Company's Board of Directors for determining the entitlement of stockholders to attend and vote at the meeting. However, if the former CDI holder later wishes to sell their investment on the ASX, it would be necessary to convert those shares of common stock back to CDIs.

As CDI holders will not appear on the Company's register as the legal holders of the underlying common stock, they will not be entitled to vote at a stockholder meeting unless one of the above steps is undertaken. As each CDI represents 1/5 of a share of common stock, if the CDI holder takes one of the steps noted above to allow it to vote at a stockholder meeting, the CDI holder will be entitled to one vote for every five CDIs it holds.

Holders of options, warrants and RSUs are not entitled to vote at the Company's general meetings.

Substantial Stockholders

The information required in relation to the substantial shareholders of the Company is included in this Annual Report at Item 12 of Part III.

Distribution of Common Stock and CDI Holders at January 31, 2024

Below is a distribution schedule of the number of holders of common stock and CDIs, categorized by the size of their holdings, based on the Company's registers as at January 31, 2024.

Common Stock		
	Number of Holders of Record	Shares of common stock
1 - 1,000	1	20
1,001 - 5,000	-	-
5,001 - 10,000	-	-
10,001 - 100,000	1	56,944
100,001 - and over	2	13,379,642
	4	13,436,606

- (1) Percentage of ownership is based on 25,706,578 shares of our common stock issued and outstanding as of January 31, 2024 (including common stock represented by CDIs).

CDIs		
	Number of Holders	Number of common stock equivalents (CDIs divided by 5) (1)
1 - 1,000	13,668	955,455
1,001 - 5,000	4,985	2,401,553
5,001 - 10,000	1,029	1,543,639
10,001 - 100,000	766	3,713,271
100,001 - and over	49	3,656,054
	20,497	12,269,972

- (1) Assuming all CDI's are held as common stock of the Company, with 5 CDIs representing a beneficial ownership interest in one share of common stock of the Company.
- (2) Percentage of ownership is based on 25,706,578 shares of our common stock issued and outstanding as of January 31, 2024 (including common stock represented by CDIs).

The number of holders holding less than a marketable parcel of securities

The number of stockholders and/or CDI holders holding less than a marketable parcel of shares of common stock and/or CDIs (where a "marketable parcel" means a parcel of securities worth at least A\$500, pursuant to the ASX Operating Rules) as of January 31, 2024 was as follows:

- 2,591 holders of less than a marketable parcel of CDIs.
- No common stockholders owning less than a marketable parcel of shares of common stock.

Buy-back of securities

There is no current on-market buy-back of our securities.

Twenty Largest Holders as of January 31, 2024

Below is a statement of the 20 largest stockholders and CDI holders, and the number and percentage of issued common stock held by those holders, based on the Company's registers at January 31, 2024. (assuming all CDI's are held as common stock of the Company, with 5 CDIs representing a beneficial ownership interest in one share of common stock of the Company).

Common Stock			Percentage of total common stock outstanding (1)
Rank	Name	Shares of common stock	
1	CEDE & CO	13,250,330	51.54%
2	DR MIKE PERRY	129,312	0.50%

- (1) Assuming all CDIs are held as shares of common stock of the Company, with 5 CDIs representing a beneficial ownership interest in one share of common stock in the Company.

- (2) Percentage of ownership is based on 25,706,578 shares of our common stock issued and outstanding as of January 31, 2024 (including common stock represented by CDIs).

General Information

The name of our Secretary is Donna Shiroma.

The Company's ASX liaison officer who is responsible for communications with the ASX is Mark Licciardo.

The complete mailing address, including zip code, of our principal executive office is 28159 Avenue Stanford, Suite 220, Valencia, CA 91355, USA. The telephone number is +1(661) 367-9170.

The address of our registered office in Australia is c/o Acclime Ltd (formerly Merton's Corporate Services), Level 7, 330 Collins Street, Melbourne VIC 3000, Australia and our telephone number there is +61 3 8689 9997.

Registers of securities are held as follows:

- for CDIs in Australia at Computershare Investor Services Pty Limited, Level 2, 45 St Georges Terrace, Perth WA 6000 Australia, Investor Enquiries +61 8 9323 2000 (within Australia) +61 3 9415 4677 (outside Australia); and
- for common stock in the United States at Computershare Investor Services, 250 Royall Street, Canton, MA 02021 USA, Tel: +1 866-644-4127.

Application of funds

The Company advises that it has used the cash and assets in a form readily convertible to cash that it had at the time of the Company's admission to the Official List of ASX in a way that is consistent with its business objectives.

Directors' Declaration

As at the date of this Annual Report, the directors confirm that they are of the opinion that there are reasonable grounds to believe that the members of the "extended closed group" identified in Note 19, being the Company and the Australian Subsidiaries that are party to the deed of cross guarantee that is detailed in Note 19, will be able to meet any liabilities to which they are, or may become, subject, by virtue of the deed of cross guarantee.

Item 13. CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions with Related Persons

SEC rules require us to disclose any transaction or currently proposed transaction in which the Company is a participant and in which any related person has or will have a direct or indirect material interest involving the lesser of \$120,000 or 1% of the average of the Company's total assets as of the end of the last two completed fiscal years. A related person is any executive officer, director, nominee for director, or holder of 5% or more of the Company's Common Stock, or an immediate family member of any of those persons. Since January 1, 2023, the Company has not participated in any such related party transaction.

Director Independence

The Company's Board of Directors has determined that all members of our Board of Directors, except Mr. James Corbett, are independent directors for purposes of the rules of Nasdaq and the SEC and for the purposes of the ASX Listing Rules and the ASX Corporate Governance Council's 4th Edition Corporate Governance Principles and Recommendations. In making this determination, our Board of Directors considered the relationships that each non-executive director has with us and all other facts and circumstances that our Board of Directors deemed relevant, including the beneficial ownership of our common stock by each non-executive director and Mr. Corbett's executive role within AVITA Medical.

The composition and functioning of the Company's Board of Directors and each of its committees complies with all applicable requirements of Nasdaq and the rules and regulations of the SEC as well as the ASX Listing Rules and the ASX Corporate Governance Council's 4th Edition Corporate Governance Principles and Recommendations.

Item 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Principal Accounting Fees and Services

Grant Thornton LLP, the U.S. member of Grant Thornton International Ltd, independent registered public accountants have served as our independent public accountant for the years-ended December 31, 2023 and 2022. The following table sets forth fees billed or accrued by our independent registered public accountants during the years-ended December 31, 2023 and 2022.

	<u>Year-Ended</u> <u>December 31, 2023</u>	<u>Year-Ended</u> <u>December 31, 2022</u>
Audit fees - Grant Thornton LLP (1)	\$ 775,020	\$ 605,900
Grant Thornton UK LLP (1)	47,301	46,832
Tax fees - Grant Thornton LLP (2)	137,812	87,281
Total fees	<u>\$ 960,133</u>	<u>\$ 740,013</u>

- (1) Audit fees consist of fees for the professional services by the principal accountant for the audit of the registrant's annual financial statements and review of financial statements included in the registrant's Form 10-Q or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements.
- (2) Tax fees include the aggregate fees billed in each of the last two fiscal years for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning.

Pre-Approval Policies and Procedures

The Audit Committee's policy is for the Audit Committee to approve all audit and non-audit services prior to such services being performed by the independent registered public accounting firm. Before engaging an independent registered public accountant firm to render audit or non-audit services, the engagement is approved by the Company's Audit Committee or the engagement to render services is entered into pursuant to pre-approval policies and procedures established by the audit committee. The Audit Committee pre-approved all audit services provided by independent registered public accountants during the years-ended December 31, 2023 and 2022.

PART IV

Item 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as part of this Annual Report:

(1) All Financial Statements

See Index to Financial Statements in Part II, Item 8 of this Annual Report.

(2) Financial Statement Schedules

All financial statement schedules have been omitted since the required information was not applicable or was not present in amounts sufficient to require submission of the schedules, or because the information required is included in the financial statements or the accompanying notes.

(3) Exhibits

The exhibits listed in the following Index to Exhibits are filed, furnished or incorporated by reference as part of this Annual Report

EXHIBITS

Exhibit Number	Exhibit Description

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders
AVITA Medical, Inc.

Opinion on the financial statements

We have audited the accompanying consolidated balance sheets of AVITA Medical, Inc. (a Delaware corporation) and subsidiaries (the “Company”) as of December 31, 2023 and 2022, the related consolidated statements of operations, comprehensive loss, stockholders’ equity, and cash flows for each of the two years in the period ended December 31, 2023, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America.

Basis for opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ GRANT THORNTON LLP

We have served as the Company’s auditor since 2020.

Interest paid during the period	\$	1,143	\$	15
Non-cash investing activities:				
Plant and equipment purchases not yet paid	\$	6	\$	33
Right-of-use-asset obtained in exchange for lease liabilities	\$	2,337	\$	-
Non-cash financing activities:				
Warrant liability recognized upon issuance of term loan	\$	2,425	\$	-

The accompanying notes form part of the consolidated financial statements

AVITA MEDICAL, INC.
Notes to Consolidated Financial Statements

1. The Company

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). These financial statements include the assets, liabilities, revenues and expenses of all wholly-owned subsidiaries.

Nature of the Business

AVITA Medical and its subsidiaries (collectively, “AVITA Medical”, “we”, “our”, “us”, or “Company”) is a commercial-stage regenerative medicine company transforming the standard of care in wound management and skin restoration with innovative devices. At the forefront of our portfolio is our patented and proprietary RECELL® System (“RECELL System” or “RECELL”), approved by the FDA for the treatment of thermal burn wounds and full-thickness skin defects, and for repigmentation of stable depigmented vitiligo lesions. RECELL harnesses the regenerative properties of a patient’s own skin to create an autologous skin cell suspension, Spray-On Skin™ Cells, delivering a transformative solution at the point of care. This breakthrough technology serves as the catalyst for a new treatment paradigm enabling improved clinical outcomes. In September 2018, the FDA granted PMA to the RECELL System for use in the treatment of acute thermal burns in patients eighteen years and older. Following receipt of the original PMA, the Company commenced commercialization of the RECELL System in January 2019 in the United States. In June 2021, the FDA approved the expanded use of the RECELL System in combination of meshed autografting for acute full-thickness thermal wounds in pediatric and adult patients. In February 2022, the FDA approved a PMA supplement for the RECELL Autologous Cell Harvesting Device, an enhanced ease-of-use device aimed at providing clinicians a more efficient user experience and simplified workflow. On June 7, 2023, the FDA approved a PMA supplement for full-thickness skin defects based on results of the Company's pivotal trial for soft tissue repair and reconstruction. Following this approval, the Company commenced a commercial launch on June 8, 2023.

On June 16, 2023, the FDA approved a PMA application for the repigmentation of stable depigmented vitiligo lesions. Following FDA approval, the Company established a framework, which consists of three steps, to secure reimbursement for vitiligo. The first step is to conduct the 100-patient post market study called TONE. TONE will evaluate repigmentation using the RECELL device and will also seek to measure the improvement in the quality-of-life following treatment of stable vitiligo with RECELL. TONE, including publication, is expected to be complete by the end of 2024. The second step is to initiate a health economics study to capture the longitudinal healthcare costs for a vitiligo patient, which is expected to be completed by the end of 2024. The purpose of these studies is to demonstrate how treating vitiligo with RECELL can significantly reduce the lifetime healthcare cost of patients. As a result, commercial payors will stand to benefit economically by providing coverage of RECELL for the repigmentation of stable depigmented vitiligo lesions. Conversations with commercial payors will begin during the first quarter of 2025. Commercial coverage will be rolled out on a tiered basis based on state and geographic factors. The Company anticipates that the initial phase of reimbursement coverage will likely begin in the fourth quarter of 2025 with appropriately sized commercial support as coverage is established.

Additionally, on June 29, 2023, the Company submitted a PMA supplement to the FDA for RECELL GO™. RECELL GO maintains the FDA Breakthrough Device designation from predecessor devices. On September 29, 2023, the Company received notice from the FDA that additional information regarding the PMA is required for the continuation of a substantive review for RECELL GO. This request, which is not unique to the Breakthrough Device Program, placed the application file on hold while the Company addresses the FDA's questions. A category of questions posed by the FDA will require additional in-house testing. The Company has already made significant progress in developing the data plan for testing with some testing underway. Consequently, the Company expects to submit the complete response to the FDA no later than February 28, 2024. Upon the submission to the FDA, the application will reenter the 180-day cycle, with 90 days remaining in the review period. This timing would imply a product launch on May 31, 2024.

In February 2019, the Company entered into a collaboration with COSMOTEC, an M3 Group company, to market and distribute the RECELL System in Japan. Under the terms of the agreement, AVITA Medical will supply the RECELL product, and COSMOTEC will be the sole distributor of the product in Japan. The Company worked with COSMOTEC to advance its application for approval of the RECELL System in Japan pursuant to PMDA. In February 2022, COSMOTEC’s application for regulatory approval was approved by the PMDA with labeling for burns only. In September 2022, COSMOTEC commercially launched RECELL in Japan following Japan’s Ministry of Health, Labor, and Welfare approval of reimbursement pricing.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany transactions and balances have been eliminated upon consolidation.

Reclassification of prior year presentation

Certain prior year amounts within Other current liabilities have been reclassified to Current non-qualified deferred compensation liability, in the Consolidated Balance Sheets for consistency with current period presentation. These reclassifications had no effect on the reported results of operations or financial position.

Recent Accounting Pronouncements

In November 2023, the FASB issued ASU 2023-07, *Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures*. The ASU expands public entities' segment disclosures by requiring disclosure of significant segment expenses that are regularly reviewed by the Chief operating decision maker ("CODM") and included within each reported measure of segment profit or loss, an amount and description of its composition for other segment items, and interim disclosures of a reportable segment's profit or loss and assets. The ASU also allows, in addition to the measure that is most consistent with U.S. GAAP, the disclosure of additional measures of segment profit or loss that are used by the CODM in assessing segment performance and deciding how to allocate resources. All disclosure requirements under ASU 2023-07 are also required for public entities with a single reportable segment. The ASU is effective for the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2025, and subsequent interim periods, with early adoption permitted. The Company is currently evaluating the impact of adopting this ASU on its consolidated financial statements and disclosures.

In December 2023, the FASB issued ASU 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*. The amendments require (i) enhanced disclosures in connection with an entity's effective tax rate reconciliation and (ii) income taxes paid disaggregated by jurisdiction. The amendments are effective for annual periods beginning after December 15, 2024. The Company is currently evaluating the impact of adopting this ASU on its consolidated financial statements and disclosures.

Use of Estimates

The preparation of the accompanying consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts (including allowance for credit losses, carrying value of long-lived assets, the useful lives of long-lived assets, accounting for marketable securities, income taxes, fair value of the debt, fair value of warrants, stock-based compensation and the stand-alone selling price for the BARDA contract) and related disclosures. Estimates have been prepared on the basis of the current and available information. However, actual results could differ from estimated amounts.

Foreign Currency Translation and Foreign Currency Transactions

The financial position and results of operations of the Company's operating non-U.S. subsidiaries are generally determined using the respective local currency as the functional currency of that subsidiary. Assets and liabilities of these subsidiaries are translated at the exchange rate in effect at each period end. Income statement accounts are translated at the average rate of exchange prevailing during the period. Adjustments arising from the use of differing exchange rates from period to period are included in accumulated other comprehensive gain (loss) in shareholders' equity. Gains and losses resulting from foreign currency transactions are included in general and administrative expenses and were losses of \$22,000 and a gain of \$91,000 for the years-ended December 31, 2023 and 2022, respectively.

The Company's subsidiaries that use the U.S. dollar as their functional currency remeasure monetary assets and liabilities at exchange rates in effect at the end of each period, nonmonetary assets and liabilities at historical rates. Gains and losses resulting from these remeasurements and foreign currency transactions are included in general and administrative expenses and were a loss of \$15,000 and a loss of \$6,000 for the years-ended December 31, 2023 and 2022, respectively.

Comprehensive Loss

The components of comprehensive loss consist of net loss, foreign currency translation adjustments ("CTA") from its subsidiaries not using the U.S. dollar as their functional currency, unrealized gains and losses in investments available for sale and changes in fair value due to instrument specific credit risk on the debt. During the year-ended December 31, 2023, the Company

liquidated the Company's foreign subsidiaries. In accordance with ASC 830-30, *Foreign Currency Matters* ("ASC 830"), the CTA was reclassified into earnings. As such, the Company reclassified \$9.4 million from comprehensive loss to earnings for the winding down of the foreign subsidiaries. The amount is recorded in Other income, net in the Consolidated Statement of Operations. The Company did not have reclassifications from other comprehensive loss to net loss during the year-ended December 31, 2022.

Revenue Recognition

The Company recognizes revenue when its customers obtain control of promised goods or services, in an amount that reflects the consideration which the Company expects to be entitled in exchange for those goods or services.

To determine revenue recognition for arrangements that are within the scope of Topic 606 *Revenue from contracts with customers* ("ASC 606"), the Company performs the following five steps:

1. Identify the contract with a customer
2. Identify the performance obligations
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations
5. Recognize revenue when/as performance obligation(s) are satisfied

In order for an arrangement to be considered a contract, it must be probable that the Company will collect the consideration to which it is entitled for goods or services to be transferred. Once the contract is determined to be within the scope of ASC 606, the Company assesses the goods or services promised with each contract, determines whether those are performance obligations and the related transaction price. The Company then recognizes the sale of goods based on the transaction price that is allocated to the respective performance obligation when the performance obligation is satisfied.

The Company's revenue consists primarily of the sale of the RECELL System to hospitals or other treatment centers, COSMOTEC and BARDA (collectively, "customers"), predominately in the United States. The Company evaluated the BARDA contract and concluded that a portion of the arrangement, such as the procurement of the RECELL system and the emergency preparedness, represents a transaction with a customer and as such are in the scope of ASC 606. Amounts received from BARDA for the research and development of the Company's product are classified as BARDA income in the Consolidated Statement of Operations and are accounted for under International Accounting Standards 20 ("IAS 20"). For further details refer to BARDA Income and Receivables below.

Revenues for commercial customers (hospitals, treatment centers and COSMOTEC) are recognized as control of the product is transferred to customers, at an amount that reflects the consideration expected to be received in exchange for the product. Revenues are recognized net of volume discounts. As such, revenue is recognized only to the extent a significant reversal of revenues is not expected to occur in subsequent periods. For the Company's contracts that have an original duration of one year or less, the Company elected the practical expedient applicable to such contracts and does not consider the time value of money. Further, because of the short duration of these contracts, the Company has not disclosed the transaction price for the remaining performance obligations as of each reporting period or when the Company expects to recognize this revenue. The Company has further applied the practical expedient to exclude sales tax in the transaction price and expense contract acquisition costs such as commissions and shipping and handling expenses as incurred.

For revenues related to the BARDA contract within the scope of ASC 606, the Company identified two performance obligations (i) the procurement of 5,614 RECELL units, (ii) emergency preparedness services. Through this contract the Company promises to procure the product through a vendor management inventory arrangement and to stand ready to provide emergency deployment services related to the product. Emergency preparedness services include procuring necessary storage containers, housing, and maintaining the containers (and product), and providing shipping and handling services in the event of an emergency situation. This stand ready obligation is a series of distinct services that are substantially the same and have the same pattern of transfer to the customer, overtime as services are consumed.

At contract inception, the total transaction price for the portion of the BARDA contract that is within the scope of ASC 606, was determined to be \$9.2 million. The transaction price was allocated on a stand-alone selling price basis as follows: \$7.6 million to the procurement of the RECELL product, which is classified as Revenues when recognized in the Consolidated Statement of Operations and \$1.6 million to the emergency deployment services which is classified as Revenues when recognized in the Consolidated Statement of Operations. The \$1.6 million for emergency deployment includes variable consideration which is deemed immaterial to the contract as a whole. The Company estimated the stand-alone selling price of the procurement of the RECELL product based on historical pricing of the Company's product at the initial execution of the contract. The Company estimated the

stand-alone selling price of the emergency deployment services performed based on the Company's projected cost of providing the services plus an applicable profit margin as denoted in the contract.

The Company's performance obligations are either satisfied at a point in time or over time as services are provided. The product procurement performance obligation is satisfied at a point in time, upon transfer of control of the product. RECELL units that have been delivered to BARDA have a product replacement obligation at no cost to BARDA due to product's limited shelf-life. The estimated cost of the expired inventory over the term of the contract is recognized on a per unit basis at the time of delivery. The estimated liability is released upon replacement of the product along with a corresponding reduction to inventory. The emergency preparedness services performance obligation is satisfied over time. Revenue for the emergency deployment will be recognized on a straight-line basis during the term of the contract as services are consumed over time. Services recognized are included in sales within the Consolidated Statement of Operations. Contract costs to fulfil the performance obligations are incremental and expected to be recovered are capitalized and amortized on a straight-line basis over the term of the contract. Contract costs are included in other current assets.

Contract Liabilities

The Company receives payments from customers based on contractual terms. Trade receivables are recorded when the right to consideration becomes unconditional. The Company satisfies its performance obligation on product sales when the products are shipped or delivered, depending on the terms of the sale. Payment terms on invoiced amounts are typically 30 days, and do not include a financing component. Contract liabilities are recorded when the Company receives payment prior to satisfying its obligation to transfer goods to a customer.

Cost of Sales

Cost of sales related to products includes costs to manufacture or purchase, package, and ship the Company's products. Costs also include relevant production overhead and depreciation and amortization. These costs are recognized when control of the product is transferred to the customer and revenue is recognized.

Income Taxes

Income taxes are accounted for using the liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income or loss in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in operations in the period that includes the enactment date. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that a portion of the deferred tax asset will not be realized. We recognize interest and penalties related to unrecognized tax benefits on the income tax expense line in the accompanying Consolidated Statement of Operations. Accrued interest and penalties are included on the related tax liability line in the Consolidated Balance Sheet.

The Company reviews its uncertain tax positions regularly. An uncertain tax position represents the Company's expected treatment of a tax position taken in a filed return, or planned to be taken in a future tax return or claim that has not been reflected in measuring income tax expense for financial reporting purposes. The Company recognizes the tax benefit from an uncertain tax position when it is more-likely-than-not that the position will be sustained upon examination on the basis of the technical merits or the statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired.

Cash and cash equivalents

Cash and cash equivalents consists of cash held at deposit institutions, money market funds and short-term highly liquid investments with original maturities of three months or less from the date of purchase. The Company holds cash at deposit institutions in the amount of \$10.7 million and \$4.1 million, of which \$69,000 and \$737,000 is denominated in foreign currencies in foreign institutions as of December 31, 2023 and 2022, respectively. As of December 31, 2023 and 2022, the Company held cash equivalents in the amount of \$11.4 million and \$14.1 million, respectively.

Concentrations

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents, marketable securities, trade receivables, BARDA receivables and other receivables. As of December 31, 2023 and 2022, substantially all of the Company's cash was deposited in accounts at financial institutions, and amounts may exceed federally insured limits and subject to the risk of bank failure.

As of December 31, 2023, no single commercial customer accounted for more than 10% of accounts receivable. As of December 31, 2022, one commercial customer accounted for approximately 10% of net accounts receivable. For the year-ended December 31, 2023, no single commercial customer accounted for more than 10% of total revenues. For the year-ended December 31, 2022, one commercial customer accounted for more than 10% of total revenues.

BARDA revenues for the procurement of the RECELL system accounted for approximately 1% of total revenues for the years-ended December 31, 2023 and 2022, respectively. BARDA receivables for the procurement of the RECELL system and emergency preparedness accounted for approximately 27% and 2% of BARDA receivables as of December 31, 2023 and 2022, respectively. See table below for breakdown of BARDA receivables (in thousands).

	As of	
	December 31, 2023	December 31, 2022
BARDA procurement and emergency preparedness services	\$ 8	\$ 16
BARDA expense reimbursements	22	882
Total	<u>\$ 30</u>	<u>\$ 898</u>

Fair Value of Financial Instruments

Certain assets and liabilities are carried at fair value under GAAP. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. Financial assets and liabilities carried at fair value are to be classified and disclosed in one of the following three levels of the fair value hierarchy, of which the first two are considered observable and the last is considered unobservable:

- Level 1 — Quoted prices in active markets for identical assets or liabilities.
- Level 2 — Observable inputs (other than Level 1 quoted prices), such as quoted prices in active markets for similar assets or liabilities, quoted prices in markets that are not active for identical or similar assets or liabilities, or other inputs that are observable or can be corroborated by observable market data.
- Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to determining the fair value of the assets or liabilities, including pricing models, discounted cash flow methodologies and similar techniques.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

At December 31, 2023 and 2022, the Company's financial instruments included cash, accounts payable, accrued expenses, convertible notes and warrant liabilities. The carrying amounts of accounts payable and accrued expenses approximate fair value due to the short-term maturities of these instruments.

Long-term debt

The Company elected the fair value option ("FVO") of accounting under *ASC 825-10, Financial Instruments* ("ASC 825"), to record the debt at fair value at issuance and subsequently remeasures to fair value each reporting period. The Company elected the fair FVO option of accounting of ASC 825 for the debt from the issuance date in order to not have to bifurcate any embedded derivatives in accordance with *ASC 815 Derivatives and Hedging – Contracts in Entity's Own Equity* ("ASC 815"). The debt accounted for under the FVO represents a financial instrument containing embedded features which would otherwise be required to be bifurcated from the debt-host and recognized as separate derivative liabilities subject to initial and subsequent periodic estimated fair value measurements under ASC 815. The Company has elected to present interest expense separately from changes in fair value and therefore will present interest expense associated with the debt as Interest expense in the Consolidated Statement of Operations. Any changes in fair value caused by instrument-specific credit risk are presented separately in Other comprehensive income ("OCI") in the Consolidated Balance Sheets. Changes in fair value attributable to changes in credit risk are determined using observable option adjusted spreads for the issuer or comparable companies with similar credit ratings. All costs associated with the issuance of the Credit Agreement

accounted for using the FVO were expensed upon issuance. The fair value of the debt is determined using a Monte Carlo Simulation and classified as Level 3 in the fair value hierarchy. For further details refer to Note 4.

Presentation and Valuation of the Warrants

Warrants are accounted for as liabilities in accordance with ASC 815-40 and were presented within Warrant liability on the Consolidated Balance Sheet as of December 31, 2023. The initial fair value of the warrant liability is measured at fair value at the date of issuance and are remeasured at each reporting date until settlement. Changes in the fair value of the warrant liability is recognized in Other income, net in the Consolidated Statement of Operations for the year ended December 31, 2023.

The Company established the fair value of the warrants utilizing the Black-Scholes pricing model. Assumptions used in the valuation are the price of the company stock, expected share-price volatility, expected term, risk-free interest rate and dividend yield. The Company estimates the volatility based on historical volatility that matches the expected remaining life of the warrants. The expected term of the warrants is assumed to be equivalent to their remaining contractual term. The dividend rate is based on the historical rate, which the Company anticipates to remain at zero. The warrants were classified Level 3 fair value measurement, due to the use of unobservable inputs.

Marketable Securities

We classify all highly liquid investments with original maturities of three months or less from the date of purchase as cash equivalents and all highly liquid investments with stated maturities of greater than three months as marketable securities. The Company classifies marketable securities as short-term when they have remaining contractual maturities of one year or less from the balance sheet date, and as long-term when the investments have remaining contractual maturities of more than one year from the balance sheet date. Classification is determined at the time of purchase and re-evaluated each balance sheet date. Short-term marketable securities represent investment of cash available for current operations. We account for our marketable securities as available-for-sale securities.

All marketable securities, which consist of corporate debt securities, asset backed securities, U.S. treasury and commercial paper are denominated in the U.S. dollars, have been classified as “available for sale”, and are carried at fair value. Unrealized gains and losses, net of any related tax effects, are excluded from earnings and are included in other comprehensive income (loss) and reported as a separate component of stockholders equity until realized. Realized gains and losses on marketable securities are included in Other income, net, in the accompanying Consolidated Statements of Operations. The cost of any marketable securities sold is based on the specific identification method. The amortized cost of marketable securities is adjusted for amortization of premiums and accretion of discounts to maturity. Interest on marketable securities is included in Other income, net in the Consolidated Statements of Operations. In accordance with the Company’s investment policy, management invests to diversify credit risk and only invests in securities with high credit quality, including U.S. government securities, and the maximum final maturity from the date of purchase is thirty-seven months.

If necessary, the Company will recognize an allowance for credit losses on available-for-sale debt securities on an individual basis, and will no longer consider other than-temporary impairment or immediately reduce the cost basis of the investment provided that it is more likely than not that the security will be held to recovery or maturity. Further, the Company will recognize any improvements in estimated credit losses on available-for-sale debt securities immediately in earnings and reduce the existing allowance for credit losses. The Company will disaggregate its available-for-sale marketable securities into the following categories: commercial paper, corporate debt, government and agency securities and money market funds. The Company’s corporate bonds are comprised of predominantly high-grade corporate bonds while its government and agency securities are U.S. treasury bonds, and U.S. agency bonds. The Company has analyzed both corporate bonds and government and agency securities and identified that both types of securities have similar risk characteristics in that they are traded infrequently and have contractual interest rates and maturity dates.

To evaluate for impairment, management reviews credit rating changes, securities trends, interest rate movements and unrealized loss at the security level of the Company’s available for sale debt securities. If any of these give rise to a potential credit concern, the Company performs a discounted cash flow analysis to determine the credit portion of the impairment. The discounted cash flow analysis will be performed either internally or through the assistance of a qualified third party. Once the credit component of the impairment is determined, the Company will record the impaired amount as an allowance to the available-for-sale debt securities balance and as a charge to other income in the accompanying Consolidated Statements of Operations, not to exceed the amount of the unrealized loss. The Company assesses expected credit losses at the end of each reporting period and adjusts the allowance through Other income, net.

Accounts Receivable

Accounts receivable are recorded net of customer allowances for credit losses. The Company estimates an allowance for expected credit losses (i.e., the inability of our customers to make required payments). These estimates are based on a combination of past experience and current trends. In estimating the allowance for expected credit losses, consideration is given to the current aging of receivables, a specific review for potential bad debts and an evaluation of historic write-offs. The resulting bad debt expense is included in sales and marketing expenses in the Consolidated Statement of Operations. Receivables are written-off when deemed uncollectible. As of December 31, 2023 and 2022, the allowance for credit losses was \$48,000 and \$24,000, respectively.

A rollforward of the activity in the Company's allowance for doubtful account is as follows (in thousands):

	Year-ended	
	December 31, 2023	December 31, 2022
Balance at beginning of year	\$ 24	\$ 28
Additions: change to cost and expense	24	5
Deductions: write-offs, net of recovery	-	(9)
Balance at end of year	<u>\$ 48</u>	<u>\$ 24</u>

BARDA Income and Receivables

The Company was awarded a BARDA grant in September 2015. Under this grant BARDA supported the Company's research and development for the Company's product, including U.S. clinical regulatory program targeted towards FDA PMA, compassionate use programs, clinical and health economics research, U.S. pediatric burn programs and the clinical trial in soft-tissue reconstruction, which led to the full-thickness skin defect indication.

Consideration received under the BARDA grant is earned and recognized under a cost-plus-fixed-fee arrangement in which the Company is reimbursed for direct costs incurred plus allowable indirect costs and a fixed-fee earned. Billings under the contracts are based on approved provisional indirect billing rates, which permit recovery of fringe benefits, general and administrative expenses and a fixed fee.

The Company has concluded that grants under the BARDA grant are not within the scope of ASC 606, as they do not meet the definition of a contract with a "customer." The Company has further concluded that Subtopic 958-605, *Not-for-Profit-Entities-Revenue Recognition* also does not apply, as the Company is a business entity and the grants are with governmental agencies or units. With respect to the BARDA grant, we considered the guidance in IAS 20, *Accounting for Government Grants and Disclosure of Government Assistance*, by analogy. BARDA income and related receivables are recognized when there is reasonable assurance that the grant will be received, and all attaching conditions have been complied with. When the grant relates to an expense item, the grant received is recognized as income over the period when the expense was incurred.

Inventory

Inventory is valued at the lower of cost or estimated net realizable value and is reflected in cost of sales. Costs incurred in bringing each product to its present location and condition are accounted for at purchase cost on a first-in, first-out basis ("FIFO"). The Company capitalizes inventory costs associated with the Company's products when, based on management's judgment, future commercialization is considered probable and the future economic benefit is expected to be realized; otherwise, such costs are expensed as research and development. Inventory is evaluated for impairment periodically to identify inventory obsolescence when an inventory item's cost basis is in excess of its net realizable value. These adjustments are based upon multiple factors, including inventory levels, projected demand, and product shelf life.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and costs to complete the sale.

Leases

The Company has operating leases for corporate office space, manufacturing and warehouse facility. The Company's operating leases have remaining lease terms of one year to five years, some of which include options to renew the lease. At contract inception, the Company determines whether the contract is a lease or contains a lease. A contract contains a lease if the Company is both able to identify an asset and can conclude it has the right to control the identified asset for a period of time. Leases with an initial term of twelve months or less are not recorded on the Consolidated Balance Sheet.

Right-of-use (“ROU”) assets represent the Company’s right to control an underlying asset for the lease term, and lease liabilities represent the Company’s obligation to make lease payments arising from the lease. ROU assets and lease liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As the Company’s leases do not provide an explicit rate, the Company used its incremental borrowing rate (“IBR”) based on the information available at commencement date in determining the discount rate used to present value lease payments. In determining the IBR, the Company considered its credit rating and current market interest rates. The IBR used approximates the interest that the Company would be required to pay for a collateralized loan over a similar term. The Company’s leases typically do not include any residual value guarantees or asset retirement obligations.

The Company’s lease terms are only for periods in which it has enforceable rights. A lease is no longer enforceable when both the lessee and the lessor each have the right to terminate the lease without permission from the other party with no more than an insignificant penalty. The Company has options to renew some of these leases for three years after their expiration. The Company considers these options, which may be elected at the Company’s sole discretion, in determining the lease term on a lease-by-lease basis. Lease expense is recognized on a straight-line basis over the lease term and is primarily included in general and administrative expenses in the accompanying consolidated statements of operations.

The Company has lease agreements with lease and non-lease components, which are accounted for as a single lease component for all underlying asset classes. Some leases require variable payments for common area maintenance, property taxes, parking, insurance and other variable costs. The variable portion of lease payments is not included in operating lease assets or liabilities. Variable lease costs are expensed when incurred.

Property, Plant and Equipment

The Company’s property, plant and equipment are stated at cost, net of accumulated depreciation and amortization. Depreciation is computed based on the straight-line method over the estimated useful lives of the various asset classes, generally three to seven years. Leasehold improvements are amortized over the shorter of the life of the related asset or the remaining term of the lease. Costs associated with customized internal-use software systems that have reached the application development stage and meet recoverability tests are capitalized and include external direct costs utilized in developing or obtaining the applications and payroll and payroll-related expenses for employees who are directly associated with the application development. Maintenance and repairs are expensed as incurred.

Intangible Assets

The Company maintains definite-lived intangible assets related to patents initially measured at cost and amortized over estimated useful lives of approximately 3—20 years. The Company had capitalized patent costs of \$616,000 and \$558,000 as of December 31, 2023 and 2022, respectively, related to regulatory approval of the RECELL System, and are being amortized over their estimated useful lives.

Impairment of Long-Lived Assets

The Company evaluates long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If the sum of the estimated, undiscounted future cash flows is less than the carrying amount of the asset, then an impairment is recognized for the amount by which the carrying value of the asset exceeds its estimated fair value. Fair value is determined using the market, income, or cost approaches as appropriate for the asset. Any write-downs are treated as permanent reductions in the carrying amount of the asset and recognized as an operating loss. The Company had \$4,000 of impairments of long-lived assets for the year-ended December 31, 2023. The Company did not have any impairments in long-lived assets for the year-ended December 31, 2022.

Sales and Marketing Expenses

Sales and marketing expenses consist primarily of compensation and employee benefits of sales and marketing personnel and related field sales organization, marketing events, advertising costs, travel, trade shows and other marketing materials. The Company expenses all selling and marketing costs as incurred. Advertising expenses were \$398,000 and \$216,000 for the years-ended December 31, 2023 and 2022, respectively.

Research and Development Expenses

Research and development expenses represent costs incurred to develop the Company's products. Research and development expenses consist primarily of salaries and other personnel costs, clinical trial costs, regulatory costs and manufacturing costs for non-commercial products. The Company expenses all research and development costs in the periods in which they are incurred.

Stock-Based Compensation

The Company records compensation expense for stock options and restricted stock units ("RSU") based on the fair market value of the awards on the date of grant. The fair value of stock-based compensation awards is amortized over the vesting period of the award. Compensation expense for performance-based awards is evaluated based on the number of shares ultimately expected to vest, evaluated each reporting period and based on management's expectations regarding the relevant performance criteria. The Black-Scholes option pricing model and Monte Carlo Simulation are used to estimate the fair value of the time-based and performance-based options, respectively. Under *ASU 2016-09, Compensation – Stock Compensation ("ASC 718") Improvements to Employee Share-Based Payment Accounting*, the Company elected to account for forfeitures as they occur.

The following assumptions were used in the valuation of stock options.

- Expected volatility – determined using the historical volatility using daily intervals over the expected term.
- Expected dividends - based on the fact that the Company has never paid cash dividends and does not expect to pay any cash dividends in the foreseeable future
- Expected term – the expected term of the Company's stock options for tenure only vesting has been determined utilizing the "simplified" method as described in the SEC's Staff Accounting Bulletin No. 107 relating to share-based compensation. The simplified method was chosen because the Company has limited historical option exercise experience due to its short operating history of awards granted, with the first plan being established in 2016 which was primarily used for executive awards. Further, the Company does not have sufficient history of exercises in the U.S. market given the Company's redomiciliation from Australia to the United States in 2020. The expected term of options with a performance condition or market condition was set to the contractual term of 10 years. The contractual term was used for options with a performance or market condition as these are primarily awarded to executives and the Company assumes that they will hold them longer than rank and file employees.
- Risk-free interest rate – the risk-free interest rate is based on the U.S. Treasury yield in effect at the time of grant for a period approximately equal to the expected term of the award.

Employee Stock Purchase Plan ("ESPP")

The Company's ESPP, features two six-month offering periods per year, running from June 1 to November 30 and December 1 to May 31. The ESPP provides eligible employees with an opportunity to purchase shares of the Company's common stock through payroll deductions of up to 15% of their eligible compensation. Under the ESPP, employees can purchase the Company's Common Stock at the lower of 85% of the fair value of shares on either the first or last day of the offering period. Amounts deducted and accumulated by the participant are recorded as ESPP liability and included in Accrued wages and fringe benefits in the Consolidated Balance Sheets. This amount is used to purchase shares of common stock at the end of each six-month purchase period. Once the shares are purchased, the ESPP liability is reclassified to stockholders' equity on the purchase date. The ESPP is a compensatory plan accounted for under the expense recognition provision of share-based payment accounting standards. Compensation expense is recorded based on the fair market value at the grant date, which corresponds to the first day of each purchase period. The Black-Scholes option pricing model is used to estimate the grant date fair value.

Loss per Share

Basic net loss per share is computed by dividing net loss by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net loss by the weighted-average number of common shares outstanding during the period, assuming potentially dilutive ordinary shares from option exercises, employee share awards, ESPP and warrants and other dilutive instruments that have been issued. For periods where the Company has presented a net loss, potentially dilutive securities are excluded from the computation of diluted net loss per share as they would be anti-dilutive. In accordance with ASC 710-10, *Compensation – General ("ASC 710")*, shares of common stock held by the rabbi trust are excluded from the denominator in the basic and diluted EPS calculations.

Non-Qualified Deferred Compensation Plan Liability and Corporate-Owned Life Insurance Asset

The Company's non-qualified deferred compensation plan (the "NQDC plan"), which became effective in October 2021, allows highly compensated key employees to elect to defer a portion of their salary, bonus and RSU awards to later years.

Management determined that the cash deferrals under the NQDC plan shall be accounted for similarly to a defined benefit plan under ASC 715, *Compensation – Retirement Benefits* (“ASC 715”), and should follow accounting treatment that is similar to a cash balance plan. Management determined that the employee portion and employer portion of the deferred compensation should be recognized as a compensation expense with a corresponding credit to deferred compensation liability. The matching contribution will be accrued over the vesting period of two years with 25% vesting in the first year and 75% vesting in the second year. Employees aged 55 or older immediately vest in employer matching contributions. The change in the liability between each reporting period is accounted for as compensation expense with a corresponding adjustment to deferred compensation liability. Upon distribution, the Company will record the distribution as a decrease to deferred compensation liability with a corresponding credit to cash. The Company funds the NQDC plan through a Corporate-Owned Life Insurance (“COLI”). Per the ASC 325-30-25-1A, *Investments – Other*, COLI is recorded as an asset on the Consolidated Balance Sheets as it does not meet the definition of a plan asset under ASC 715. The Company invests in COLI policies relating to its deferred compensation plan. Investments in COLI policies are recorded at their cash surrender values as of each balance sheet date. Changes in the cash surrender value during the period are recorded as a gain or loss in the Consolidated Statements of Operations in Other income, net.

Rabbi Trust

During April 2022, the Company established a rabbi trust for a select group of participants in which share awards granted under the 2020 Omnibus Incentive Plan (“2020 Plan”) and deferred under the NQDC plan may be deposited. In addition to the deferral of shares, the rabbi trust holds the assets in the COLI for the NQDC plan. The rabbi trust is an irrevocable trust, and no portion of the trust fund may be used for any purpose other than the delivery of those assets to the participants. The assets held in the rabbi trust are subject to the claims of our general creditors in the event of bankruptcy or insolvency. The value of the assets of the rabbi trust is consolidated into our financial statements.

The NQDC plan permits diversification of vested shares (common stock) into other equity securities subject to a six-month and one day holding period subsequent to vesting. Per ASC 710-10-25-15, accounting for deferred common stock will be under plan type C or D. Accounting will depend on whether or not the employee has diversified the common stock. Under Plan type C, diversification is permitted but the employee has not diversified. Under plan type D, diversification is permitted, and the employee has diversified.

For common stock that have not been diversified, the employer stock held in the rabbi trust is classified in a manner similar to treasury stock and presented separately on the Consolidated Balance Sheets as Company common stock held by the NQDC plan. The common stock will be recorded at the fair value of the stock at the time it vested, subsequent changes in the value of the common stock will not be recognized. The deferred compensation obligation is measured independently at fair value of the common stock with a corresponding charge or credit to compensation cost. The fair value is calculated as the product of the common stock and the closing price of the stock each reporting period.

Under plan type D, the accounting for the assets held by the rabbi trust is subject to the accounting pronouncements under applicable GAAP for each asset type. The deferred compensation obligation is measured independently at fair value of the underlying assets. During the year-ended December 31, 2023, diversified stock was invested in funds under the COLI policy.

Non-Qualified Deferred Compensation Stock Awards

In accordance with ASC 718, *Compensation — Stock Compensation*, the deferred RSU awards under the NQDC plan are classified as an equity instrument and changes in fair value of the amount owed to the participant are not recognized. As the plan permits diversification, presentation outside of permanent equity in accordance with *ASR 268, Redeemable Preferred Stock* is appropriate. The redemption amounts are based on the vested percentage and are recorded outside of equity as Non-qualified deferred compensation share awards on the Consolidated Balance Sheets. Deferred awards will be presented outside of permanent equity until the awards are vested. For further details refer to Note 18.

Segment Reporting

Operating segments are defined as components of an enterprise for which separate discrete financial information is available for evaluation by the chief operating decision-maker in making decisions regarding resource allocation and assessing performance. The Company’s chief operating decision-maker is its Chief Executive Officer. To date, the Company has viewed its operations and manages its business as one segment.

3. Marketable Securities

The following table summarizes the amortized cost and estimates fair values of debt securities available for sale:

	As of December 31, 2023			
	Amortized Cost	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Carrying Value
(in thousands)				
Cash equivalents:				
Money market funds	\$ 8,427	\$ -	\$ -	\$ 8,427
U.S. Treasury securities	2,992	-	-	2,992
Total cash equivalents	<u>\$ 11,419</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 11,419</u>
Current marketable securities:				
U.S. Treasury securities	\$ 65,145	\$ 100	\$ (3)	\$ 65,242
U.S. Government agency obligations	1,699	-	(2)	1,697
Total current marketable securities	<u>\$ 66,844</u>	<u>\$ 100</u>	<u>\$ (5)</u>	<u>\$ 66,939</u>
	As of December 31, 2022			
	Amortized Cost	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Carrying Value
(in thousands)				
Cash equivalents:				
Money market funds	\$ 14,089	\$ -	\$ -	\$ 14,089
Total cash equivalents	<u>\$ 14,089</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 14,089</u>
Current marketable securities:				
U.S. Treasury securities	\$ 43,092	\$ 1	\$ (393)	\$ 42,700
Commercial paper	12,743	-	-	12,743
Corporate debt securities	3,865	-	(23)	3,842
U.S. Government agency obligations	1,901	-	(8)	1,893
Total current marketable securities	<u>\$ 61,601</u>	<u>\$ 1</u>	<u>\$ (424)</u>	<u>\$ 61,178</u>
Long-term marketable securities:				
Asset backed securities	\$ 3,568	\$ 7	\$ (3)	\$ 3,572
U.S. Treasury securities	2,416	-	(6)	2,410
U.S. Government agency obligations	949	-	(1)	948
Total long-term marketable securities	<u>\$ 6,933</u>	<u>\$ 7</u>	<u>\$ (10)</u>	<u>\$ 6,930</u>

The maturities of debt securities available for sale are summarized in the following table using contractual maturities. Actual maturities may differ from contractual maturities due to obligations that are called or prepaid.

	As of December 31, 2023		As of December 31, 2022	
	Amortized Cost	Carrying Value	Amortized Cost	Carrying Value
(in thousands)				
Due in one year or less	\$ 66,844	\$ 66,939	\$ 61,601	\$ 61,178
Due after one year through three years	\$ -	\$ -	\$ 6,933	\$ 6,930

Gross unrealized gains and losses on the Company's marketable securities were an unrealized gain of \$100,000 and an unrealized loss of \$5,000 as of December 31, 2023 which resulted in a net unrealized gain of \$95,000. Gross unrealized gains and losses on the Company's marketable securities were an unrealized gain of \$8,000 and an unrealized loss of \$434,000 as of December 31, 2022 which resulted in a net unrealized loss of \$426,000.

During the years-ended December 31, 2023 and 2022, the Company did not recognize credit losses. The Company has accrued interest income of \$227,000 and \$168,000 as of December 31, 2023 and, 2022, recorded in Prepaids and Other Current Assets, respectively. Money market funds were included in the cash and cash equivalents line item.

4. Fair Value Measurements

The authoritative guidance on fair value measurements establishes a framework with respect to measuring assets and liabilities at fair value on a recurring basis and non-recurring basis. Under the framework, fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants, as of the measurement date. The framework also establishes a three-tier hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability and are developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability and are developed based on the best information available in the circumstances. The hierarchy consists of the following three levels:

Level 1: Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.

Level 2: Inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Inputs are unobservable inputs for the asset or liability

The following tables present information about the Company's financial assets measured at fair value on a recurring basis, based on the three-tier fair value hierarchy:

(in thousands)	As of December 31, 2023			
	Level 1	Level 2	Level 3	Total
Cash equivalents:				
Money market funds	\$ 8,427	\$ -	\$ -	\$ 8,427
U.S. Treasury securities	-	2,992	-	2,992

Total financial liabilities	\$ -	\$ 1,348	\$ -	\$ 1,348
Financial assets:				
Corporate-owned life insurance policies	\$ -	\$ 1,238	\$ -	\$ 1,238
Total financial assets	\$ -	\$ 1,238	\$ -	\$ 1,238

The following table presents the summary of changes in the fair value of our Level 3 financial instruments:

	As of December 31, 2023	
	Long-term debt	Warrant liability
Value at beginning of period	\$ -	\$ -
Fair value at issuance date - October 18, 2023	37,575	2,425
Change in fair value in earnings	1,616	733
Change in fair value in OCI	621	-
Balance at December 31, 2023	<u>\$ 39,812</u>	<u>\$ 3,158</u>

The Company's Level 1 assets include money market instruments and are valued based upon observable market prices. Level 2 assets consist of commercial paper, asset back securities and corporate debt securities, U.S. Government Agency obligations and U.S. Treasury securities. Level 2 securities are valued based upon observable inputs that include reported trades, broker/dealer quotes, bids and offers. As of December 31, 2022, the Company had no investments that were measured using unobservable (Level 3) inputs. There were no transfers between fair value measurement levels during the years-ended December 31, 2023 and 2022. Cash equivalents consist of money market funds and are classified as a Level 1. The corporate-owned life insurance contracts are recorded at cash surrender value, which is provided by a third party and reflects the net asset value of the underlying publicly traded mutual funds and are categorized as Level 2. Non-qualified deferred compensation plan liability is measured at fair value based on quoted prices of identical instruments to the investment vehicles selected by the participants.

Long-term debt

The fair value of the debt was determined using a Monte Carlo simulation in order to predict the probability of different outcomes. The valuation was performed based on significant inputs not observable in the market, which represents a Level 3 measurement within the fair value hierarchy. The fair value of the debt is recorded in the Consolidated Balance Sheets. The fair value is estimated by the Company each reporting period and the change in the fair value is recorded in earnings.

The below assumptions were used in the Monte Carlo simulation

- risk free interest rate
- revenue volatility
- revenue discount rate
- future revenue projection
- expected dividend rate

Warrant Liability

The fair value of the warrant liability is recognized in connection with the Credit Agreement. The fair value of the warrant liability was determined based on significant inputs not observable in the market, which represents a Level 3 measurement within the fair value hierarchy. The fair value of the warrant liability, which is reported within Warrant liabilities on the Consolidated Balance Sheets, is estimated by the Company based on the Black Scholes option pricing model with the following unobservable inputs (Level 3):

- price of common stock
- expected term
- exercise price
- expected volatility
- expected risk free interest rate
- expected dividend rate

5. Revenues

The Company's revenues consists of sale of the RECELL System to hospitals or other treatment centers, COSMOTEC and to BARDA (collectively "customers"), predominately in the United States. In addition, the Company records service revenue for the emergency preparedness services provided to BARDA.

Performance Obligations

For commercial contracts, we identified the hospital or treatment center and COSMOTEC as the customer in Step 1 of the ASC 606 5 step model and have determined a contract exists with those customers in Step 1. As these contracts typically have a single performance obligation (i.e. product delivery), no allocation of the transaction price is required in Step 4 of the model. Control of the product is transferred to the customer at a point in time. Specifically, we determined the customer obtains control of the product at point in time at which the goods are either shipped or delivered to our customers' facilities, depending on the terms of the contract. The transaction price is stated within the contract and is therefore fixed consideration. The transaction price does not include the sales tax that are imposed by governmental authorities.

For the contract with BARDA, the Company identified two performance obligations (i) the procurement of 5,614 RECELL units, (ii) emergency preparedness services. The Company's performance obligations are either satisfied at a point in time or over time as services are provided. The product procurement performance obligation is satisfied at a point in time, upon transfer of control of the product. RECELL units that have been delivered to BARDA have a product replacement obligation at no cost to BARDA due to product's limited shelf-life. The estimated cost of the expired inventory over the term of the contract is recognized on a per unit basis at the time of delivery. The estimated liability is released upon replacement of the product along with a corresponding reduction to inventory. The Company has estimated deferred cost of approximately \$0 and \$194,000 as of December 31, 2023 and 2022, respectively, for the rotation cost of the product, such amounts are recorded in Other current liabilities. The emergency preparedness services performance obligation is satisfied over time. Revenue for the emergency deployment will be recognized on a straight-line basis during the term of the contract as services are consumed over time. Services recognized of \$335,000 and \$370,000 for the years-ended December 31, 2023 and 2022, respectively, and are included in Revenues within the Consolidated Statement of Operations. Contract costs to fulfil the performance obligation are incremental and expected to be recovered are capitalized and amortized on a straight-line basis over the term of the contract. As of December 31, 2023 and December 31, 2022, contract cost of \$0 and \$252,000 are included in Other current assets, respectively.

Remaining Performance Obligations

Revenues from remaining performance obligations are calculated as the dollar value of the remaining performance obligations on executed contracts and relate to BARDA and COSMOTEC. The estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) pursuant to the Company's existing customer agreements is \$390,000 and \$698,000 as of December 31, 2023 and December 31, 2022, respectively. As of December 31, 2023 and December 31, 2022, the Company had \$0 and \$274,000, respectively, in contract liabilities related to our contract with BARDA for the purchase, delivery and storage of the RECELL system for emergency response preparedness. We are contracted to manage this inventory of product until the federal government requests shipment or at contract termination on December 31, 2023. The Company had \$390,000 and \$424,000 in contract liabilities as of December 31, 2023 and December 31, 2022, respectively, related to the contract with COSMOTEC. These amounts are split between Other current liabilities and Contract Liabilities in the Consolidated Balance Sheets. As of December 31, 2023 and December 31, 2022, the Company had \$33,000 and \$0 in Other current liabilities, respectively. As of December 31, 2023 and December 31, 2022, the Company had \$357,000 and \$424,000 in Contract Liabilities,

respectively. The Company expects to recognize these amounts as revenue on a straight-line basis over the term of the contract with COSMOTEC.

Variable Consideration

The Company evaluates its contracts with customers for forms of variable consideration, which may require an adjustment to the transaction price based on their estimated impact. For commercial customers, revenue from the sale of goods is recognized net of volume discounts. The Company uses the expected value method when estimating variable consideration. Revenue is only recognized to the extent that it is probable that a significant reversal will not occur. Variable consideration under the BARDA contract is not material to the consolidated financial statements.

Volume Discounts — The Company generally provides contracted customers with volume discounts that are explicitly stated in the Company's customer contracts. The RECELL system is sold with respective volume discounts based on aggregated sales over a 12-month period on a customer-by-customer basis. Revenue from these sales is recognized based on the price specified in the contract, net of estimated volume discounts, and net of any sales tax charged. Goods sold are not eligible for return. The Company has determined such discounts are not distinct from the Company's sale of products to the customer and, therefore, these payments have been recorded as a reduction of revenue and as a reduction to accounts receivable, net.

Contract Assets and Contract Liabilities

Contract assets include amounts related to the Company's contractual right to consideration for both completed and partially completed performance for which the Company does not have the right to payment. As of December 31, 2023 and December 31, 2022, the Company does not have any contract assets.

Contract liabilities are recorded when the Company receives payment prior to satisfying its obligation to transfer goods to a customer. The Company had a total of \$390,000 and \$698,000 in contract liabilities as of December 31, 2023 and December 31, 2022, respectively. These amounts split between Other current liabilities and Contract liabilities in the Consolidated Balance Sheets. The Company had \$33,000 and \$0 in Other current liabilities as of December 31, 2023 and December 31, 2022, respectively. The Company had \$357,000 and \$698,000 in Contract liabilities as of December 31, 2023 and December 31, 2022, respectively. The balance relates to the unsatisfied performance obligation for emergency preparedness under the BARDA contract and COSMOTEC. Performance obligation will be recognized over time over the term of the contract. For the years-ended December 31, 2023 and 2022, the Company recognized \$335,000 and \$370,000 of BARDA revenue from amounts included in the beginning balance of contract liabilities, respectively. For the years-ended December 31, 2023 and 2022, the Company recognized \$33,000 and \$11,000 of revenue for COSMOTEC for amounts included in the beginning balance of contract liabilities, respectively.

Cost to Obtain and Fulfill a Contract

Contract fulfillment costs include commissions and shipping expenses. The Company has opted to immediately expense the incremental cost of obtaining a contract when the underlying related asset would have been amortized over one year or less. The Company generally does not incur costs to obtain new contracts.

BARDA Contract Costs

Cost to fulfill the BARDA emergency preparedness performance obligation, which primarily consist of billed costs to BARDA incurred in connection with the emergency deployment services, are incremental and expected to be recovered. Costs are capitalized and amortized on a straight-line basis over the term of the contract. As of December 31, 2023, the Company did not have any contract costs remaining in Other current assets. As of December 31, 2022, the Company had \$252,000 of contract costs included in other current assets. Amortization expense related to deferred contract costs were \$341,000 and \$338,000 during the years-ended December 31, 2023 and 2022, respectively and are classified as cost of sales on the accompanying Consolidated Statements of Operations. There was no impairment loss in relation to deferred contract costs during the years-ended December 31, 2023 and 2022.

Disaggregated Revenue

The Company disaggregates revenue from contracts with customers into geographical regions and by customer type. As noted in the segment footnote, the Company's business consists of one reporting segment. A reconciliation of disaggregated revenue by geographical region and customer type is provided in Segment Note 12.

6. Long-term debt

On October 18, 2023 ("Closing Date") the Company entered into a Credit Agreement, by and between the Company, as borrower, and an affiliate of OrbiMed as the lender and administrative agent (the "Lender"). The Credit Agreement provides for a five-year senior secured credit facility in an aggregate principal amount of up to \$90.0 million, of which (i) \$40.0 million was made available on the Closing Date (the "Initial Commitment Amount"), (ii) \$25.0 million will be made available, at the Company's discretion, on or prior to December 31, 2024, subject to certain net revenue requirements, and (iii) \$25.0 million will be made available, at the Company's discretion, on or prior to June 30, 2025, subject to certain net revenue requirements. The maturity date of the agreement is October 18, 2028 ("Maturity Date"). On the Closing date, the Company closed on the Initial Commitment Amount of \$40.0 million, less certain fees and expenses payable to or on behalf of the Lender. The Company received net proceeds of \$38.8 million upon closing after deducting the Lender's transaction costs in connection with the issuance.

All obligations under the Credit Agreement will be guaranteed by all of the Company's wholly owned subsidiaries (subject to certain exceptions) and secured by substantially all of the Company's and each guarantor's assets. The loan will be due in full on the Maturity Date unless the Company elects to repay the principal amount at any time prior to the Maturity Date. Upon prepayment, the Company will owe the applicable repayment premium and exit fee of 3% on the principal amount of the Loans. The repayment premium varies between 0% - 3%, depending on certain conditions that are defined in the Credit Agreement. Note that the Repayment premium incorporates the make-whole amount. The make-whole amount represents the remaining scheduled interest payments on the loan during the period commencing on the prepayment date through the 24-month anniversary of the closing date. The Credit Agreement further states that the Company will be required to repay the principal amount of the Loans if the Company does not achieve certain net revenue thresholds. If, for any quarter until the maturity date, the Company's net revenue does not equal or exceed the applicable trailing twelve-month amount as set forth in the Credit Agreement, then the Company shall repay in equal quarterly installments equal to 5.0% of the outstanding principal amount on the date the net revenue amount was not satisfied, together with a repayment premium and exit fee. The Company shall repay amounts outstanding in full immediately upon an acceleration as a result of an event of default as set forth in the Credit Agreement, together with a repayment premium and other fees. As of December 31, 2023, the Company has not made any repayments on the outstanding debt balance.

During the term of the Credit Agreement, interest payable in cash by the Company shall accrue on any outstanding debt at a rate per annum equal to the greater of (x) the SOFR rate for such period and (y) 4.00% plus, in either case, 8.00%. As of December 31, 2023, the interest rate was 13.34%. During an event of default, any outstanding amount will bear interest at a rate of 4.00% in excess of the otherwise applicable rate of interest. The Company will pay certain fees with respect to the Credit Agreement, including an upfront fee, an unused fee on the undrawn portion of the Loan Facility, an administration fee, a repayment premium and an exit fee, as well as certain other fees and expenses of the Lender. The undrawn fee accrues at 0.5% of the undrawn balance and its recorded as an asset in the Consolidated Balance Sheets.

The Credit Agreement contains certain customary events of default, including with respect to nonpayment of principal, interest, fees or other amounts; material inaccuracy of a representation or warranty; failure to perform or observe covenants; material defaults on other indebtedness; bankruptcy and insolvency events; material monetary judgments; loss of certain key permits, persons and contracts; material adverse effects; certain regulatory matters; and any change of control. As of December 31, 2023, the Company was in compliance with all financial covenants in the Credit Agreement.

Each of the Credit Agreement and a Pledge and Security Agreement entered into by the Company, the guarantors and the Lender on October 18, 2023 (the "Pledge and Security Agreement") contains a number of customary representations, warranties and covenants that, among other things, will limit or restrict the ability of the Company and its subsidiaries to (subject to certain qualifications and exceptions): create liens and encumbrances; incur additional indebtedness; merge, dissolve, liquidate or consolidate; make acquisitions, investments, advances or loans; dispose of or transfer assets; pay dividends or make other payments in respect of their capital stock; amend certain material documents; redeem or repurchase certain debt; engage in certain transactions with affiliates; and enter into certain restrictive agreements. In addition, the Company and guarantors will be required to maintain at least \$10.0 million of unrestricted cash and cash equivalents.

On the Closing Date, the Company issued to an affiliate of the Lender a warrant (the "Warrant") to purchase up to 409,661 shares of the Company's common stock, par value \$0.0001 per share ("Common Stock"), at an exercise price of \$10.9847 per share, with a term of 10 years from the issuance date. The Warrant contains customary share adjustment provisions, as well as weighted average price protection in certain circumstances.

As permitted under ASC 825, the Company elected the fair value option to account for the Credit Agreement, and recorded the Credit Agreement and warrants at fair value with changes in fair value recorded in the Consolidated Statements of Operations in Other income, net. Changes related to instrument specific credit risk are recorded in other comprehensive income in the Consolidated Balance Sheet. For changes in fair value refer to Note 4. The Company incurred debt issuance costs of \$775,000, which were

expensed as incurred and recorded in Other income, net. The Company also incurred a loss on issuance of \$1.2 million as the fair value of the debt and warrant exceeded the proceeds received.

7. Leases

During February 2023, the Company remeasured the lease liability for an office lease due to an increase in the lease term. As a result of the remeasurement of the lease liability, there was an increase of approximately \$1.1 million to the operating lease ROU assets and operating lease liabilities. There was no impact on earnings as a result of the lease modification.

During May 2023, the Company entered into a new office lease in Irvine, California. The lease commenced during July 2023 and resulted in an increase of \$1.1 million in the operating lease ROU asset and operating lease liabilities.

During December 2023, the Company expanded the square footage of the Ventura Warehouse by 3,360 square feet for a term of 12.5 months. The lease commenced during December 2023 and resulted in an increase of approximately \$50,000 in the operating lease ROU asset and operating lease liabilities.

The following table sets forth the Company's operating lease expenses which are included in operating expenses in the Consolidated Statements of Operations (in thousands):

	Year-Ended	
	December 31, 2023	December 31, 2022
Operating lease cost	\$ 929	\$ 775
Variable lease cost	101	51
Total lease cost	<u>\$ 1,030</u>	<u>\$ 826</u>

Supplemental cash flow information related to operating leases was as follows (in thousands):

	Year-Ended	
	December 31, 2023	December 31, 2022
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash outflows from operating leases	\$ 815	\$ 803

Supplemental balance sheet information, as of December 31, 2023 and 2022, related to operating leases was as follows (in thousands, except for operating lease weighted average remaining lease term and operating lease weighted average discount rate):

	As of	
	December 31, 2023	December 31, 2022
Reported as:		
Operating lease right-of-use assets	\$ 2,440	\$ 851
Total right-of-use assets	<u>\$ 2,440</u>	<u>\$ 851</u>
Other current liabilities:		
Operating lease liabilities, short-term	\$ 895	\$ 612
Operating lease liabilities, long term	1,702	306
Total operating lease liabilities	<u>\$ 2,597</u>	<u>\$ 918</u>
Operating lease weighted average remaining lease term (years)	3.31	1.44
Operating lease weighted average discount rate	8.75%	6.71%

As of December 31, 2023, maturities of the Company's operating lease liabilities are as follows (in thousands):

	Operating Leases
2024	\$ 1,079
2025	738
2026	684
2027	318
2028	190
Total lease payments	3,009
Less imputed interest	(412)
Total operating lease liabilities	<u>\$ 2,597</u>

At December 31, 2023 there were no leases entered into that had not yet commenced. On January 4, 2024, the Company executed the second amendment to the Ventura Warehouse to extend the lease for an additional three years. Refer to subsequent events footnote for more information.

8. Inventory

The composition of inventories is as follows (in thousands):

	As of	
	December 31, 2023	December 31, 2022
Raw materials	\$ 3,683	\$ 1,131
Work in process	878	384
Finished goods	1,035	610
Total inventory	<u>\$ 5,596</u>	<u>\$ 2,125</u>

The Company has reduced the carrying value of its inventories to reflect the lower of cost or net realizable value. Charges for estimated excess and obsolescence are recorded in cost of sales in the Consolidated Statement of Operations and were \$221,000 and \$375,000 for the years-ended December 31, 2023 and 2022, respectively.

9. Intangible Assets

The composition of intangible assets is as follows (in thousands):

	Weighted Average Useful Life	As of December 31, 2023			As of December 31, 2022		
		Gross Amount	Accumulated Amortization	Net Carry Amount	Gross Amount	Accumulated Amortization	Net Carry Amount
Patent 1	3	\$ 17	\$ (17)	\$ -	\$ 17	\$ (16)	\$ 1
Patent 2	13	141	(39)	102	137	(28)	109
Patent 3	13	206	(54)	152	194	(39)	155
Patent 5	19	99	(11)	88	89	(6)	83
Patent 6	19	56	(6)	50	43	(4)	39
Patent 7	13	2	-	2	2	-	2
Patent 8	18	29	(1)	28	13	-	13
Patent 9	3	3	-	3	-	-	-
Patent 10	19	3	-	3	3	-	3
Patent 11	19	6	(1)	5	6	-	6
Trademarks	Indefinite	54	-	54	54	-	54
Total intangible assets		<u>\$ 616</u>	<u>\$ (129)</u>	<u>\$ 487</u>	<u>\$ 558</u>	<u>\$ (93)</u>	<u>\$ 465</u>

During the year-ended December 31, 2023, the Company recorded an impairment charge of approximately \$4,000 in General and administrative expenses in the Consolidated Statement of Operations. During the year-ended December 31, 2022, the Company did not identify any events or changes in circumstances that indicated the carrying value of its intangibles may not be recoverable. As such, there was no impairment of intangibles assets recognized for the year-ended December 31, 2022. Amortization expense of

intangibles included in the Consolidated Statements of Operations was \$35,000 and \$58,000 for the years-ended December 31, 2023 and 2022, respectively.

The Company expects the future amortization of amortizable intangible assets held at December 31, 2023 to be (in thousands):

	Estimated Amortization Expense
2024	\$ 38
2025	38
2026	37
2027	37
2028	37
Thereafter	246
Total	\$ 433

10. Property and Equipment, net

The composition of property and equipment, net is as follows (in thousands):

		As of	
	Useful Lives	December 31, 2023	December 31, 2022
Computer equipment	3 - 5 years	\$ 984	\$ 755
Computer software	3 years	840	871
Construction in progress		87	258
Furniture and fixtures	7 years	824	439
Laboratory equipment	5 years	769	643
Leasehold improvements	Lesser of life or lease term	367	257
RECELL moulds	5 years	438	129
Less: accumulated amortization and depreciation		(2,432)	(2,152)
Total plant and equipment, net		\$ 1,877	\$ 1,200

Depreciation expense related to plant and equipment was \$597,000 and \$510,000 for the years-ended December 31, 2023 and 2022, respectively. The Company recorded an impairment of approximately \$83,000 for the year-ended December 31, 2023. Amounts are recorded in General and administrative expenses in the Consolidated Statement of Operations. During the year-ended December 31, 2022, the Company did not identify any events or changes in circumstances that indicated that the carrying value of its plant and equipment may not be recoverable. As such, there was no impairment of plant and equipment recognized for the year-ended December 31, 2022.

11. Prepaids and Other Current Assets and Other Long—Term Assets

Prepaids and other current assets consisted of the following (in thousands):

	As of	
	December 31, 2023	December 31, 2022
Prepaid expenses	\$ 1,376	\$ 921
Accrued investment income	227	168
Lease deposits	38	110
BARDA contract costs	-	252
Other receivables	18	127
Total prepaids and other current assets	\$ 1,659	\$ 1,578

Prepaid expenses primarily consist of prepaid benefits and insurance.

Other long-term assets consisted of the following (in thousands):

	As of	
	December 31, 2023	December 31, 2022
Long-term lease deposits	\$ 155	\$ 25
Long-term prepaids	148	97
Other long-term assets	52	-
Total other long-term assets	<u>\$ 355</u>	<u>\$ 122</u>

Other current liabilities consisted of the following (in thousands):

	As of	
	December 31, 2023	December 31, 2022
Operating lease liability	\$ 895	\$ 612
BARDA deferred costs	-	194
COSMOTEC deferred revenue	33	-
Other current liabilities	338	184
Total other current liabilities	<u>\$ 1,266</u>	<u>\$ 990</u>

12. Reporting Segment and Geographic Information

The Company views its operations and manages its business in one reporting segment. Long-lived assets were primarily located in the United States as of December 31, 2023 and December 31, 2022 with an insignificant amount located in Australia and the United Kingdom.

Revenues by region and customer location were as follows (in thousands):

	Year-Ended	
	December 31, 2023	December 31, 2022
Revenue:		
United States	\$ 46,359	\$ 33,257
Foreign:		
Japan	3,370	729
European Union	51	-
Australia	222	275
United Kingdom	141	160
Total	<u>\$ 50,143</u>	<u>\$ 34,421</u>

Revenues by customer type were follows (in thousands):

	Year-Ended	
	December 31, 2023	December 31, 2022
Revenue:		
Commercial sales	\$ 49,775	\$ 34,051
Deferred commercial revenue	33	-
BARDA:		
Services for emergency preparedness	335	370
Total	<u>\$ 50,143</u>	<u>\$ 34,421</u>

Cost of sales by customer type were as follows (in thousands):

	Year-Ended	
	December 31, 2023	December 31, 2022
Cost of sales:		
Commercial cost	\$ 7,544	\$ 5,573
BARDA:		
Product cost	(105)	130
Emergency preparedness service cost	341	338
Total	\$ 7,780	\$ 6,041

13. Contingencies

The Company is subject to certain contingencies arising in the ordinary course of business. The Company records accruals for these contingencies to the extent that a loss is both probable and reasonably estimable. If some amount within a range of loss appears to be a better estimate than any other amount within the range, that amount is accrued. Alternatively, when no amount within a range of loss appears to be a better estimate than any other amount, the lowest amount in the range is accrued. The Company expenses legal costs associated with loss contingencies as incurred. As of December 31, 2023, the Company does not have any outstanding or threatened litigation that would have a material impact to the financial statements.

14. Common and Preferred Stock

The Company's shares of common stock are quoted on Nasdaq under AVITA Medical's previous Nasdaq ticker code, "RCEL". The Company's CDIs are quoted on the ASX under AVITA Medical's previous ASX ticker code, "AVH". One share of common stock on Nasdaq is equivalent to five CDIs on the ASX.

The Company is authorized to issue 200,000,000 shares of common stock, par value \$0.0001 per share, and 10,000,000 shares of preferred stock, par value \$0.0001 per share, issuable in one or more series as designated by the Company's board of directors. No other class of capital stock is authorized. The Company has 25,682,078 and 25,208,436 shares of common stock issued and outstanding as of December 31, 2023 and December 31, 2022, respectively. The Company has no shares of preferred stock outstanding during any period.

15. Share-Based Payment Plans

Overview of Employee Share-Based Compensation Plans

Our former parent company, AVITA Medical Pty Limited, adopted the Employee Share Plan and the Incentive Option Plan (collectively, the "2016 Plans"). Upon completion of the redomiciliation of the Company from Australia to the United States in June 2020 ("Redomiciliation"), the 2016 Plans were terminated with respect to future grants and accordingly, there are no more shares available to be issued under the 2016 Plans. During November 2020, the Company filed a registration statement on Form S-8 to register a total of 1,750,000 shares of common stock which may be issued pursuant to the terms of the 2020 Plan. During June 2023, the Company filed a registration statement on Form S-8 to register an additional 2,500,000 shares of common stock under the 2020 Plan. The increase in shares available for issuance was a result of the stockholders of AVITA Medical, Inc. approving an amendment to the 2020 Plan on June 6, 2023 at the Company's 2023 Annual Meeting of Stockholders (the "2023 Annual Meeting").

On December 22, 2021, the Company's stockholders approved the issuance of options and RSUs to the Board of Directors in accordance with ASX rules. These awards are subject to the vesting and performance conditions as denoted in the individual agreements (collectively, the "2021 Annual Meeting Awards"). On December 12, 2022, the Company's stockholders approved the issuance of options and RSUs to the Board of Directors and the CEO in accordance with ASX rules. These awards are subject to vesting conditions as denoted in the individual agreements (collectively, the "2022 Annual Meeting Awards"). On June 6, 2023, the Company's stockholders approved the issuance of options and RSUs to the Board of Directors and the CEO in accordance with ASX rules. These awards are subject to vesting conditions as denoted in the individual agreements (collectively, the "2023 Annual Meeting Awards").

The 2020 Plan provides for the grant of the following Grants: (a) Incentive Stock Options, (b) Nonstatutory Stock Options, (c) Stock Appreciation Rights, (d) Restricted Stock Grants, (e) Restricted Stock Unit Grants, (f) Performance Grants, and (g) Other Grants. The 2020 Plan will be administered by the Compensation Committee or by the Board acting as the Compensation Committee. Subject to the general purposes, terms and conditions of the 2020 Plan, applicable law and any charter adopted by the Board

governing the actions of the Compensation Committee, the Compensation Committee will have full power to implement and carry out the 2020 Plan. Without limitation, the Compensation Committee will have the authority to interpret the plan, approve persons to receive grants, determine the terms and number of shares of the grants, determine vesting and exercisability of grants, and make all other determinations necessary or advisable in connection with the administration of this Plan.

The contractual term of stock option awards granted under the 2020 Plan is ten years from the grant date. Unless otherwise specified, the vesting periods of options and RSUs granted under the 2020 Plan are: (i) vest over a three-year or four-year period in equal installments at the end of each year from the date of grant, and /or (ii) subject to other performance criteria, as determined by the Compensation Committee.

Modifications

During the fourth quarter of 2023, the Company had administrative changes to employment agreements of five executives. Changes included clarification that equity awards are inclusive of options and RSUs, and a change in the post-termination exercise period from 6-months to 3-months. In addition, four employees received employment agreements for the first time as a result of a promotion. Per the terms of the employment agreement outstanding awards (options and RSUs) will immediately accelerate upon a qualifying termination. These employees were previously governed by the terms of the 2020 Plan, which upon separation from service, unvested awards will forfeit. We accounted for these changes in the accelerated vesting provision upon termination and the decrease in the post-termination exercise period as modifications. The modifications did not result in incremental expense.

The following table summarizes information about the Company's stock-based award plans as of December 31, 2023:

	Outstanding Options	Outstanding Restricted Stock Units	Shares available for future issuance
2016 Equity Incentive Plan	740,945	-	-
2020 Equity Incentive Plan	1,553,969	171,552	2,294,367
2021 AGM Awards	22,600	5,782	-
2022 AGM Awards	247,876	-	-
2023 AGM Awards	124,768	57,798	-

Share-Based Payment Expenses

Stock-based payment transactions are recognized as compensation expense based on the fair value of the instrument on the date of grant. The Company uses the graded-vesting method to recognize compensation expense. Compensation cost is reduced for forfeitures as they occur in accordance with *ASU 2016-09, Simplifying the Accounting for Share-Based Payment*. The Company recorded stock-based compensation expense of \$8.4 million and \$7.0 million for the years-ended December 31, 2023 and 2022, respectively. No income tax benefit was recognized in the Consolidated Statements of Operations for stock-based payment arrangements for the years-ended December 31, 2023 and 2022.

The Company has included stock-based compensation expense and ESPP expense as part of operating expenses in the accompanying Consolidated Statements of Operations as follows:

	Year-Ended	
	December 31, 2023	December 31, 2022
Sales and marketing expenses	\$ 1,401	\$ 1,393
General and administrative expenses	5,948	4,668
Research and development expenses	1,035	937
Total operating expenses	<u>\$ 8,384</u>	<u>\$ 6,998</u>

A summary of share option activity as of December 31, 2023 and changes during the year then ended is presented below:

	Service Only Share Options	Performance Based Share Options	Total Share Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding shares at December 31, 2022	1,724,252	511,194	2,235,446	\$ 12.47	7.71	\$ 1,530,263
Granted	972,193	-	972,193	14.52		
Exercised	(136,675)	(30,000)	(166,675)	5.74		
Expired	(61,062)	(180,473)	(241,535)	20.95		
Forfeited	(101,137)	(8,134)	(109,271)	11.53		
Outstanding shares at December 31, 2023	2,397,571	292,587	2,690,158	12.91	7.67	1,530,263
Exercisable at December 31, 2023	909,162	255,629	1,164,791	12.96	5.98	587,632
Vested and expected to vest	2,397,571	292,587	2,690,158	\$ 12.91	7.67	\$ 1,530,263

The weighted-average grant-date fair value of options granted during the years-ended December 31, 2023 and 2022 was \$9.46 and \$4.64, respectively. The total intrinsic value of options exercised during the years-ended December 31, 2023 and 2022 was \$1.7 million and \$179,000, respectively. Intrinsic value is measured using the fair market value at the date of exercise for options exercised, or at balance sheet date for outstanding options, less the applicable exercise price.

Cash received from the exercise of options was approximately \$957,000 and \$900,000, for the years-ended December 31, 2023 and 2022, respectively.

As of December 31, 2023, there was approximately \$7.4 million of total unrecognized compensation cost related to share-based compensation expense. Of this amount \$7.3 million relates to service only share options to be recognized over a weighted average period of 1.15 years, \$0.1 million related to performance-based share options to be recognized over a weighted average period of 0.74 years.

Restricted Stock Units

Restricted stock units are granted to executives as part of their long-term incentive compensation. RSUs granted to directors as a result of stockholder approval 2021 Annual Meeting, 2022 Annual Meeting and 2023 Annual Meeting are issued pursuant to award agreements between the Company and the holders of such securities. These RSU awards were approved by the Compensation Committee. All RSU awards vest in accordance with the tenure or performance conditions as determined by the Compensation Committee and set out in the contracts between the Company and the holders of such securities. The grant date fair value is determined based on the price of the Company stock price on the date of grant (stock price determined on Nasdaq).

A summary of the status of the Company's unvested RSUs as of December 31, 2023, and changes that occurred during the year is presented below:

Unvested Shares	Service Condition RSU	Performance Condition RSU	Total RSU's	Weighted Average Grant Date Fair Value per Unit
Unvested RSUs outstanding at December 31, 2022	394,872	65,646	460,518	\$ 6.30
Granted	57,798	-	57,798	14.17
Vested	(205,308)	(29,751)	(235,059)	6.37
Forfeited	(40,250)	(7,875)	(48,125)	5.67
Unvested RSUs outstanding at December 31, 2023	207,112	28,020	235,132	\$ 8.29

The weighted-average grant-date fair value of the RSUs granted during the years-ended December 31, 2023 and 2022, was \$14.17 and \$5.28, respectively. The total fair value of shares vested during the years-ended December 31, 2023 and 2022, was \$2.9 million and \$894,000, respectively.

As of December 31, 2023, there was \$829,000 of total unrecognized compensation cost related to RSU awards. Of this amount \$734,000 relates to service only RSUs to be recognized over a weighted average period of 0.63 years, \$95,000 related to performance-based awards to be recognized over a weighted average period of 0.51 years.

2021 Annual Meeting Awards

Awards to non-executive members of the Board of Directors ("Director awards") under the 2021 Annual Meeting Awards

The Director awards that were granted in 2021 consist of an aggregate 68,600 options and RSUs. A total of 41,400 tenure-based options are RSUs (15,300 options and 26,100 RSUs) vested 12 months from the grant date. A total of 27,200 tenure-based options and RSUs (9,850 options and 17,350 RSUs) vest over 3 three years in equal installment each year.

2022 Annual Meeting Awards

Awards to the CEO under the 2022 Annual Meeting Awards

On December 12, 2022, the CEO was issued an aggregate 226,296 options with 25% of those options vesting annually commencing on September 28, 2023.

Non-Executive Director awards under the 2022 Annual Meeting Awards

The Director awards consist of an aggregate 71,936 options and RSUs (21,580 options and 50,356 RSUs) vesting 12 months from the grant date.

2023 Annual Meeting Awards

Awards to the CEO under the 2023 Annual Meeting Awards

On June 6, 2023, the CEO was issued an aggregate 100,000 options with 33.3% of those options vesting annually commencing on June 6, 2024.

Non-Executive Director awards under the 2023 Annual Meeting Awards

The Director awards consist of an aggregate 82,566 options and RSUs. A total of 52,926 tenure-based options and RSUs (15,876 options and 37,050 RSUs) vest 12 months from the grant date. A total of 29,640 tenure-based options and RSUs (8,892 options and 20,748 RSUs) vest over three years in equal installments each year.

Option Pricing Model

The Company estimates the fair value of tenure-based share options using the Black-Scholes option pricing model on the date of grant.

The valuation of the options is affected by the Company's share price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, expected share price volatility over the term of the awards and actual and projected employee share option exercise behaviors. The risk-free rate is based on the U.S. Treasury rate for the expected term at the time of grant, volatility is based on the historical volatility. For tenure-based options, the expected term is based on the estimated average of the life of options using the simplified method as prescribed by SAB 107. The Company utilizes the simplified method for plain vanilla options to determine the expected term of the options due to insufficient exercise activity during recent years. The expected dividend assumption is based on the Company's history and expectation of dividend payouts.

Included in the following table is a summary of the related assumptions used in the Black-Scholes Option pricing model for the years-ended December 31, 2023 and 2022.

	Year-Ended December 31, 2023	Year-Ended December 31, 2022
Expected volatility	66% - 114%	72% - 113%
Weighted-average volatility	71%	103%
Expected dividends	0%	0%
Expected term (in years)	5 - 7	5 - 9.8
Risk-free interest rate	3.51% - 4.44%	1.42% - 3.94%

Employee Stock Purchase Plan

In June 2023, the stockholders approved the AVITA Medical, Inc. Employee Stock Purchase Plan (the “ESPP”). The ESPP became effective on July 1, 2023. On June 30, 2023, the Company filed Registration Statement on Form S-8 to register 1,000,000 shares of common stock under the ESPP, as a result of the Company’s stockholders approving the ESPP at the 2023 Annual Meeting. The ESPP features two six-month offering periods per year, from June 1 to November 30 and December 1 to May 31. The first offering period for the ESPP was July 1 – November 30, 2023. Subsequent offering periods will begin the first trading day of December and June each year. For the year-ended December 31, 2023, 72,319 shares, were issued under the ESPP at a purchase price of \$9.06. Total proceeds received from the purchase of shares under the ESPP were approximately \$655,000. During the year-ended December 31, 2023, the Company recorded \$382,000 in ESPP expense and has unamortized expense remaining of \$327,000 to be recognized over a term of 0.42 years. As of December 31, 2023, the Company had approximately \$122,000 in accrued payroll contributions for future ESPP purchases. As of December 31, 2022, the Company did not have any accrued payroll contributions related to the ESPP.

The Company estimates the fair value of the ESPP using the Black-Scholes option pricing model on the date of grant. The valuation is affected by the Company's share price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, expected term, expected share price, volatility over the expected term and risk-free rate. The risk-free interest rate is based on the U.S. Treasury rate for the expected term at the time of grant, volatility is based on the historical volatility. The expected dividend assumption is based on the Company’s history and expectation of dividend payouts.

Included in the following table is a summary of the related assumptions used in the Black-Scholes Option pricing model for the year-ended December 31, 2023.

	Year-Ended December 31, 2023
Expected volatility	81.98% - 82%
Weighted-average volatility	81.99%
Expected dividends	0%
Expected term (in years)	0.42 - 0.5
Risk-free interest rate	5.19% - 5.31%

16. Income Taxes

Geographic sources of loss before income taxes are as follows:

	Year-Ended	
(amounts in thousands)	December 31, 2023	December 31, 2022
United States	\$ (44,691)	\$ (26,764)
Foreign	9,376	135
Loss before income taxes	\$ (35,315)	\$ (26,629)

The income tax expense as shown in the accompanying Consolidated Statements of Operations includes the following:

	Year-Ended	
(amounts in thousands)	December 31, 2023	December 31, 2022
Current:		
Federal	\$ -	\$ -
State	66	36
Foreign	-	-
Total current	66	36
Deferred:		
Federal	-	-
State	-	-
Foreign	-	-
Total deferred	-	-
Total income tax expense	\$ 66	\$ 36

The provision for income taxes differs from the tax computed using the statutory United States federal income tax rate of 21% for the years-ended December 31, 2023 and 2022 as a result of the following items:

(amounts in thousands)	Year-Ended	
	December 31, 2023	December 31, 2022
Tax benefit at U.S. statutory rate	\$ (7,416)	\$ (5,592)
State income taxes	66	35
Foreign rate differential	375	5
Share-based compensation	774	719
Fair value change in debt and warrants	494	-
Foreign exchange gain/(loss) on intercompany trade balances	(2,354)	-
Gain of transfer of intellectual property	2,804	-
Permanent differences	554	(30)
Change in tax rate	(847)	-
Net change in valuation allowance	5,616	4,899
Income tax expense	<u>\$ 66</u>	<u>\$ 36</u>

A summary of deferred income tax assets is as follows (in thousands):

(amounts in thousands)	Year- Ended	
	December 31, 2023	December 31, 2022
Deferred tax liabilities		
ROU Asset	\$ (618)	\$ (229)
Intangible assets	-	(11)
Property, plant and equipment	(6)	-
Total deferred tax liabilities	<u>\$ (624)</u>	<u>\$ (240)</u>
Deferred tax assets		
Property, plant and equipment	\$ -	\$ 3
Accrued expenses	2,714	1,833
Intangible assets	12	-
Stock based compensation	3,763	3,405
Lease liability	657	247
Research and development	5,357	2,215
Net operating loss carryforward	50,438	48,413
Other	992	630
Total deferred tax assets	<u>\$ 63,933</u>	<u>\$ 56,746</u>
Less valuation allowance	<u>(63,309)</u>	<u>(56,506)</u>
Net deferred tax assets	<u>624</u>	<u>240</u>
Net deferred tax assets / (liabilities)	<u><u>\$ -</u></u>	<u><u>\$ -</u></u>

At December 31, 2023, the Company and its subsidiaries had net operating loss carryforwards for federal, state, United Kingdom, and Australia income tax purposes of \$145.2 million, \$89.5 million, \$29.9 million and \$24.9 million respectively. The net operating loss carryforwards may be subject to limitation regarding their utilization against taxable income in future periods due to “change of ownership” provisions of the Internal Revenue Code and similar state and foreign provisions. Of these carryforwards, \$19.5 million will expire, if not utilized, between 2028 through 2038. The remaining carryforwards have no expiration.

In assessing the recoverability of its deferred tax assets, the Company considers whether it is more likely than not that its deferred assets will be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income in those periods in which temporary differences become deductible and/or net operating losses can be utilized. The Company considers all positive and negative evidence when determining the amount of the net deferred tax assets that are more likely than not to be realized. This evidence includes, but is not limited to, historical earnings, scheduled reversal of taxable temporary differences, tax planning strategies and projected future taxable income. Based upon the weight of available evidence including the uncertainty regarding the Company’s ability to utilize certain net operating losses and tax credits in the future, the Company has established a valuation allowance against its net deferred tax assets of \$63.3 million and \$56.5 million as of December 31, 2023 and 2022, respectively. The deferred tax assets are primarily net operating loss carryforwards for which management has determined it is more likely than not that the deferred tax assets will not be realized.

The Company recognizes the tax benefit from an uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the consolidated financial statements related to a particular tax position are measured based on the largest benefit that has a greater than a 50% likelihood of being realized upon settlement. The amount of unrecognized tax benefits is adjusted as appropriate for changes in facts and circumstances, such as significant amendments to existing tax law, new regulations or interpretations by the taxing authorities, new information obtained during a tax examination, or resolution of an examination.

The Company has not identified any uncertain tax positions as of December 31, 2023 and 2022.

The Company files income tax returns in the U.S. federal, California and certain other state and foreign jurisdictions. The Company remains subject to income tax examinations for its U.S. federal and state income taxes generally for fiscal years ended June 30, 2006 and forward. The Company also remains subject to income tax examinations for international income taxes for fiscal years ended June 30, 2019 through December 31, 2022, and for certain other U.S. state and local income taxes generally for the fiscal years ended June 30, 2019 through December 31, 2022.

17. Loss per Share

The following is a reconciliation of the basic and diluted loss per share computations:

	Year-Ended	
	December 31, 2023	December 31, 2022
(in thousands, except per share amounts)		
Net loss	\$ 35,381	\$ 26,665
Weighted-average common shares—outstanding, basic and diluted	25,331	25,000
Net loss per common share, basic and diluted	\$ 1.40	\$ 1.07

	Year-Ended	
	December 31, 2023	December 31, 2022
Anti-dilutive shares excluded from diluted net loss per common share:		
Stock options	2,690,158	2,235,446
Restricted stock units	235,132	460,518
ESPP	91,152	-
Warrants	409,661	-

The Company's basic net loss per share is calculated by dividing the net loss by the weighted-average number of shares of common stock outstanding for the relevant period. In accordance with ASC 710-10 *Compensation - General*, shares of common stock held by the rabbi trust are excluded from the denominator in the basic and diluted net loss per common share calculations. As of December 31, 2023 and 2022 a total of 99,106 and 17,927, shares of common stock were excluded, respectively. For details on shares of common stock held by the rabbi trust refer to Note 18. For the purposes of the calculation of diluted net loss per share, options to purchase common stock, restricted stock units and unvested shares of common stock issued upon the early exercise of stock options have been excluded from the calculation of diluted net loss per share as their effect is anti-dilutive. Because the Company has reported a net loss for years-ended December 31, 2023 and 2022, diluted net loss per common share is the same as the basic net loss per share for those periods.

18. Retirement Plans

The Company offers a 401(k)-retirement savings plan (the "401(k) Plan") for its employees, including its executive officers, who satisfy certain eligibility requirements. The Internal Revenue Code of 1986, as amended, allows eligible employees to defer a portion of their compensation, within prescribed limits, on a pre-tax basis through contributions to the 401(k) Plan. The Company matches contributions to the 401(k) Plan based on the amount of salary deferral contributions the participant makes to the 401(k) Plan. The Company will match up to 6% of an employee's compensation that the employee contributes to his or her 401(k) Plan account. Total Company matching contributions to the 401(k) Plan were \$1.2 million and \$1.0 million for the years-ended December 31, 2023, and 2022, respectively.

Non-qualified deferred compensation plan

The Company's non-qualified deferred compensation plan (the "NQDC plan"), which became effective on October 2021 allows for eligible management and highly compensated key employees to elect to defer a portion of their salary, bonus, commissions and RSU awards to later years. Cash deferrals are immediately vested and are subject to investment risk and a risk of forfeiture under

certain circumstances. RSU deferrals are subject to the vesting conditions of the award. Once RSUs vest, subject to a six-month and one day holding period, employees are allowed to diversify the common stock into other investment options offered by the plan. For cash deferrals, the Company matches 4% to 6% (depending on level) of employee contributions. These matching employer contributions are vested over a two-year period with 25% vesting on year one and 75% vesting on year two for employees under 55 years of age. Employer contributions for employees over 55 years of age are immediately vested. Employer contributions to the NQDC plan for the years-ended December 31, 2023 and 2022 were \$171,000 and \$258,000, respectively. The Company's deferred compensation plan liability was \$3.8 million and \$1.3 million as of December 31, 2023 and 2022, respectively. These amounts are split between current and long term on the Consolidated Balance Sheets. As of December 31, 2023 and 2022, \$168,000 and \$78,000 is included in Current non-qualified deferred compensation liability and \$3.7 million and \$1.3 million in Non-qualified deferred compensation liability, respectively. During the years-ended December 31, 2023 and 2022, the Company had a payout of approximately \$950,000 in the deferred compensation liability for terminated employees.

The Company established a COLI to fund the NQDC plan. Amounts in the COLI are invested in a number of funds. The securities are carried at the cash surrender value on the Consolidated Balance Sheets. We record investment gains and losses of the COLI as other income. Refer to Note 4, Fair Value Measurements for the fair values of the COLI policies and the NQDC liability.

Rabbi Trust

During April 2022, we established a rabbi trust to hold the assets of the NQDC plan. The rabbi trust holds the COLI asset and the common stock from deferred RSU awards that have vested. The NQDC permits diversification of fully vested shares into other equity securities subject to a six month and one day holding period. In accordance with ASR 268, *Redeemable Preferred Stock*, and ASC 718, prior to vesting, the deferred share awards are classified as an equity instrument and changes in fair value of the amount owed to the participant are not recognized. The redemption amounts of the deferred awards are based on the vested percentage and are recorded outside of permanent equity as Non-qualified deferred compensation share awards on the Consolidated Balance Sheets. As of December 31, 2023 and December 31, 2022, a total of 81,052 and 253,048, shares awards have been deferred, respectively. Vested shares are converted to common stock and are reclassified to permanent equity. Common stock held in the rabbi trust is classified in a manner similar to treasury stock and presented separately on the Consolidated Balance Sheets as Common stock held by the NQDC plan. For the years-ended December 31, 2023 and December 31, 2022 a total of 99,106 and 17,927 shares were vested at the redemption value of \$1.1 million and \$127,000, respectively.

The following table summarizes the eligible share award activity as of December 31, 2023 and December 31, 2022.

(in thousands)	As of	
	December 31, 2023	December 31, 2022
Non-qualified deferred compensation share awards:		
Balance at inception/beginning of period	\$ 557	\$ -
Change in classification of deferred compensation share awards	-	192
Stock-based compensation expense	518	471
Change in redemption value	1,019	21
Vesting of share awards held by NDQC	(1,401)	(127)
Ending Balance	<u>\$ 693</u>	<u>\$ 557</u>

19. Deed of Cross Guarantee

The Company (as the parent entity of the AVITA Group) is party to a deed of cross guarantee dated June 29, 2020 ("**Deed**") with each of its Australian wholly-owned subsidiaries, namely:

- AVITA Medical Pty Ltd (ACN 058 466 523);
- C3 Operations Pty Ltd (ACN 090 161 505);
- Visiomed Group Pty Ltd (ACN 003 010 580); and
- Infamed Pty Limited (ACN 084 800 653),

(together, the "Australian Subsidiaries").

The Company and the Australian Subsidiaries were the only parties to the Deed at December 31, 2023 and comprise the “closed group” for the purposes of the Deed (and also the “extended closed group”). No parties were added to or removed from the Deed, or subject to a notice of disposal, during or since the financial year-ended December 31, 2023. Since December 31, 2023, there has been no change in ownership of any of the Australian Subsidiaries.

By entering into the Deed, the Company and the Australian Subsidiaries have guaranteed the debts of each other.

Relief under ASIC Corporations (Wholly-owned Companies) Instrument 2016/785

By entering into the Deed, the Australian Subsidiaries have been relieved from the requirement to prepare a financial report and directors’ report for the financial year-ended December 31, 2023 under *ASIC Corporations (Wholly-owned Companies) Instrument 2016/785*.

Consolidated financial information of parties to the Deed

The financial statements below are additional disclosure items specifically required by the Australian Securities and Investments Commission and represent the consolidated financial statements of the entities that are party to the Deed only (being the ‘closed group’ and also the ‘extended closed group’ under the Deed).

(in thousands)	Year-Ended December 31, 2023	
Revenues	\$	222
Cost of sales		(263)
Gross profit		(41)
Operating Expenses:		
Sales and marketing expenses		(206)
General and administrative expenses		(79)
Product development expense		(28)
Total operating expenses		(313)
Other income		21,717

Total liabilities		12
Accumulated equity		14
Total stockholders' equity		14
Total liabilities and stockholders' equity	\$	26

20. Subsequent Events

Ventura Lease Extension

On January 1, 2024, the Company executed the second amendment to the Ventura Warehouse to extend the lease for an additional three years until September 30, 2027. The lease was set to expire in September 30, 2024. The average monthly rent payment on the extended lease is approximately \$36,000 per month. The Company will account for the lease extension during the three months ended March 31, 2024.

Stedical Scientific Distributor Agreement

On January 26, 2024, the Company entered into an exclusive multi-year distribution agreement with Stedical Scientific, Inc. ("Stedical") to commercialize PermeaDerm® Biosynthetic Wound Matrix in the United States. PermeaDerm is cleared by the FDA as a transparent matrix for use in the treatment of a variety of wound types until healing is achieved. Under the terms of the agreement, the Company will hold the exclusive rights to market, sell, and distribute PermeaDerm products, including any future enhancements or modifications, within the United States. The initial term is for five years, with the option to renew for an additional five years, contingent upon meeting certain minimum requirements. During February 2024, the Company purchased a total of \$2.5 million in inventory from Stedical Scientific.

OVIK Health was the distributor for Stedical from March 20, 2020 until January 26, 2024. As part of the distribution agreement with Stedical, the Company entered into a separate agreement with OVIK Health. As part of this agreement Stedical and OVIK Health agreed to terminate their previous distribution agreement and all rights thereunder, transfer customer lists to the Company and the purchase by the Company of existing inventory held by OVIK Health for \$1.2 million. As consideration for the covenants, agreements, undertakings and purchase of the inventory the Company paid OVIK Health a total of \$1.75 million. The inventory purchased from OVIK is included in the purchase by Stedical.

BARDA Contract

On February 16, 2024, the Company executed a contract modification with BARDA to extend the period of performance, under the original contract dated September 29, 2015, from December 31, 2023 to September 28, 2025. Under the modified contract, BARDA shall have access to AVITA Medical's RECELL inventory in the event of a national emergency. No additional inventory build will be required. In the case of a national emergency, BARDA shall pay for RECELL devices at a reduced price for the first 1,000 units and retail price for any units over 1,000 requested. BARDA will pay AVITA Medical approximately \$333,000 in maintenance fee over the term of the contract to ensure first right of access.
